1998 Xth PIARC International Winter Road Congress
16-19 March in Luleå, Sweden.
TECHNICAL REPORT, VOLUME 1

Topic 1A - Winter Road Maintenance Policies: Strategy

Topic 1B - Winter Road Maintenance Policies: Organization
Winter Road Maintenance Policies: Strategy
(Topic 1A - Volume 1)

Tsefels, Koit and Varik, Hillar, Estonia,
Effects of the Technology Improvements in Winter Maintenance of Estonian Roads . . . .1

Lapsins, Andris and Kronlaks, Olafs, Latvia,
Latvian Winter Road Maintenance .................................. 7

Dobosi, Tivadar, Timár, András and Tóth, Sándot, Hungary,
Performance of Winter Road Operation Duties on the National Road Network within a Corporate Operation Framework - a Comparison between the Hungarian and EU Practices ...........................................15

Jaquet, Jette and Prahl, Knud Bjørn, Denmark,
Road Standards for Winter Services ................................ 23

Postiglioni, Giannino, Italy,
The Experience of Some Compartimenti in North Italy on the Subject of Winterservices ...........................................35

Fraser, Graham and Drew, Joe, United Kingdom,
Route Selection and Salt Management in Northern Ireland ...........................................41

Danielson, Uno, Sweden,
A Way to Optimise Winter Maintenance ................................ 53

Roussel, Jean-Jacques, France,
General Political Context of Winter Service in France ...........................................59

Paquier, Francois, France,
Winter Service Level: Method of Calculation and Testing ...........................................69

Keranen, Paul F, USA,
Maintenance Research - A Unique Approach to Innovation in Winter Maintenance ...........................................79

Miyamoto, Yasuyuki and Tadao, Mizukami, Japan,
Outline of Winter Road Management Measures in Japan ...........................................91

Cat, Michel, France,
From PIVH to DOVH ..................................................101

Caniggia, Federico and Gillio, Italo, Italy,
Winter Management of a Mountain Highway ...........................................111

Sakai, Takashi, Japan,
Methods of Evaluating the Costs of Snow Removal from Roads ...........................................119

Vallius, Pekka, Finland,
The Effects of Reduced Use of Salt in De-icing of Roads to the Contents of Chloride in Groundwater ...........................................131
Special Winter Road Problems in Urban Areas
(Topic 3 - Volume 3)

Kroeker, Jon, Norway,
Studded Tyres and Public Health “The Road Grip Project” .........................611

Takagi, Hideki and Tsutae, Akinori, Japan,
Winter Skidding Accidents on Road Surfaces Covered with Snow and Ice under Studded-Tire Regulation .........................................................621

Durth, Walter, Bernhard, Markus and Stöckert, Ralph, Germany,
Intensified Snow Removal .................................................................635

Svedová, Dagmar and Kováč, Pavol, Slovakia,
Winter Maintenance on Urban Roads ....................................................647

Laurinavicius, Alfredas and Cygas, Donatas, Lithuania,
Winter Maintenance Problems on the Streets of Lithuanian Cities .............655

Mattsson, Jouni, Finland,
Estimating the Winter Maintenance of a Street on the Basis of Street Properties ....667

Öberg, Odrun, Sweden,
Single Accidents Among Pedestrians and Cyclists in Sweden ..................677

Mikkelsen, Leif and Præhl, Knud Bjørn, Denmark,
Use of Brine to Combat Icy Bicycle Lane Surfaces ..................................687

Valtonen, Jarkko and Mustonen, Jari, Finland,
How to Reduce Street Dust in Spring ....................................................699

Chuichi, Shimomura, Takeshi, Oshita and Yasuyoshi, Ebiko, Japan,
Deicer Spreading Methods for Road Surfaces Following the Prohibition of Spike Tires .705

Maintenance Information and other Support Systems for Winter Road Management
(Topic 4 - Volume 3)

Nakatsuji, Takashi, Fujiwara, Takashi, Hagiwara, Toru and Onodera, Yuki, Japan,
Direct and Indirect Methods for Predicting Slipperiness of Road Surfaces in Winter Using a Neural Network Model .............................................715

Fleege, Edward J and Wambold, James C, USA,
Variable Slip Friction Measurement Techniques for Snow and Ice Operations ..................729

Nordström, Olle, Sweden,
Development and Validation of BV14, a New Twin Track Fixed Slip Friction Tester for Winter Road Maintenance Monitoring in Sweden ............741

Leviääkangas Pekka, Finland,
Improving Winter Road Management Under Euro-regional Project “Viking” ....755
Burtwell, Marilyn, United Kingdom, Assessment of Road Surface Freezing Point Sensors for the UK ..........767

Pani, Bruno and Totaro, Stefano, Italy and Troitsky, Arkady and Khaikine, Michail, Russia, A Radiometric System for Road Surface Condition Monitoring ..........779

Maletka, Grzegorz, Dzienis, Tadeusz, Palya, Marek, Antosz, Marek and Supernak, Szymon, Poland, Integrated System of Meteorological Roads Protection in Poland Based on Intelligent Road Weather Stations ..........787

Ledent, Thierry, Belgium, "Meteo Routes": The Walloon Project of Meteorological Data Control for a Better Service to the Users ..........797

Knudsen, Freddy, Denmark, The Danish Winter Management System ..........805

Randeu, Walter L and Schreiber, Helmut, Austria, Winter Road Management Support by Pulsed Doppler Avalanche Radar ..........817

Muurinen, Ilpo and Kokkinen, Matti, Finland, Winter and Mathematics: The Development and Experience in Finnish Road and Traffic Management ..........827

Kobayashi, Nobuo, Maruyama, Teruhiko and Wada, Jun, Japan, A Prediction System for Winter Road Maintenance and a Study of Service Levels ..........835

Tokida, Ken-ichi, Imacho, Nobuhiro and Kato, Hajime, Japan, Black Ice Sensing System with Optical Fiber Sensor ..........843

Melcher, Karel, Czech Republic, Solving the Problems of Support Systems of the Czech Republic Winter Road Maintenance ..........855

Kwon, Taek Mu and Fleege, Edward J, USA, Automatic Visibility Measurement Methods Based on Video Cameras ..........867

Dahl, Torgrim, Norway, Winter Management System ..........877

Rockvam, Judith, Wikelius, Mark and Fleege, Edward J, USA, Implementing an Integrated Road Weather Information System in Minnesota ..........883

Ask, Bernie and Ask, Tom, USA, Expert System Control of Automated Ice Prevention Equipment for Bridges ..........899

Steinacker, Reinhold and Spreitzhofer, Gerald, Austria, The WELS - Weather Prediction System ..........913

Nelson, Richard J. USA, Road Weather Information Systems - Intelligent Transportation System Applications by the Nevada Department of Transportation ..........921

Interaction between People, Roads and Vehicles (Topic 5 - Volume 3)

Wallman, Carl-Gustaf, Sweden, Driver Behaviour on Winter Roads: A Driving Simulator Study ..........927

Suzuki, Shun-ichi, Asano, Toshikazu and Taketani, Eiichi, Japan, Expressway Traffic Operation in the Winter Season ..........939

Leiren, Kjersti, Norway, Road User Information Service in Norway ..........947

Desmarchais, Pierre, Canada, Assessment of the Effect of Accumulated Snow or Ice on the Retaining Capacity of Parapets under Actual Operating Conditions ..........957

Cabanes, Ariel, France, Winter Serviceability ..........967

Nordström, Ole and Gustavsson, Lars-Erik, Sweden, Experience of Functional Testing of Winter Tyres for Passenger Cars and Heavy Vehicles by Means of the VTI Indoor Flat Bed Test Facility and a Mobile Tyre Test Vehicle ..........977

Kajiya, Yasuhiko, Ishimoto, Keishi and Matsuzawa, Masaru, Japan, ITS Technology for Winter Road Management - ITS/Win Research Program of the Hokkaido Development Bureau ..........989

Sasaki, Mitsuru, Japan, Laser Ray Visible System ..........1003

Schou, Henrik and Antonsen, Lise, Denmark, Interaction between People, Roads and Vehicles in Denmark ..........1013

Enberg, Åsa and Mannan, Shafiqul, Finland, Effects of Road and Weather Conditions on Traffic Flow on a Three-Lane Rural Highway in Finland ..........1019

Gustavsson, Eva and Yakoub, Janet, Sweden, Secondary Environmental Impact due to Winter Road Salting ..........1033

Johansson, Östen, Sweden, An Analysis of Accident Statistics during Three Winter Seasons ..........1043

Amechenko, Vasily, Smirnov, Alexander, Christolyubov, Igor, Shipitsin, Valery and Agalakov, Yuri, Russia, Relationship between Traffic Accident Rate and Pavement Surface Conditions in Different Districts ..........1053
