Publisher and Distributor

Foreword

SAMPE EUROPE Organizing Committee
SAMPE EUROPE Scientific Committee
SAMPE EUROPE Members of the Board

## Session 1A: RTM

**Automating the RTM Process to fabricate high Precision, high Quality Composite Components at rapid Production Rates:** M. Liggett, N. Schwendeman, Raytheon Advanced Product Center, McKinney (USA)  
**Investigation of Fabric Saturation in RTM:** B. Gourichon, C. Binétruy, P. Krawczak, Ecole des Mines de Douai, Technology of Polymers and Composites Department, Douai (F)  
**RTM Technology Development: New Methodologies for Process Control Improvement:** A. Alix, E. Benazzi, H. Trétout, Dassault-Aviation, Centre de Développement Exploratoire, Argenteuil (F)

## Session 1B: Non-destructive testing (NDT) I

**Keynote: “Advanced Techniques for non-destructive Inspection of Aerospace Materials and Structures”:** G. Busse, Institute for Polymer Testing and Polymer Science, University of Stuttgart (DE)  
**State-of-the-art Techniques for the ultrasonic Inspection of large area Composite Structures:** R. Freemantle, NDT Solutions Ltd, Chesterfield (UK)  
**Nonlinear Acoustics for Monitoring of Damage in polymer Materials:** I. Solodov, K. Pfeiderer, G. Busse, Institute for Polymer Testing and Polymer Science, University of Stuttgart (DE)

## Session 1C: Thermoplastic Joining

**Welding technologies for a generic carbon fiber reinforced thermoplastic assembly:** M.J. van Wijngaarden, Kok & Van Engelen Composite Structures B.V., The Hague (NL)  
**Effect of Mesh size on Resistance Welding of Thermoplastic Composites using Metal Mesh Heating Elements:** A. Yousefpour, M. Simard, M.-A. Octeau, M. Laramée, M. Hojjati, Institute for Aerospace Research, National Research Council of Canada, Saint Laurent, Quebec (CAN)  
**Experimental Investigation of Resistance Welding of Thermoplastic Composites with Metal Mesh Heating Element:** D. Stavrov, H.E.N. Bersee, Faculty of Aerospace Engineering, Delft University of Technology, Delft (NL)
### Session 2A: Infusion Processes I

**Low Cost Aerospace Composites:**
M. Labordus, Centre of Lightweight Structures, TUD-TNO, Delft (NL)

**Evaluation of Vacuum Infusion Scarf Repairs on GFRP Skins:**
D. Tzetzis, P.J. Hogg, Queen Mary College, University of London, Materials Department, London (UK)

**Infusion utilising grooved Core Materials, a Case Study:**
S. Reuterlöv, R. Jansson, DIAB, Laholm (S)

### Session 2B: Design I

**Fatigue Behaviour of RTM-Laminates:**
E. Ladstätter, Polymer Competence Centre Leoben GmbH, Leoben (A), G. Pinter, Institute of Materials Science and Testing of Plastics, University of Leoben, Leoben (A), W. Billinger, FACC AG, Ried im Innkreis (A), R.W. Lang, Polymer Competence Centre Leoben GmbH (A) and Institute of Materials Science and Testing of Plastics, University of Leoben, Leoben (A)

**Degradation of high Temperature Composites under thermal Spike Loads:**
M. Gan, Centre of Lightweight Structures, TUD-TNO, Delft (NL)

### Session 2C: Marine / Infrastructure

**Design and Building of the T2000 Composite Hovercraft Superstructure:**
M. Mustakangas, M. Hildebrand, FY-Composites Oy, Nokia (FN)

**Smart Composite Plates for Health Monitoring of a Boat Structure:**

**Reinforcing and Monitoring of Concrete Structure with Composites and Fibre Optic Sensors:**
J. M. Kenny, A. Terenzi, Università degli Studi di Perugia, Dipartimento di Ingegneria Civile ed Ambientale, Terni (I)

### Session 3A: The BRITE/EURAM Project (COBRAID)

**COBRAID Project. Development of a cost-effective 3D-Braiding Manufacturing Process for complex shaped High-Performance Composite Products: Material Characterization and Design Optimization:**
A. Chiminelli Sarria, A. Miravete, University of Zaragoza, Departamento de Ingenieria e Infraestructura de los Transportes, Zaragoza (SP), I. Márquez, Airbus Spain, Getafe (Madrid) (SP)

**Development of 2D and 3D braiding Equipment in the COBRAID Project:**
J. Horn, August Herzog Maschinenfabrik GmbH & Co. KG, Oldenburg (DE)

**The COBRAID Project: Developing a cost-effective 2,5D and 3D-braiding manufacturing Process for complex Shapes high-performance composite Products:**
T. Wassenberg, F. A. Kümpers GmbH, Rheine (DE)

**Manufacturing and Testing of a Composite Insulator Flange for a High-Voltage Application:**
R. Lundström, M. Svanberg, A. Holmberg, SICOMP AB, Piteå (S)
Session 3B: Aerospace I

CFRP APU Intake Duct for Megaliner: M. Kleineberg, L. Herbeck, German Aerospace Center, Institute of Structural Mechanic, Braunschweig (DE), A. Brosinger, German Aerospace Center, Institute of Structural Mechanic, Braunschweig (DE) and INVENT GmbH, Braunschweig (DE)

Realisation of a new Compressor Concept by Usage of metal and polymer Matrix Composites for Aeroengines: J. M. Hausmann, DLR – German Aerospace Center, Institute of Materials Research, Köln (DE), F. Kocian, DLR – German Aerospace Center, Institute of Structures and Design, Stuttgart (DE), E. Nicke, DLR – German Aerospace Center, Institute of Propulsion Technology, Köln (DE)

Fabrication Methods for Crash Energy Absorbing Polymer Composite Structures: N A Warrior, T Turner, F Robitaille, C D Rudd, School of M3EM, University of Nottingham, Nottingham (UK)

Session 3C: Nanotechnologies

NANOFUN-POLY: Network of Excellence on nanostructured and functional Polymer-based Materials and Nanocomposites: J. Kenny, University of Perugia, Terni (I)

Carbon Nanotubes and their Composite Materials: W. K. Maser, Instituto de Carboquimica, Zaragoza (SP)

Fabrication of Carbon-Nano-Tube Composite by integrated Hardening (IH) Technique: Y. Hirao, T. Fujii, Doshisha University, Department of Mechanical Engineering, Kyoto (JP)

Nanocomposite Matrices for continuous fiber reinforced thermoplastic Composites.: D.P.N. Vlasveld, Polymer Engineering and Materials (PME), Faculty of Chemical Technology (DCT), In co-operation with the Faculty of Aerospace Engineering, Delft University of Technology, Delft (NL)

Session 4A: Technologies for Carbon Fibre Reinforced Modular Automotive Body Structures (TECABS)

Introduction to TECABS: Technologies for carbon fibre-reinforced Automotive Body Structures: L. Bax, M. van Rijn, Willems & van den Wildenberg, Barcelona (SP)

Micro – Macro structural Analysis of textile Composite Parts: Case Study: B. Van Den Broucke, F. Tümer, S.V. Lomov, I. Verpoest, Department MTM, Katholieke Universiteit Leuven, Leuven (B), L. Dufort, P. de Luca, ESI Software, Lyon (F)

Bladder Moulding Technology for Manufacturing structural automotive Parts: N. Piccirelli, Renault Technocentre, Polymer Engineering Department, Guyancourt (F), C. Binetruy, Ecole des Mines de Douai, Polymer and Composite Technology Department, Douai (F)

Session 4B: Joining / Bonding

Examination of a low Temperature Cure Paste Adhesive as an Alternative to Film Adhesives for Process Cost Reduction: D.S. LeGrand, Henkel Aerospace Corporation, Bay Point (USA)

Key Factors of the Peel Ply Surface Preparation Process: D. K. Klapprott, Loclite Aerospace, Bay Point (USA)

Hybrid nonisocyanate Polyurethane Adhesives: L. Shapovalov, F. Buslov, N. Blank, Chemomol Ltd., Migdal HaEmek (ISR), O. Figovsky, O. Birukov, Polymate Ltd. (ISR)

Damage and Strength Analysis of bolted Joints in CFRP: O. Kyrkach, R. Schaeuble, Fraunhofer Institut für Werkstoffmechanik, Halle/Saale (DE)

Session 4C: Design II

Postbuckling and Failure Analysis of debonded curved Sandwich Panel Subjected to Falcon 2000 Load: J.-P. Marouzé, V. Poggi, Dassault Aviation, St Cloud (F)

A Study of Open-Hole Tensile Strength of S2-Glass/Epoxy Composite: R.M. O'Higgins, G.S. Padhi, M.A. McCarthy, Composites Research Centre Department of Mechanical and Aeronautical Engineering, University of Limerick, Limerick (IRL)

Structural Design and Analysis of Composite Elements for a new concept hydraulic Filter for Aeronautics: L. Torre, E. Frulloni, J.M. Kenny, Material Engineering Center, Terni (I)

Functional Designing of CFRP Precision large-size support Structure: L. Klimakova, A. Polovy, N. Vymorkov, Obninsk Research and Production Enterprise "Technologiya", Obninsk (RU), P. Zinoviev, Institute of Composite Technologies, Moscow region (RU), A. Catinaccio, European Organization for Nuclear Research CERN, Geneva (CH)

Session 5A: Non-destructive testing (NDT) II

NDI Observations on bonded fibre reinforced Specimens under static & fatigue tensile Loading: R.M. Aoki, DLR German Aerospace Center Institute of Structures and Design, Stuttgart (DE)

Session 5D: Infrastructure

Testing and Deployment of FRP in Kentucky's Bridges: I. Harik, University of Kentucky, Lexington (USA)

Non-pultruded Bridge Structures; Process vs. Design: L. Tromp, Centre of Lightweight Structures TUD-TNO, Delft (NL)

Development of a fiber reinforced Bushing for the Maeslant Barrier: L. Van Schepdael, P. Globevnik, Solico b.v., Oosterhout (NL), E. Suister, H. Leendertz, Ministry of transport, public works and water support, Zeistmeen (NL)
**Session 5C: Thermoplastics I**

*Processing of advanced thermoplastic Composites using a novell cyclic thermoplastic Polyester one Part System designed for Resin transfer Molding: M. Rösch, J. Lohmiller, J. Wang, S. Winckler, Cyclics Europe GmbH, Filderstadt (DE)*

*Resin Film Infusion Processing of Cyclic PBT Composites: A Fundamental Study: S. Coll, C.M. Ó Brádaigh, Department of Mechanical Engineering, National University of Ireland, Galway (IRL)*

*E-LFT Process - a new mass-production Process for structural lightweight Parts: A. Ruegg, ESORO AG, Fällanden (CH)*

**Session 6A: Liquid Molding Simulation**

*Modelling the Effect of Fibre Architecture on Permeability for textile Preforms: A. C. Long, F. Robitaille, C. C. Wong, M. Sherburn, School of Mechanical, Materials, Manufacturing Engineering & Management, University of Nottingham, Nottingham (UK)*

**Session 6B: New Materials I**

*Novel Resin System with Superior Process and Performance: W. H. Li, Loctite Aerospace, Inc., Bay Point (USA)*

*Novel electrostatic Prepregging of Fabrics and Tows using Polymer Powders: S. Kenig, E. Werner, Powder Coating Composites Ltd., Kfar-Vradim (ISR)*

*New Prepregs for cost effective, out-of-Autoclave Tool and Component manufacture: M. Steele, The Advanced Composites Group, Heanor (UK)*

**Session 6C: Manufacturing I**

*A Comparison of the Costs of Manufacture of a laminated Composite Component by conventional autoclave and a novel non-autoclave Process: M.G. Bader, School of Engineering, University of Surrey, Guildford (UK)*

*New Developments in Resin Infusion materials using PRIFORM technology: Stitching: C. Lo Faro, M. Aldridge, Cytec Engineered Materials, Wrexham (UK), R. Maskell, Cytec Engineered Materials, Tempe (USA)*

Session 7A: Textile Preforms I

Modelling of Permeability of textile Reinforcements: Lattice Boltzmann Method: S.V. Lomov, I. Verpoest, Department of Metallurgy and Materials Engineering, Katholieke Universiteit Leuven, Leuven (B), T. Peters, D. Roose, Department of Computer Science, Katholieke Universiteit Leuven, Leuven (B)

Structural Analysis Tools for Validating mechanical Test Methods and experimental Results for 3-D woven Composites: A. Bogdanovich, 3TEX, Inc., Cary (USA)

Session 7B: New Materials II

Microcellular biodegradable polymeric Foams produced from supercritical Fluids and nanocomposite Solutions: S. Cotugno, E. Di Maio, G. Mensitieri, Department of Materials and Production Engineering, University of Naples Federico II, Naples (I), S. Iannace, IMCB-CNR Institute for Composite and Biomedical Materials, Naples (I)

Session 7C: Manufacturing II

Automation System for the Production of large Parts: J. Wittig, Kleinmachnow (DE)

The Development of rapidly manufactured low-cost Composite Tooling: D. Jonson, G. Kidson, Center for Advanced Materials, Design and Manufacture Research, Durban Institute of Technology, Durban (ZA), K. Mann, Kentron, a division of Denel, Pretoria (ZA)

Evolving Production and Quality Data with Automatic Ply Verification for Hand-laid Composites: S. Blake, Assembly Guidance Systems, Inc., Chelmsford (USA)

Session 8A: Technologies for the CFRP-Fuselage

CFRP-Fuselage – Ensuring future Competitiveness: M. Kupke, Airbus Deutschland GmbH, Bremen (DE)

Double Skin Composite Fuselage Design – Materials & Process Approaches for Test Article Realisation: C. Rueckert, Airbus Deutschland GmbH, Bremen (DE)

**Session 8B: Design III**

**Optimisation of an inflatable braided Beam:** S.L. Veldman, O.K. Bergsma, A. Beukers, Faculty of Aerospace Engineering, Delft University of Technology, Delft (NL), K. Drechsler, Institut für Flugzeugbau, University of Stuttgart, Stuttgart (DE)

**The practical Application of Finite Element Modeling for the Pultrusion Process:**
J. H. Barron, The Dow Chemical Company, Freeport (USA)

**The synergistic Roles of high Strength Glass Composite and Alumina Ceramic Facing in lightweight composite Armor against armor piercing Projectiles:** D. L. Fecko, D. Murray, Advanced Glassfiber Yarns, LLC, Huntingdon (USA), P. D. Lyle, Advanced Glassfiber Yarns LLC, Aiken (USA)

**Parametric Finite Element Calculations for SME’s:**
P.A.J. de Haan, G.D van der Weijde, Centre of Lightweight Structures TUD-TNO, Delft (NL)

**Session 8C: Automotive**

**Robotically placed continuous Fibre Tow as tailored structural Inserts for over-injection Moulding:** M.D. Wakeman, P-O. Hagstrand, B. Ecabert, J-A.E Månson, Ecole Polytechnique Fédérale de Lausanne, Laboratoire de Technologie des Composites et Polymères, Lausanne (CH), E. Eble, P. Beyeler, DaimlerChrysler, Research and Technology, Ulm (DE)

**Recycling of Thermoplastic Composites in the Automotive Industry:** J. Müller, E. Kramer, University of Applied Sciences Aargau, Department Technik, Mechanical Engineering, Windisch (CH), A. Bacher, Bacher Kunststofftechnik, B.-U. Wulf, Rieter Automotive Division (CH)

**Vacuum moulding of Thermoplastic Composite Sandwich Beams:**
R. Brooks, P. Kulandaivel, C. Rudd, School of Mechanical, Materials, Manufacturing Engineering and Management, University of Nottingham, Nottingham (UK)

**Rheology, Mold Filling and structural FE-simulation of LFT-D and tailored LFT-Structures:**
A. Radtke, Fraunhofer-ICT, Polymer Engineering-Composites, Pfinztal (DE)

**Session 9A: Sandwich**

**Manufacturing of folded Core-Structures for technical Applications:**
K. Drechsler, R. Kehrle, Institute of Aircraft Design, University of Stuttgart, Stuttgart (DE)

**Filling or not filling the Slits in contourable Sandwich Cores with Resin? – Effect on the Properties of the Sandwich Construction:**
L. Berger, Alcan Airex AG, Sins (CH), C. Dransfeld, Dyne Engineering, Lenzburg (CH)

**Processing and Characterization of PET-based Sandwich Panels:**
A. Passaro, P. Corvaglia, S. Corigliano, O. Manni, L. Barone, Department of Materials and Structures Engineering, Consorzio CETMA, Brindisi (I), A. Maffezzoli, Department of Innovation Engineering, University of Lecce, Lecce (I)
Session 9B: Thermoplastics II

The Fabrication and Performance of Ring-Stiffened Cylinders manufactured by a combined in situ automated thermoplastic Filament Winding and Tape Laying Process:
M. A. Lamontia, M. B. Gruber, Accudyne Systems Inc., Newark (USA),
J. F. Pratte, Cytec Engineered Materials Inc., Havre de Grace (USA)
Properties, Processing and Fabrication of Poly(Ether-Ketone-Ketone) Composites:
J. M. Bai, D. Leach, Cytec Engineered Materials, Anaheim (USA), J.
Pratte, Cytec Engineered Materials, Havre de Grace (USA)
Effects of Impact Modifiers on mechanical and microcracking
Properties of PPS Composites: P.P. Parlevliet, H.E.N. Bersee, Delft
University of Technology, Faculty of Aerospace Engineering,
Delft (NL)

Session 9C: Infusion Processes II

Novel Preforming and Moulding Technology for affordable
Composite Aircraft Component Manufacturing: M. Frost, A. Mills,
Centre For Lightweight Composites, Cranfield University (UK)
A-VaRTM Process for primary Aircraft Structure: T. Abe, S.
Nishiyama, K. Hayashi, Mitsubishi Heavy Industries, Ltd. Nagoya
Aerospace Systems, Nagoya (JP), S. Yamane, Toray Co. (JP)
Near Net Shape Manufacturing with Vacuum Assisted Resin
Infusion Process (VARI):
M. Feiler, R. Keck, W. Dudenhausen, German Aerospace Center
(DLR), Institute of Structures and Design, Stuttgart (DE)

Session 10A: Aerospace II

Experience in the Development and Manufacture of Composite
Structures for Aircraft and Rocket-and-Space Engineering:
V.V.Vikulin, N.V.Mukhin, O.N.Komissar, Federal State Unitary
Enterprise Obninsk Research and Production Enterprise
“Technologiya”, Obninsk (RU)
The Applicability and Reliability of unidirectional Carbon Fiber
reinforced Plastic Composites (T-1000G/Epoxy 3651) to Helicopter
bearingless Rotor Flexbeam: F. Alzaidi, T. Ogasawara, M. Takashi
Design and Manufacturing Simulation Environment for
Thermoplastic Composites with Thermoforming Process: G. F.
Nino, O.K. Bergsma, H.E.N. Bersee, Design and Production of
Composite Structures, Faculty of Aerospace Engineering, Delft
University of Technology, Delft (NL)
Creep in Thermoplastic Nano- and Fibercomposites: K. van Rijswijk,
K.H. Boonstra, H.E.N.Bersee, Delft University of Technology, Faculty of
Aerospace Technology, Delft (NL), D.P.N. Vlasveld, S.J. Picken, Delft
University of Technology, Faculty of Applied Sciences and Dutch
Polymer Institute,
Delft (NL)

Session 10B: Textile Preforms II

Mechanics of a novel 3D hybrid Fabric: L. Onal, Erciyes University,
Department of Textile Engineering, Kayseri, (TK), S. Adanur, Auburn
University, Department of Textile Engineering,
Auburn (USA)
Interlacing Wide, Dry, Stabilized Carbon Tapes for Improving
Reinforcement Material’s Structural Performance: F. Ohlsson, Royal
Institute of Technology, KTH, Stockholm (S), P.-Å. Löfgren, IFP
Braided Carbon Fibre Composite Tubes for Energy Absorption using Low Cost Manufacturing Methods: M. Frost, A. Mills, Centre for Lightweight Composites, Cranfield University (UK)

Ballistic Damage Detection in Thermoplastic Composite Laminates by means of embedded Optical Fibers: I. Zivkovic, M. Tomic, Institute of Security, Belgrade (SCG), L. Brajovic, Civil Engineering Faculty, Belgrad (SCG), R. Aleksic, S. Milinkovic, Faculty of Technology and Metallurgy, Belgrade (SCG)

PANELFORM - Production and Forming of Thermoplastic Composite Sandwich Panels into Lightweight Structures: E. Schmachtenberg, S. Hoelzel, J. Strohhaecker, Institute of Plastics Processing, Aachen (DE)

Design and Manufacturing Technologies for large Composite Transportation Structures: J. Carruthers, Advanced Railway Research Centre, University of Sheffield, Sheffield (UK)

The Use of Composite Materials in the Transport Sectors: J. Brandt, EADS Corporate Research Center, Ottobrunn, München (DE), J. Carruthers, Advanced Railway Research Centre, University of Sheffield, Sheffield (UK), K. Drechsler, Institute of Aircraft Design, University of Stuttgart, Stuttgart (DE)

TANGO Lateral Wing Box lower Cover - Engineering and Manufacturing of cost efficient large primary A/C Structure Components: M. Schradick, B. Law, Airbus Deutschland GmbH, Technology Development Structures, Bremen (DE)
