Quenching and the Control of Distortion

Proceedings of the 4th International Conference on Quenching and the Control of Distortion

20 –23 May 2003

Beijing Xi Jiao Hotel, Beijing, China

Organizer
Chinese Heat Treatment Society (CHTS), CMES

Sponsors
International Federation for Heat Treatment and Surface Engineering (IFHTSE)
Chinese Mechanical Engineering Society (CMES)
ASM International

Cooperator
Houghton (Shenzhen) Co., Ltd
# Table of Contents

## Plenary Reports

**Influence of Carbon Content on Structure and Properties of Carburized Steel Using Different Quenchants Part I** ...................................................... 1  
Malgorzata Przylecka, Wojciech Gęstwa, Poznań University of Technology; Poznań, Poland  
George E. Totten, G.E. Totten & Associates, LLC, Seattle, WA USA  
Józef Olejnik, Seco/Warwick (Poland) Ltd., Świebodzin, Poland

**Influence of Carbon Content on Structure and Properties of Carburized Steel Using Different Quenchants Part II** ................................................................. 8  
Malgorzata Przylecka, Wojciech Gęstwa, Poznań University of Technology; Poznań, Poland  
George E. Totten, G.E. Totten & Associates, LLC, Seattle, WA USA  
Józef Olejnik, Seco/Warwick (Poland) Ltd., Świebodzin, Poland

**Computer Simulation on Quenching of Large-sized Steel Mould Blocks** .................................................. 13  
PAN Jian-sheng, YAO Xin, GU Jian-feng, SONG Dong-li  
Shanghai Jiao Tong University, Shanghai, China

**Critical Heat-Flux Densities, Quenching Intensity and Heat Extraction Dynamics during Quenching in Vaporizable Liquids** .................................................. 21  
Bozidar Liscic, University of Zagreb, Croatia

**The Use of CFD-Modelling for the Development of a New High-Performance Gas Quench Chamber for the Hardening of Carburised Components for the Automotive Industry** .................................................. 29  
Bernd Edenhofer, Franz Bless, Ludger Oimann, Ipsen International GmbH, Kleve, Germany

**Heat Treating Aluminum for Aerospace Applications** .................................................. 35  
D. Scott Mackenzie, Houghton International, Inc, Valley Forge, PA

**Recent Development of the Process Optimization for the Reduction of Deformation: Examples of Prestress Engineering and Surface Nanocrystallization of Materials** .................................................. 45  
Jian LU, LASMIS, University of Technology of Troyes, Troyes, France

**Reduce Distortion via the Analysis of Cooling Processes** .................................................. 47  
Kiyoshi Funatani, Shogetsu-cho 3-31, Mizuho-ku, Nagoya 467-0004 JAPAN

**Prediction of Internal Stresses, Phase Transformations and Research on Numerical Simulation of Quenching** .................................................. 53  
SHI Wei, LIU Zhuang, Tsinghua University, Beijing 100084, China

**Survey of Basic Achievements in the Area of Intensive Steel Quenching** .................................................. 63  
NikoLai Kobasko, Intensive Technologies Ltd, Kiev, Ukraine/IQ Technologies Inc, Akron, USA
Heat Transfer

The Prediction of heating / Cooling Rates in Material Science Investigations ........................................ 87
J.I. Frankel, G.E. Osborne, University of Tennessee, Tennessee, USA

Evaluation of Heat Transfer Coefficient in Jominy End-quench Test ..................................................... 97
M. Narazaki, M. Kogawara, A. Shirayori, S. Fuchizawa, Utsunomiya University, Utsunomiya, Japan

Simultaneous Identification on Multi-positions for Heat Transfer Coefficient in Quenching of Steel .............. 105
Ju Dong-ying, SIMIZU Naoya, MUKAI Ryuji
Saitama Institute of Technology, Fusaiji 1690, Saitama 369-0293, Japan
WATABE Youichi, SUGIMOTO Tsuyoshi
Nissan Motor Co. Ltd., Tsumi-ku 6-1, Yokohama 230-0053, Japan

Measurement and Calculation of the Heat Transfer Coefficient of Dynamic Quenching Oil ...................... 111
CHEN Nai-lu, LIAO Bo, Yanshan University, Qinghuangdao 066004, China

Convection Heat Transfer Coefficients for Axial Flow Gas Quenching of a Cylinder ............................. 115
Roland Wiberg, Royal Institute of Technology(KTH) 10044 Stockholm, Sweden
Noam Lior, University of Pennsylvania, Philadelphia, PA 19104-6315, U.S.A

Study of Surface Heat Flux at Quenching Process of P/M Superalloys .................................................... 121
WANG Xu-qing, Zou Jin-wen, HE Feng, Luo Xue-jun, HU He, WANG Wu-xiang
Beijing Institute of Aeronautical Material, Beijing 100095, China

Modeling & Simulation

Heat Treatment Simulation of High Alloed Tool Steels ............................................................................. 125
SCHUTZENHOFER Wolfgang, WIESER Volker, SCHWEIGER Herbert, KAISER Egon,
SHNEIDER Reinhold,
Böhler Edelstahl GmbH & Co KG, Kapfenberg, AUSTRIA

A Quenchant Discovery Breeding Many Inventions .............................................. 243
  Nori V S N Murthy, Hyderabad, India

Cooling Behaviors of High-Carbon Steel Wires in Lead Bath and Alternatives for Patenting ... 247
  LUO Xin-min, Jiangsu University, Zhenjiang, Jiangsu 212013, P.R.China

Investigation of Influence Factors on Cooling Rate of PVP Quenchant .................... 253
  CHEN Chun-huai, Houghton (China) Co.Ltd, Shenzhen, 518040, China
Residual Stress

Applied Research on the CaCl2 Aqueous Solution Quenching Medium ........................................ 257
LIU Ying-yi, Anshan University of Iron and Steel, Anshan 114002, China

The Technology and Application of Middle-Carbon Alloy Structural Steel's
Intensive Quenching Through Control Time and Temperature In Sodium Chloride Brine ............ 263
ZHANG Yuan, China Juli Group, Hebei Xushui 072550, China

Acoustic Emission during Quenching of 42CrMo5 Steel ......................................................... 267
Janez Grum, University of Ljubljana, Ljubljana, Slovenia

Measurement of Residual Stresses Based on
Microhardness Testing in Non-homogenous Materials ......................................................... 273
DAI Hua, Wuhan University of Technology, Wuhan, Hubei 430063, China;
PAN Chun-xu, Wuhan University, Wuhan, Hubei 430072, China

Crack Propagation of Rolling Contact Fatigue in Ball Bearing Steel due to Tensile Strain ........ 279
Noriyuki Tsushima, NTN Corporation, 411-15 Kawagishi-Chofu Kawanishi-city, 511-0938, Japan

Vibration Stress Relief Treatment for Marine Shafting Made of Bar Steel 35 ......................... 287
SUN Mao-cai, SUN Yu-hang, WANG Ri-kun,
Harbin Institute of Technology, Harbin, 150001, P. R. China

Simulation and Verification of Residual Stresses And Distortion in
Carburizing-quenching Process of a Gear Shaft ................................................................. 291
Ju Dong-ying, ITO Yousuke, Saitama Institute of Technology, Saitama, Japan
INOUE Tatsuo, Kyoto University, Yoshida-honmachi, 606-8501, Japan

Pre-Stressing in Tensioning on Diamond Circular Saw Blade .............................................. 297
LI Guo-bin, LI Chang-long, GUO Quan-mei, WU Yu-hui, WANG Chun-fang,
Harbin University of Technology, Tianjin, 300132, China

Analysis of Surface Residual Stresses Occurring under Different Quenching Conditions .... 301
Janez Grum, Martin Zupančič, Slavko Božič, University of Ljubljana, Ljubljana, Slovenia

50Mn18Cr4WN Retaining Ring Macro Residual Stress Relieving by Pulsating Oil Pressure .... 307
SUN Mao-cai, SUN Yu-hang, WANG Rikun, Harbin Institute of Technology, Harbin, P.R. China

Vibration Stress Relief Treatment for D6AC and D406A Welding Steel Plate ....................... 311
SUN Mao-cai, SUN Yu-hang, WANG Rikun, Harbin Institute of Technology, Harbin, P.R. China

“Distortion Engineering”

“Distortion Engineering” - Distortion Control during the Production Process ...................... 317
F. Hoffmann, O. Kessler, Th. Luebben, P. Mayr,
Stiftung Institut für Werstofftechnik, Bremen, Germany
“Distortion Engineering”: A System-Oriented View on the Distortion of Component-Parts  
Klaus-Dieter Thoben, Dieter Klein, 
Bremen Institute of Industrial Technology and Applied Work Science, Bremen, Germany 
Th. Luebben, B. Clausen, Chr. Prinz, A. Schulz, R. Rentsch, R. Kusmierz, L. Nowag, H. Surm, 
F. Frerichs, M. Hunkel, P. Mayr, Institute for Material Science (IWT), Bremen, Germany 

Influence of the Longitudinal Turning Process on Workpiece Distortion of Rings  
BRINKSMEIER Ekkard, WALTER André, NOWAG Lutz, SÖLTER Jens Foundation Institute for 
Materials Science, Bremen, Germany 

Influence of the Heating Parameters on the Distortion of 
Quench Hardened AISI 52100 Steel Bearing Rings  
O. Kessler, H. Surm, F. Hoffmann, P. Mayr, Stiftung Institut für Werstofftechnik, Bremen, Germany 

Distortion 

Anisotropic Distortion of D2 Tool Steel during Gas Quenching and Tempering  
J. Wei, O. Kessler, F. Hoffmann, P. Mayr 
Stiftung Institut für Werstofftechnik, Bremen, Germany 

Study on Deformation and Control in Quenching Medium Steel Plate  
LI Mou-wei, WANG Feng-li, WANG Bang-wen, ZHANG Shao-ju, ZHUN Qi-jian, LIANG Zhi-yuan 
University of Science and Technology Beijing, Beijing 100083, China 
WANG Yi-de, PEI Quan-ren, WANG Quan, YIN Shi-ping and DENG Zhi-yuan 
Taiyuan Iron and Steel (Group) Co., Ltd., Taiyuan 030000, China 

Heat Treatment and Behaviour of 
New Corrosion Resistant Plastic Mould Steels with Regard to Dimensional Change  
SCHNEIDER Reinhold, 
Committee for Heat treatment of The Austrian Society for Metallurgy, 
c/o Böhler Edelstahl GmbH & Co KG, Kapfenberg, Austria 
PIERER Robert, Montanuniversität Leoben, Leoben, Austria 
SAMMT Klaus, SCHÜTZENHOFER Wolfgang 
Böhler Edelstahl GmbH & Co KG, Kapfenberg, Austria 

Distortion of Parts During Quenching in Conveyer Belt Type Furnace  
LIU Yao-zhong, ZHANG Zeng-qi, Luoyang Bearing Research Institute, Luoyang 471039, China 

Influence of Gas or Oil Quenching on Changes in Shape and Dimension of Gear Wheels  
H Altena, Aichelin Ges.m.b.H., A-2340 Mödling, Austria 
P. Jurci, P. Stolar, ECOSOND s.r.o., Praha, Czech Republic 

Distortion of the Internal Gear by Induction Hardening and Measures of Control  
LU Zhi-ming, NING Xiang-mei 
China First Tractor & Construction Machinery Corporation, Luoyang, Henan 471004, China
