2003 IEEE Power Engineering Society General Meeting

Conference Proceedings, Volume 1

Tracks 0, 1, and 2

13 - 17 July 2003
Toronto, Ontario Canada
PES 2003 General Meeting
Table of Contents

Track 0 - Non-Track Sessions

Capstone Design Courses in Power Engineering
Sponsored by: Power Engineering Education
Chair: W. Jewell, Wichita State University

Synergy Between ABET EC 2000 and Capstone Senior Design Projects
Keith Holbert

Senior Design Projects at Drexel University - Focus on Power Engineering
Maja Bystrom, Karen Miu and Kevin Scoles
A Senior Design Program at Iowa State University
John Lamont

Power Engineering Senior Design at Michigan Tech University
Leonard Bohmann

Senior Design at Washington State University
Robert Olsen

PSR Poster Session
Sponsored by: Power System Relaying
Chair: P. Wilson, IEEE Power System Relaying Committee

Road to the Integrated Protective Relaying Fault Information System
Shi Dongyuan, Duan Xianzhong and Wang Xinghua
Study, Comparison and Simulation of Power System Swing Detection and Prediction Methods
Ali Naderian Jahromi and Majid Sanaye-Pasand
A CT Saturation Detection Algorithm
S.H. Kang, Y.C. Kang and S.H. Ok
Novel Wavelet Approach to Current Differential Pilot Relay Protection
Chi-kong Wong, Chi-wai Lam, Kuok-cheong Lei, Chu-San Lei and Yingduo Han

The FGRs Vs. FTRs Debate: Facts and Fiction – PANEL
Sponsored by: Power System Analysis, Computing & Economics
Chair: A. Papalexopoulos, ECCO International

Customer Choice: Offering Both Flowgate Rights and Firm Transmission Rights
Richard P. O'Neill
Designing a Market for Transmission Rights
Harry Singh
FTRs vs. FGRs: The Midwest Perspective
Roberto Paliza
Nodal Pricing Versus Flowgate Pricing
Fernando Alvarado
The FGRs vs. FTRs debate: Facts and Misconceptions
Shmuel Oren

Multi-Agent Systems in Power Engineering - PANEL
Sponsored by: Power System Analysis, Computing & Economics
Chair: S. McArthur, University of Strathclyde

Agents for Distributed Decision-Making
Sarosh Talukdar
# PES 2003 General Meeting
## Table of Contents

Multiagent System Solutions for Distributed Computing, Communications, and Data Integration Needs in the Power Industry  
Vasant Honavar, James McCalley, Vijay Vishwanathan and Zhong Zhang ........................................ 44

Multi-Agent Systems for Diagnostic and Condition Monitoring Applications  
J.A. Hossack, G. Jahn and Stephen D.J. McArthur ................................................................. 48

Multi-Agent System Technologies and an Application for Power System Vulnerability  
Juhwan Jung and Chen-Ching Liu .................................................................................................. 52

### Human Capital (Manpower Development) – PANEL ............................................................... 57

Sponsored by: Power Engineering Education  
Chair: Mariesa Crow, University of Missouri – Rolla

A Panel Session on Human Capital (Manpower Development): University Career Opportunity Centers  
Lee-Ann Morton .......................................................................................................................... 58

University Coop/Internship Programs  
Larry Hameman .......................................................................................................................... 59

A Power Engineering Curriculum for the 21st Century  
Peter Sauer .................................................................................................................................. 60

Prabha Kundur ............................................................................................................................. 62

Industry/University Interaction  
Paul Nauert ................................................................................................................................ 64

Industry and University Interaction  
Lowell Brothers .......................................................................................................................... 65

### The Ethical Problems of the Electric Power Industry - PANEL .................................................. 66

Sponsored by: Policy Development  
Chair: C. Casazza, American Education Institute

The Six Networks and Electric Power Policy, Engineers, Economists and Ethics  
Jack Casazza ................................................................................................................................ 66

### Practical Measurement Issues Related To Power Quality and IEEE Std. 1459-2000 - PANEL .................................................. 97

Sponsored by: Power System Instrumentation & Measurement  
Chair: E. So, National Research Council Canada

IEEE Standard 1459: Questions and Future Direction -- Quo Vadis?  
Alexander Emanuel ....................................................................................................................... 82

Application of IEEE Standard 1459-2000 for Revenue Meters  
Rejean Arseneau .......................................................................................................................... 87

Measurements of Electricity Meters Beyond kWh  
Scott Weikel ................................................................................................................................ 92

NIST Program for Traceable Power and Energy Measurements Under Non-Sinusoidal Waveform Conditions  
David Bergman, Thomas Nelsen, Gerard Stenbakken and Bryan Waltrip ....................................... 95

Harmonic Measurements: Current and Voltage Transducers  
Eddy So ....................................................................................................................................... 97
# PES 2003 General Meeting
## Table of Contents

### Opportunities in ONR for Power Engineering Educators - PANEL

**Sponsored by:** Power Engineering Education  
**Chair:** D. Niebur, Drexel University

- **ONR Supported Research Efforts at Drexel's Center for Electric Power Engineering**  
  Harry Kwatny, Karen Miu, Dagmar Niebur and Chika Nwankpa .................................................. 99
- **An NSF/ONR Funded Project on the Use of Micromechanical Machines in a Power Circuit Breaker**  
  Gerald Heydt ................................................................. 101
- **Experiences of an ONR YIA Awardee**  
  Alex Stankovic ..................................................................... 103
- **Electric Power Networks Efficiency and Security: An NSF/ONR Initiative**  
  James Momoh ....................................................................... 104
- **Advanced Electrical Power Systems (AEPS) Thrust at the Office of Naval Research**  
  Terry Ericsen ..................................................................... 105
- **An ONR Young Investigator Project - Predictive Reconfiguration of Shipboard Power Systems**  
  Karen Butler-Purry ............................................................. 106

### Distribution Modeling for Feeder Analysis - PANEL

**Sponsored by:** Power System Analysis, Computing & Economics  
**Chair:** S. Carneir, Jr., Federal University of Rio de Janeiro

  D.P. Chassin, R.T. Guttromson and S.E. Widergren ................................................................. 108
- **A Perspective on Transformer Modeling for Distribution System Analysis**  
  Roger Dugan ........................................................................ 114
- **Measurements and Model Validation on Three-Phase Core-Type Distribution Transformers**  
  Sandoval Carneiro, Jr. and Helvio J. A. Martins ................................................................. 120
- **Windmill Modelling Consideration and Factors Influencing the Stability of a Grid-Connected Wind Power Based Embedded Generator**  
  S.K. Salman and A.L.J. Teo .......................................................... 125

### Future Power Engineering Educators - PANEL

**Sponsored by:** Power Engineering Education  
**Chair:** K. Miu, Drexel University

- **Developing Interdisciplinary Research and Education: A Case for Power System**  
  James Momoh ....................................................................... 126
- **The Future Power Engineering Professor**  
  Vijay Vittal ........................................................................ 127
- **Teaching Utility Applications of Power Electronics in the First Course on Power Systems**  
  Ned Mohan ........................................................................ 130
- **A Modern Power Engineering Curriculum that Exhibits the Effects of Information Technology**  
  Chika Nwankpa .................................................................... 133
- **Intelligent Computational Methods for Power Systems Optimization Problems**  
  Sudhakar Chavali, Sanjoy Das and Anil Pahwa ................................................................. 135
Standby Vs. Cycling Stationary Battery Applications - How Battery Management Requirements Differ - PAPER

Batteries for Stationary Standby and for Stationary Cycling Applications - Introduction
Garth Corey .................................................................................................................. 139

Spencer Everingham, Robert Hammond and Devarajan Srinivasan ................................ 141

Lead Acid Batteries for Stationary Float Service and Cycling Service, Part 2: Selection Criteria
Thomas Ruhlmann ...................................................................................................... 146

Batteries for Stationary Standby and for Stationary Cycling Applications, Part 3: Operating Issues
Jim McDowall ............................................................................................................. 152

Batteries for Stationary Standby and for Stationary Cycling Applications, Part 4: Charge Management
Philip Symons .............................................................................................................. 155

Batteries for Stationary Standby and Cycling Applications, Part 5: Maintenance and Testing Standards
Jay Chamberlin ............................................................................................................ 158

Batteries for Stationary Standby and for Stationary Cycling Applications, Part 6: Alternative Electricity Storage Technologies
Garth Corey .................................................................................................................. 164

Track 1 - Asset Management

FACTS Applications in a Restructured Environment - Paper

FACTS Applications in Preventing Loop Flows in Interconnected Systems
Chikong Wong and Wei Wu ............................................................................................ 170

Application of GUPFC in China’s Sichuan Power Grid - Modelling, Control Strategy and Case Study
Qiang Lu, Jin Ma, Shengwei Mei and Lin Sun .................................................................. 175

Use of a Single-Phase Active Power Filter for Generator Negative Sequence Current Reduction
Hongfa Ding, Xianzhong Duan and Dongyuan Shi .......................................................... 182

Investigation of Cascade Multilevel Inverter as an STATCOM
Husam Al-Hadidi and Robert W. Menzies ........................................................................ 187

Modulation Index Regulation of a Multilevel Inverter for Static Var Compensation
John Chiasson, Fang Peng and Leon Tolbert .................................................................... 194

Feature Analysis of Power Flows Based on the Allocations of Phase Shifting Transformers
Chung-Neng Huang ........................................................................................................ 200

An Improvement Project for Distribution Transformer Load Management in Taiwan
Hong-Chan Chang, Yen-Ting Chao and Sheng-Ta Lee .................................................... 201
# PES 2003 General Meeting

## Table of Contents

### Insulators - PAPER

**Sponsored by:** Transmission and Distribution  
**Chair:** G. Karady, Arizona State University  
 **Partial Discharge Measurement as a Diagnostic Tool of the Early Ageing of Silicone Rubber Insulation**  
Edward Cherny, Shesha Jayaram and Ivan Lopes ................................................... 202  
 **Study on the Effect of Test Circuit Parameters on Dry Band Arcing Failure of ADSS Fiber Optic Cable**  
Qi Huang, George Karady, Baozhuang Shi and Monty Tuominen .................................. 207  
 **Testing and Modelling Hollow-Core Composite Station Post Insulators under Short-Circuit Conditions**  
J.S. Barrett, William A. Chisholm, C. de Tourreil, John Kuffel, B.P. Ng, C.J. Pon and A.-M. Sahazizian ................................................................. 211  
 **Performance Evaluation of Polymeric Insulators in the Lab and Field**  
Jason Graves, Areef Mohammed and Rajeswari Sundararajan ........................................ 219  
 **Experimental Investigation of the Aging Process on ADSS Optical Fiber Cables**  
Qi Huang, George Karady, Baozhuang Shi, Devarajan Srinivasan and Monty Tuominen ............. 225

### Power System Planning and Operations

**Sponsored by:** Power System Planning and Implementation  
**Chair:** G. Welch, Consultant  
 **Fast Estimation of Point-to-Point Transmission Services Costing for the Mexican System**  
Akihito Escobar, Dora E. Flores and Adrian Inda .................................................. 229  
 **Models for Long-Term Energy Forecasting**  
Cui Wen Fu and Tien Tam Nguyen ................................................................................ 235  
 **Fast Short Circuit Analysis Method for Unbalanced Distribution Systems**  
Jen-Hao Teng ............................................................................................................. 240  
 **A New Method for Unit Maintenance Scheduling Based on Genetic Algorithm**  
Rong-Ceng Leou ........................................................................................................ 246  
 **A New Approach Type-Newton For Optimal Reactive Dispatch Problem**  
Edmarcio A. Belati, Geraldo DaCosta, Vanusa de Sousa and Luiz Claudio Nunes ..................... 252

### Distribution Lightning Performance - COMBO

**Sponsored by:** Transmission and Distribution  
**Chair:** J. McDaniel, DTE Energy Technology  
 **Calculation of Transient Electromagnetic Field around a Transmission Line Subjected to Lightning Strokes**  
Ali Naderian Jahromi, Pabak Porkar and Siyamak Porkar .............................................. 258  
 **Measurement of Lightning-Induced Currents in an Experimental Coaxial Buried Cable**  
Alain Cordier, Douglas Jordan, Carlo Alberto Nucci, Mario Paolone, Emanuel Petrache, Farhad Rachidi, Vladimir Rakov, Keith Rambo, Jens Schoene, Martin Uman and Thierry Verhaege ............................................. 262
# PES 2003 General Meeting

## Table of Contents

### SVC Refurbishment & Life Extension - PANEL

**Sponsored by:** Substations  
**Chair:** B. Gemmell, Alstom T&D Ltd.

- Refurbishment of the Static Var Compensator at Laurentides  
  Hubert Bilodeau and Louis P. Rollin .................................................. 342
- SVC Refurbishment: a cost efficient method to extend the life time of an SVC  
  G. Andersson, B.L. Johansson, Eric John, Bo A. Nilsson and T.J. Wemette ........ 348
- AZ to UK, a New Life for an SVC  
  Chris Horwill and Gearoid S. O'hEidhin ............................................. 353
- Relocation of SVC from Shin-Shinano Substation to Suruga substation  
  Yasutomo Moriura, Shigeki Muramatsu, Ronald Pape, Kazuyoshi Shimada and Hideo Takeda ................................................................. 357

### Bidding Genco Assets in New SMD Markets – PANEL

**Sponsored by:** Power System Operations  
**Chair:** K. Le, PCI

- Formulating Bidding Strategies for SMD Markets  
  Khai Le ........................................................................................................ 371
- Overview of the New SMD-based Market Design in California  
  Alex Papalexopoulos .................................................................................. 372
- Lessons Learned from California Market  
  Joseph H. Yan ............................................................................................ 373
- Experience with Operating in PJM Market  
  Laura Manz .................................................................................................. 374
- Managing Congestion Risks in PJM Market  
  Herb Yan ..................................................................................................... 375
- Building IT Infrastructure to Bid Genco Assets in SMD Markets  
  Don Simpson and Kurt Wissner ................................................................ 376
- Experience with Running Market-Simulation Studies  
  Marta Marmiroli, Yukitoki Tsukamoto and Hiromasa Yoshimoto ................. 377

### Southeast Europe and Regional Electricity Market-Configuring the Power System - PANEL

**Sponsored by:** Energy Development & Power Generation  
**Chair:** T. Hammons, Glasgow University  
  P. Donalek, Montgomery Watson Harza

- Southeast European Power Systems Aspects Overview  
  Trajce Cerepnalkovski ................................................................................ 378
- Review of Electricity Supply and Demand in South East Europe  
  Snezana Mijailovic ...................................................................................... 381
- South-East Europe Transmission System Planning Project  
  Davor Bajs .................................................................................................. 388
- Tele-information System in SEE to Enhance Coordinated Operation and Support the Regional Market  
  Christopher O’Reilley, Savu C. Savulescu and Sudhir Virmani ................... 393
- Role and Value of Hydro and Pumped Storage Generation in a Proposed Regional Electricity Market in Southeast Europe  
  Peter J. Donalek .......................................................................................... 395
PES 2003 General Meeting
Table of Contents

Modeling the Regional Electricity Network in Southeast Europe
Vladimir Koritarov and Thomas Veselka ................................................................. 399
The Electric Power System of Bulgaria - On Its Way to UCTE
Bozhidar Pavlov ........................................................................................................... 405
Romanian Electricity Sector Reform, Market Opening and Challenges
Jean Constantinescu ................................................................................................... 408

Optimization Applications in Power Systems Operations - PAPER

Sponsored by: Power System Operations
Chair: W. Snyder, Siemens
A Method to Identify the Optimal Voltage Control Structure of Electric Power Systems
T. Kumano and M. Takasaki ......................................................................................... 412
Discrete Particle Swarm Optimization Algorithm for Unit Commitment
Zwe-Lee Gaing ........................................................................................................... 418
VAR Optimization and Pricing in Multi-Areas Power System
Xiaofu Xiong and Jizhong Zhu .................................................................................. 425
Optimizing Asset Usage Through Integrated Maintenance Software Systems
Claus Vetter and Thomas Werner .............................................................................. 430
A Multi-Agent Based Dispatching Operation Instructing System in Electric Power Systems
Gengyin Li, Jianwen Ren, Xianghai Xu and Ming Zhou ............................................. 436
Environmental/Economic Power Dispatch Using Multiobjective Evolutionary Algorithms
Mohammad A. Abido ................................................................................................ 441

Track 2 - Risk Management

Market Simulation Programs For the Standard Market Design and Generation/Transmission Planning - Panel

Sponsored by: Power System Planning and Implementation
Chair: J. Yang, ABB, Inc.
Jian Yang, Fangxing Li and Lavelle Freeman .............................................................. 442
Modelling Issues of the Brazilian Market Design
Cynthia Andrade, Ivan Camargo, Dilcemar Mendes, Hugo Nunes and Edvaldo Santana ................................................................. 447
A Power System Assessment Tool for the Deregulated Electricity Market
Gomaa Hamoud.......................................................................................................... 453
Market Based Generation and Transmission Expansions in the Competitive Market
Paola Bresesti, Massimo Gallanti and Dario Lucarella ............................................. 459
LMPSIM – A Chronological Simulator for Security Constrained LMP-based Electricity Markets
Derek Lane .................................................................................................................. 463
PES 2003 General Meeting
Table of Contents

Distribution Reliability - PAPER

Sponsored by: Transmission and Distribution
Chair: M. Waclawik, United Illuminating Company

Classification of Major Event Days

The Reliability Analysis of High Power Switches Composed of Series and Parallel Branches
Mihaela Albu, Esma Gel, Gerald Heydt, Norma Hubele and Daniel James ........................................ 472

Reliability Evaluation of Radial Distribution System Considering Momentary Interruptions
Jae-Chul Kim, Mun-Seok Lee, Jong-Fil Moon, Chang-Ho Park, Sang-Man Park and Sang-Yun Yun .................. 480

Genetic Algorithm Based Network Reconfiguration for Loss Minimization in Distribution Systems
Saw-Yu Ho and Ying-Yi Hong ...................................................................................... 486

Lab VIEW based Implementation of Remedial Action for DC Arcing Faults in a Spacecraft
Robert Button, Ayodele Ishola-Salawu, DMV Kumar, James Momoh and Robert Sowah ...................... 491

Tools and Techniques for Market Monitoring - PANEL

Sponsored by: Power System Analysis, Computing & Economics
Chair: D. Kirschen, UMIST

Electricity Markets Monitoring at the Federal Energy Regulatory Commission
William Hederman........................................................................................................ 499

Market Monitoring: Detection of Anti-Competitive Behavior and Appropriate Responses
Robert Ethier ................................................................................................................ 500

Market Power Mitigation and Standard Market Design
William Hogan ............................................................................................................ 504

Evaluation of Market Power using Agent Based Simulation
Derek Bunn .................................................................................................................. 506

Benchmark Analysis and Competition Policy in the Electricity Industry
Jim Bushnell ............................................................................................................... 509

Overview of Market Monitoring Tools and Techniques
Dave Patton ............................................................................................................... 513

Risk Responsibility for Supply in Deregulated Electricity Markets - The Latin American Case – PANEL ................................................................. 518

Sponsored by: Energy Development & Power Generation
Chairs: I. Camargo, Universidade De Brasilia
H. Rudnick, Pontificia Universidad Catolica De Chile
T. Hammons, Glasgow University

Risk Responsibility for Supply in the Brazilian Energy Market
Ivan Camargo and Dilcemar de Paiva Mendes ........................................................................ 520

Risk Responsibility for Supply in Deregulated Electricity Markets - The Chilean Case
Hugh Rudnick ............................................................................................................. 525
