TWENTY-FIFTH NATIONAL
INDUSTRIAL ENERGY
TECHNOLOGY
CONFERENCE

May 13 - 16, 2003
Adam's Mark Hotel
Houston, Texas

W. D. Turner
Conference Director

Host
Energy Systems Laboratory
Texas A&M University

Sponsors
American Chemistry Council
Armstrong International, Inc.
Global Energy Partners & EPRI
Spirax Sarco, Inc.
Texas State Energy Conservation Office
U.S. Department of Energy

Portions or all of this book may be copied with the permission of the
authors and Texas A&M only.

The statements and conclusions contained herein do not necessarily reflect
the statements and conclusions of Texas A&M University, the Texas Engineering
Experiment Station and the Energy Systems Laboratory.

Admission to Texas A&M University and any of its sponsored programs is open to qualified individuals
regardless of race, color, religion, sex, age, national origin, or educationally unrelated handicaps.
TABLE OF CONTENTS

Plant Wide Energy Management & Optimization

“Teamwork plus Technology Equals Reduced Emissions, Reduced Energy Usage and Improved Productivity for an Oil Production Facility,” Garth Booker, Suncor and James Robinson, Automation Applications Inc, LLC ............................................ 1

“Industrial Powerhouse Optimization in the Deregulated Electricity Marketplace,”

“Optimizing the Day to Day Operation of Utility Systems,” Alan Eastwood and Chris Bealing, Linnhoff March .................................................................................. 21

Compressed Air Systems

“Compressed Air 101: Getting Compressed Air to Work,” J. J. Burke and Eric G. Bessey, SAV-AIR, LLC (Abstract Only) ................................................................. 31

“Power Characteristics of Industrial Air Compressors,” Chris Schmidt and Kelly Kissock, University of Dayton .................................................................................. 33

“Using Compressed Air Efficiency Projects to Reduce Peak Industrial Electric Demands: Lessons Learned,” John Skelton, Xenergy (Abstract Only) ........................................ 53

Equipment Issues in Energy Conservation -1

“Recent VOC Control Test Data for a Reactive VOC Converter – Scrubber System for Non-Thermal Control of VOCs,” Mike McGinness, EcoShield Environmental Systems, Inc ................................................................................. 59

“Implementation Of An Integrated Energy Information System In A Large University Campus,” John R. McBride, New Horizon Technologies, LLC, Larry Schuster, University of New Mexico, and Don Rickey, Square D Power Management Operations ...... 77
**Big View Energy Issues**

“State Level Analysis of Industrial Energy Use,” R. Neal Elliott, Anna Monis Shipley, and Elizabeth Brown, the American Council for an Energy Efficient Economy

“A New System of Energy Intensity Indicators for the U.S. Economy Focus on Manufacturing,” Joseph M. Roop, Pacific Northwest National Laboratory

**Future Power Choices**

“Transmission Matter Now: How Will Power Market Regulations Impact the Industrials’ Power Supply Costs and Reliability?” Fred James, Husam Beidas, and Robert Fox, Pace Global Energy Services

**Steam Systems**

“Cash Flow Impacts of Industrial Steam Efficiency,” Christopher Russell, Alliance to Save Energy

“SteamMaster: Steam System Analysis Software,” Greg Wheeler, Oregon State University

“Strategies in Optimizing Condensate Return,” Debbie Bloom, Ondeo Nalco Company ...... 179

American Chemistry Council Award Winners

“Optimization of Operation of a Cogeneration Unit,” Eugene W. Salonek Jr., E. I. DuPont Victoria, Texas ................................................................. 183

“Energy Savings by the Use of Key Energy Variables,” M. L. Merrifield, ExxonMobil Chemical Company ................................................................. 183

“Morris Plant Steam System Improvements,” Robert A. Aegerter, Equistar Chemicals, LP ..... 183

Energy Cost Reduction Opportunities

“Motorola’s Exhaust Optimization Program: Tracer Gas Application for Gas Panel Enclosures,” Harold R. Myart, Jr. and Robert Camacho, Motorola Inc .................................................. 185

“Energy Efficiency Improvements and Cost Saving Opportunities in the Corn Wet Milling Industry,” Christina Galitsky and Ernst Worrell, Lawrence Berkeley National Laboratory ...... 191

“Savings Opportunities in the Restructured Texas Electric Market,” Paul Smolen and Marilyn Fox, Fox, Smolen & Associates (Abstract Only) .................................................. 203

Outsourcing Energy Activities

“Parameter Estimation for Gas Turbine Fault Detection Using Neural Networks,” Steven D. Gabel, Honeywell Laboratories .................................................. 205

Equipment Issues in Energy Conservation -2

“Build, Own, Operate and Maintain (BOOM) Boiler Systems,” Tom Henry, Armstrong Service, Inc (Abstract Only) .................................................. 217
"Outsourced Energy Management – A Trustee Approach," David F. Ciarlone and Thomas W. O’Connor, Pace Global Energy Services, LLC..........................................................219

Labs 21 Program

“Labs21: Improving the Environmental Performance of U.S. Laboratories,” Paul Mathew, Lawrence Berkeley National Laboratory..........................................................229
