HERCMA 2001

Proceedings of the Fifth
Hellenic-European Conference
on Computer Mathematics and its Applications

September 20-22, 2001 - Athens, Hellas

E. A. LIPITAKIS
Editor

Volume 2
Volume 2

CONTRIBUTED PAPERS

Caratheodory's Theorem on constrained optimization and comparative statics
E. Drandakis 417

Discrete Frank-Wolfe method for relaxed optimal control problems
I. Chryssoverghi 427

Mixed gradient penalty method for optimal control problems defined by semilinear parabolic equations
J. Coletsos 432

Discrete projected gradient method for optimal control problems defined by semilinear elliptic equations
B. Kokkinis 437

On a modified curvilinear path step-size algorithm
N. I. Djuranovic-Milicic 441

Strategies for optimizing traversals of graphs with random edge profits
E.F. Magirou 444

Structured eigenvalue optimization in distance Geometry
T.G. Nikitopoulos and I.Z. Emiris 451

An interval branch-and-bound algorithm for global optimization using pruning steps
D.G. Sotiropoulos and T.N. Grapsa 455

Categorical models of multisets
A. Syropoulos 460

Self-dual codes, unimodular lattices and orthogonal designs
S. Georgiou and C. Koukouvinos 465

Sign methods for enumerating solutions of nonlinear algebraic systems
I.Z. Emiris, B. Mourrain and M.N. Vrahatis 469

Expected behavior of Bisection based methods for counting and computing the roots of a function
D.J. Kavvadias, F.S. Makri and M.N. Vrahatis 474

</table>
A numerical method to compute up-flowing salty water in a porous medium
F.J. Vermolen and C. Vuik 550

From multidimensional Geometry to machine learning
A. Inselberg 557

Geometric pattern prediction and scheduling of uniform dependence loops
I.Drositis, T. Andronikos, A. Alexandridi, G. Papakonstantinou, N. Koziris 560

Piecewise polynomial collocation method for weakly singular integral equations
A. Pedas 568

Comparative study of numerical methods for a class of integral equations with weakly singular kernel
T. Diogo and P. Lima 574

On functional elimination in Brown's method
J.P. Milaszewicz 582

Expected algorithmic errors at the numerical solution of differential equations
A. Chronopoulos 590

Numerical iterative schemes through stochastic approximation
C.P. Kitsos 594

Efficient iterative biharmonic solvers on a shared memory parallel computer
N.H.M. Ali and A.R. Abdullah 597

Finite Difference schemes and domain decomposition explicit approximate inverses
G.A. Gravvanis 605

Connected mathematical software kernels: A solution for large IVP integration
D. Petcu 613

Informatization kernel of the macroeconomics systems- informational control system
E.N. Desyatirikova, V.G. Khromykh and A.I. Anissimov 621

On Dynamical Model Combination
S.D. Nikolopoulos and P.A. Papakyriazis 627

A simple ERICA type core algorithm to support TCP over ATM
G.I. Mousadis and T.A. Tsiligirides 637

E-Commerce and Computing Applications: A case study for a small publishing firm
A. Liptakis 647
Globally flexible functional forms: the neural cost function
E. Tsionas

Minimum expected loss using Markov chain Monte Carlo
E. Tsionas

Kalman filtering for time series regression with noisy data
D. Papanastasiou and D. Ioannides

A long memory and chaotic model of the London metal exchange (LME) market
E. Panas

An analysis of environmental Kuznets curve using regional time-series data
E. Panas and V. Ninni

The future of TEX
A. Syropoulos

SPECIAL SESSION PAPERS

A vehicle's approach evaluation index: theoretical approach and practical applications
V. Angelis, C. Dimaki and I. Virras

Income distribution: an application to Greek data
X. Balogianni and C. Dimaki

Characterizations of lifetime distributions based on reliability measures
M. Benia and C. Dimaki

Multivariate statistical process control
S. Bersimis and S. Psarakis

Measuring the predictive accuracy of the correlated Gamma ratio method for model selection
S. Degiannakis and E. Xekalaki

Monte Carlo techniques in pricing financial derivatives
N. Demiris

On analyzing demand and making inventory decisions
D. Demetrakopoulou and E. Xekalaki

The economic design of X-control chart: a literature review
V. Dikopoulos and S. Psarakis
Conjugate Gibbs for some non-linear time series  
  S. Giakoumatos, P. Dellaportas and D. Politis  763

Deterministic and stochastic differential equation modeling for electrical networks  
  Y. Kamarianakis and N. Frangos  770

Maximum likelihood estimation for integer valued time series models  
  D. Karlis and E. Xekalaki  778

Survival analysis techniques  
  M. Kondakis and C. Dimaki  784

A classification of statistical approaches to experimental carcinogenesis  
  A. Limakopoulou and E. Xekalaki  790

Effect of estimation of the process parameters on the control limits of the univariate control charts for process dispersion  
  P. Maravelakis, J. Panaretos and Psarakis S.  796

Autoregressive conditional heteroskedasticity models and the dynamic structure of the Athens Stock Exchange  
  F. Margiora and J. Panaretos  803

Using sampling techniques to estimate the de jure population of Greece and apportion parliament seats among electoral districts  
  V. Michalakopoulos and S. Psarakis  812

The use of EWMA control chart for detecting outbreaks and trends in microbes in Tzaneio Hospital  
  I. Monopolis and S. Psarakis  819

Expanding an abridged life table  
  V. Panousis and A. Kostaki  824

A new method for constructing confidence intervals for the index $C_{pm}$  
  M. Perakis and E. Xekalaki  832

Methodology and applications of kernel techniques  
  P. Peristera and A. Kostaki  839

A simulation study on the performance of extreme value index estimators and proposed robustifying modifications  
  Z. Tsourti and J. Panaretos  847
Aspects of estimation procedures at Eurostat with some emphasis in over space harmonisation

N. Tzavidis and J. Panaretos 853

Measuring the effect of financial incentives on a region's development: a survival analysis approach

I. Virras, C. Dimaki and V. Angelis 858

Testing for long-range dependence: The case of the Athens Stock Exchange

N. Frangos and S. Vrontos 865

On some discrete valued time series models based on mixtures and thinning

N. Yiokari, E. Xekalaki and D. Karlis 872

Ruin probability in reinsurance via weak approximation

Y. Zaphiropoulos and M. Zazanis 878

The generalized waring process

M. Zografi and E. Xekalaki 886

The use of statistical quality control techniques in the study of Regional development issues

I. Virras, C. Dimaki and V. Angelis 894

Wavelet Approximations in Cardiology

N.K. Dicheva 903

The HERCMA 2001 Round-Table Discussion 910

Authors List 925
