Table of Contents

Session DS1: Heterogeneous Database
1. Managing Global Constraints in Multidatabase Systems ............................................. 1
   Arbee L. P. Chen and Chih-Shyang Chang, National Tsing Hua University, R.O.C.
2. Querying and Browsing the Resources in Internet ................................................... 9
   Arbee L. P. Chen, Yi-Hung Wu and Yen-Huan Chen, National Tsing Hua University, R.O.C.
3. On Efficient Execution of Aggregate Functions for Resolving Data Inconsistency in Multidatabases ............................................................. 17
   Yungho Leu, Chunli Yang and Shyueming Tang, National Taiwan Institute of Technology, R.O.C.
4. Using Traders for Loosely Integrated Heterogeneous Database System ...................... 25
   Wanlei Zhou, Philip Hepner and Xidong Wang, Deakin University, Australia

Session DS2: Multimedia Database
1. An Efficient Access Method for Spatial Databases .................................................... 33
   Anthony J. T. Lee, National Taiwan University, R.O.C.
   Chin-Chen Chang and Tian-Fu Lee, National Chung Cheng University, R.O.C.
3. Spatial Reasoning and Similarity Retrieval for Pictorial Databases Indexed by RCOS-Strings with Shape Approximation .............................................. 46
   P. W. Huang, National Chung Hsing University, R.O.C.
4. Multimedia Database Modeling with Z Notations ..................................................... 52
   Timothy K. Shih, Huan-Chao Keh and Chao T. Fang-Tsou, Tamkang University, R.O.C.

Session DS3(A): Object Databases
1. An Efficient Query Processing Algorithm on Object Databases with Multi-valued Attributes .......................................................... 60
   Arbee L. P. Chen and Jou-Hui Lin, National Tsing Hua University, R.O.C.
2. A User Interface for an ODMG-93 Compliant Database ......................................... 68
   Daniel J. Buehrer, Yi-Huang Liu, Ting-Yue Hong and Kai-Liang Hou, National Chung Cheng University, R.O.C.
3. Nested Query Processing Techniques in Object-Oriented Databases ....................... 76
   Jorng-Tzong Horng, Jiunn-Chin Wang, Ji-Tsong Lin and Baw-Jhiune Liu,
National Central University, R.O.C.

4. A Donation-Based Approach to Concurrency Control for Object-Oriented Database Systems ................................................................. 84
Ye-In Chang and Chung-Che Wu, National Sun Yat-Sen University, R.O.C.

5. DOOR = 'Object with Roles' + 'Schema Evolution' ................................................................. 92
E. Lewis Chau, Raymond K. Wong and Frederick H. Lochovsky, Hong Kong University of Science and Technology, Hong Kong

Session DS3(B): Mobile Computing

1. Integrating GSM and Internet for Mobile Computing ................................................................. 100
Chien-Chao Tseng, Kuan-Min Chen Tsan-Pin Wang and Ghing-Yu Lin, National Chiao Tung University, R.O.C.

2. Dynamic Resource Scheduling for GSM Data Services ................................................................. 108
Jeu-Yih Jeng, Chi-Wai Lin and Yi-Bing Lin, National Chiao Tung University, R.O.C.

3. Reducing Call-Setup Time for Location Tracking with Distributed HLR and Pointer Forwarding ................................................................. 113
Chien-Chao Tseng, Kuen-Liang Sue and Yi-She Lai, National Chiao Tung University, R.O.C.

4. Modeling and Analysis of Forwarding and Resetting Strategies for Location Management in Mobile Environments ................................................................. 121
Ing-Ray Chen, Tsong-Min Chen and Chiang Lee, National Cheng Kung University, R.O.C.

5. FlyingCloud: A Mobile Agent Service Network ................................................................. 129
Yao-Nan Lien, Yenlin Yin, Tony Chan, Fuhan Liu, Chi-Yung Chen, Chun-Shyan Hwang, Yuli Hwang, Chun-Ing Lee, Shin-Yi Leu, Chin-Hung Chen and Yang-Farn Liu, National Chengchi University, R.O.C.

Session DS4: Distributed Database

1. A Basic-Cycle Calculation Technique for Efficient Dynamic Data Redistribution ................................................................. 137
Yeh-Ching Chung, Ching-Sheng Sheu and Sheng-Wen Bai, Feng Chia University, R.O.C.

2. Debugging User-Defined Functions in RDBMS Client-Server Environment ................................................................. 145
Gene Fuh, Kevin Nomura, Mike Meier and Hsin Pan, IBM Almaden Research Center, U.S.A.

3. Constraint Maintenance for Replicated Databases ................................................................. 153
Y. H. Chin, Keith K. S. Lee, San-Yih Hwang and Shu-Chin Su Chen, National Tsing Hua University, R.O.C.

4. Buffer Management for Relational Database Systems ................................................................. 161
Jen-Yao Chung, Don Haderle, Jim Teng and Tai-Yi Huang, IBM T.J. Watson Research Center, U.S.A.
Session DS5(A): Join Algorithms
1. A Temporal Join Algorithm Based on Rank Key-to-Address Transformation .................................. 169
   C.Y. Chen, C.C. Chang and R. C. T. Lee, Feng Chia University, R.O.C.
2. A Comparison of Composition and Join Operations ........................................................................... 177
   Yao-Nan Lien, Chian-Yuan Chiou and Gillin Hu, National Chengchi University, R.O.C.
3. Two Dominance Searching Based Temporal Join Algorithms ............................................................. 185
   C.Y. Chen and J.F. Hu, Feng Chia University, R.O.C.
4. Declarative View Updates in Linear Logic Databases ........................................................................... 193
   Dong-Tsan Lee and C.P. Tsang, University of Western Australia, Australia

Session DS5(B): Scheduling and Performance Evaluation
1. On Improving the Schedulability of Real-Time Data-Intensive Applications:
   Preemptibility versus Non-Preemptibility .......................................................................................... 201
   Ming-Chung Liang, Shao-Juen Ho and Tei-Wei Kuo, National Chung Cheng University, R.O.C.
2. Synthesizing Timed Transitions and Timed Places in a Petri Net ......................................................... 209
   Steve J. Yang, Jeffrey J. P. Tsai, Eric Y. T. Juan and Zheng-Hao Lai, National Central University, R.O.C.
3. On Detection of Bounded Global Predicates ........................................................................................ 217
   Loon-Been Chen and I-Chen Wu, National Chiao Tung University, R.O.C.

Session DS6(A): Distributed Applications and Their Supports(I)
1. Efficient Eigenvalue Computation of Symmetric Tridiagonal Matrices on Heterogeneous Workstation Clusters ........................................................................................................... 224
   Shen-Fu Hsiao and Kuo-Chung Chen, National Sun Yat-Sen University, R.O.C.
   Yeh-Ching Chung, Ching-Jung Liao and Chin-Feng Lin, Feng Chia University, R.O.C.
3. Design and Implementation of Message Passing Interface for Clusters of Workstations on Local Area Networks .................................................................................................................. 240
   Jyh-Jong Tsay, Yuan-Zi Chang and Kuo-Shun Ding, National Chung Cheng University, R.O.C.
4. Multi-threaded Design for a Distributed Shared Memory System .......................................................... 248
   Ce-Kuen Shieh, Su-Cheong Mac, An-Chow Lai, Jyh-Chang Ueng and Tyng-Yeu Liang, National Cheng Kung University, R.O.C.
5. Design and Implementation of a Parallel File Subsystem on TreadMarks .............................................. 256
   Su-Cheong Mac, Ce-Kuen Shieh, Bor-Jyh Shieh and Li-Ming Tseng, National Cheng Kung University, R.O.C.
Session DS6(B): Software Metrics

1. Cost-Reliability Optimal Software Release Policy under Penalty Cost Based on the HGDM ................................................................. 264
   Sy-Yen Kuo, Rong-Huei Hou and Yi-Ping Chang,
   National Taiwan University, R.O.C.

2. A Validation of Coupling and Cohesion Metrics for Object-Oriented Programs ............ 271
   Feng-Jian Wang, Bin-Shiang Liang, Shu-Fen Wu and Yen-Sung Lee,
   National Chiao Tung University, R.O.C.

3. A Model of Software Testability Measurement .......................................................... 279
   Jin-Cherng Lin, Szu-Wen Lin and Ian Ho, Tatung Institute of Technology, R.O.C.

4. Evidence-based Software Verification and Validation Technique .................................. 286
   Chin-Feng Fan, Wei-Huang Hung and Swu Yih, Yuan-Ze Institute of Technology, R.O.C.

Session DS7(A): Distributed Applications and Their Supports(II)

1. An Extension of MS Windows to Support the Development of Distributed Object-Oriented Applications ......................................................... 294
   Chih-Ping Chu and Heng-Ching Lin, National Cheng Kung University, R.O.C.

2. Supporting an object-based API for DCE ..................................................................... 302
   Chu-Sing Yang, Shu-Chin Su Chen, C. C. Chen and David Lin,
   National Sun Yat-Sen University, R.O.C.

3. An Efficient Forward Recovery Checkpointing Scheme in Distributed Systems ............ 310
   Kuochen Wang and Chien-Chun Wang, National Chiao Tung University, R.O.C.

4. Experience with Building Reliable RPC Servers Based on a Fault Tolerant RPC Library .......................................................................... 316
   Jyh-Tzong Chiou, Shang-Rong Tsai and Charles Changli Chin,
   National Cheng Kung University, R.O.C.

5. An Optimal Agreement Protocol for Hybrid Fault Model on Communication Links .......... 324
   Yeh-Hao Chin, Wei-Pang Yang and Hin-Sing Siu,
   National Tsing Hua University, R.O.C.

Session DS7(B): Object Oriented Technology

1. High-Level Flow Model for Anomaly Detection in Object-Oriented Programs .............. 331
   Feng-Jian Wang and Jiun-Liang Chen, National Chiao-Tung University, R.O.C.

2. Reusable Component Identification by Code Understanding through Program Transformation in RRRA ................................................................. 339
   Hongji Yang and William C. Chu, Montfort University, England

3. A Unifying Framework for Undoing Code Transformations ........................................ 347
   Chyi-Ren Dow, Mary Lou Soffa and Shi-Kuo Chang, Feng Chia University, R.O.C.

4. OBRAD: An Object-Based Rapid Application Development Method ............................ 355
   Wei T. Huang, Jonathan Lee and Tai Lin Kuei, National Central University,
R.O.C.

5. High-Level Reuse in the Design of an Object-Oriented Real-Time System Framework ................................................................. 363
   Sao-Jie Chen and Win-Bin See, National Taiwan University, R.O.C.

Session DS8: Compiler and Programming Language
1. A Tool for Layered Analysing and Debugging of Distributed Programs ..................... 371
   Wanlei Zhou, Deakin University, Australia
2. Designing a Multiuser Interactive Script Language for CSCW Systems .................... 379
   Jia-Sheng Heh, Wen-Han Lin and Jwu-Hwa Ho, Chung Yuan Christian University, R.O.C.
3. Study and Implementation of Integrated CSCW Support Environment .................... 387
   Yong Tang, Yong Wang and Xianji Li, GuangDong University of Technology,
   China
4. Constructing Flow-Based Editors with a Model-View-Shape Architecture .................. 391
   Feng-Jian Wang and Chung-Hua Hu, National Chiao Tung University, R.O.C.

Session DS9: Groupware Environments and Tools
1. A Specification Language Based on Attribute Grammar for Compiler Construction ......... 398
   Feng-Jian Wang and Ji-Tzay Yang, National Chiao Tung University, R.O.C.
2. SSCC: A Sufficiently Smart Compiler-Compiler .................................................. 406
   Wuu Yang and Yen-Tsan Liu, National Chiao Tung University, R.O.C.
3. Identifying Functionality of Fragments in Concurrent Programs ............................ 414
   Ting-Lu Huang, National Chiao Tung University, R.O.C.
4. A Program Slicing System for Object-Oriented Programs ..................................... 422
   Jien-Tsai Chan and Wuu Yang, National Chiao Tung University, R.O.C.
