XXX IAHR CONGRESS
AUGUST 2003, AUTH, THESSALONIKI, GREECE

THEME D
HYDROINFORMATICS AND ADVANCED DATA TECHNOLOGY IN ENGINEERING PRACTICE

Also includes papers from the AGORA on "Hydraulic Instrumentation"

SERIES EDITORS
Ganoulis J. (AUTH, Greece)
Prinos P. (AUTH, Greece)

THEME EDITORS
Korfiatis G. (Stevens Institute of Technology, USA)
Christodoulou G. (NTUA, Greece)
## CONTENTS

### Keynote Paper

**Adaptive Control of Flow and Mass Transport by Multi-Sensors Arrays**  
KATOPODIS N., USA .................................................. 1

### Hydrologic Parameters and Forecasting

**A Critical Review of Calibration**  
KHALIBI R., JACKSON D., PENDER G., WHITLOW C., WERNER M.,  
HARRISON T., UK .................................................. 15

**Deriving Effective and Efficient Data Set with Subtractive Clustering Method and Genetic Algorithm**  
LIONG S.Y., DOAN C.D., KARUNASINGHA D.S.K., ONG C.H., SINGAPORE .................................................. 23

**Turtle - Web-Based Information System: Data Monitoring, Analysis and Reporting for Field Measurements**  
MOLKENTHINF., APPT J., STUMPP S., GERMANY .................................................. 31

**Rainfall-Runoff Process in Mountainous Catchment with Artificial Neural Network**  
PANAGOULIA D., MARATOS N., GREECE .................................................. 39

**Wavelets for Synthesis of Mean Daily Flows from Monthly Values**  
AGUIRRE J., VARGAS X., CHILE .................................................. 47

**Genetic Algorithms in Assimilating Agro-Hydrological Model Parameters**  
INES A.V.M., GUPTA A.D., DROOGERS P., HONDA K., THAILAND/NETHERLANDS ....... 55

### Hydraulic Parameter Estimation - Remote Sensing

**An Object-Oriented Approach to Modelling Real Time Control**  
MURRAY M.G., KUTIJA V., UK .................................................. 63

**Spatial-Temporal Estimation of Land Surface Cover and Temperature Derived from the Advanced Very High Resolution Radiometer (AVHRR)**  
PAPANASTASOPOULOS D., PETROPOULOS G., UK .................................................. 71

**Estimation of Land Surface Moisture Contents in River Catchments Using Satellite Based Remote Sensing Data**  
PAPANASTASOPOULOS D., DURUCAN S., UK .................................................. 79

**Modeling Soil Water Retention Curve Using ANN**  
JAIN S.K., SINGH V.P., USA .................................................. 89
Hydrologic Modeling- Predictions

Semi-Implicit Advection Diffusion Particle Distribution Model
FERREIRA J.S., COSTA M., PORTUGAL ......................................................... 99

Construction of Time Series with Prescribed Statistical Properties for Applications in Hydraulic Engineering
VAN DEN BOOGAARD H.F.P., UITTENBOGAARD R.E., MYNNETT A.E., NETHERLANDS ................................................................. 107

Methodology for Calibration and Sensitivity Analysis with Application to Cannonsville Watershed Model
SHOEMAKER Ch.B., BENAMAN J., USA ...................................................... 115

Mixture of Models: A New Framework for Modelling Complex Nonlinear Dynamical Systems
VELICKOV S., NETHERLANDS ................................................................. 123

Prediction of Nonlinear Dynamical Systems Based on Time Series Analysis: Issues of Entropy, Complexity, and Predictability
VELICKOV S., PRICE R.K., SOLOMATINE D.P., NETHERLANDS ................ 131

Spatially Integrated Modeling Approach Using Morgan, Morgan & Finney Method for Predicting Sediment Yield
SINNAKAUNDAN S.K., RAINIS R., ISMAIL W.R., MALAYSIA .................... 141

Stream-Marine Hydrology

The Validation of Models
TROI S., STRAFACE S., ITALY ................................................................. 149

CAESAR Evaluation of Scour and Stream Stability
CHEN H.L., RAO A.R., LYN D.A., TAIWAN/USA .................................... 159

Combined Hydrodynamic/Neural Network Modeling of River Flow
WRIGHT N., DASTORANI M., UK ............................................................. 167

Best-Fit Distributions of Daily Flow Duration Curves
CIGIZOGLU H.K., TURKEY ................................................................. 175

Short-Term Rainfall-Runoff Prediction with Weather Radar and Monte Carlo Simulation
SMITH P.J., KOJIRI T., JAPAN ............................................................... 183

Morphological Impact of Floodplain Lowering Along a Low-Land River: A Probabilistic Approach
VAN VUREN S., VAN BREEN L.E., NETHERLANDS ................................ 191

Hydrodynamic and Geomorphologic Mechanisms in the Hydrological Response of a Watershed
CALLE G.R., VARAS E.A., CHILE ......................................................... 201
Maritime Hydraulics

Neural Networks in Reconstructing Missing Wave Data in Sedimentation Modelling
BHATTACHARYA B., SHRESTHA D.L., SOLOMATINE D.P., NETHERLANDS/NEPAL........... 209

Data Assimilation in Numerical Ocean Models over the Coastal Waters of Korea
KIM J.K., LEE M.O., KOREA.................................................................................. 217

Generation of Regular Meshes for Numerical Wave Modeling
MAI S., BERKHAHN V., GERMANY........................................................................ 223

Uncertainty Assessment in Basis Function Models with Application to Tidal Analysis
VAN DEN BOOGAARD H.F.P., GERRITSEN H., MYNNETT A.E., NETHERLANDS....... 231

Tidal Model Validation of the Seas of South East Asia Using Altimeter Data and Adjoint Modelling
GERRITSEN H., SCHRAMA E.J.O., VAN DEN BOOGAARD H.F.P., NETHERLANDS...... 239

Prediction of Vertical Thermal Structure from Sea Surface Temperature Using Genetic Programming
BABOVIC V., ZHANG H., DENMARK/SINGAPORE.................................................. 247

Application of MEP Method to the Study of Wave Climate Statistical Characteristics
XU F., XUE H., CHINA...................................................................................... 255

Hydroinformatics

Coupling of Hydroinformatic Methods and Techniques for the Simulation of Gas-Water Flow Processes in the Subsurface
BREITING Th., HINKELMANN R., SHETA H., HELMIG R., GERMANY.................... 263

HYDROMML: Conceptual Development of a Hydrologic Markup Language
PIASECKI M., BERMUDEZ L., USA....................................................................... 271

The Contribution of Hydroinformatics to Restoring Professional Spaces in the Water Sector
ABBOT M.B., HUANG Y., BELGIUM/NETHERLANDS........................................... 279

Hydroinformatics System in Multi-Knowledge Environments
ABBOT M.B., BELGIUM.................................................................................... 285

The Mass-Customisation of Advice-Serving Systems in the Water Sector
AHN L.H., ABBOT M.B., NETHERLANDS............................................................ 291

Who is to Decide in the Water Sector?
THEIN K.N.N., ABBOT M.B., GERMANY/BELGIUM........................................... 297
River Hydraulics

Forecasting Flows on the River Meuse
ABEBE A.J., PRICE R.K., DILLINGH D., VERLAAN M., NETHERLANDS

Daily River Flow Estimation by Multi Layer Perceptrons
CIGIZOGLU H.K., TURKEY

Velocity Prediction in channels with vegetated floodplains using genetic programming
HARRIS, E., BABOVIC, V., FALCONER, R. UK/DENMARK

Application of Artificial Neural Network and Genetic Algorithm in River Flood Forecast
YUAN X., LI H., CHINA

A Numerical Simulation of Flow Pattern and Bed Variation on Widening Steep Slope Channels
KUSAKABE S., MICHUE M., HINOKIDANI O., FUJITA M., JAPAN

Use of Mathematical Model as a Tool for Improvement of Drainage Congestion of a River System: Case Study Mrigi River Drainage Improvement Project in Bangladesh
WAHIDUZZAMAN W., BANGLADESH

Hydraulic Structures

Prediction of Side Sluice Gate Discharge under Free Flow Using ANN
GHODSIAN M., ZAKERMOSHFEGH M., IRAN

Experimental Investigation of Free Rectangular Falling Jets
KAVIANPOUR M.R., ALIAKBAR M., IRAN

Bridge Pier Scour Risk Evaluation Using Third-Order Polynomial Normal Transform
CHEN X., TUNG Y.K., CHINA

Research on Probabilistic Design Method on Flood Defenses
WU X., DING L., SUN D., CHINA

An Integrated Algorithm for Real Time Identification of Water Pipe Networks
BREYIANNIS S., VAROUTIS S., VALOUKEORGIS D., PAPADIMITRIOU C., GREECE

Piping Network Design under the Condition of Subdefinite and Incomplete Data
TARASEVICH V.V., NARINJANI A.S., ZAGORULKO Y.A., RUSSIA
Field and Laboratory Measurements

The Use of Helicopter-Mounted Radar to Measure River Discharge
MELCHER N., COSTA J.E., HAENI F.P., CHENG R.T., BUURSINK M., SPICER K.R.,
HAYES E., PLANT W.J., KELLER W.C., HAYES K., USA

Velocity Measurements Around Non-Submerged and Submerged Spur Dykes by
Means of Large-Scale Particle Image Velocimetry
FUJITA I., MUTO Y., SHIMAZU Y., TSUBAKI R., AYA A., JAPAN

The New Simultaneous Measurement Equipment for Abiotic Data Collection
MADER H., MAYR P., FABIAN K., KATSCHNIG W., WAGNER M., AUSTRIA

High Resolution Monitoring of Sediment Dynamics
MUELLER V., EDEN H., GERMANY

Smart Electromagnetic Current Flow Meter
PRODANOVIC D., PAVLOVIC D., YUGOSLAVIA

Using CTA and LDA Techniques in Unsteady Pipe Flow Investigations
LIIV U., ESTONIA

Experiences from Models and Prototypes

Hydraulic Modeling - Mapping of River Bed
GEISLER Th., BREITENSTEIN S., HAMMER A., MAYR D., KLASINC R., AUSTRIA

Using Cohesive Material for Scour Modeling in Plunge Pool of Karun 3 Project
ATTARI J., AREFI E., ANDAROODI M., TORBATYA A., IRAN

Flood Control Studies Using Hydraulic Scale Model Tests for Diversion Works on
the Bulubulu River
MENENDEZ C., ZEVALLOS O., ECUADOR

Field Observation on the RCC Stepped Spillways with the Flaring Pier Gate on
the Dachaoshan Project
GUO J., LIU Z., LIU J., LU Y., CHINA

Hydraulics of the Stepped Spillway Model of Cine Dam
DARAMAY., TURKEY

Forensic Evaluation of Hydraulic Conditions Associated with Structural
Problems in a Lock Conduit
STOCKSTILL R., USA
Hydraulic Structures

Hydraulic Design of Bottom Rack Intakes
HAGER W.H., MINOR H.E., SWITZERLAND ................................. 495

The Influence of Joint Aeration on Dynamic Uplift of Concrete Slabs of Plunge Pool Linings
BOLLAER T., SWITZERLAND .................................................. 503

Tail Water Influenced Transmission from Free Surface to Pressurized Flow in Bottom Outlet Tailrace Tunnels
KELLER V., VOLKART P.U., MINOR H.E., SWITZERLAND ........ 511

Hydrodynamic Pressures Caused by Plunging Jets
KAVIANPOUR M.R., ALIAKBARI M., IRAN ................................. 519

Hydrodynamic Downpull Coefficient for Bottom Outlet Leaf Gates under Non-Submerged Conditions
KHOSROJERDI A., KAVIANPOUR M.R., IRAN ............................... 527

Reduction of Downpull Forces on High Head Gates
MARKOVIC J., PRENNER R., DROBIR H., AUSTRIA ...................... 535

GIS and CFD Applications

Flows Due to a Structure Failure on the Canal du Centre
LE GRELLE N., BERTRAND G., SOARES FRAZAO S., HIVER J.M., ZECH Y., BELGIUM ......................................................... 543

GIS Methodology for Hydrological Analysis and Sewer Network Design
CHAMOUX Ch., GOURBESVILLE Ph., FRANCE ............................ 551

Automatic Optimization of Hydraulic Structures
DEMNY G., HOMANN C., SHOEMAKER C., KONGETER J., GERMANY/USA .......................... 559

Free Surface Perturbation Induced by a Vertical 2-D Liquid Jet Introduced from the Bottom of a Rectangular Tank: Numerical Study by SPH Method
ESPAP P., GALLATI M., SIBILA S., ITALY .................................. 567

Numerical Study of the Velocity Field in a Vortex Flow Heat Exchanger-Mixer
PETITOT S., LYAZID A., DEVIENNE R., FRANCE ......................... 575

Towards a Protocol for the Validation of CFD Models for Secondary Settling Tanks
STAMOU A., GREECE ............................................................ 583
Free Surface Flows

Free Surface Simulation of Natural Channels and Rivers by 3-D Two-Phase Theory
LI R., LI J., LI K., LI Z. CHINA ........................................................................................................... 591

Computation of Open-Channel Flows with Large Variation of the Free Surface by a Reynolds Average-Equation Method
NAKAYAMA A., NAKASE Y., FUJITA I., JAPAN .................................................................................. 599

3D Modeling of Spillway Using VOF Method
KIM S.H., LEE K.S., LEE J.H., KOREA .............................................................................................. 607

Two-Dimensional Numerical Simulation of Flow and Geo-morphological Processes near Headlands by using Unstructured Grid
MOHAMADIAN A., AZAD F.L., TAJRISHI M., IRAN ........................................................................... 615

Simulation of Shallow Recirculating Flows with Variable Topography Using Upwind Schemes on Unstructured Grid
MOHAMADIAN A., TAJRISHI M., IRAN ............................................................................................... 623

Numerical Modeling of Flows in Water Basins and Channels on the Basis of 2D Shallow Water Model
KLIMOVC Campaign, RUSSIA ........................................................................................................... 631

CFD Models and Applications

An Investigation of the 3D Oscillating Flow around an Array of Cylinders
NEHARI D., BALLIO F., ARMENIO V., ADJLOUT L., ITALY/ALGERIA ............................................. 639

Vortex Method Simulation of Turbulent Boundary Layers
DIMAS A., BERNARD P., COLLINS J., POTTS M., GREECE/USA ......................................................... 647

Turbulent Flow over Periodic Hills
PRINOS P., SOFIALIDIS D., GREECE .................................................................................................. 655

Computation of Immiscible two-Fluid Flows with a Unified Numerical Procedure
YOSHIDA K., USHIJIMA S., NEZU I., JAPAN ..................................................................................... 663

Quasi 2D-Numerical Model of Aerated Flow over Stepped Chutes
ANDRE S., DEWALS B., PIROTTON M., SCHRIL ESS A.J., SWITZERLAND/BELGIUM .................... 671

Numerical Simulation of Turbulent Flow Upstream of the Inception Point in a Stepped Channel
BENMAMAR S., KETTAB A., THIRRIOT C., ALGERIE ........................................................................ 679
Experiments on Stepped Spillways

Development of Mean Air Concentration on Chute Flow
KRAMER K., HAGER W.I., MINOR H.E., SWITZERLAND

Micro- and Macro-Scopic Study of two-Phase Flow on a Stepped Chute
YASUDA Y., CHANSON H., JAPAN

Effect of Step Cavity Area on Flow Characteristics of Skimming Flows on Stepped Chutes
YASUDA Y., OHTSU I., JAPAN

Air Inception and Pressure Fields over a Stepped Spillway in Transition Flow Regime
FRATINO U., AMADOR A., VALENZANO B., RENNA F.M., SANCHEZ-JUNY M., DOLZ J., ITALY/SPAIN

Air Demand for a Ramp-Offset Aerator as a Function of Spillway Slope, Ramp Angle and Froude Number
GASKIN S., AUBEL T., HOLDER G., CANADA

Effect of Ramp Angle on Aerator Performance
JAVANBARG M.B., ZARRATI A.R., JALILI M.R., IRAN

Hydraulic Machinery

Water Oxygenation in Stepped Chutes
CRUICKSHANK-VILLANUEVA C., MEXICO

A New Concept in Hydropower-Hydromatrix-Technology: Drag Forces on an Advanced Hydromatrix-Module
PRENNER R., YUCEL L., KIENBERGER V., DROBIR H., AUSTRIA

2D Numerical Model for Transient Vaporous Cavitation
CANNIZZARO D., PEZZINGA G., ITALY

A New More Sensitive Acoustic Method for Cavitation Detection
CIARAVINO G., GUALTIERI P., PULCI DORIA G., ITALY

Air-Valve Tests at Large Scale in WL/Delft Hydraulics
BOURNASKI E., BERGANT A., KRUISBRINK A., BULGARIA/SLOVENIA/NETHERLANDS

Membrane Valve as Effective Protection of Pipelines during a Transient Process in Pumping Stations
NIKOLOV N., MARADJIEVA M., BULGARIA
Poster Session

Modeling of Flow-Induced Vibrations
DROBIR H., BINDER M., AUSTRIA .............................................. 783

Visualization of ADCP Measurements and 3D Numerical Model Results
GEILS J., KONTNY P., MATHEJA A., STOSCHEK O., ZIMMERMANN C., GERMANY .... 791

The Feasibility Study of Ocean Sequestration Technique of Carbon Dioxide in the Pacific Ocean Using 3-D Circulation Model
HASEGAWA K., WADA A., JAPAN .............................................. 799

Set-up of Hydrodynamic and Meteorological Database in Abu Dhabi Emirate
KHALED A.M., UNITED ARAB EMIRATES .............................................. 807

Chaotic Dynamics of Streamflow Data
KIM H.S., KIM B.S., SOH B.H., SHIM M.P., KOREA .............................................. 815

Sensitivity Analysis of the Critical Rainfall Duration
LEE J.H., HUR J., LEE D.H., LEE E.T., KOREA .............................................. 823

Mapping of Floodplain Boundaries Using High Spatial Resolution Dem
LEE J.H., YOON K.H., JEONG S. LEE E.T., KOREA .............................................. 831

Experimental Study on Controlling Parameters of Flow Patterns in Plunge Pools Downstream of High Dams
LIU P., LI F., YIN W., CHINA .............................................. 839

Some Progress of Hydroinformatics and its Application on Hydraulic Engineering in China
LIU Y., LI G., CHINA .............................................. 845

Hydraulic Research on Side-Channel Spillways Based on Physical Modeling and Optimization
MARADJIEVA M., KAZAKOV B., BULGARIA .............................................. 849

Geographical Information Systems (G.I.S.) Implementation in Water Supply Network Modeling
MATSOKI M., GERMANOPOULOS G., SPILIOTOPOULOS A., GREECE .............................................. 857

Noah Gibberish: An Efficient Model Coupling Method
MURRAY M.G., KUTIJA V., UNITED KINGDOM .............................................. 865

Artificial Neural Networks as a Nonlinear Combination Framework for Describing Non-Darcy Flow in Porous Media
NAZEMI A.R., HOSSEINI S.M., AKBARZADEH T. M.R., POORKHADEN M. H., IRAN ... 873

Advances in Hydroinformatic Estimation of Aquifer Vulnerability
OBREGON N., FRAGALA F., GARCIA O., COLOMBIA .............................................. 883

GIS Application in Water Systems Management
TOCKMAJIAN H., SIMONYAN A., KALANTARYAN T., HOVHANNISYAN H., ARMENIA .............................................. 891
Improvement of Pool-and-Weir Fishway with High Difference of Water Level  
URA M., ONITSUKA K., AKIYAMA J., YAMAGUCHI H., JAPAN ........................................ 895

Regionalization of Scale Models of Maximum Rainfall Intensities  
VARAS E.A., CHILE ................................................................. 903

Data Management and Conditioning for a Large-Scale Groundwater Model in the Upper Danube Catchment  
WOLF J., ROJANSCHI V., BARTHEL R., BRAUN J., GERMANY .................................... 911

Structure Risk Analysis with Slope Stability and Seepage of Dike at High Flood Level  
WU X., DING L., ZHANG J., CHINA ...................................................... 919

AGORA: Hydraulic Instrumentation

The Use of Doppler Methods for Measuring Velocity and Discharge in Streams Less than 1.5 m Depth  
WARD C., PIMBLE L., SonTek/YSI Inc., U.S.A. .................................................. 929

Online Discharge Measurements in Large Rivers  
DYPVIK K., LOHRMANN A., Nortek AS, NORWAY ........................................... 937

Yangtze River ADCP Discharge Measurement Using Multiple External Sensor Inputs  
MARSDE N R., SONGSHEN C., DEXU Y., JINCHUN W., HUANG H., 
RD Instruments, U.S.A., CWRC, CHINA .................................................. 947

Combining ADCP with External Sensors  
AARDOOM J., Aqua Vision BV, NETHERLANDS ............................................. 953

Site Specificity of Bedload Measurement Using an ADCP  
RENNIE C., Dalhousie University, Halifax, CANADA ......................................... 961

Sediment Sampling in Sand-Bed Rivers: Methods and Instruments  
PETERS J.J., UCL Brussels, BELGIUM ..................................................... 969

Phenomena Influencing the Quality of Sediment Samples  
VAN DYK G.P., Eijkelkamp T & C, NETHERLANDS ........................................ 977

LOG_aDSLP-Echosounder; A New Surveying Technology  
EDEN H., General Acoustics, GERMANY ................................................ 985

Comprehensive Investigation on Cohesive Sediment Erodibility by Field and Laboratory Experiments  
WESTRICH B., SCHMID G., WITTO O., IH, University Stuttgart, GERMANY ............. 993
