Contents

Session 1—Monday, October 13th, 8:30 AM

INDUSTRIAL AUTOMATION AND CONTROL
Sensors & Measurements

Session Chair: Don Zinger, Northern Illinois University, USA
Session Organizer: Ganesh Venayagamoorthy, University of Missouri–Rolla, USA

A Wavelet-based Multi-Resolution PID Controller
Shahid Parvez, Zhiqiang Gao, Cleveland State University, USA

Error Analysis and Compensation for Inductosyn-based Position Measuring System
Du Chanyang, Yang Guijie, Harbin Institute of Technology, CHINA

Torque Ripple Minimization in Direct Torque Control of Induction Machines
Malik Elbuluk, University of Akron, USA

Performance Improvement in Image Retrieval Utilizing Image Directory on Gigabit Network for Distributing Industrial Product Information
Xinlei Wang, Ikeda Technologies, Inc., JAPAN, Shizuoka University, JAPAN; Kayo Suzuki, Hiroaki Ikeda, Ikeda Technologies, Inc., JAPAN; Katsuhira Ishimar, Junji Suzuki, Makuhari Gigabit Research Center, JAPAN

An Implementation of a Proposed Modification of CAN Protocol on CAN Fieldbus Controller Component for Supporting a Dynamic Priority Policy
Salem Hasnaoui, Oussama Kallel, Ridha Kbaier, École Nationale d’Ingénieurs de Tunis, TUNISIA; Samir Ben Ahmed, Institut Supérieur d’Informatique de Tunis, TUNISIA

A Carrier-based Discontinuous PWM Modulation for Four-Leg Inverters and Applications
Olorunfemi Ojo, Parag Kshirsagar, Tennessee Technological University, USA

Improving the Dynamic Motion Behavior of a Servo System with Low Mechanical Stiffness
Leonid Gannel, Control & Robotic Solutions, USA; Richard H. Welch Jr., Welch Enterprise, USA

Session 2—Monday, October 13th, 8:30 AM

PRODUCTION AND APPLICATION OF LIGHT
Plasma Display Panels

Session Chair: Lazlo Laskai, Power Electronic Solutions, USA
Session Organizer: Hiroshi Murakami, Dai Nippon Printing Co., Ltd., JAPAN

Historical View and Current Status of Plasma Displays
Heiju Uchiike, Takayoshi Hirakawa, Saga University, JAPAN

Plasma Displays for Digital Broadcasting
Fumio Sato, Taichihiro Kurita, Display and Optical Devices, JAPAN

Fabrication Technologies of Plasma Display Panels
Tsutae Shinoda, Fujitsu Labs. Ltd., JAPAN

Driving Technologies and Picture Quality of PDPs
Hiroshi Murakami, Dai Nippon Printing Co., Ltd., JAPAN

Physics of a PDP Discharge Cell: Improvement of Luminance and Luminous Efficiency
J. P. Boeuf, Th. Callegari, CPAT, Univ. P. Sabatier, FRANCE; J. Ouyang, Beijing Institute of Technology, CHINA
Session 3—Monday, October 13th, 8:30 AM

METALS INDUSTRY

Metals Industry I

Session Chairs: Brian Boulter, AplCS LLC, USA; Juergen Schwahn, Alcan Inc., CANADA
Session Organizer: Brian Boulter, AplCS LLC, USA

Scheduling Requirements for Hot Charge Optimization in an Integrated Steel Plant ................................. 74
Peter Knoop, Luc Van Nerom, A.I, Systems, BELGIUM

Power Quality Solutions for 12-Pulse Smelter Converters in ETÝ Aluminium Works ........................................... 79
M. Ermis, Tubitak Bilten, TURKEY, Middle East Technical University, TURKEY;
A. Acýk, B. Gültekin, A. Terciyanli, I. Çadirci, C. Ermis, Tubitak Bilten, TURKEY;
E. Naýçãy, N. Ýzay, Middle East Technical University TURKEY;
M. Gökmen, H. Kýzyýtr, ETÝ Aluminium Works Inc., TURKEY

Magnetic Contact-less Speed Measurement Sensor for Steel Industries .......................................................... 90
J. M. Lopera, M. J. Prieto, F. F. Linera, University of Oviedo, SPAIN;
G. Vecino, J. A. González; Aceralia-Grupo Arcelor, SPAIN

Increase in Electrical System Reliability and Reduction in Maintenance Cost Through Improved Design Engineering ................................. 97
Usha Vasudev M., Indian Oil Corporation Ltd., INDIA

Stripping of Protective Coatings Ensuring Antiabrasion on Metals Using Energy Gradient ................................. 100
Alok K. Ghosh, Kanai Ch. Paul, Arun Kiran Pal, Nihar Ranjan Chakraborty, Jadavpur University, INDIA

A Methodology for Determining the Frequency Response of Electrodes in Arc Furnaces for Silicon Metal Production ......................... 105
José Faríña, Óscar Fdez.-Pol, Juan J. Rodríguez-Andina, University of Vigo, SPAIN;
Javier Bullón, Ángel Lorenzo, Polígono Industrial de Sabón, SPAIN

Session 4—Monday, October 13th, 8:30 AM

INDUSTRIAL DRIVES

Induction Motor Drives

Session Chairs: Thomas Jahns, University of Wisconsin–Madison, USA; Tomy Sebastian, Delphi Automotive Systems, USA
Session Organizer: Roy Davis, Ballard Power Systems, USA

Speed Identification for Vector Control of Induction Motors With Voltage Decoupling Control Principle ........................................... 111
Xudong Zou, Pengcheng Zhu, Yong Kang, Jian Chen, Huazhong University of Science and Technology, PR CHINA

Speed Estimation for Induction Machines Using Imaginary Power ............................................................................. 117
R. E. Betz, T. Summers, University of Newcastle, AUSTRALIA

Stator and Rotor Resistance Observers for Induction Motor Drive Using Fuzzy Logic and Artificial Neural Networks ..................... 124
Baburaj Karanayil, Muhammed Fazlur Rahman, Colin Grantham, The University of New South Wales, AUSTRALIA

On-line Stator and Rotor Resistance Estimation Scheme for Vector Controlled Induction Motor Drive using Artificial Neural Networks .............................................................. 132
Baburaj Karanayil, Muhammed Fazlur Rahman, Colin Grantham, The University of New South Wales, AUSTRALIA

A New TLS-based MRAS Speed Estimation with Adaptive Integration for High Performance Induction Machine Drives .................. 140
Maurizio Cirrincione, Marcello Pucci, Institute on Intelligent Systems for the Automation, ITALY;
Giansalvo Cirrincione, Gérard-André Capolino, University of Picardie-Jules Verne, FRANCE

Optimal Common-mode Voltage Reduction PWM Technique for Induction Motor Drives with Considering the Dead-Time Effects for Inverter Control ................................................ 152
Yen-Shin Lai, Fu-San Shyu, National Taipei University of Technology, TAIWAN
Session 5—Monday, October 13th, 8:30 AM

INDUSTRIAL POWER CONVERTER
High Power Converters

Session Chair: G. Joos, McGill University, CANADA
Session Organizer: F. Blaabjerg, Aalborg University, DENMARK

Three-Level Topologies for Low Voltage Power Converters in Drives, Traction, and Utility Applications ................................................................. 160
Ralph Teichmann, Teicon, GERMANY;
Steffen Bernet, Berlin University of Technology, GERMANY

Comparison of State-of-the-Art Voltage Source Converter Topologies for Medium Voltage Applications ................................................................. 168
Dietmar Krug, Ing. Steffen Bernet, Sibylle Dieckerhoff, Berlin University of Technology, GERMANY

Investigation of 9-switch Dual-bridge Matrix Converter Operating under Low Output Power Factor ................................................................. 176
Lixiang Wei, Thomas A. Lipo, The University of Wisconsin–Madison, USA

Voltage Balancing Control of Diode-Clamped Multilevel Rectifier/Inverter Systems ................................................................. 182
Fang Z. Peng, Zhiguo Pan, Michigan State University USA;
Keith Corzine, University of Wisconsin–Milwaukee USA;
Victor Stefanovic, Virginia Tech, USA;
Mickey Leuthen, Centrilift/Baker-Hughes USA

Control of a Hybrid Asymmetric Multi-Level Inverter for Competitive Medium-Voltage Industrial Drives ................................................................. 190
Martin Veenstra, Alfred Rufer, Ecole Polytechnique Fédérale de Lausanne, SWITZERLAND

A DC Traction Drive Application of a Regenerative Rectifier using AC/AC Matrix Converter Theory ................................................................. 198
Alexander L. Julian, Giovanna Oriti, Power Engineering Consultants, USA

Overlap Time and Voltage Drop Compensation in an AC/AC Converter ................................................................. 205
Alper Akdag, Luc Meysen, ABB Switzerland Ltd., SWITZERLAND;
Philippe Stefanutti, Nicolas Hugo, ABB Secheron SA, SWITZERLAND

Session 6—Monday, October 13th, 8:30 AM

ELECTRIC MACHINES
Reluctance Machines

Session Chair: Avoko Omekanda, Delphi Research Laboratory, USA
Session Organizer: Babak Fahimi, University of Missouri–Rolla, USA

Comparison of Full Pitch and Concentrated Coil Switched Reluctance Machines ................................................................. 213
Gabriel Gallegos-Lopez, Ronald J. Krefta, Delphi Corp., USA

Investigation of Electromagnetic Force Components in SR Machines: Design and Control Issues ................................................................. 219
C. S. Edrington, D. C. Kaluvagunta, J. Joddar, B. Fahimi, University of Missouri–Rolla, USA

Modeling of Losses in Switched Reluctance Machines ................................................................. 227
Virginie Raulin, Iqbal Husain, The University of Akron, USA;
Art Radun, University of Kentucky, USA

Effects of Material Properties on Switched Reluctance Motor Vibration Determination ................................................................. 235
Zhangjun Tang, Stryker Instruments, USA;
Pragasen Pillay, Chen Li, Cetin Cetinkaya, Clarkson University, USA;
Avoki M. Omekanda, Delphi Research Labs, USA;

Flux Switching Motors for Automotive Applications ................................................................. 242
C. Pollock, H. Pollock, University of Leicester, UK;
R. Barron, R. Sutton, TRW Automotive, USA;
J. Coles, D. Monle, A. Court, TRW Consekt, UK

Torque Ripple Improvement for Synchronous Reluctance Motor using Asymmetric Flux Barrier Arrangement ................................................................. 250
Masayuki Sanada, Kenji Hiramoto, Shigeo Morimoto, Yoji Takeda, Osaka Prefecture University, JAPAN

Optimal Rotor Design for Brushless Doubly Fed Reluctance Machines ................................................................. 256
E. M. Schulz, R. E. Betz, University of Newcastle, AUSTRALIA
Session 7—Monday, October 13th, 2:00 PM

INDUSTRIAL AUTOMATION AND CONTROL

Industrial Controls & Mechatronics

Session Chair: Ganesh Venayagamoorthy, University of Missouri-Rolla, USA
Session Organizer: M. Naier Uddin, Lakehead University, CANADA

A New Vision-Sensorless Anti-Sway Control System for Container Cranes ................................................................. 262
Yong-Seok Kim, Hyundai Motor Co. & Kia Motors Corp., KOREA;
Hidemasa Yoshihara, Naoki Fujioka, Hideshi Kasahara, Yaskawa Siemens Automation & Drives Corp., JAPAN;
Hyungbo Shim, Hanyang University, KOREA;
Seung-Ki Sul, Seoul National University, KOREA

Wenxin Liu, Ganesh K. Venayagamoorthy, Donald C. Wunsch II, University of Missouri-Rolla, USA

Multi-Layer Fuzzy Controller for Control of Power Networks .......................................................... 277
Ahmed Rubaai, Abdul Ofoli, Howard University, USA

Microcontroller-based Fuzzy Logic Active Filter for Selective Harmonic Compensation ................................................. 285
A. Dell’Aquila, A. Lecci, M. Liserre, Politecnico di Bari, ITALY

QFT-based Robust and Precision Motion Control System for a High Speed Direct-Drive XY Table Positioning Mechanism ............ 293
Zuo Z. Liu, Fang L. Luo, Nanyang Technological University, SINGAPORE;
Muhammad H. Rashid, University of West Florida, USA

Performance Evaluation of Antilock Brake Controller for Pneumatic Brake System .................................................. 301
Ki-Chang Lee, Jeong-Woo Jeon, Don-Ha Hwang, Yong-Joo Kim, Korea Electrotechnology Research Institute, KOREA

Two Separate Continually Online Trained Neurocontrollers for a Unified Power Flow Controller ................................... 308
Radha P. Kalyani, Ganesh K. Venayagamoorthy, University of Missouri-Rolla, USA

Session 8—Monday, October 13th, 2:00 PM

PRODUCTION AND APPLICATION OF LIGHT

HID Ballasts

Session Chair: Mark Fellows, Philips Lighting, USA
Session Organizer: Bill Peterson, E&M Power, USA

A Wide Bandwidth, Low Noise Xenon Lamp Ballast...................................................................................................... 316
George Sobierajski, William Peterson, E&M Power, USA

A Novel Low-Frequency Square Wave Electronic Ballast for Low-Wattage HID Lamps ............................................... 321
Jun Zhao, Miao Seng Shen, Min Chen, Zhaoming Qian, Zhejiang University, PR CHINA

Advanced Design of a Low-Cost Electronic Ballast with PFC for HPS Lamps ......................................................... 325
J. Cardesin, A. Calleja, M. Alonso, E. L. Corominas, J. Ribas, M. Rico-Secades, J. Garcia, Universidad de Oviedo, SPAIN

Non-Resonant, Quasi-Square Wave, High-Frequency Inverter for HID Lamps Operation from a DC Bus ......................... 332

Single Stage Electronic Ballast for HID Lamps .......................................................................................... 339
Márcio A. Cô, Márcio Brumatti, Federal Technologic Education Center of Espirito Santo, BRAZIL;
Domingos S. L. Simonetti, José Luiz F. Vieira, Federal University of Espirito Santo, BRAZIL

Session 9—Monday, October 13th, 2:00 PM

METALS INDUSTRY

Metals Industry II

Session Chair: Louis Dreinhoefer, Alcoa Inc., USA; Thomas Dionise, Cutler-Hammer Inc., USA
Session Organizer: Brian Boulter, Apics LLC, USA

Feedforward Control of the Lateral Position of a Moving Web Using System Identification ............................................. 345
Kee-Hyun Shin, Soon-Oh Kwon, Sang-Hoon Kim, Konkuk University, KOREA;
Seung-Ho Song, Chonbuk National University, KOREA
Towards Automatic Real-Time Controller Tuning and Robustness ................................................................. 352
Matthew J. Wade, Michael A. Johnson, University of Strathclyde, UK

A Closed Loop Feedback Method for a Manual Bar Straightener ................................................................. 360
Robert J. Miklosovic, Zhiqiang Gao, Cleveland State University, USA

Session 10—Monday, October 13th, 2:00 PM

ELECTRIC MACHINES
Special Topics

Session Chair: Thomas Jahns, University of Wisconsin–Madison, USA
Session Organizer: Uday Deshpande, Black & Decker, USA

New Core Structure and Manufacturing Method for High Efficiency of Permanent Magnet Motors ........................................... 367
Hiroyuki Akita, Yuji Nakahara, Nobuaki Miyake, Tomoaki Oikawa, Mitsubishi Electric Corporation, JAPAN

Pseudo Constant Power Times Speed Operation in the Field Weakening Region of IPM Synchronous Machines .................................... 373
Z. X. Fu, Visteon Corporation, USA

Analysis and Control of a Piezo-electric Travelling Wave Ultrasonic Motor for Haptic Stick Application ......................................... 380
Frederic Giraud, PBetty Semail, Polytech'Lille, FRANCE;
Jean-Thierry Audren, SAGEM SA Defence and Security, FRANCE

Simple Non-Linear Magnetic Analysis for Permanent Magnet Motors ........................................................................ 387
Yoshiaki Kano, Takashi Kosaka, Nobuyuki Matsui, Nagoya Institute of Technology, JAPAN

Issues in Reducing the Cogging Torque of Mass-Produced Permanent Magnet Brushless DC Motor .................................................. 393
Mohammad S. Islam, Saeed Mir, Tomy Sebastian, Delphi Steering Systems, USA

Simple Non-Linear Magnetic Analysis for Permanent Magnet Motors ........................................................................ 387
Yoshiaki Kano, Takashi Kosaka, Nobuyuki Matsui, Nagoya Institute of Technology, JAPAN

Issues in Reducing the Cogging Torque of Mass-Produced Permanent Magnet Brushless DC Motor .................................................. 393
Mohammad S. Islam, Saeed Mir, Tomy Sebastian, Delphi Steering Systems, USA

Simple Non-Linear Magnetic Analysis for Permanent Magnet Motors ........................................................................ 387
Yoshiaki Kano, Takashi Kosaka, Nobuyuki Matsui, Nagoya Institute of Technology, JAPAN

Simple Non-Linear Magnetic Analysis for Permanent Magnet Motors ........................................................................ 387
Yoshiaki Kano, Takashi Kosaka, Nobuyuki Matsui, Nagoya Institute of Technology, JAPAN

Issues in Reducing the Cogging Torque of Mass-Produced Permanent Magnet Brushless DC Motor .................................................. 393
Mohammad S. Islam, Saeed Mir, Tomy Sebastian, Delphi Steering Systems, USA

Multi-Phase Permanent Magnet Motor Drives ........................................................................................................... 401
Leila Parsa, Hamid A. Toliyat, Texas A&M University, USA

Identification of Machine Parameters of a Synchronous Motor .................................................................................. 409
Khwaja M. Rahman, Silva Hiti, General Motors, USA

Session 11—Monday, October 13th, 2:00 PM

INDUSTRIAL DRIVES
Drives Interface Issues

Session Chairs: Gerard-Andre Capolino, Université de Picardie Jules Verne, FRANCE; Mahesh Swamy, Yaskawa, USA
Session Organizer: Sudip Mazumder, University of Illinois at Chicago, USA

EMI Characterization with Parasitic Modeling for a Permanent Magnet Motor Drive ....................................................... 416
Xudong Huang, Elton Pepa, Jih-Sheng Lai, Virginia Polytechnic Institute and State University, USA;
A. R. Hefner Jr., D. W. Berning, National Institute of Standards and Technology, USA;
Shuang Chen, Thomas W. Nehl, Delphi Research Labs, USA

Common-Mode Voltage Reduction PWM Technique for Wide Speed Range Control
of Induction Motor Drives Fed by Inverter with Diode Front End ............................................................................... 424
Yen-Shin Lai, Hsiang-Kuo Lee, John Chou, National Taipei University of Technology, TAIWAN;
Sheng Chen, Industrial Technology Research Institute, TAIWAN

Accessing the Insulation Characteristics for Stator Windings of Low-Voltage Induction Motors
for Adjustable-Speed Drive Applications ................................................................................................................ 432
Don-Ha Hwang, Ki-Chang Lee, Yong-Joo Kim, Korea Electrotechnology Research Institute, KOREA;
In-Woo Lee, Hysung Company, KOREA;
Tae-Hoon Lim, Dong-Hee Kim, Yeungnam University, KOREA

Voltage Stresses on Stator Windings of Induction Motors Driven by IGBT PWM Inverters ..................................................... 439
Don-Ha Hwang, Ki-Chang Lee, Yong-Joo Kim, Korea Electrotechnology Research Institute, KOREA;
Sung-Woo Bae, Dong-Hee Kim, Chae-Gyun Ro, Yeungnam University, KOREA

A Novel Output Filter Topology to Reduce Motor Overvoltage .................................................................................. 445
Norbert Hanigovszki, Jørn Poulsen, Danfoss Drives A/S, DENMARK;
Frede Blaabjerg, Aalborg University, DENMARK
An Approach to Eliminating High-Frequency Shaft Voltage and Leakage Current from an Inverter-driven Motor

Hirofumi Akagi, Tokyo Institute of Technology, JAPAN

A New Method to Control Common Mode Currents Focusing on Common Mode Current Paths Produced in Motor Drive Systems

Nobuyoshi Mutoh, Masaki Kanesaki, Joji Nakashima, Mitsukatsu Ogata, Tokyo Metropolitan Institute of Technology, JAPAN

Session 12—Monday, October 13th, 2:00 PM

INDUSTRIAL POWER CONVERTER

Industrial Applications of Power Conversion Equipment (Products and Services Session)

Session Chair: J. H. Galloway, J. H. Galloway & Associates, USA
Session Organizer: R. Guenther, NWL, USA

Session 13—Tuesday, October 14th, 8:30 AM

INDUSTRIAL AUTOMATION AND CONTROL

Motion Controls

Session Chair: Marcelo Simoes, Colorado School of Mines, USA
Session Organizer: Ahmed Rubaai, Howard University, USA

Maximum Torque Speed Tracking Control of IPM Synchronous Motor with State Observers and Load Torque Adaptive Estimation

Xie Yue, D. Mahinda Vilathgamuwa, K. J. Tseng, H. M. Wijekoon, Nanyang Technological University, SINGAPORE

Micro-stepping Control of a Two-Phase Linear Stepping Motor with Three-Phase VSI Inverter for High-Speed Applications

Sheng-Ming Yang, Feng-Chieh Lin, Ming-Tsung Chen, Tamkang University, TAIWAN

Sliding Mode Observer for Wide-Speed Sensorless Control of PMSM Drives

Malik Elbuluk, Changsheng Li, The University of Akron, USA

Outer Loop Controller Design of a Switched Reluctance Motor Driven System

Syed A. Hossain, Globe Motors, USA;
Iqbal Husain, The University of Akron, USA

Modeling, Simulation and Test of a Three-level Voltage Source Inverter with Output LC Filter and Direct Torque Control

Alain Sapin, EEF Electrical Power Company, SWITZERLAND;
Peter K. Steimer, ABB Industrie AG, SWITZERLAND;
Jean-Jacques Simond, Swiss Federal Institute of Technology, SWITZERLAND

Simplified Fuzzy Logic Based MTPA Speed Control of IPMSM Drive

Casey Butt, M. A. Hoque, M. A. Rahman, Memorial University of Newfoundland, CANADA

A Sensorless Integrated Doubly-Fed Electric Alternator/Active Filter (IDEA) for Variable Speed Wind Energy System

Mehdi T. Abolhassani, Peyman Niazi, Hamid A. Toliyat, Prasad Enjeti, Texas A&M University, USA

Session 14—Tuesday, October 14th, 8:30 AM

PRODUCTION AND APPLICATION OF LIGHT

LED and Fluorescent

Session Chair: Jo Olsen, Osram Sylvania, USA
Session Organizer: Bill Peterson, E&M Power, USA

Red, Green and Blue LED-based White Light Source: Implementation Challenges and Control Design

Subramaniam Muthu, Advance Transformer Co., USA;
James Gaines, Philips Research, USA

A Fluorescent Lamp Electronic Ballast for Railway Applications Based on Low Cost Microcontroller

A New Control Scheme of Class-E Electronic Ballast with Low Crest Factor

Hyun-Son Chon, Dong-Yun Lee, Dong-Seok Hyun, Hanyang University, KOREA
Using Full Physical Model for Fluorescent Lamps in Ballast Engineering
Georges Zissis, CPAT, David Buso, CPAT, University Toulouse 3, FRANCE

Evaluation of a Low Cost Permanent Emergency Lighting System Based on High Efficiency LEDs

Session 15—Tuesday, October 14th, 8:30 AM

POWER SYSTEMS ENGINEERING
The IEEE Color Books in the 21st Century (Panel Discussion)
Session Chair: Mark Halpin, Auburn University, USA
Session Organizer: Matt Dozier, iDesign Systems, Inc., USA

Session 16—Tuesday, October 14th, 8:30 AM

ELECTRIC MACHINES
Generators

Session Chair: Farid Meibody-Tabar, INP-ENSEM, FRANCE
Session Organizer: Zed (Zhangjun) Tang, Stryker Instruments, USA

Thermal Analysis of a High-Speed Generator
O. Aglén, KTH The Royal Institute of Technology, SWEDEN;
Å. Andersson, ABB Automation Technologies, SWEDEN

Cogging Torque Minimization Technique for Multiple-Rotor, Axial-Flux, Surface-Mounted-PMMotors:
Alternating Magnet Pole-Arcs in Facing Rotors
Metin Aydin, Thomas A. Lipo, University of Wisconsin–Madison, USA;
Ronghai Qu, GE Global Research Center, USA

Modeling and Control of a Variable-Speed Constant-Frequency Synchronous Generator with Brushless Exciter
Chunting Mi, Mariano Filippa, John Shen, Narashim Natarajan, University of Michigan–Dearborn, USA

Inverter Supplied Voltage Control System for an Isolated Induction Generator Driven by a Wind Turbine
D. Seyoum, M. F. Rahman, C. Grantham, The University of New South Wales, AUSTRALIA

Compact Permanent-Magnet Generator for Hybrid Vehicle Applications
F. Crescimbini, A. Di Napoli, L. Solero, University “Roma Tre”, ITALY;
F. Caricchi, University of Rome “La Sapienza”, ITALY

Application of Bi-State Magnetic Material to Automotive Offset-Coupled IPM Starter/Alternator Machine
Ayman M. El-Refaie, Thomas M. Jahns, University of Wisconsin–Madison, USA

Session 17—Tuesday, October 14th, 8:30 AM

INDUSTRIAL DRIVES
PM Motor Drives

Session Chairs: Michael Giesselmann, Texas Tech University, USA;
Farid Meibody-Tabar, National Center of Scientific Research, Nancy, FRANCE
Session Organizer: Fabio Capponi, University of Rome, ITALY

Analysis of Permanent Magnet Machine for Sensorless Control based on High Frequency Signal Injection
Ji-Hoon Jang, Seung-Ki Sul, Seoul National University, KOREA;
Jung-Ik Ha, Samsung Electronics Corporation, KOREA;
Motomichi Ohto, Kozo Ide, Yaskawa Electric Corporation, JAPAN

Adaptive Observer for Speed Sensorless PM Motor Control
H. Rasmussen, Aalborg University, DENMARK;
P. Vadstrup, H. Bästing, Grundfos A/S, DENMARK

A Control Strategy for Optimum Efficiency Operation of High Performance Interior Permanent Magnet Motor Drives
Olorunfemi Ojo, Femi Osaloni, Zhiqiao Wu, Tennessee Technological University, USA;
Mike Omoigui, Obafemi Awolowo University, NIGERIA
An Error Analysis of the Sensorless Position Estimation for BLDC Motors

Tae-Hyung Kim, Samsung Electronics Co., Ltd., S. KOREA; Mehrdad Ehsani, Texas A&M University, USA

BLDC Motor Full Speed Range Operation Including the Flux-Weakening Region

Lei Hao, Texas A&M University, USA; Hamid A. Toliyat, Texas A&M University, USA

A Direct Torque Controlled Interior Permanent Magnet Synchronous Machine Drive with Compensation of the Forward Voltage Drops of the Power Switches

Lixin Tang, Muhammed F. Rahman, The University of New South Wales, AUSTRALIA

A Direct Torque Controlled Interior Permanent Magnet Synchronous Machine Drive with a New Stator Resistance Estimator

Lixin Tang, Muhammed F. Rahman, The University of New South Wales, AUSTRALIA

Session 18—Tuesday, October 14th, 8:30 AM

INDUSTRIAL POWER CONVERTER

Pulse Width Modulation Techniques

Session Chair: G. Holmes, Monash University, AUSTRALIA
Session Organizer: L. Solero, University "Roma Tre", ITALY

A New Approach to Solving the Harmonic Elimination Equations for a Multilevel Converter

John N. Chiasson, Leon M. Tolbert, Keith J. McKenzie, Zhong Du, The University of Tennessee, USA

Space Vector PWM Techniques for Dual Three-Phase AC Machine: Analysis, Performance Evaluation, and DSP Implementation

D. Hadiouche, L. Baghil, A. Rezzoug, Université H. Poincaré, FRANCE

Overmodulation Strategy for a Three-Phase Four-Leg Voltage Source Converter

Jang-Hwan Kim, Seung-Ki Sul, Seoul National University, KOREA

A New Multilevel Carrier-based PWM Control Method for GTO Inverter in Low Index Modulation Region

Lazhar Ben-Brahim, Qatar University, QATAR; Susumu Tadakuma, Chiba Institute of Technology, JAPAN

Extending the Operating Range of the Neuro-Computing Vector Classification Space Vector Modulation Algorithm of Three-Level Inverters into Overmodulation Region

M. Saeedifard, A. R. Bakhshai, Isfahan University of Technology, IRAN; G. Joot, McGill University, CANADA; P. Jain, Queen’s University, CANADA

Delta-Sigma Modulation Applications in Neutral-Point Clamped Inverters

Shaoan Dai, Annette von Jouanne, Alan Wallace, Gabor C. Temes, Oregon State University, USA

Radial State Space Vector Modulation—A New Space Vector Technique for Reducing DC Link Capacitor Harmonic Currents in Three Level Converters

Ashish Bendre, DRS Power and Control Technologies, USA; Giri Venkataramanan, University of Wisconsin–Madison, USA

Session 19—Tuesday, October 14th, 8:30 AM

POWER ELECTRONIC DEVICES AND COMPONENTS

Special Session on Power Module Technology (Products and Services Session)

Session Chair: Richard A. Lukaszewski, Rockwell Automation, USA
Session Organizer: W. G. Odendaal, Virginia Polytechnic Institute, USA

AUTHOR INDEX
