2003 IEEE Power Engineering Society General Meeting

Conference Proceedings, Volume 3

Track 5
(continued in Volume 4)

13 - 17 July 2003
Toronto, Ontario Canada
# PES 2003 General Meeting
## Table of Contents

### Track 5 - Developments in Power Engineering Technologies

**Assessing the Need To Include Higher Order Terms For Small-Signal (Modal) Analysis - COMBO**

Sponsored by: Power System Dynamic Performance  
Chair: J. Sanchez-Gasca, GE Power Systems Energy Consulting

Explaining and Validating Stressed Power Systems Behavior Using Modal Series  
Naser Pariz, Hasan Modir Shanechi and Ebrahim Vaahedi .................................................................................................................. 1285

Selecting an Initial Condition for Normal Form Analysis  
U.D. Annakkage, Ioni Fernando, Ani M. Gole and Niraj Kshatriya ................................................................................................. 1286

### Generator Stability Model Validation Testing - COMBO

Sponsored by: Power System Dynamic Performance  
Chair: L. Hajagos, Kestrel Power Engineering Ltd

Generator Stability Model Validation Testing  
Les Hajagos .................................................................................................................. 1292

Validation of Dynamic Model Parameters for Stability Analysis  
James Feltes and Leonardo Lima ............................................................................. 1295

Validation of Generator Reactive Capability  
Terry Crawley ........................................................................................................... 1302

Modeling of Combined-Cycle Power Plants for Power System Studies  
Pouyam Pourbeik ...................................................................................................... 1308

Testing and Modeling of Generator Controls  
G.R. Berube and Les Hajagos .................................................................................. 1314

Summary of the SERC Generator Modeling Validation Task Force  
Chris Schaeffer ........................................................................................................ 1323

A Generation Utilities’ Experience with Generator Stability Model Validation Testing  
Joel Barton, Roger Berube and Gord Haines ............................................................ 1326

### Harnessing Untapped Solar Potential Around the World – Panel

Sponsored by: Energy Development & Power Generation  
Chair: T. Hammons, Glasgow University

Solar Electric Power in the Mainstream  
Allen Barnett and Howard Wenger ........................................................................ 1330

Photovoltaics as a Distributed Resource – Making the Value Connection  
Christy Herig ........................................................................................................... 1334

### Power Electronics Building Block Concepts - PANEL

Sponsored by: Substations  
Chair: N. Hingorani, Consultant

Power Electronics Building Block Concepts  
Narain Hingorani ..................................................................................................... 1339

PEBB-Oriented Generalized Representation of Switching Power Converters  
Dushan Boroyevich and Rolando P. Burgos ............................................................ 1344
Control Interface Characterization of Power Electronics Building Blocks (PEBB) in Utility Power System Applications .......................... 1350
Dushan Boroyevich, S. Rosado, Randy Wachal and F. Wang

A H Bridge PEBB for STATCOMs and other VSC Applications
Bjarne Andersen............................................................................. 1356

Power Electronics Building Blocks - a Platform-based Approach to Power Electronics
Peter Steimer .................................................................................. 1360

PEBB Modules In Distributed Generation Applications
Yuri Khersonsky and George Robinson........................................ 1366

Application of AC Switch Power Electronic Building Blocks in Medium Voltage Static Transfer Switches
John Schwartzzenberg.................................................................... 1372

Impact of Load Models On the Power System Dynamic Analysis - PANEL

Sponsored by: Power System Dynamic Performance
Chair: B. Agrawal, Arizona Public Service

Automatic Determination of Parameters in Dynamic Load Models From Normal Operation Data
Sture Lindahl, Inés Romero Navarro and Olof Samuelsson.................. 1375

Impact of Induction Motor Loads in System Loadability Margins and Damping of Inter-Area Modes
Carlos Antonio Barbosa Martins, Camilo Braga Gomes,
Adriano de Andrade Barbosa, Sergio Gomes, Jr., Nelson Martins
and Ricardo Mota Henriques................................................................. 1379

Modeling of Load During and After System Faults Based on Actual Field Data
Isao Iyoda, Katsuhiko Matsuno, John Paserba, Toshihiro Takano,
Koji Temma, Katsuyuki Tomiyama and Seiji Ueoka........................ 1385

Practical Issues in Load Modeling for Voltage Stability Studies
Hamid Hamadani, Kip Morison and Lei Wang................................ 1392

Motor Behavior in a Large Integrated Steel Mill
Goran Drobnjak, Antonio Remo and John Undrill.................................. 1398

An Interim Dynamic Induction Motor Model for Stability Studies in the WSCC
Donald Davies, Dmitry Kosterev, Peter Mackin, Les Pereira, John Undrill
and Wenchun Zhu ........................................................................ 1404

Security and Reliability Aspects of SMD - Panel

Sponsored by: Power System Operations
Chair: W. Snyder, SIEMENS

System Reliability in the Context of SMD
Norris Peterson................................................................................... 1405

Transmission Reliability and Security Under Open Access
Marija Illic................................................................. 1406

Reliability in an SMD Environment
Dean Chapman................................................................................. 1409

Power System Security and Reliability Aspects Under SMD:
The New York Experience
Mayer Sasson .................................................................................. 1411

Risk, Reliability, Cascading, and Restructuring
Rodney Hardiman and Yuri Makarov........................................... 1417

Market Monitoring and Mitigation: Impacts on System Reliability
Robert Thomas ............................................................................... 1430
## PES 2003 General Meeting

Wind Generation Modeling and Controls for Power System Dynamic Performance Part I - COMBO/PANEL

Sponsored by: Power System Dynamic Performance
Chair: W. Wong, ABB

Integration of Large Wind Farms into Utility Grids (Part 1 - Modeling of DFIG)
   David Dickmander, Rodolfo Koessler, Srinivas Pillutla and Lan Trinh ........................................ 1512

Integration of Large Wind Farms into Utility Grids (Part 2 - Performance Issues)
   David Dickmander, Rodolfo Koessler, Pouyan Pourbeik and Willie Wong ......................................... 1520

Modeling wind farms for power system stability studies
   James Feltes, Yuriy Kazachkov and Robert Zavadil ............................................................................ 1526

Transient Stability Studies in Grids with Great Wind Power Penetration,
Modelling Issues and Operation Requirements
   Domingo Beato, Jose L. Fernandez, Ramon Iturbe, Pablo Ledesma, Juan M. Rodriguez, Julio Usola and Jose R. Wilhelmi .................................................. 1534

Generator and Doubly-Fed Induction Generator
   Andreas Petersson, Tomas Petru and Torbjorn Thiringer ............................................................... 1542

T & D Poster Session

Sponsored by: Transmission and Distribution
Chair: B. Johnson, University of Idaho

Optimal Cosine Windowed Algorithms for Harmonic Analysis of Power System
   Hui Xue and Rengang Yang .................................................................................................................. 1548

Fast Hybrid Method of Parallel Tabu Search and Ordinal Optimization
for On-line Capacitor Control in Distribution Systems
   Hiroyuki Mori and Hidenobu Tani ...................................................................................................... 1553

Magnetic Field-Induced Currents in Human Body in The Proximity of Power Lines
   Mousa Abd-Allah ............................................................................................................................... 1559

Power Quality XML Markup Language for Enhancing the Sharing of Power Quality Data
   Shiun Chen and Xiaolin Wang ............................................................................................................ 1565

Performance Study of An Special Protection System
   Tsun-Yu Hsiao, Ming-Chuan Lin, Chan-Nan Lu and Chun-Lien Su ..................................................... 1571

Routing Transmission Lines via Steiner trees
   Chris Coulston and Robert Weissbach ............................................................................................. 1576

Mathematical Modeling and Simulation of Transients in Power Distribution Systems with Valve Devices and Dynamic Loading
   Petro Gogolyuk, Taras Grechyn, Ilya Grinberg and Alexander Ravlyk ................................................ 1580

A Study on the Simple Loop Formation Method of Modern Power System
   Shi Dongyuan, Duan Xianzhong and Li Yinhong ................................................................................ 1586

Evaluation of Grounding System Impedance of a Near Sea Water ITV Electric Power Installation
   Xuan Dai Do, Jacques Fortin, Semaan Georges, Pierre Jean Lagace and Fouad Saloui ......... 1591

Novel Software Architecture for Power Distribution Automation
   R.P. Gupta, Sachchidanand Tiwari and Rajiv Varma ........................................................................ 1598

Application of Box Counting Method-Based Fractal Geometry Technique for Disturbance Detection in Power Systems
   Shyh-Jier Huang and Jeu-Min Lin ....................................................................................................... 1604

Optimal And Adaptive Active Filtering Under Non Stiff and Distorted Voltage Conditions
   Mohammad Reza Rafiei ..................................................................................................................... 1609
# PES 2003 General Meeting

## Table of Contents

A DSP Controlled Hybrid Power Filter Used to Compensate the Harmonics and Reactive Power Caused by Electrical Traction Loads  
Yue Wang, Zhaoan Wang and Jun Yang ................................................. 1615

Wavelet-Based Neural Network for Power Disturbance Classification  
Zwe-Lee Gaing and Hou-Sheng Huang ................................................. 1621

Measurement Placement Method for Power System State Estimation:  
Part I  
Chakphed Madtharad, Sutitichai Premrudeeprachacharn, Duangdi Seanrak and Neville R. Watson ................................................. 1629

An Auto-disturbance Rejection Control Scheme for Hybrid Power Compensators  
Lijuan Cai, Yongqiang Liu, Jie Wu, Zheng Yan and Zhibing Zhou ................................................. 1633

A New Time Domain Positive and Negative Sequence Component Decomposition Algorithm  
Yiqiao Liang .................................................................................. 1638

Magnetic Cores Modeling for Ferroresonance Computations using the Harmonic Balance Method  
Noel Janssens ............................................................................. 1644

A Distributed Parameter model for Grounding Systems in the PSCAD/EMTDC environment  
Gianni Celli and Fabrizio Pilo ......................................................... 1650

A Newton-Raphson Method Based on Eigenvalue Sensitivities to Improve Harmonic Voltage Performance  
Leonardo Tadeu Garcia Lima, Nelson Martins and Sergio Luis Varricchio ................................................. 1656

## Power System Dynamic Performance Poster Session

Sponsored by: Power System Dynamic Performance  
Chair: A. Feliachi, West Virginia University

SDM Hybrid Control Approach for Nonlinear Systems and Its Application to Power Systems  
Feng Liu, Qiang Lu and Shengwei Mei ................................................. 1657

Representation of Power System Load Dynamics with ANN for Real-Time Applications  
Mahinda Vilathgamuwa and Herath Mudiyanselage Wijekoon ................................................. 1665

Robust Damping of Inter-Area Oscillations Through Controllable Phase Shifters Using Global Signals  
Balarko Chaudhuri and Bikash Pal ..................................................... 1673

Fuzzy Logic Based Identifier and Pole-Shifting Controller For PSS Application  
Tamer Abdelazim and O.P. Malik ....................................................... 1680

New Selective Control Strategy of Power System Properties  
Christian Andersson and Bo Eliasson ................................................. 1686

Methodology for Tuning Stabilizers Taken into Account Operating Restrictions  
Juan M. Ramirez ............................................................................ 1692

Computational Enhancement of Genetic Algorithm via Control Device Pre-Selection Mechanism for Power System Reactive Power / Voltage Control  
Usman Aliyu, Ganiyu Bakare, Gerhard Krost and Ganesh Kumar Venayagamoorthy ................................................. 1698

Design of Delayed-Input Wide Area Power System Stabilizer Using the Gain Scheduling Method  
Gerald Heydt and Hongxia Wu ......................................................... 1704

Improvement of Stability Region and Damping of a Power System by Using SSSC  
M.H. Haque and Prechanon Kumkratug ............................................. 1710

An Adaptive Power System Stabilizer Using On-line Self-learning Fuzzy Systems  
Tamer Abdelazim and O.P. Malik ....................................................... 1715

PES 2003 General Meeting
Table of Contents

Transient Stability Preventive Control for Stable Operating Condition with Desired CCT
Yoshinori Kato and Shinichi Iwamoto ................................................................. 1813

A New Thermal Governor Modeling Approach in the WECC
Donald Davies, Dmitry Kosterev, Shawn Patterson, Les Pereira and John Undrill ................................................................. 1814

Lyapunov Function for Power Systems with Transfer Conductances: Extension of the Invariance Principle
Luis F.C. Alberto and Newton G. Bretas ................................................................. 1815

FACTS VSC Applications For Improving Power System Performance - PANEL

Sponsored by: Transmission and Distribution
Chair: B. Mehraban, AEP

Advantages of Voltage Sourced Converter (VSC) Based Design Concepts for FACTS and HVDC-Link Applications
Ronald Pape, Gregory Reed and Masatoshi Takeda ................................................................. 1816

Understanding Grid Integration Issues at Wind Farms and Solutions Using Voltage Source Converter FACTS Technology
Arnold Kehrli and Mike Ross ................................................................. 1822

Eagle Pass Back to Back VSC Installation
Aty Edris, B. Ekehov, David Kidd, Ben Mehraban and Johan Ulleryd ................................................................. 1829

A ±150 MVAr STATCOM for Northeast Utilities' Glenbrook Substation
James Di Luca, Jr., David Hanson, Chris Horwill, Brent Oberlin and Allen Scarfone ................................................................. 1834

VSC Transmission Technologies - The Right Fit for the Application
Michael Bahrman, Jan Johansson and Bo A. Nilsson ................................................................. 1840

Power System Relay Committee # 1 - PAPER

Sponsored by: Power System Relaying
Chair: M.S. Sachdev, University of Saskatchewan

Adaptive Distance Relaying Technique Using On-Line Trained Neural Network
Tamer Abdelazim, O.P. Malik and Ahmed Osman ................................................................. 1848

A Novel Directional Protective Relay using Mathematical Morphology
Zhiqian Bo, Xiangning Lin, Pei Liu and Miles A. Redfern ................................................................. 1854

Genetic Algorithm Approach for Adaptive Data Window Distance Relaying
Tamer Abdelazim, O.P. Malik and Ahmed Osman ................................................................. 1862

Transient Protection of EHV Transmission Line Using Discrete Wavelet Analysis
M. Solanki and Y.H. Song ................................................................. 1868

Using Impedance Measurement to Improve the Reliability of Traveling-Wave Distance Protection
E. Dirks, P.G. McLaren and Vajira Pathirana ................................................................. 1874

Advances in Electric Machinery Development - PAPER

Sponsored by: Electric Machinery
Chair: O. Mohammed, Florida International University

An Iron Core Probe based Inter-laminar Core Fault Detection Technique for Generator Stator Cores
Gerald Kliman, Sang Bin Lee, Mark Lusted, N. Kutty Nair and Manoj Shah ................................................................. 1880
# PES 2003 General Meeting

## Table of Contents

### A New Method for Synchronous Generator Core Quality Evaluation
Gerald Kliman, Sang Bin Lee, Mark Lusted, Kutty Nair and Manoj Shah ............................. 1888

### Modeling and Steady-State Analysis of Stand-Alone Switched Reluctance Generators
Mohamed Al-Khazendar, Mohamed El-Nemr, Mostafa Hassanin and Essam Eddin Rashad ............................. 1894

### A Novel Method to Detect Broken Rotor Bars in Squirrel Cage Induction Motors When Interbar Currents are Present.
Charles F. Landy and Grant H. Muller ............................. 1900

### Prospects for Magnetization of Large PM Rotors: Conclusions from a Development Case Study
P. Curiac, Y.H. Jeong, S.J. Jung and D.H. Kang ............................. 1901

### Identification of Physical Parameters of a Synchronous Generator from On-Line Measurements
M. Karrari and O.P. Malik ............................. 1902

### Substations Technical Session - PAPER

**Sponsored by:** Substations  
**Chair:** H. Abdallah, Arizona Public Service Co

A Nationwide Survey of Recorded Information Used for Calculating Distribution Reliability Indices  
Dan J. Pearson, Michael T. Sheehan and Cheryl A. Warren ............................. 1903

A New Artificial Treatment for the Reduction of Resistance in Ground Electrode  
Luis A. Cisternas, Osvaldo A. de la Fuente, Edward L. Fuentealba, Hector R. Galleguillos, Jorge F. Kasaneva and Hugo E. Martinez ............................. 1904

Improvement in the Performance of On-Load Tap Changer Transformers Operating in Series  
Stephen Potts, Miles A. Redfern and Christopher Smith ............................. 1905

### New Method for Function Categorizing in Numerical Substation Control Systems
Iman Rajaei and Majid Sanaye-Pasand ............................. 1911

### Design and Implementation of a Real-Time Network-based Substation Simulation System
YongChang Gu and Dan Yang ............................. 1917

### Control Schemes of the Inverter-Interfaced Multi-functional Dispersed Generation
Joon-Ho Choi, Il-Yop Chung, Jae-Eon Kim, Seung-Il Moon and Sung-Woo Park ............................. 1924

### Developments in the Application and Design of High Voltage Circuit Breakers - PAPER

**Sponsored by:** Switchgear  
**Chair:** J. Nelson, TVA, Chattanooga, TN

Application of Controlled Switching to 500kV Shunt Reactor  
Current Interruption  
Takayuki Kobayashi, Tadashi Koshizuka, Kozo Matsushita, Nobuyuki Miyake, Susumu Nishiwaki, Ichiro Ohno, Toshiyuki Saida and Shigeyuki Tsukao ............................. 1930

A New Algorithm Enabling Controlled Short Circuit Interruption  
Klaus Frohlich and Anton Poll ... ............................. 1931

A Novel Hybrid Current-Limiting Circuit Breaker for Medium Voltage: Principle and Test Results  
Klaus Frohlich, W. Holaus, K. Kaltenegger and M. Steurer ............................. 1932
## PES 2003 General Meeting
### Table of Contents

**Analytical Approach to SF6 Breakdown Under Transient Conditions**  
Steven A. Boggs, Susumu Nishiwaki and Toshiyuki Uchii .......................................................... 1933

**Effects of Hot SF6 on Post-Arc Circuit Breaker Design**  
Steven A. Boggs, Susumu Nishiwaki and Toshiyuki Uchii .......................................................... 1934

**Optimization of Dead Tank Gas Circuit Breaker Design Based on Quantification of Hot Gas Flow and Dielectric Properties**  
Steven A. Boggs, T. Nakamato, Susumu Nishiwaki, M. Toyoda and Toshiyuki Uchii ......................... 1935

**Decision Support Tools in Restructured Electricity Systems Part I - PANEL**

- **Sponsored by:** Power System Operations  
- **Chair:** E. Vaahedi, Perot Systems

**Evolution Toward Standardized Market Design**  
Kwok Cheung, Xingwang Ma and David Sun ..................................................................................... 1936

**Future of Scheduling and congestion management**  
G. Irisarri, J. Latimer, S. Mokhtari, N. Muller and I. Slutsker .................................................. 1938

**Managing Electricity Market Risk**  
Michael Denton, Ralph Masiello, Adrian Palmer and Petter Skantze ........................................ 1940

**Experience with the Nord Pool Design and Implementation**  
Gerard Doorman, Nils Flatabo, Ove Grande, Hans Randen and Ivar Wangensteen ......................... 1942

**Decision Support Tools for Market Participants**  
Farrokh Albuyeh and Jayant Kumar ................................................................................................ 1944

**Effective Market Monitoring in Deregulated Electricity Market Power and Market Monitoring - CAL ISO experience**  
F.A. Rahimi and A. Sheffrin ......................................................................................................... 1946

**ERCOT’s Implementation of Dynamic Security Assessment**  
Rene Avila-Rosales, Madeleine Gibescu, Hamid Hamadani, Kip Morison, Ali Sadjadpour and Lei Wang ............................................................................................................. 1948

**Decision Support Tools in Restructured Electricity Systems Part 2 - PANEL**

- **Sponsored by:** Power System Operations  
- **Chair:** M. Shahidehpour, Illinois Institute of Technology

**Methods for Managing Uncertainties in the Changing Electric Power Industry**  
Marija Ilic .................................................................................................................................... 1952

**Issues in the Path Toward an RTO and Standard Markets**  
Narayan Rau .................................................................................................................................. 1954

**Experience with PJM’s Market Operation, Design and Implementation**  
Andrew Ott ...................................................................................................................................... 1956

**Risk Assessment in Energy Trading**  
Robert Dahlgren, Jacques Lawarree and Chen-Ching Liu ............................................................ 1958

**A Demand-Side View of Electricity Markets**  
Daniel Kirschen ........................................................................................................................ 1960

**Effective Market Monitoring in Deregulated Electricity Market Power and Market Monitoring - CAL ISO experience**  
A. Sheffrin and and F.A. Rahimi .................................................................................................. 1962
# PES 2003 General Meeting
## Table of Contents

**Wind Generation Modeling and Controls For Power System Dynamic Performance - PANEL Part II**

**Sponsored by:** Power System Dynamic Performance  
**Chair:** R. Guttromson, Pacific Northwest National Lab

- **Designing Controls to Increase Wind Power Penetration in Weakly Connected Areas of the Hellenic Interconnected System**  
  John Kabouris and Costas Vournas ................................................................. 1964

- **Control Systems of Wind Turbine Generators - An Italian Experience**  
  Pozzi Massimo and Corsi Sandro ........................................................................... 1970

- **Dynamic Modeling of GE 1.5 and 3.6 Mw Wind Turbine-Generators for Stability Simulations**  
  Robert W. Delmerico, Nicholas Miller, William W. Price and Juan J. Sanchez-Gasca ................................................................. 1977

- **Control concepts to enable increased wind power penetration**  
  Magni Palsson, John Olav G. Tande, Trond Toftevaag and Kjetil Uhlen ................................................................. 1984
