</table>
Slanted transmission mode of air-coupled ultrasound: new opportunities in NDT and material characterisation
I.Yu. Solodov, K. Pfleiderer, H. Gerhard, S. Predak & G. Busse

Use of ultrasounds to estimate the composition and textural properties of a meat-based product
S. Simal, A. Femenia, C. Rosselló & J. Benedito

Nondestructive evaluation of multilayered composites using low frequency, oblique incidence acousto-ultrasonics

Acoustic visualization and characterization of thin interface deterioration in adhesively bonded joints: theory and experiment
R.G. Maev

Acoustic emission

Impact damage detection and evaluation in graphite epoxy motorcases (GEM)
R.D. Finlayson, M.A. Luzio, V. Godinez-Azuaga, A. Anastasopoulos & P.T. Cole

Gear defect diagnosis using acoustic emission
T. Toutountzakis & D. Mba

On the characterization of acoustic emission activity generated by continuous fibres breakage
Y.Z. Pappas, A. Kontsos, T. Loutas & V. Kostopoulos

Fracture behaviour and damage mechanisms identification of SiC/Glass ceramic composites using DEN specimens and AE monitoring
T. Loutas, G. Sotiriadis, K. Dassios, I. Kalaitzoglou & V. Kostopoulos

Valve condition monitoring of reciprocating compressors using acoustic emission
S.C. Kerkyras

On-stream monitoring of process plant
P.T. Cole & S.N. Gautrey

Advanced acoustic emission for on-stream inspection of petrochemical vessels
M.F. Carlos, D. Wang, S.J. Vahaviolos & A. Anastasopoulos

Robustness of acoustic emission technique for bearing diagnosis
D. Mba

Infrared methods

Ultrasound Burst Phase Thermography (UBP) – Advances by ultrasound frequency modulation
T. Zweschper, G. Riegert, A. Dillenz & G. Busse

Contrast enhancement of nonlinear photothermal radiometry in composite materials
G. Kalogiannakis & D. Van Hemelrijck

Vibrational methods

Crack identification in beam and plate structures using wavelet analysis
E. Douka, S. Loutridis & A. Trochidis

Vibration damping as an NDE tool for woven carbon fabric laminates
C. Kyriazoglou, R.D. Adams, E.J. Guild & B.H. Le Page
Radiography

Quantitative determination of micro crack density in composites and polymers by X-ray refraction topography
K.-W. Harbich

High energy X-ray imagery on large or dense objects: definition and performance studies of measurement devices by simulation
J.L. Pettier, R. Thierry & D. Eck

Magnetic techniques

Non-destructive method for the measurement of stress in bent pipes
S. Iimura & Y. Sakai

Relaxation times in magneto-thermal NDT
N.J. Siakavellas

Application of the magnetic Barkhausen noise to determination of hardness and residual-stress variations in hardened surface layers
J. Grum & P. Žerovnik

Material characterisation

Stress wave propagation in fresh mortar
D.G. Aggelis & T.P. Philippidis

Low temperature transitions used as a non-destructive indication of durability in fibre-reinforced polymers
R.D. Adams & M.M. Singh

Determining the in-situ tensile properties of pipelines using the automated ball indentation (ABI) technique
A.C. Russell, B.L. Jones & L. Manning

Health monitoring

Non-destructive testing for health monitoring of adaptive structures
K. Pfleiderer & G. Busse

Validation of damage detection techniques for automatic structural health monitoring during fatigue tests
S. Vanlanduit, P. Guillaume & G. Van der Linden

Acoustic emission for periodic inspection of composite wrapped pressure vessels
M.A. Luzio, R.D. Finlayson, V.F. Godinez-Azcua, S.J. Vahaviolos, P.T. Cole & A. Anastasopoulos

NDT of civil engineering structures

Condition assessment of concrete half joint bridges
J.R. Watson, P.T. Cole & A. Anastasopoulos

DIC for damage detection at the surface of a pre-stressed concrete beam under static loading
D. Lecompte & J. Vantomme

A combined experimental–numerical study of tensile behaviour of limestone
K. De Profi, W.P. De Wilde, G.N. Wells & L. Sluys
Non-destructive inspection method for evaluating conditions of reinforced concrete structures after extreme influence

G. Muravin, L. Lezvinsky & B. Muravin

301

Special techniques

Real-time photoelastic stress analysis – a new dynamic photo-elastic method

M. Honlet, G.C. Calvert, J.R. Lesniak & B.R. Boyce

309

Automated fluorescent penetrant inspection (FPI) system is triple A

T.L. Adair, D.H. Wehener & M.G. Kindrew

313

Detection of defect applying conductivity measured by Eddy current

A. Hammouda, M. Zergoug, A. Haddad & A. Benchaala

317

Risk-based investigation of steel reinforcement corrosion using the AeCORR technique

M.J. Ing, S.A. Austin, R. Lyons, P.T. Cole & J. Watson

321

Use of wavelet packet transform for signal analysis in adhesive bond testing

S. Tavrou & C. Jones

327

Surveillance of gas assisted injection moulding process by means of microwaves

C. Sklarczyk

333

Applying pulsed eddy current in detection and characterisation of defect

M. Zergoug, A. Haddad, A. Hammouda & S. Lebaili

337

Special applications

Feasibility of using earth-bounded NDT techniques for the space environment

V. Nikou, P.F. Mendez, K. Masubuchi & T.W. Eagar

345

Non-contact ultrasound imaging for foreign object detection in cheese and poultry

Byoung-Kwan Cho & J. Irudayaraj

351

Non-destructive assessment of manchego cheese texture

J. Benedito, A. Rey, P. García-Pascual, J.A. Cárcel & N. Perez-Muelas

355

Acoustic testing of rectifier transformers

P.T. Cole, J. Iqbal & S.N. Gautrey

359

Education for humanitarian demining

V. Krstelj, J. Stepanić & A. Lypolt
