HEAT TRANSFER IN MULTIPHASE SYSTEMS

Introduction
Ed McAssey

IMECE2003-41126
A Model for Predicting Droplet Entrainment at a Quench Front in Thermal Hydraulic Analysis Codes
M. J. Hofowach, L. E. Hochreiter, J. H. Mahaffy, and F. B. Cheung

IMECE2003-41149
EHD Conduction Pump Designed for Flow Control of Parallel Evaporators
Yinshang Feng, Jamal Seyed-Yagoobi, and Subhra Datta

IMECE2003-41248
Analysis of the Thermal Performance of a Loop Heat Pipe
Thiago Dutra and Roger R. Riehl

IMECE2003-41327
Explosive Boiling of Liquid Droplets at Their Superheat Limits
Hong-Chul Park, Gi-Taek Byun, Ho-Young Kwak, and Sung-Kap Cho

IMECE2003-41337
Size Prediction of Spray Drops Disintegrated From Subcooled Liquid Sheet in Condensable Environment
Kwang Uoong Koh and Sang Yong Lee

IMECE2003-41564
Transient Heat Transfer Response During Application of an Electric Field in Convective Boiling of R-404A in a Horizontal Smooth Tube
James E. Bryan

IMECE2003-41604
Hiroyasu Ohtake and Yasuo Koizumi

IMECE2003-41621
Quenching of Hot Wall of Vertical-Narrow-Annular Passages by Gravitational Liquid Penetration
Yasuo Koizumi, Hiroyasu Ohtake, Masanori Tsukudo, and Naoko Sakamoto

IMECE2003-41680
Effects of Noncondensable Gas and Subcooling on the Spray Cooling of an Isothermal Surface
Bohumil Horacek, Jungho Kim, and Kenneth T. Kiger

IMECE2003-41761
A Review of Multiphase Flow and Heat Transfer With Artificial Neural Networks
Mihir Sen and K. T. Yang
Heat Transfer and Pressure Drop for Condensation of Refrigerant R410A at Near-Critical Pressures
Biswajit Mitra and Srinivas Garimella

Flow Regime Identification in Gas-Liquid-Pulp Fiber Slurry Flows Based on Pressure Fluctuations Using Artificial Neural Networks
T. Xie, S. M. Ghiaasiaan, and S. Karrila

Heat Transfer Correlation for Two-Phase Flow in Vertical Pipes Using Artificial Neural Network
A. J. Ghajar, L. M. Tam, and H. K. Tam

Ronald D. Boyd, Ali Ekhlassi, Penrose Cofie, and Hongtao Zhang

Nucleate Pool Boiling of a Surface Active Polymer (HEC) Solution
Juntao Zhang, Raj M. Manglik, and Manish Bahl

Electrohydrodynamically (EHD) Augmented External Condensation for R-134a in a Tube Bundle Heat Exchanger
J. Wu, M. M. Ohadi, S. Thorpe, and J. Qi

Overall Review of Steam Jet Condensation in a Next Generation Reactor Water Pool
Yeon-Sik Kim and Chul-Hwa Song

Measurement of Interstitial Heat Transfer Coefficient During Rapid Phase Change in Porous Media
A. G. Agwu Nnanna

Investigation of the Ice Particles Formation In an Auger Driven Heat Exchanger
K. J. Kluz, E. S. Geskin, D. V. Shishkin, B. Goldenberg, and V. Samardzic

New Effects In Interfacial Heat and Mass Transfer of Boiling and Evaporation in Micro-Scale Porous Materials

The Effect of Nano-Tailored Surfaces on Steam Condensation
S. Vemuri, K. J. Kim, B. D. Wood, S. Govindaraju, and T. W. Bell

THEORY AND FUNDAMENTAL RESEARCH
Introduction
Leslie M. Phinney
IMECE2003-41053
Turbulent Heat Transfer in a Duct With Periodic Wall-Attached Round-Edge Ribs
Majid Molki

IMECE2003-41121
Thermal Convection in a Closed Vertical Rotating Circular Cylinder Heated From the Top
Kamil Kahveci and Mehmet Cem Ece

IMECE2003-41269
An Experimental Study of Radiative Effects on Natural Convection in Air in Convergent Channels
Nicola Bianco, Oronzio Manca, Sergio Nardini, and Vincenzo Naso

IMECE2003-41271
Transient Analysis of Natural Convection Between Inclined Parallel Plates
Assunta Andreozzi, Yogesh Jaluria, and Oronzio Manca

IMECE2003-41276
Effects of Periodic Structures on the Coherence Properties of Blackbody Radiation Field
L. Hu, A. Schmidt, A. Narayanaswamy, and G. Chen

IMECE2003-41308
Thermal Conductivity of Nanocomposite Silicon Aerogels
Benjamin L. Lawson and Taofang Zeng

IMECE2003-41377
Marangoni Instabilities in Microencapsulation
Pravin K. Subramanian and Abdelfattah Zebib

IMECE2003-41508
Two Dimensional Analytical Solutions for Optimization of Convective Annular Fin of Rectangular Profile
Hyung Suk Kang and Benjamin T. F. Chung

IMECE2003-41744
Optimum Rib-to-Rib Spacing to Enhance Forced Convection in the Triangular Duct With Ribbed Inner Surfaces
D. D. Luo, C. W. Leung, and T. L. Chan

IMECE2003-41856
Thermal Boundary Resistance of Thin Metal Films and Thermally Conductive Dielectric Materials
Robert J. Stevens, Andrew N. Smith, Arthur W. Lichtenberger, and Pamela M. Norris

IMECE2003-41862
The Dynamic Characteristics of a Liquid-Gas Interface in Microscale Pores
Junwoo Suh, Yuelei Yang, Frank M. Gerner, and H. Thurman Henderson

IMECE2003-41874
Natural Convection, Conduction and Radiation Dimensional Analysis
M. Davies and T. Dalton

IMECE2003-41890
Conjugate Computation of Transient Flow and Heat and Mass Transfer Between Humid Air and Desiccant Plates and Channels
Hassan S. Al-Sharqawi and Noam Lior
IMECE2003-41899  
Integration of Molecular Dynamics Simulations and Boltzmann Transport Equation in Phonon Thermal Conductivity Analysis  
A. J. H. McGaughey, M. Kaviany, and J. D. Chung

IMECE2003-41939  
The Effect of Support Grid Design on Azimuthal Variations in Heat Transfer Coefficient for Rod Bundles  
Mary V. Holloway, Timothy A. Conover, Heather L. McCluskey, Donald E. Beasley, and Michael E. Conner

IMECE2003-41952  
Enhanced Radiation Tunneling of a Multilayer Structure With a Left-Handed Medium by Surface Plasmon Polaritons  
C. J. Fu, Z. M. Zhang, and D. B. Tanner

IMECE2003-41972  
Effects of Surface and Bulk Polaritons on the Radiative Properties of a Multilayer Structure With a Left-Handed Medium  
K. Park, B. J. Lee, C. J. Fu, and Z. M. Zhang

IMECE2003-42089  
Comparison of Flow Patterns During Flow Boiling in Single (Dh = 333 mm) and Parallel Rectangular Channels (iDh = 207 mm)  
Prabhu Balasubramanian and Satish G. Kandlikar

IMECE2003-42134  
Convective Heat Transfer in a Differentially Heated Enclosure Due to Acoustic Excitations  
Murat K. Aktas and Bakhtier Farouk

IMECE2003-42148  
Thermocapillary Flow Analysis of Levitated Thin Liquid Disk  
Sungho Lee, Kenichi Ohsaka, Alexei Rednikov, and S. S. Sadhal

IMECE2003-42199  
Experimental Investigation of Temperature Annealing Effect on Thermophysical Properties of Carbon Nanotube Arrays  
Theodorian Borca-Tasciuc, Fazeel J. Khan, Claudiu L. Hapenciu, Bingqing Wei, Robert Vajtai, and Pulickel M. Ajayan

IMECE2003-42323  
Research Into Optimal Cooling Strategies for Hot Forging Tools  
Dirk Czechowski, Stephan Naumann, Kathrin Telkamp, and Peter Hustedt

IMECE2003-42754  
Modeling Natural Convection Heat Transfer From a Uniformly Heated Vertical Plate  
Chris J. Kobus, Laila Guessous, and Vinay Raikar

IMECE2003-42853  
Development of Three-Dimensional, Unsteady Natural Convective Flow in a Horizontal Enclosure With a Heated Strip on the Lower Surface and Cooled Top and Side Walls  
Patrick H. Oosthuizen and Jane T. Paul

IMECE2003-43168  
Natural Convection in a Concentric Annulus With a Porous Sleeve  
J. C. Leong and F. C. Lai
IMECE2003-43252
Measurement of the Unsteady Thermal Green's Function in a Boundary Layer Flow: A Preliminary Theory  
Gregg Radtke, Alfonso Ortega, and Barry Ganapol

IMECE2003-43347
A Numerical Study of Turbulent Heat Transfer in Unconfined Impinging Slot Jets  
M. Baris Dogruoz and Alfonso Ortega

HEAT AND MASS TRANSFER IN BIOTECHNOLOGY
Introduction  
John Bischof and Lisa Xu

IMECE2003-41955
Pre-Existing Inflammation Induced by TNF-Alpha Augments Cryosurgery on Human Prostate Cancer  
Bo H. Chao and John C. Bischof

IMECE2003-41967
Study of Vascular Endothelium Damage Due to Freezing  
Aili Zhang, Lisa X. Xu, and George A. Sandison

IMECE2003-41986
Arrhenius Model Thermal Damage Coefficients for Birefringence Loss in Rabbit Myocardium  
John A. Pearce, Karthik Raghavan, and Sharon Thomsen

IMECE2003-41994
In Vivo Experimental Study of Brain Temperature Distribution in Rats During Head Surface Cooling  
Chenguan Diao and Liang Zhu

IMECE2003-42012
Perfusion Measurements Using a Non-Invasive Thermal Probe in a Phantom Test Stand  
Allison Ballmer, Elaine P. Scott, and Otto Lanz

IMECE2003-42044
Modeling of Transient Tissue Temperatures and Biotransport of Vasodilators During Localized Heating  
Cuiye Chen and Robert B. Roemer

IMECE2003-42067
Utilization of Directional Freezing for the Construction of Tissue Engineering Scaffolds  
Jessica A. Preciado, Prathib Skandakumaran, Smadar Cohen, and Boris Rubinsky

IMECE2003-42130
Thermal Dose Control During High Temperature Ultrasound Therapies When Temperature Mediated Perfusion Oscillations Are Present: A Simulation Study  
Dhiraj Aora, Cuiye Chen, Mikhail Skliar, and Robert B. Roemer

IMECE2003-42178
Correlations Between Spray Properties and Heat Transfer Dynamics During Cryogen Spray Cooling  
Odette Ma, G. Aguilar, J. S. Nelson, and G.-X. Wang
