Contents

Preface .................................................................................................................................................................. 7

Why safety and Human Factors/Ergonomics standards are so difficult to establish ........................................ 9

*Paul Green*

**TRANSPORTATION**

An ergonomic approach to on-board systems .................................................................................................. 27

*A. Toffetti, D. Bertolino, E. Nodari, C. Zoldan, W. Gerbino, & T. Agostini*

Skill-development when interacting with in-vehicle information systems: a training study on the learnability of different MMI concepts ........................................................................................................... 35

*Georg Jahn, Josef F. Krems, Christhard Gelau*

An empirical comparison of the use of distance versus landmark information within the Human-Machine Interface for vehicle navigation systems ........................................................................ 49

*Gary E. Burnett, & J. Mark Porter*

Preliminary results of an ergonomic study investigating the needs of older drivers and passengers .................. 65

*Enrica Fubini, Silvia Leone, Maurizio Cerrone, Anna Barelo, Ivan Bellanca, Claudia Campanella, Annalisa Abbà, Maurizio Cagliuso, Laura Peralma, Elisabetta Toscano*

Joystick versus conventional driving controls ................................................................................................. 77

*Joakim Östlund & Björn Peters*

Human factors aspects on joystick control of adapted vehicles ....................................................................... 81

*Björn Peters, Joakim Östlund, & Håkan Alm*

Evaluation of an on-board driver support system -the IN-ARTE project ......................................................... 99

*F. Tango & E. Bekiaris*

COMUNICAR: Designing multimodal interaction for advanced in-vehicle interfaces ...................................... 113

*Michele Mariani*

The impact of transport company safety climate on truck crashes .................................................................. 121

*Mark J.M. Sullman, Karl Pajo, & Michelle L. Meadows*

Analysis of workplace transport accidents ...................................................................................................... 131

*Nicholas Dickety*

Effects of complexity of in-car information on visual fixations and driving performance .............................. 147

*Guy Labiale & Mario Galliano*

Recognition of retroreflective road signs during night driving ....................................................................... 155

*J. Berzinsh, M.Ozolinsh, P.Cikmacs, and K. Pesudos*

Driver’s electric skin variations response and Emergency Braking Systems’ requirements .......................... 165
Alain Priez, Claire Petit, & Christophe Brigout
Spontaneous speed: theoretical and applied considerations..............................175

Alessandro Couyoumdjian, Francesco Di Nocera, & Fabio Ferlazzo
Feeling your way home: the design of haptic control interfaces within cars ........189

Steve J. Summerskill, Gary E. Burnett, & J.Mark Porter
Assessment of driver's mental effort while driving roads of different complexity 195

A. Ronen, T. Oron-Gilad, D. Shinar, & Y. Cassuto
Road design and subjective safety.................................................................205

Andrea Simone
Predictive aids in Air Traffic Control: Situation Awareness and mental
workload implications .........................................................................................209

Ashley Nunes & Michael L. Matthews
Attention switching and mental workload in a modern traffic control centre .....213

Addie Johnson, Helena Fongers & Harry Lammeretz
Drowsiness warning and driver acceptance—a simulator experiment ..............217

Albert-jan Roskam, Dick de Waard, Karel Brookhuis, Everd Uneken, Serge
Boverie, Alain Giralt
Evaluation of the comprehensibility of various designs of a Full Colour
Information Panel..................................................................................................231

Albert-jan Roskam, Everd Uneken, Dick de Waard, Karel Brookhuis, Sascha
Breker, & Stefan Rothermel
Effects of time pressure on feelings of stress, activation and arousal, and
drivers' risk taking behaviour.............................................................................245

Carme Oliveras, Monica Cunill, M.Eugenia Gras, Mark J.M. Sullman,
Montserrat Planes, and Cristina Figuer
Psychological factors in young drivers' traffic accidents..................................249

Valdimar Briem, Asthor Ragnarsson, & Kjartan Thordarson
Testing the interface of a cab signalling system.............................................255

Walter Gerbino & Francesco Strano

MULTI-NATIONAL MISSIONS OF THE 21ST CENTURY: IMPACT ON LEADERSHIP & TRAINING...265

Yvonne R. Masakowski
Sensible Agents: augmenting and empowering human decision-makers..........273

K. Suzanne Barber, Anuj Goel, Joonoo Kim, Cheryl E. Martin, David C.
Han, Dung N. Lam, Matt MacMahon, Ryan McKay
Digital memory cabinets: reviving the Art of Memory for augmented cognition .287

Yvonne F. Barnard & Guy A. Boy
HEALTH AND THE WORKPLACE

Determining dynamic cardiovascular state changes using a baro-reflex simulation model..................................................................................................................................................................................297
  Ben Mulder, Arie van Roon, Monika Althaus, Hans Veldman, Karin Laumann, Jaap Bos, Lennert Quispel, & Matthijs Dicke

The suitability of the 0.1 Hz component of heart rate variability for the assessment of mental workload in real and simulated work situations..............317
  Peter Nickel & Friedhelm Nachreiner

Use of biofeedback in occupational risk prevention..................................................335
  Jan Seghers, Hans Ponnet, & Arthur Spaepen

The Sky Light Simulator Project ..............................................................................343
  Juri Barollo & Pier Giorgio Bellei

Way-finding and Maritime Emergency Signs..............................................................349
  Michael May

Human factors and everyday routine in the maritime work domain .................361
  Thomas Koester

Situation awareness in maritime traffic control: a comparison of two methods ...377
  Erik Wiersma & Rene Butter

Development of a Performance Monitoring Instrument for Vessel Traffic
  Service Operators................................................................................................................387
  Rene Butter and Erik Wiersma

Risk assessment to increase safety and health in the Estonian work environment397
  Piia Tint & Virve Sirak

New health risks in the information era?.................................................................401
  Hilja Taal

Awareness of occupational health risks of nitrous oxide and formaldehyde used in a hospital’s operating room.................................................................405
  Marina Kempinen

An anthropometric survey of Italians "L’Italia si misura": a decade of research..409
  Melchiorre Masali, Enrica Fubini, Giordano Pierlorenzi, Alessandra Millevolte, Gianna Anzil, Marinella Ferrino, Ivana Coniglio, Alessandra Fenoglio, Nadia Salis

Design and evaluation of simulator-training in Anaesthesia Crisis Resource Management (ACRM)..................................................................................................................421
  Niclas Schaper, Anja Pia Schmitz, Christoph Grube, Peter Dieckmann, & Bernhard Graf

Linguistic and location effects in compliance to pesticide warning labels ..........435
  Judy Edworthy, Elizabeth Hellier, Nicola Lambell, Clare Grey, Kirsteen Aldrich, & Andrew Lee

Identification of qualifications for train-dispatcher trainees......................................445
  Ann Britt Skjerve, Jan Ludvigsen, & Tore Neset

Simulation of industrial decision making: lessons learnt from field studies in process control and railway signalling environments.............................................455
  Sarah Nichols & Sarah Crawford
COMMUNICATION

Multi-media and the internet as educational tools for solving the problems of ergonomics and safety ................................................................. 471

Virve Siirak

“Always On” a new way of interacting with information and communication technologies in daily life............................................................... 473

Elena Guercio, Antonella Roella, & Silvia Bonaventura

E-tool: a personalised prototype for web based applications............................ 485

Cristina Gena, Amedeo Perna, & Massimiliano Ravazzi

Portable data assistant for emergency units................................................... 497

Camillo Sassano

Reading and searching information on small display screens............................... 505

Jari Laarni, Ilpo Kojo, & Lari Kärkkäinen

Varying types and levels of automation in the support of dynamic fault management: an analysis of performance costs and benefits .......................... 517

Bernd Lorenz, Francesco Di Nocera, & Raja Parasuraman

Acknowledgement to reviewers........................................................................... 525
