### PANEL 1 ENERGY EFFICIENCY – A STRATEGIC CHOICE FOR EUROPE

Panel leaders: Bernard Laponche, Hans-Joachim Ziesing

<table>
<thead>
<tr>
<th>Introduction to Panel 1</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Innovative approaches to finance energy efficiency projects in Russia</td>
<td>3</td>
</tr>
<tr>
<td>Petra Opitz</td>
<td></td>
</tr>
<tr>
<td>Australia’s contribution on standby power</td>
<td>9</td>
</tr>
<tr>
<td>Lloyd Harrington, Shane Holt</td>
<td></td>
</tr>
<tr>
<td>Lessons learnt from Australia’s standards &amp; labelling program</td>
<td>21</td>

</table>
1.128 Energy efficiency in UK energy policy: a step change towards a low carbon economy
Joanne Wade, Matthew Leach .................................................. 131

1.130 Energy efficiency policy instruments in Southeast European countries
Zdravko G. Genchev ................................................................. 139

1.135 Bringing energy efficiency to the liberalised markets
Stefan Thomas, Randall Bowie, Wolfgang Irrek .......................... 149

1.138 Energy conservation policy in Ukraine
V. A. Zhovtynansky, E. P. Kolesnikova ..................................... 159

1.139 A handbook in evaluation of energy saving activities
Kirsten Dyhr-Mikkelsen, Preben Birr-Pedersen, Peter Bach .......... 169

1.141 Greening the EU power market: Nordic perspectives on electricity disclosure
Francis X. Johnson, Mattias Nordström .................................... 173

1.144 A sustainable development obligation for Wales
Charlotte Gibson ................................................................. 185

1.145 The role of an advice infrastructure in the co-ordination and delivery of energy efficiency activity
Colin Timmins, Philip Ivey .......................................................... 199

1.159 Implications of a deregulated electricity market on three major energy efficiency programs in Norway
Ingunn Ettestol, Hans Otto Hauland, Hans Nilsson ..................... 209

1.198 Teaching and learning made easy: strengthening of the European Sustainable Energy Education Forum (ESEEF)
Laila K. Lindseth, Káecz Albrechtsen ........................................ 217

1.193 Let's talk "energy efficiency + energy modesty"
Albrecht Kaupp, Shashi Shekhar ............................................. 221

1.203 International energy efficiency benchmarking for plants and installations – combining strategic energy management and enhanced energy efficiency
Joerg Meyer, Martin Kruska, Andreas Trautmann ....................... 231

1.204 Carbon rationing, equity and energy efficiency
Tina Fawcett ................................................................. 239

1.206 A case for self-deception in energy policy
Harold Wilhite, Jorgen S. Norgard ........................................... 249

1.209 Restructuring, liberalisation and EU accession: are transition economies moving towards more sustainable electricity markets?
Diana Ürge-Vorsatz, László Puics, Radmilo Pesic ......................... 259

1.219 Electricity labelling in the EU
Kevin Lane ................................................................. 269

1.224 Reducing UK residential carbon emissions by 60%
Brenda Boardman ............................................................... 273

1.227 European best practices in energy efficiency programmes and in supportive policies aimed at increasing economic, social and environmental benefits of energy efficiency on the demand-side
Wolfgang Irrek, Stefan Thomas, Lorenzo Pagliano, Gianluca Ruggieri, Carlos Lopes ........... 281

PANEL 2 COMFORT AND ENERGY USE IN BUILDINGS
Panel leaders: Vincent Berrutto, George Henderson

Introduction to Panel 2 ............................................................ 293

2.003 A detailed analysis of the historical role of energy efficiency in reducing carbon emissions from the UK housing stock
Les Shorrock ................................................................. 295

2.021 Residential building retrofit effectiveness analysis based on heat and water use data
Denis Dogadin, Oleg Komarov, Boris Nekrasov ............................ 303

2.026 Is one litre enough? – tenants’ satisfaction in passive houses
Andreas Hermelink, Hartmut Hübner ........................................ 315

TABLE OF CONTENTS

2,200 Networks for energy management in the Tertiary Building Sector – replication of the successful Norwegian Building Networks program
Thea Marie Mørk ................................................................. 485

2,231 European Window Energy Rating System, EWERS: the future European, national or international standard?
Diana Avasoo, Arne Andersson ........................................... 493

VOLUME 2 PROCEEDINGS

PANEL 3 LAND USE, TRANSPORTATION AND MOBILITY
Panel leaders: Mohamed Mezghani, Dominic Stead

Introduction to Panel 3 .......................................................... 503

3,008 Emissions trading in international aviation:
Possible design options for an emissions trading scheme and their impact on climate change and the aviation industry
Odette Deuber, Martin Cames ............................................... 505

3,018 Decoupling the link between economic growth, transport growth and transport energy consumption in Europe
Dominic Stead, David Banister .............................................. 515

3,022 Comparison of the environmental impact from aircraft and high-speed train operation
Moshe Givoni ........................................................................ 527

3,031 Transportation and environment in Mexico city: reviving a bus system or giving in to the auto?
Lee Schipper, Aaron Golub ................................................... 539

3,034 Sometimes, economic arguments are better for achieving efficiency in transport:
A remarkable new market based approach on Commuter Mobility Management makes accessibility and energy efficiency go hand in hand
Henk van Elburg ..................................................................... 549

3,069 Urban form and greenhouse gas emissions in Finland
Irmeli Harmaa-Järvi .............................................................. 555

3,074 ECO-DRIVING Europe – building the frame for a European market for eco-driving
Willy Raimund, Stephan Fickl ............................................... 565

3,079 UK tax policies to control CO₂ emissions from motor vehicles – early impacts and lessons for other European countries
Neil Wallis .............................................................................. 569

3,118 The Planning System and its impact on sustainable urban form and energy demand
Maarten Wolsink .................................................................... 575

3,121 Smart infrastructure solutions implemented in Stockholm – systematic approach on transports pays off in many ways
Agnete Persson ...................................................................... 587

3,146 Is compact urbanisation the best way to reduce travel? – a theoretical approach
Kees Maat .............................................................................. 593

3,199 Motorization and energy consumption in large cities in the OECD and Asia – tax incentives and public transportation for greater fuel efficiency
Keiko Hirota, Kiyoyuki Minato ................................................ 601

3,237 The SEA BUS – a biogas driven commuter ferry for public transportation
Mats Dryselius ........................................................................ 609

PANEL 4 BUILDING THE BRIDGE FROM LAB TO CUSTOMER
Panel leaders: Lena Neij, Jacky Pett

Introduction to Panel 4 ........................................................... 613

4,005 "Efficient compressed air" – a successful campaign for energy efficient compressed air systems in Germany
Anne-Claudine Agricola, Peter Radjen ............. 617
