FIRST CONFERENCE ON
APPLIED ENVIRONMENTAL GEOLOGY (AEG’03)
IN CENTRAL AND EASTERN EUROPE

Abstract volume, Vienna, October 7-10th 2003

M. Kralik, H. Häusler & C. Kolesar (editors)

Dedicated to Univ.-Prof. Erich SCHROLL

BE-228

Vienna, October 2003
CONTENT

Abdel-Hafez, T. & Schlüchter, C.: Geotechnical problems and the damage potential to 15th May City, Cairo, Egypt

Aboughalma, H. & Stüben, D.: Lateral and vertical distribution of platinium group elements (PGE) emitted from car catalytic converters along a German highway

Adamcova, R. et al.: Hydraulic conductivity of karst soils

Alberti, L. & Zanini, A.: Application of the integral pumping test in Milano

Alvarez, R. et al.: A new methodological approach for the exploration of the extended polluted sites

Aston, J.: The Rosia Montana Project, Romania. - How a gold mining investment gives hope to the environment

Behr, O. et al.: River bed morphology assessment of the lower Danube in the common Romanian-Bulgarian river reach (Danube km 845 – km 375)

Biondic, B.: Karst groundwater strategy in Croatia

Birk, S. et al.: Evaluating spring responses to characterise karst conduit systems

Boev, B. & Lepitkova, S.: Soil contamination in the vicinity of Probistip

Borsato, A. et al.: Stable isotope monitoring of Alpine karstic springs in the Trentino province (NE-Italy)

Brauner, M. et al.: RockFor – investigations on shelter efficiency of mountain forests against rockfall

Buxbaum, I. & Kralik, M.: Particulate transport and deposition in a prealpine area

Caputo, D. et al.: Degradation of groundwater resources in the Mediterranean basin: climatic changes or human activities?

Cara, F. & Dema, S.: Heavy metal as indicators of pollution and their impact in the ecosystem of an industrial zone

Chon Hyo-Taek & Lee Jin-Soo: Environmental contamination and risk assessment of arsenic and heavy metals around some abandoned metal mine sites in Korea

Clemens, T.: CO₂ sequestration in oil and gas fields and CO₂ enhanced gas recovery for an example gas reservoir in the Netherlands

Čurlík, J.: The influence of soil properties on distribution and leaching of airborne heavy metals in high mountains

Dangić, A. & Dangić, J.: Lead as environmental geochemical risk in the central and eastern parts of the Western Balkan (SE Europe)

Dangić, A. et al.: Geochemical processes and impacts of some heavy metals to water quality in the system Danube River-groundwater aquifer: Vinci near Golubac (Serbia and Crna Gora)
Dangić, A.: Arsenic in ground-, mineral and thermal waters and rivers in central parts of the Balkan Peninsula (SE Europe): Contents, geochemistry, and environmental impacts

Dangić, A.: Integrative environmental geochemical-geological studies of the Danube River Basin in Serbia and Montenegro (SE Europe)

Denner, M.et al.: Analysis of potentially toxic elements in sediments

Deutsch, R.: Dams in karstic areas – stand firm or yield?

Dragisic, V., Spadijer S. & Milenic D.: Aquifer control techniques in a karst environment, the southeast Serbia case study

Faber, R.: WinGeol: Data preparation for numerical groundwater simulations. How to create an accurate model of the subsurface

Frančišković-Bilinski, S. & Rantitsch, G.: Geochemical and mineralogical dispersion in the Upper Sava river (Slovenia), a preliminary report

Frisia, S. et al.: Holocene climate and environmental changes reconstructed from annually laminated speleothems

Gaisberger, G. et al.: Heavy metals and their biological availability in soils around the historic mining and metallurgy centre of Oberzeiring/Austria

Gavrilita, A. & Gavrilita, D.: Consequences of human impact on landscape in the Republic of Moldavia. Soil processes and land degradation with reference to the last decade

Gavrilita, A. & Gavrilita, D.: The contribution of NATO project to the development and water resources management in the Republic of Moldavia

Gerstbach, G. et al.: Interdisciplinary sediment models in "Austro-Pannonia"

Gosar, M. et al.: Environmental impacts of metal mining in Slovenia

Grath, J. et al.: Model-based risk assessment of Groundwater Quality at Groundwater body level in Austria

Hannich, D. & Hőtzl, H.: Earthquake induced soil liquefaction as a high geo-risk factor

Häusler, H. & Leber, D.: Climatic change in the eastern Himalaya as derived from meteorological data and glacier melt processes

Häusler, H. et al.: Integration of geological and air-borne geophysical data for groundwater prospecting in the Bohemian massif of Upper Austria

Häusler, H. et al.: Risk analysis of geo-hazards in the Bhutan Himalaya

Helios Rybicka, E. & Rybicki, S.: Impact of coal mining on the environment in Poland

Helios-Rybicka, E. & Adamiec, E.: Sediment assessment in the Oder River system; Recommendations for the transboundary Rivers Monitoring
Höfer, G.: «Ältere Deckenschotter Mostviertel»: a study of groundwater resource and quality

Hofmann, T.: Contaminant transport in the unsaturated zone: behavior of colloidal carriers

Hötzl, H. & Neukum, C.: Hazard and risk assessment of karst aquifers

Humer, F. et al.: Austrian longterm integrated monitoring; geochemical cycles in a dolomite karst

Inderbitzin, L. et al.: The geochemistry of recent sediments in the Ova Spìn-Reservoir (Engadin, Switzerland) - tracing human impact

Isermann, K. & Isermann, R.: Intentional "natural" attenuation is an unsuitable measure to mitigate immissions of the reactive compounds of Carbon (C), Nitrogen (N), Phosphorus (P) and Sulphur (S) from the total system nutrition

Isermann, K. et al.: Influence of the duration of floodings on the carbon and nitrogen fraction of soils

Kiss, S.: Reuse of brownfields – a case study of the former "Screw Faktory Neunkirchen", Lower Austria

Klug, H. et al.: Comparison of two different integrative approaches for sustainable water management practices

Knittel, U. et al.: Heavy metal pollution in sediments of the August-2002 floods (Freiberger and Zwickauer Mulde)

Kolesar, C. et al.: Application of "Integral Pumping Tests" for integrative groundwater investigation in Linz-Heilham, Austria

Kollarits, S. & Kuschnig, G.: Decision-support systems for groundwater protection: Innovative tools for resource management

Kopriva, A.: Assessment of iron and manganese migration abilities in mine waters

Koscal, M. et al.: Areas of ecological risk in Serbia

Kostic, N. et al.: Environmental geochemical changes in Pleistocene loess-paleosols in Serbian part of the Pannonian Basin

Kraft, C. et al.: Mining in Northern Romania and heavy metal distribution in sediments of the rivers Szamos and Tisza (Hungary)

Kralík, M.: A strategy for protecting karst groundwater in Austria

Kralík, M. et al.: Austrian Network of Isotopes in Precipitation (ANIP) as a tool for assessing good status in groundwater

Križáni, I. et al.: The role of microorganisms in hypergenous processes in dumps and setting-pits at Banská Štianvnica (Slovakia)

Križáni, I. et al.: Comparison of the ability of heavy metal leaching from hydro-quartzite and from sediments of setting-pits (Banská Štiavnica, Slovakia)
