STRATEGIES FOR PERFORMANCE
IN THE AFTERMATH OF
THE WORLD TRADE CENTRE
## CONTENTS

**Preface**

**Keynotes**

Towards Better and Safer Built Environment  
*Ron Klemencic*

Performance: Imperative for Safety, Security and Competitiveness in the 21st Century  
*J. E. Snell*

Structural Investigation of the New York World Trade Center Collapse  
*W. Gene Corley*

Evacuation of the World Trade Center: What Went Right  
*G. Proulx, R. F. Fahy*

Review of Evacuation Procedures for the PETRONAS Twin Towers  
*Arilda Ariff*

Life Safety System Design for the PETRONAS Twin Towers  
*Lawrence S. Ng*

Fire Protection Engineering: Where are we heading from here? A Look at the Present and Future Research Agendas in Tall Buildings  
*Robert Solomon*

**Evacuation Opportunities**

Equal Opportunity in Evacuations in Future Tall Buildings  
*John Ng*

*David Barber & Rudy Van Merkestein*

Analysis of Simultaneous Evacuation of the World Trade Centre  
*Yoshiyuki Yoshida*

Pedestrian Evacuation Flow from Hallway to Stairs  
*T. Chen, W. Song, W.C. Fan, S. Lu, & B. Yao*

Redefining Egress Capacity – All in Good Time  
*James D. Amy*

**Fire Resistance of Structures**

Fire Resistance of Large Steel Columns Under Axial Load  
*M. Kohno & H. Masuda*

Fire Resistance of Steel Frames  
*Y. Sakamoto, T. Nishigaki, & K. Ikeda*

Role of Fire Resistance Issues in the Collapse of the Twin Towers  
*V. K. R. Kodur*

Predicting the Collapse Behaviour of Light Steel Floor Trusses in Fire  
*I.W. Burgess, S.K. Choi & R.J. Plank*

Fire Resistance – Implications for Regulations and Standards of the September 11th Terrorist Attacks on the World Trade Centre  
*T. Lennon*
Planning and Management

Joseph T. Balsamello

To Live High or Low: case Study of Singapore Public Housing Residents
B. Yuen, A. Yeh, S. Appold, G. Earl, J. Ting, & K.L. Kurnianingrum

Strategies for Tall Buildings in the Netherlands
George Ang, & Matt Prins

Analysis of the Constraints to Innovations in High Rise Buildings
F.J.M. Scheublin

Building Regulations on Fire Safety in Europe
L. Sheridan, H.J. Visscher & F.M. Meijer

Elevators in Emergency

An overview of Elevator Use For Emergency Evacuation
John H. Klote

 Protected Elevators For Egress and Access During Fires in Tall Buildings
Richard W. Bukowski

Elevators for Occupant Evacuation and Fire Department Access
E. Kuligowski

Enhanced Elevator Operation During Emergency Conditions
Louis Bialy

Planning and Implementing an Emergency Evacuation Elevator System
K. Barlund, J. de Jong & R. Kontturi

Evacuation Simulation of Tall Buildings
Henri Hakonen, Tuomas Susi & Marja-Lisa Silkonen

Phase III – Elevator Evacuation Operation
Tom Allen

Structural Robustness of Tall Buildings

Analyses of Structural Responses and Damages of World Trade Center Tower 2 due to Impact of Aircraft Crashed

A Study on Redundancy of High-Rise Steel Buildings: The Effect of Induced Heat and Loss of Vertical Structural Members
A. Wada, K. Oh, H. Suzuki, Y. Sakamoto, M. Fusini & H. Kamura

A Study on Redundancy of High-Rise Steel Buildings
A. Wada, K. Oh, H. Suzuki, Y. Sakamoto, M. Fusini & H. Kamura

Assessment of the Life Safety Aspects and Structural Robustness of High Rise Buildings in Hong Kong
C. Gibbons, Mingchun Luo & David Dumigan

Procedures for Progressive Collapse Analysis
S. Marjanishvili

Risk Analyses, Management and Economics

SC4 : A Risk-Informed Performance - Based Approach for Tall Building Design
B. Meacham
An Assessment of Australian Preparedness for Tall Building Usage in a New Risk Regime
Alan P. Jeary

Education to meet the needs of Disaster Managers and Engineers
Steve Bloomer & Brian Hobbs

Cost Comparison Between North American Codes and British Collapse Measures
Barry Chamish

The Economics of Tall Buildings after the WTC Disaster
William R. Code

Enhancing the Safety of High Risk Buildings through the Concept of the Levels Safety and the Use of Fire Engineering Tool: The Needs for International Cooperation
Raphael Slama

Structural Performance in Fire Environment

Behaviour of Steel-Framed Structure Supporting Precast Concrete Slabs in Fire
A. Allam

New Research in the Understanding of Steel Frames in Fire and the Development of New Fire Engineered Solutions Applicable to Tall Buildings
B.R. Kirby

Whole Building Behaviour- Results from a Series of Large Scale Tests
Tom Lennon

Evaluation of Effects of Fire Test on Cardington Concrete Building
T.D.G. Canisius, S.L. Matthews & N. Waleed

Performance-Based Codes

Performance System Model- A Framework for Describing the Totality of Building Performance
Brian Meacham, B. Tubbs, D. Bergeron & F. Szigeti

Role of Acceptable Solutions in Evaluating Innovative Designs
Denis Bergeron

Qualitative Versus Quantitative Aspects of Performance-Based Regulations
Douglas Beller, Greg Foliente & B. Meacham

The Role of Standards in a Performance-Based Building Regulatory System
Richard Bukowski

Performance Design Review and Verification Techniques
Robert D. Weber

Structural Design Considerations

Structural Performance of i-Tech Composite Beam Composed of Steel With Web Openings

Structural Design and Analysis of Galleria Palace
Jong Soo Kim, Song Mun Yoo & Dong Whan Kim

Recent Supertall Building in Korea and Reinforced Concrete Structural System for a 130 Story Ultra High-Rise Building
Sung. Woo. Shin, Beom Seok Han. S. Han & Ming Sung Song

Development of Structural Safety Monitoring System for Buildings
M. Teshigawara, H. Isoda & K. Kitagawa
The Development of an Evaluation System for Structural Damage
K. Kusunoki & M. Teshigawara

Progressive Analysis of Cross-Sections Exposed to Fire
Naveed Anwar, Umer Haroon & M. Talha Junaid

Unitary Load-Equalisation in the Solution of Linearly Elastic Structures and Unified Damage Analysis
Satya. P. Singh

Fire Safety & Engineering

Smoke Movement Simulation and Regulatory/Non-Regulatory Approaches for Smoke Control in Buildings
Xavier Bodart, Michel Curtat, Eric Cesmat & Dhionis Dhima

Prediction Method of External Flame Ejected from an Opening of Building
Yoshifumi Ohmiya, Yoshihiko Hayashi, Shuatsu Yusa & Michael A. Delichatsios

Numerical Study on Possibility of Activating Smoke Detector in an Atrium
H.B. Wang, B. Yao, L.Yi, R. Huo C.L. Shi & Y.Z Li

Measuring Smoke and Toxic Gas Pathways in Tall Buildings
C. Genge

Mitigation of Backdraft with Water Mist: A Reduced-Scale Experimental Study
W.G. Weng, W. C. Fan & B. Yao

A Quantitative Method For Calibrating CFD Model Calculations
J.A. Ierardi, J. R. Barnett

Designing for Wind and Seismic

Characteristics of Aerodynamic Response of High Rise Buildings with Open Passage
Hitomitsu Kikitsu & Hisashi Okada

Comparison of Peak Pressure Coefficients for Wind Load Among International Codes and Standards
Hitomitsu Kikitsu, Hisashi Okada & Yasuo Okuda

Numerical Analysis of Wind Loads on Tall Buildings in Urban Area

Revision of AJ Recommendations on Wind Loads for Buildings
Y. Tamura, T. Ohkuma & H. Kawai

Studies on the Design Earthquake Motions in Accordance to the Revised Japanese Building Standards
I. Okawa, M. Midorikawa, M. Iiba, T. Kashima & S. Koyama

Innovation of Low Frequency Buildings by Semi Active Control using an ‘MR’ Damper
H. Fujitani, Y. Shiozaki, T. Hiwatashi & S. Soda

Designing for Egress

Pavements in the Sky: The Use of Skybridge in Tall Buildings
Antony Wood

Evacuation Design Strategy for High-rise Buildings
T. Sano, I. Hagiwara, A. Tanaka
The Continuous Information Stream – Leading Occupants to Safety with Photoluminescent Safety Way Guidance Systems and Signage
James D. Amy, Jr.

Structural Performance under Impact Loading
The Structural Redundancy of Earthquake-Resistant designed Buildings Against Impulsive Load
K. Tamura, Y. Nakamura, D. Ishii

Vulnerability Assessment of Concrete Tall Buildings Subjected to Extreme Loading Conditions
T. Ngo, P. Mendis, G. Kusuma

Structural Design of Tall Buildings With a Minimal Risk of Collapse
Erik Reitzel

Interaction of Height-Dependent Performance Properties for Facades of Tall Buildings
Jonathan Sakula, Frederick Hulton

Response of Multi-Storey Building System Subjected to Blasts and Projected Charges
Ramanath Ganesh, Enno Koehn

Materials and Structural Behaviour in Fire
Behaviour of Glass Fibre Reinforced Plastics (GRP) Columns at Elevated Temperatures
P.M.H. Wong, Y.C. Wang, J.M. Davies,

Spalling of Concrete When Exposed to Fire
L. Bostrom

Advantages of Steel-Concrete-Steel Sandwich Construction in Highrise Buildings
R. Dixon, H.G. Bowerman

Fire Engineering and Design
Integrated Structural Fire Design For High Rise Buildings
Young Wong, Neal Butterworth

Fire Resistant Design Criteria of Tall Steel Building Structures
Y.C. Wang

Design of Structures for Fire in the Australian Regulatory Environment and the Impact of the WTC Collapse
D. J. Proe, P.F. Johnson, R. Hough

Fire Engineering of Tall Buildings Lessons Learned from 9/11
Martin Kealy

Preliminary Studies of Fire-Whirl in High Rise Buildings Using Numerical Simulation
C.K. Chen, B. Yao, W.C. Fan

Integrated Approach to Design and Analyses
Integrated Design of Safe Skyscrapers: Problems, Challenges and Prospects
Mir M. Ali

Hostile Acts as a Design Approach
Robert Solomon

The Incident of the Perilli Skyscraper: A Case Study
C. Fiamei, G. Gallina, R. Caputo, A. Limido

Performance Strategies for High Rise Buildings: Tendencies and Developments in Europe
Norbert Rehle
Innovative Design and Technologies and other Related Issues

Catastrophic Fire Suppression and Safe Evacuation in Highrise Buildings Using Breathable Fire-Suppressive Atmosphere
  Igor K. Kotliar

A New Process to Improve Tall Buildings Heat Resistance
  B. Bastita

Inflatable Ejection Module (IEM) An Emergency Egress System for Tall Buildings
  Anshuman Khanna

Protection Against Biological and Chemical Agents
  J. Vepsalainen

Façade Emergency Exits Concept
  Jose Romano

Hyper Building Project – First 3-Dimensional Cities on the Earth
  Hitoshi Aoki

South-East Asian Property Development: An Overview of Public Planning and Private Development
  Daniel Cerf

International Council for Research and Innovation in Building and Construction (CIB)
