## Volume 1

### 1. Keynotes

- Life-cycle maintenance strategies for deteriorating structures based on multiple probabilistic performance indicators  
  D.M. Frangopol & L.C. Neves  
  3  
- Culture in construction – “human reengineering”?  
  R.F. Fellows  
  11  
- Influence of the anchorage system and of the deck stiffness on the postcritical behaviour of suspended bridges  
  P.G. Malerba  
  17

### 2. Risk analysis and structural reliability

- Codified design and reliability aspects of structural timber elements  
  T. Keskküla & L. Ozola  
  25  
- Uncertainties of the method of partial safety factors  
  A. Kudzys & E.R. Vaidogas  
  31  
- Prototype testing for reliability-based design  
  S.G. Reid  
  37  
- Microbiology risk and hydraulic of the hot water system  
  Z. Pospíchal & Žabička  
  45  
- A general framework for risk management of stable links  
  F. Petrilli  
  49

### 3. Construction planning and project management

- Improving construction processes: experiences in the field of contact–contract–conflict  
  W. Tijhuis & R.F. Fellows  
  57  
- International procurement of construction materials for the Middle East  
  E. Koehn, H.J. Tohme & A.P. Shukla  
  65  
- Building design evaluation – facility manager’s and designer’s perspectives  
  K. Lueprasert & Y. Kanhawattana  
  69  
- Development of the logistics plans in building construction  
  S.M.B. Serra & O.J. Oliveira  
  75
A design/evaluation approach to building design and construction
T.H. Nguyen & S. Yazdani 81

Organisational and managerial attributes of innovation among firms in the construction industry in the UK: why culture matters?
G. Zawdie, J. Abukhder & D. Langford 85

Lighting design for highway nighttime construction operations
K. El-Rayas & K. Hyari 93

Process analysis of interior finishing and building services works
N. Mine, T. Kunugi & N. Miura 99

Construction of super high-rise composite structures in Hong Kong
Raymond W.M. Wong 107

Design of a buried polyfunctional centre
A. Rago & P. Giura 117

Wall panels for industrialized housing method
S.P.G. Moonen 123

Development of a framework for valuing variations in concrete works
M. Sutrisna, K. Potts & D. Proverbs 129

An estimating system for construction and demolition waste management
A. Touran, J.Y. Wang, C. Christoforou & N. Dantata 137

Steel fabricator involvement in project design
M.J. Horman, M.H. Pulaski, C.M. Hewitt & J.P. Cross 143

Existing and emerging delivery system for construction projects
K.A. Tenah 151

Success factors of partnering in new project delivery models – experience in Switzerland
G. Girmscheid 157

Alternative courses of action for industrialized construction processes in small and medium-sized enterprises
J. Bärthel 163

An industrialized foundation
S.P.G. Moonen 169

Applying the theory of constraints to construction scheduling
J.-B. Yang 175

Simplified simulation system of overlapping CPM networks
A.M. Odeh 181

Planning the installation of steel structures using simulation
G. Uzzi & J. Shi 189

Probability applications in the precedence diagram scheduling method
M.F. Samara & C.S. Putcha 195

The application of simulation modelling in identifying company’s logistic system models
A. Sobotka 199

Resource scheduling of construction projects using a hybrid genetic algorithm model
A.B. Senouci & K.K. Naji 205

The importance of new information technologies in a concurrent design environment
P.J. Bártolo & H.M. Bártolo 211
IT tools for collaborative working in relationally integrated supply chains
O.O. Ugwu, M.M. Kumaraswamy, M.M. Rahman & S.T. Ng

Information technology training: aligning competence with corporate capability
J.S. Goulding, M. Alshawi & A. Alani

E-commerce in the construction industry in Lebanon
T. Mezher, M.A. Abdul-Malak & M. Ajam

Decomposition of data base – modulation for management of designing and construction of highways
M. Knezevic

4. Cost control and productivity management

A Bayesian approach for updating change order uncertainty
A. Touran

Study on the development of the curing system for concrete in construction site
T. Tamura, Y. Tominaga, O. Sakamoto, H. Ueno & H. Sumito

Methodological problems of productivity measurement in the construction industry
J. Iwamatsu & K. Endo

An expert system for construction cost indexing and forecasting
M.F. Samara

Driving down construction project labor cost
H.E. Picard

Production planning and cost optimization for prestressed concrete alveolar slabs
G. Greco, A. Rago & G. Iaconianni

Productivity management, improvement and cost reduction
L.H. Forbes, S.M. Ahmed, M. Hocaoglu & S. Azhar

Design team characteristics in aerospace, construction and product design for co-located and distributed projects
F.T. Edum-Fotwe, A. Thorpe, M.J. Gregory, P.J. Deasley, A.B. Wootton, A.N.W. North & R. Cooper

Advanced developments in semiconductor facility construction
S.J. Eibl

Construction productivity of multistory buildings in developing countries
E. Koehn, P. Shukla & H.J. Tohme

A life-cycle energy model of the UK steel construction sector
J. Ley, M. Sansom & A.S.K. Kwan

Robotics and the construction industry
N. Pires & T.D. Pereira

A review of capital procurement in the UK National Health Service
D.G. Proverbs, M. Sutrisna & G. Riley

Construction techniques for efficient and economical housing
R.K. Jain

Automating quantity takeoff and decision support for in-place reinforced concrete structures
R. Drogemuller, S. Foo, C. McNamara & J. Oliver

Analyses on the productivity of multi-skilled team in the reinforced concrete construction site of the residential buildings
K. Endo, H. Kanisawa & Y. Kimura
Comparative study of UK and Italian refurbishment sites involving demolition activities and structural instability: risk factors and Health & Safety management strategies
B.M. Marino Duffy, C.O. Egbru, C.J. Anumba, A. Gottfried & B. Neale

Integrated risk management for construction system providers
T.A. Busch

Cost and risk management utilizing an integrated master plan
A.R. Minter, D.W. Ebersole, P.D. Howorth, M. Plank, K. Raum & I. Henderson

Three missing elements of construction risk management: a conceptual exploration
C.-Yu Chang & M.-T. Wang

Developing benchmarks for project schedule risk estimation
F.T. Edum-Fotwe & Y. Nielsen

Practical cost management system for construction projects
K.A. Tenah

The cost caused by lack of interoperability in design
C.A. Jacoski & R. Lamberts

The choice of the rib thickness in the mass-production of ribbed R/C floors
L. Fenu

5. Human factor, social–economic constraints on the design process

Reciprocal model of construction safety culture
W.F. Maloney

Impossibility claims in construction projects

Engineering the World Trade Center disaster recovery
D.A. Cuoco

Highest and best use of people
W.L. Kelly

Barriers to constructability in Saudi Arabian construction industry
S. Assaf, O. Jannadi & F. Al-Yousif

Ethics of surveyors – a study of Hong Kong SAR
R.F. Fellows & A.M.M. Liu

Organizational culture of the Chinese construction companies: towards a C-E model
A.M.M. Liu & S.B. Zhang

Environment friendly design of residential buildings in hot-dry climate
R. Ahuja & V.M. Rao

Claim analysis involving multiple compensable factors
A. Singh

How soccer results effects concrete cracking
S.P.G. Moonen

6. Structural optimization and evolutionary procedures

Identification of Strut-and-Tie mechanisms in reinforced concrete structures using the cell method and genetic optimization techniques
D. Baron, S. Noè & G.A. Rassati
Strut-and-Tie model of deep beams with web openings using optimisation technique
H. Guan & J. Parsons

Analysis and optimization of a cable stayed bridge with external prestressing
G. Agostino

Searching for innovative structural layouts by means of graph grammars and evolutionary optimization
A. Borkowski, E. Grabksa, P. Nikodem & B. Strug

An overall approach to structural design of steelworks using genetic algorithms
N. Bel Hadji Ali, J.C. Mangin & A.F. Cutting-Decelle

Optimal arrangement of studded paving block system by multi-objective genetic algorithm
H. Furuta & T. Nishi

Optimal design of space structures with stability constraints
A. Csébfalvi

A design procedure for multi-component structures
Q. Li, G.P. Steven & Y.M. Xie

Discrete Lagrangian method for optimal design of truss structures
D.S. Junag, Y.T. Wu & W.T. Chang

The optimal topology of composite beams: analysis, design and experiment
B. Wethyavivorn & K. Atchacosit

Design optimization of tall steel buildings
L. Catallo, L. Sgambi & S. Tranquilli

Shape optimal design of skeletal structures
B. Harl, M. Kegl, D. Dinevski & M.M. Oblak

Multidimensional design and systemic vision in structural engineering
F. Biondini & A. Marchiondelli

On the design of optimised R/C sections in bending
L. Fenu

7. Shaping structures and form finding architectures

The design of structural systems for geometrically irregular buildings
M. Veltkamp & M. Eekhout

Integrating architectural and structural form-finding processes for free-form digital architectures
T. Kocaturk, C. van Weeren & M.W. Kamerling

An interdisciplinary approach to the design of free-form buildings
M.W. Kamerling & T. Kocaturk

Form finding research: development between empirical and numerical methods
D. Abruzzese & A. Tursi

On the shaping of cable-membranes by using “simulated annealing”
L. Fenu & S. Manca

8. Issues in computational mechanics of structures

Nonuniform torsion of bars of variable thickness
E.J. Sapountzakis & V.G. Mokos

From load path method to classical models of structural analysis
F. Palmisano, A. Vitone & C. Vitone

IX
Algebraic method for sensitivity analysis of eigensystems with repeated eigenvalues

Expression of rotational motion on flexible body
K. Miura, T. Nishimura & T. Yamada 603

Modified modal methods for calculating eigenpair sensitivity of asymmetric systems
Y.J. Moon, I.W. Lee & J.H. Lee 611

Efficient eigensolution method of large structural systems with proportional and non-proportional dampers
H.-J. Jung, J.-S. Jo, I.-W. Lee & M.-G. Ko 617

On static limit analysis using the p-version FEM
F. Tin-Loi & N.S. Ngo 625

Analysis of edge and corner column-slab connections with and without stud shear reinforcement
H. Guan & Y.C. Loo 631

Elastic–plastic large displacement analysis of thin-walled beam type structures
G. Turkalj, J. Brnic & D. Lanc 639

A strain based solid element for plate bending
L. Belounar, S. Benmebarek, M. Guenfoud & A. Charif 645

Study of full composite action in slab-beam systems
N. Chikh & J. Harrop 651

9. Advanced modelling and non-linear analysis of concrete structures

Modelling non-linear behavior of shear walls with damage
S. Yazdani 659

Non-linear analysis of reinforced concrete slabs
B. Belletti, P. Bernardi, R. Cerioni & I. Iori 663

Finite deformation analysis using natural strain (on anisotropy in yield surface under large uni-axial tension and shear)
Y. Kato & Y. Moriguchi 669

The effective length factors for the framed columns with variable cross sections
S.G. Lee, S.C. Kim & Y.J. Moon 677

Development of a continuum-mechanics-based tool for 3D finite element analysis of reinforced concrete structures
H. Hartl 685

Stringer Panel Method: a discrete model to project structural reinforced concrete elements
G. Tarquini & L. Sgambi 693

Design of reinforced structures with Strut-and-Tie model
S. Arangio, L. Catallo & A. Rago 701

Approximate methods for analysis of viscoelastic behavior of concrete structures
D. Veglianti & L. Sgambi 707

Studying of elastic–plastic behavior of concrete ceiling, joints, supports by live loading of concrete ceiling
A. Turk 715

Crack width control in two dimensional reinforced concrete elements
G. Bertagnoli, V.I. Carbone, L. Giordano & G. Mancini 721

X
Effect of cracking and material non-linearities on the dynamic behavior of reinforced concrete beams
K.S. Numayr & S.K. Jubeer
729

Continuous-discontinuous failure analysis in a rate-dependent elastoplastic damage model
A. Simone & L.J. Sluys
737

10. Concrete and masonry structures
Cracking around the interface joint between masonry panels and their supporting reinforced concrete beams in buildings
J.L.M. Dias
745

Restoration and repair of existing masonry structures
W.C. Bracken
753

Mechanical response of solid clay brick masonry reinforced with CFRP strips under eccentric loading
A. Brencich, C. Corradi, E. Sterpi & G. Mantegazza
761

On the numerical analysis of localized damage in masonry structures
J. Alfaiaite, A. Gago & J.R. de Almeida
769

Load carrying capacity of masonry arch bridges
A. Brencich, A. Cavicchi, U. De Francesco, L. Gambarotta & A. Sereno
775

Limit analysis of masonry domes: two case studies
P. Foraboschi & M. Nart
781

ACI shear reinforcement for flat slabs
R.L. Vollum & U.L. Tay
789

Shear behavior of prestressed concrete beams reinforced by CFRP grids bonded on the web surface
A. Yonekura, H. Ito, U. Idehara, Y. Kawauti, K. Era, T. Mihara & K. Zaitsu
797

Rotation capacity in shear crack hinges of R.C. beams
S. Coccia, M. Como & U. Ianniruberto
803

Bond recovery in reinforced high strength concrete after post-fire recuring
R.H. Haddad & L.G. Shannis
811

Ultimate strength of rectangular CFT column
R.V. Jarquio
817

Bonded-in reinforcement for frame node connections
J. Kunz, F. Muenger, H. Kupfer & A. Jaehring
823

11. Steel structures
Minimum stiffness requirements of intermediate transverse stiffeners in plate girders
Y. Ogawa & K. Fujii
833

Experimental noise improvement and vibration attenuation of an old steel-bridge
R. Geier, P. Furtner, G. Magonette & F. Marazzi
839

Elasto-plastic response of a bar structure to oscillatory external agency
K. Hasegawa, T. Nishimura & N. Kayama
845

Water filled steel structures
J.P. Paoluccio
851

Moment-rotation relationships of single plate connections
X. Sun & T.H. Tan
855

XI
Prestressed steel structures: historical and technological analysis
A. Masullo & V. Nunziata 861

Collapse and buckling of sheet piles, modification solution in Mared pump station, ABADAN
A. Turk 867

Effect of number of bay on sway of building frames
B. Ahmed & M. Ashraf 873

CFRP reinforcement design of steel members damaged by fatigue
P. Colombi 879

Buckling strength evaluation of corroded flange of plate girder
T. Kaita & K. Fujii 885

Testing equipment for fatigue and damage tests of steel cords
M. Kopecky, V. Cuth, I. Letko & J. Vavro 893

Performance of bolted semi-rigid connections under cyclic loading in steel portal frames
Y.M. Kim & C.M. Yang 899

Sway estimation of rigid frames using equation
B. Ahmed & M. Ashraf 907

Prestressed steel structures design: a new frontier for structural engineering
V. Nunziata 915

Development of criteria for using of bracing and shear walls in tall buildings
S. Azizpour, M. Mofid & M. Menshari 923

Linear stability bearing capacity analysis of pin-connected steel structures
S.J. Duan, H.M. Jia, S.Y. Li & Z.Y. Liang 927

Author index 933

Volume 2

12. Bridges and special structures

Croatian experience in design of long span concrete bridges
J. Radic, G. Puz & I. Gukov 941

Hydrogen embrittlement of suspension bridge cable wires
K.M. Mahmoud 947

An universal approach to analysis and design of different cable structures
V. Kulbach 951

The Maya suspension bridge at Yaxchilan
J.A. O'Kon 957

Roles of stiffening systems of steel plate girder bridges
E. Yamaguchi, K. Harada, S. Yamamoto & Y. Kubo 965

Continuity diaphragms in continuous span concrete bridges with AASHTO Type II girders
A. Saber, J. Toups & A. Tayebi 969

Modification of walking bridge into semi-heavy load bridge by new steel connection opener
A.A. Turk & B.P. Samani 975

Bridge deck analysis through the use of grillage models
G. Battaglia, P.G. Malerba & L. Sgambi 981

Hybrid truss and full web systems in composite bridges: the SS125 viaducts in Sardinia
M.E. Giuliani 989
