

1st INTERNATIONAL CONFERENCE

"THE" Coatings

in Manufacturing Engineering

PROCEEDINGS

EDITORS: K.-D. BOUZAKIS, H.-K. TOENSHOFF, M. GEIGER

CONTENTS

PVD-coated tools for metal cutting applications <i>H. K. Tönshoff, A. Mohlfeld, C. Spengler, C. Podolsky</i>	1
Laser assisted manufacturing of tribologically optimized surface topographies <i>M. Geiger, W. Becker</i>	21
Failure mechanisms of thin hard PVD coatings in cutting applications <i>K.-D. Bouzakis, N. Vidakis, N. Michailidis</i>	35

COATINGS IN MANUFACTURING PROCESSES

Wear phenomena on diamond coated carbide tools <i>E. Uhlmann, U. Lachmund, M. Brücher</i>	67
Wear mechanisms of PVD coated tools in turning <i>K.-D. Bouzakis, N. Michailidis, N. Vidakis, K. Efstathiou, S. Kompogiannis, S. Sklavounos</i>	77
TiCN coated cutting tools for machining application <i>A. Barsky, A. Layous, Y. Landau, R. Porat</i>	91
Deposition and diamond turning of hard coatings for optical applications <i>E. Brinksmeier, R. Malz, W. Preuß, J. Kohlscheen, P. Mayr, H.-R. Stock</i>	97

Fatigue failure mechanisms of multi-and monolayer physically vapour deposited coatings in interrupted cutting processes of medium cutting speed	
<i>K.-D. Bouzakis, N. Vidakis, N. Michailidis, T. Leyendecker, G. Erkens, R. Wenke, H.-G. Fuss</i>	105
PVD coatings oxidation mechanisms at high speed milling	
<i>K.-D. Bouzakis, N. Vidakis, N. Michailidis, K. Efstathiou, S. Sklavounos, T. Leyendecker, G. Erkens, H.-G. Fuss</i>	117
Soft gear cutting with coated HSS tools - operating conditions, technical data and performance potentials	
<i>F. Klocke, B. Kempa, M. Kleinjans</i>	127
Lifetime prediction of PVD coated HSS tools in gear hobbing	
<i>K.-D. Bouzakis, S. Kombogiannis, A. Antoniadis, N. Vidakis, J. Anastopoulos</i>	139
Influence of coatings on hob milling tool life	
<i>B. Sovilj, V. Todić, M. Milošević, I. Sovilj-Nikić, G. I. Sekulić</i>	159
Fatigue expectations of PVD coated HSS tools in gear hobbing	
<i>K.-D. Bouzakis, N. Vidakis, S. Kompogiannis</i>	167
Functional protective coatings for improved tool life in cold forging	
<i>U. Engel, Ch. Hinsel, M. Geiger</i>	181
Improvement of cutting performance of PVD coated cemented carbide inserts in chipboard milling considering the chip formation	
<i>K.-D. Bouzakis, G. Koutoupas, A. Siganos, P. Nikolakakis</i>	191

COATING MECHANICAL PROPERTIES CHARACTERIZATION

Determination of residual stresses in hard coatings by buckling of a plate <i>U. Uhlmann, K. Klein, H. Schoop</i>	103
Prediction of the fatigue performance of coated systems through an advanced impact tester and the software supported evaluation of the experimental data <i>K.-D. Bouzakis, K. David, N. Vidakis</i>	213
Study of thermal stresses in diamond and other advanced ceramics coating systems <i>A. Mimaroglu, U. Kocabiçak, I. Taymaz, I. Calli, M. Gur</i>	223
Experimental study of the failure processes within some metallic and ceramic coatings <i>M. Bucşă, I. Crudu, C. Gheorghies</i>	229
Determination of the mechanical properties and fatigue resistance of multilayer PVD coatings on various substrates <i>K.-D. Bouzakis, N. Vidakis, K. David, A. Siganos, T. Leyendecker, G. Erkens, R. Wenke</i>	237
Mechanical behaviour of amorphous silicon-containing diamond-like carbon (Si-DLC) coatings on steel in the as-deposited and annealed conditions <i>T. Z. Kattamis, A. Nakhla, S. Skolianos, C. G. Fountzoulas</i>	249
Coatings and surface treatments for sheet forming of aluminium alloys <i>A. Igartua, J. Garcia, N. Heras</i>	261
Determination of mechanical properties of thick coatings produced by the plasma spray method <i>K.-D. Bouzakis, A. Lontos, N. Vidakis, K. David, V. Kechagias</i>	269
Preliminary prediction of surface finishing of crust produced by arc spray on PVA <i>C. C. Lau, M. Hua, I. Hui</i>	283

Deposition and characterisation of single and multilayer hard coatings prepared by hollow cathode discharge system	
<i>M. Balaceanu, E. Grigore, A. Manea, I. Tudor, A. Popescu</i>	293
Sem, eds and waxd characterisation of a new enamel used as protective and thermal barrier coatings in aircraft engines	
<i>C. Dumitrescu, I. Pencea, D. Bunea, V. Manoliu, F. Vasiliu, F. Barca, R. Paunescu</i>	303
Modelling of the electrodeposition process for the ceramic thin films	
<i>C. Gheorghies, L. V. Gheorghies, N. Velican, M. Bucsa</i>	313

COATING MATERIAL PROPERTIES

Novel thin film coatings produced by pulsed laser deposition	
<i>I. Zergioti, G. N. Haidemenopoulos, C. Fotakis</i>	323
Generation of ceramic coatings by laser pyrolysis of organo-metallic polymers	
<i>M. Geiger, G. Ziegler, H. - J. Krauß, G. Motz, U. Engel</i>	333
Precision laser cladding and dispersing process using pastebound materials	
<i>H. Becker, M. Goede, F. Von Alvensleben, H. Haferkamp</i>	343
Aes depth profiling of Ti-Al-N multilayer coatings with gradient interlayers	
<i>J. Kourtev, R. Pascova, B. Schröter</i>	351
Experimental investigation of TiC deposition by LCVD	
<i>C. A. Kolonis, C. S. Moraitis, G. N. Haidemenopoulos</i>	359
Structural properties of TiN coatings produced by various pretreatment of construction steel	
<i>M. Zlatanović, R. Beloševac, A. Kunosić, U. Kaščak</i>	369

Super hard coating systems for innovative cutting applications	
<i>G. Erkens, R. Wenke, S. Rambadt, H.-G. Fuß, M. Alunovic, M. Feldhege, K.-D. Bouzakis</i>	377
Thermochemical treatments for protection of steels in chemically aggressive atmospheres at high temperatures	
<i>D. Tsipas, G. Triantafyllidis, J. Kipkemoi, Y. Flitris</i>	385
Deposition of Al₂O₃ and (Al, Cr)₂O₃ coatings by bipolar pulsed magnetron sputtering	
<i>R. Cremer, M. Witthaut, D. Neuschütz, G. Erkens</i>	399
Effect of substrate temperature on the properties of Ni coating produced by plasma assisted deposition	
<i>H. Akbulut, C. Bindal</i>	409
Modifying Cr-Al coatings by rear earth additions. Experimental and theoretical considerations	
<i>G. Angelopoulos, N. Voudouris, J. Kipkemoi, N. Marangoudakis, D. Tsipas</i>	417
Influence of nitrided layer's quantitative parameters on wear resistance of tool steels	
<i>V. Toshkov, A. Zumbilev, G. Michev, N. Tonchev</i>	433
Improved PVD process technique and coating properties by High Ion Sputtering (H.I.S)	
<i>G. Erkens, R. Wenke, H.-G. Fuss, I. Rass, M. Feldhege, R. Cremer</i>	441
Laser carbon surface alloying of a 15CrNi6 Low-Alloy Steel	
<i>A. Katsamas, G. Haidemenopoulos</i>	445
Researches concerning the change of superficial properties of aluminum - graphite composites by electron - beam remelting	
<i>I. Tonoiu, V. Geantă, R. Stonescu, R. Ștefănoiu, F.-D. Dănilă</i>	455
The characterization of borided 99.5% purity nickel	
<i>I. Özbek, H. Akbulut, C. Bindal, A. H. Ucisik</i>	461

The study of the selective transfer in steel - Bronze friction couple by ion beam based techniques	
<i>F. Ilie, C. I. Muntele, D. Pantelica, L. Popa Simil, P. M. Racolta, A. Tudor</i>	469
The dependence of usable quality of foundry coatings on the technological treatment of the applied rheological additive	
<i>Z. Josipovic, S. Markovic</i>	481
<hr/> COATED MACHINE ELEMENTS <hr/>	
PVD coatings for improved gear performance	
<i>M. Weck, O. Hurasky-Schönwerth</i>	491
Enhancement of machine tool spindle performance through hybrid bearings with low temperature PVD coated rings	
<i>K. D. Bouzakis, N. Vidakis, S. Mitsi, A. Lontos</i>	503
The influence of the substrate roughness on the stress distribution in PVD coated hybrid bearings	
<i>K.-D. Bouzakis, A. Michailidis, N. Vidakis, V. Bakolas, A. Siganos, A. Lontos, N. Drivakos</i>	521
PVD-coatings on high-speed ball bearings	
<i>M. Weck, A. Schumacher, U. Tüllmann, G. Erkens</i>	531
Hard ceramic coatings and their applications in industry	
<i>O. Baybars, E. Müzeyyen</i>	541
The rolling contact fatigue performance of PVD coated systems using linear and point contact test rings	
<i>K. D. Bouzakis, N. Vidakis, A. Lontos</i>	547

COATINGS TRIBOLOGY

Optimisation of a new type of DLC coating based on its tribological behaviour	559
<i>S. Economou, D. Grimanelis, M. Vardavoulis</i>	
Selection of coatings and lubricants to be applied in high speed spindle bearings	569
<i>A. Igartua, J. Barriga, G. Mendoza, J. Laucirica</i>	
Friction power intensity and energy pulse in contact zone between thin coatings and austempered ductile iron	577
<i>B. Ivkovic, D. Jesic</i>	
Common measurements and possible measurement errors in dry sliding - experimental and theoretical considerations	583
<i>G. Stoica, M. Terheci</i>	
Wear-resistant vanadium-Boride coating on steels	589
<i>N. M. Gidikova, M. Simeonova, E. G. Assenova</i>	
Impact of surface engineering on energy efficient technologies	593
<i>M. Babic, Z. Fatima</i>	
Metallographic and tribological characteristics of the cutting tools nitrided layers	603
<i>B. Nedić, M. Radovanović, R. Ječmenica, R. Ćirić</i>	

SURFACE MODIFICATIONS AND MISCELLANEOUS

Ferrous alloys superficially immunised to corrosive action of marine atmosphere	609
<i>J. Mărginean, M. Târcolea, C. Predescu, I. Ismet, C. Coca</i>	
Wear resistance casts obtained with surface treatments	615
<i>J. Chira, I. Chiculita, G. Dimitru, C. Paradovschi</i>	

Increase of life cycle due to application of welding as a surface coating method	
<i>M. Babic, S. Mitrovic, F. Zivic</i>	623
Computer simulation of steel carburizing	
<i>M. Târcolea, I. Mărginean, C. Predescu, C. Coca</i>	631
The prognosis of quantities of uncoated and coated cutting tools for processing of a definite series on the reliability base	
<i>M. Sc. P. Dasic</i>	639
Friction energy partition in the cutting process	
<i>A. Tudor, C. Tache</i>	647
Determining the machinability of composites	
<i>S. Velicu, I. Marginean, I. Stanciu, D. Boboc, C. Tita</i>	657
Centro des in the process of kinematic description of the tools for polygonal holes production	
<i>M. Zlokolica, M. Cavic, M. Kostic</i>	663
