## Contents

**Session 1A: Plenary Session**

**State of the Pipeline Industry**
Dr. Tom Iseley, P.E., Science Advisory Board—City of Atlanta

**Evolution in Trenchless Technology for Rehabilitation and Microtunnelling**
Prof. Dr.-Ing. Dietrich Stein, Ruhr-Universitaet Bochum

**Installation of Drains and Sewers**
Prof. Dr.-Ing. Dietrich Stein, Ruhr-Universitaet Bochum

**Pipeline Infrastructure Security**
Jack Fox, Branch Chief—Pipeline Infrastructure Security

**Session 2A: Asset Management**

*Millard (Sandy) Robinson, Jr., P.E, Malcolm Pirnie*

**Implementing a Cost-Effective Buried Infrastructure Asset Inventory**
Christopher Heltzel

**A Decision-Support Methodology for Asset Management**
E. Lalonde and C. Bergeron

**Benchmarking Pipeline Operations and Management**
Myron Olstein

**Asset Management of Waterlines Using Remote Field Technology**
William F. Hartman

**Comprehensive Planning of Water Distribution Pipe Equipment in Seoul Metropolitan City**
Suk Hwan Jang, Tae Yong Choi, Sang Woo Park, Jong Min Oh, and Kyung Doo Oh

**GASB 34 Asset Reporting Using Information Technology: A Case Study of Norfolk, VA Utilities Department’s Approach**
Jason D. Jennings, Dwayne Coston, and David A. Jagt

**Session 2B: Condition Assessment for Water Lines I**

*Terry Moy, CH2M Hill*

**Condition Assessment of 60-Inch Prestressed Concrete Cylinder Pipe (PCCP) in Houston, TX**
Rafael Ortega, Gregory J. Henry, and Robin S. Green
Condition Assessment and Performance of 50-Year Old Lined Cylinder Pipe (LCP) ....82  
Rasko P. Ojdrovic, Mehdi S. Zarghamee, Murray Schroeder,  
and Bradley A. Brooks

Condition Assessment of an 84-Inch Prestressed Concrete Cylinder Pipe (PCCP):  
A Case Study ................................................................................. 93  
Michael Higgins, Kenneth R. Herd, and Michael E. Strully

An Overview of Current and Developing Technologies  
for Pipe Condition Assessment .................................................. 103  
Alison Ratliff

Session 2C: Corrosion I  
Michael J. Szeliaga, P.E., Russell Corrosion Consultants, Inc.

Evaluating Ductile Iron Pipe Corrosion .................................................. 115  
Michael J. Szeliaga and Debra M. Simpson

Ductile Iron Corrosion Factors to Consider and Why ..................................... 130  
William S. Spickelmire

Corrosion Control of Large Diameter Piping Cathodic Protection  
a Proven Method ........................................................................... 146  
Scott Paul and Patrick O’Connor

100% Solids Rigid Polyurethane Coatings Technology and Its Application  
on Pipeline Corrosion Protection .................................................. 156  
Shiwei William Guan

Session 2D: Sewer Lines Renewal I  
Jon Doane, Black & Veatch Corporation

Design Considerations for Improving System Efficiency and Maximization of Service Life ....................................................... 166  
Gary L. Lienberger

Mission Possible: Baltimore’s Wet Weather Program Challenges .......................... 173  
Calvin D. Farr Jr.

Criteria for an Effective Lateral Renewal Project Utilizing Trenchless Technology .............................. 178  
Larry Kiest, Jr. and Shaun M. Flanery

Sanitary Sewer System Rehabilitation—Investigation, Planning, Implementation, and the Theory of Chaos—A Case Study ................................................. 189  
Wayne A. Schutz

Session 2E: Pipeline Security and Safety I  
Dr. Zohreh Movahed, Washington Suburban Sanitary Commission (WSSC)

Lessons Learned from Utility and Infrastructure Vulnerability Assessments .............. 197  
Milton Hunter, Rochelle Chernikoff, Tom Wood, and Mike Malvey
Automated Surveillance for Water Utilities
Myron Shenkiryk
214

Applying Security and Vulnerability Assessments to Large Water Wholesaling Agencies
Patrick T. Huston, Donald R. Kendall, Bruce W. Fischer, Susan Mulligan, and Sandra Carlson
218

Application of Integrated Control Systems for Improved Protection, Security and Reduced Maintenance Costs of Pipelines
Jamal Rostami and H. Besharati
227

Session 3A: Geographic Information Systems
Rick Nelson, P.E., Black & Veatch Corporation

Use of Pipeline for Site Selection of Sediment Deposits by GIS
Tiao J. Chang and Vito A. Cimino
238

Utilizing GIS in Developing Realistic Demand Distributions to Support Modeling in Water Supply Master Planning
Art K. Umble, Melissa Moran, Tarlochan Bhullar, and Michael C. Machlan
248

Building a Pipeline GIS for Integrity Management, High Consequence Area (HICA) Determination, and Incident Planning
Brent A. Jones
261

Role of GIS in Pipeline Industry
Vijay Yelakanti, Mohammad Najafi, and Ahmad Habibian
267

Session 3B: Condition Assessment for Water Lines II
Randy Robertson, Cyntech Corporation

Prestressed Concrete Cylinder Pipeline Evaluation: A Toolbox Approach
Richard A. Lewis and Matt Wheatley
276

Innovative Approach to Make a Condition Assessment Using Hydraulic Models
É. Lalonde and B. Prince
286

Hydrostatic Pressure Testing of Prestressed Concrete Cylinder Pipe with Broken Wires
Mehdi S. Zarghamee
294

Pressure – Leakage Relation in Urban Water Distribution Systems
Reza Ardakanian and Ali Akbar Ghazali
304

Session 3C: Corrosion II
George Ruchti, American Spiral Weld Company

Cathodic Protection for the Surface Water Transmission Program
Rafael Ortega, Gregory Lentz, Christine Kirby, and Arthur Morris
313

Break Reduction/Life Extension Program for Cast and Ductile Iron Water Mains
George A. Gehring Jr., Dale Lindemuth, and Walter T. Young
321
Cathodic Protection Applications for Water System Piping .................................................. 332
James T. Lary

Session 3D: Pipeline Renewal Panel Discussion
Jim Scott, Solution Resource

Pipeline System Renewal Technologies .............................................................................. 341
B. Jay Schrock

Centrifuge Modelling of Soil Load Transfer to Flexible Sewer Liners .............................. 352
John Gumbel, Aleksandar Spasojevic, and Robert Mair

“Fully Deteriorated” Design in Rigid Pipe Rehabilitation with Flexible Liners ............. 363
George McAlpine

Session 3E: Pipeline Security and Safety II
Dr. Henry Liu, P.E., Freight Pipeline Company

Protecting from Third Party Damage ............................................................................... 373
Will Worthington and Brian Mergelas

Economic Impact Analysis to Optimize Investments in Damage Prevention for Pipeline Construction ................................................................................................................. 384
Leonhard E. Bernold

High Resolution Defect Detection for Thermoplastic Butt-Welds in Operating Pipelines by Ultrasonic Time of Flight Diffraction (UT-TOFD) ........................................ 394
Barry Messer, Matthew Yarmuch, and Peter den Boer

Technology for the Tele-Robotic Laying of Large and Small Pipes ............................ 400
Leonhard E. Bernold and Bin Li

Session 4A: Hydraulic Modeling
Dr. Tom Walski, P.E., Haestad Methods

Pressure Transient Control Strategies for Water Pipeline Systems ............................... 408
Kevin T. Laptos, Michael T. Brown, and Jamie R. Shambaugh

The Marriage of Modeling and GIS .................................................................................. 418
Thomas M. Walski

Hazen-Williams Coefficient—The Pipeline “C” Factor ....................................................... 427
Thomas K. Bean, Michael E. Canning, and Larry V. Rott

Simulation for Interactions Between Storm Sewer and Overland Flows ...................... 437
Shiuan-Hung Chen, Ming-Hsi Hsu, and Tzen-Show Chen
Session 4B: Condition Assessment
Frank Donaldson, Patton Rust Harris and Associates

Evaluation, Rehabilitation, and Replacement of the 50-Year-Old
Upper Jones Falls Interceptor ..................................................447
Graeme C. Lake, Craig A. Benson, Gary A. Wyatt, and Wazir Qadri

Shopping for a Sag-Free Sewer: Design of a Deep Sewer Line Replacement
at a Major Regional Shopping Mall ...........................................456
Janice Ruhl, Bruce Pierstorff, and Sam Shaikh

Fuzzy Approach for Pipe Condition Assessment ..................................466
J.M. Yan and K. Vairavamoorthy

Computerized Sewer Pipe Condition Assessment ..................................477
Myung Jin (Andy) Chae, Tom Iseley, and Dulcy M. Abraham

Session 4C: Corrosion III
Jeff Moncrief, CDM

Minimizing Infrastructure Corrosion ................................................494
Scott Paul

Experimental Investigations of the Effect of Selected Admixtures on the Resistance
of Concrete to Sulfuric Acid Attack ...........................................504
E. Hewayde, E.N. Allouche, and G.F. Nakhla

Corrosiveness of Controlled Low Strength Materials versus
that of Encasement Sand .......................................................514
Ahmad Samadi and Richard Herbert

Research on the Corrosion of Sewer System Pipelines from Domestic Wastewater......524
Chen Zhaohui, He Qiang, and Yan Wentao

Session 4D: Sewer Lines Renewal II
John J. Struzziery, P.E., SEA Consultants Inc.

An Opinionated Review of Trenchless Technologies for Pipeline Rehabilitation ..........530
Henry R. (Kelly) Derr

The Road to Rehabilitation of a 42-Inch Diameter Interceptor .........................540
John Trypus, William Darrow, and John Mattingly

Planning, Design, and Implementation of Large Diameter Sewer Rehabilitation ......548
Paul V. Savard, Eleanor Duffy, David K. Pottle, and John E. Murphy

Automated Assessment Technologies for Sanitary Sewer Evaluation .......................560
Sanjiv Gokhale and Makarand Hastak

A New Device for the Control Compaction of Trench Backfills
for Buried Flexible Pipes .....................................................571
Olivier Thépot

Pipe Rehabilitation and Utility Conflicts in Urban Environments .........................581
Aaron K. Nelson, Gary Wyatt, and Wazir Qadri

xiii
Session 4E: Risk Assessment and Management
Ken Kienow, P.E., Kienow Associates, Inc.

Risk Management in Underground Infrastructure Construction
and Rehabilitation ..................................................591
Tom Sangster

Risk Analysis of Prestressed Concrete Cylinder Pipe with Broken Wires...........599
Mehdi S. Zarghamee, Daniel W. Eggers, Rasko Ojdrovic, and Brian Rose

Risks Analysis for Prioritizing Urban Sewer Rehabilitation:
A Decision Support System .......................................610
Youssef George Diab and Denis Morand

Risk Assessment of Gray Cast Iron Pipelines ........................................621
Hidetaka Minagata, Koji Yoshizaki, and Yoshito Hatsuda

Session 5A: Pipeline Design I
Grant Whittle, Ultraliner

72-Inch Parallel Transmission Main Needs to Know for Design and Construction .....629
Frank Eskridge, Mike Sharpness, and Pat Rogers

Project Management – Pipeline Hydraulic Analysis .....................................638
Daniel Seli, Ralph Claytor, and Larry Sivak

Performance of Shallow Cover Method with Geogrid at Large Blasting Test.........648
Satoshi Suenaga, Yoshiyuki Mohri, and Kennichi Matsushima

Three-Dimensional Response of Buried Pipe Under Vehicle Loads ..................658
Munaz A. Noor and Ashutosh S. Dhar

Session 5B: Condition Assessment for Sewer Lines II
Alison Ratliff, HDR Engineering, Inc.

Prioritizing Sanitary Sewer Rehabilitation with Closed Circuit Television (CCTV)
Inspection/Automated Rating/Ranking System .......................................666
Roy D. Holmberg and Kipp Nelson

Sewer Condition Assessment and Rehabilitation: A Fast-Tracked Approach
to a Small Community’s Problem ...........................................678
John Correa, Satish Kamath, and Sylvester Hsu

Remote Field Eddy Current/Transformer Coupling (RFEC/TC) Technology
Advancement Through Great Man Made River Authority (GMRA) Experience ......687
Brian Mergelas, Stat Shatat, Xiangjie Kong, Weihua Mao, and David L. Atherton

Condition Assessment of Sewers for Replacement/Rehabilitation
and the Accompanying Development of a Management System .....................696
Johann W. Wessels
Session 5C: Fiber Optics in Utilities
Dr. Jey K. Jeyapalan, P.E., Consultant

Municipal Optical Fiber Through Existing Sewers, Storm Drains, Drinking Waterlines, and Gas Pipes May Complete the Last Mile
Jey K. Jeyapalan

Third–Party Pipeline Integrity Program/Construction Management
Christopher A. Pioli and Mark P. Smith

Cured-in-Place Pipe (CIPP) Process: Installation of Fiber Optic Cables in Sewers
Gregory K. Anderson

Contractors’ Concept of Optical Fiber in Sewers or Abandoned Pipelines
Michael C. Welch

Session 5D: Water Lines Renewal I
Timothy M. Stinson, P.E., SEA Consultants Inc.

Structural Repair of a 42-Inch (1,067 mm) Steel Water Main
Irene McSweeney Woodfall

No Two Conduits Are Alike: The Challenges and Lessons Learned During the Rehabilitation of the Washington Aqueduct’s Raw Water Conduits
Nathan H.A. Cole and Thomas P. Jacobus

External Corrosion of Water Piping Systems—Causes and Solutions
David H. Kroon and James T. Lary

Rehabilitation Management of Pre-Stressed Concrete Cylinder Pipe Using Remote Field Current/Transformer Coupling (RFEC/TC) and Other Technologies
A. Almugerhiy Abdullah, M. Elaish Reafat, and M. Enawaa Khalifa

Session 6A: NSF Panel Discussion on “Pipeline Interdependencies, Security, and Asset Management”
Dr. Miriam Heller, National Science Foundation

Infrastructure Security, Dependencies, and Asset Management
Miriam Heller

Underground Infrastructure and Interdependencies: WTC Case Study
Tom O’Rourke (Presentation only)

Service Implications of Managing Infrastructure Distribution Systems in Crises
Rae Zimmerman

Water Infrastructure Security: Performance Metrics
Neil S. Grigg

Sewer Asset Management Decisions, Rehabilitation, and Security
Duley M. Abraham
Session 6B: NASSCO/WRC/PAC Pipeline Materials and Deterioration Assessment Program
Robert Carpenter, Underground Construction Magazine

Pipeline Assessment and Certification Program (PACP)
Irvin Gemora
Implementation of the Pipeline Assessment and Certification Program
Rod Thornhill
Evaluation of Collection Systems Using the Aqua Zoom Camera
Stephane Joseph and William Di Tullio
Future Outlook for Pipeline Materials, Methods, and Maintenance
Jey K. Jeyapalan

Session 6C: Operation and Maintenance
Philip M. Hannan, P.E., Black & Veatch Corporation

An Innovative Method for Cleaning Large Bore Sewer
M.A. (Rusty) Nezat, II
Who You Gonna Call? Emergency Response Planning for Sanitary Sewer Overflows in Baltimore, Maryland
Robert Tuttle, Warren Williams, Jay Sakai, and Robert Mohr
Wireless Supervisory Control and Data Acquisition (SCADA) Demonstration—Project History
Hiram Tanner
Case Study of Hydraulic Transients Generated by Microfiltration Processes
R. Scott Foster

Session 6D: Water and Sewer Lines Renewal
Joseph P. Castronovo, P.E., CH2M HILL

So You Thought Water Main Repairs were Straightforward?
Joseph Kavanagh, Warren Williams, and Jaswant Dhupar
Carbon Fiber Reinforced Polymer (FRP) Strengthening of Prestressed Concrete Cylindrical Pipe (PCCP) Aqueducts
Tarek Alkhrdaji and Jay Thomas
84-Inch Aerial Water Main over US 59: Limiting Collateral Damage by a Rupture
Emmanuel De Pau and Charles Troy Anthony
Renewal of Fully Deteriorated Sewers — The Importance of Engineering Due Diligence
Randy Cooper
Session 7A: Pipeline Research
Dr. Ahmad Habibian, P.E., Black & Veatch Corporation

Past, Present, and Future—An Overview of Awwa Research Foundation (AwwaRF) .......................................................... 922
Jian Zhang

Pipeline-Related Infrastructure Reliability Research ................................................................. 931

Pipeline Systems R&D for Critical Infrastructure Protection .......................................................... 931
William E. Kirksey

Overview of Water Environment Research Foundation’s (WERF) Collection System Related Research Activities ........................................................................................................... 939
Amit Pramanik, Linda Blankenship, and Jeff C. Moeller
