

Editor-in-Chief

Martin Stutzmann, Garching

Regional Editors

Martin S. Brandt, Garching

Peter Deák, Budapest

José Roberto Leite, São Paulo

John I. B. Wilson, Edinburgh

Managing Editor

Stefan Hildebrandt, Berlin

Proceedings

International Conference on
Physics of Light–Matter Coupling in Nanostructures III (PLMCN3)

Acireale, Sicily, Italy

1–4 October 2003

Guest Editors

Alexey Kavokin and Fabrice P. Laussy

Contents

Full text on our homepage at: <http://www.pss-c.com>

This Table of Contents is organized according to the topics presented at the conference. Articles with page numbers marked (a) are reprinted from phys. stat. sol. (a) **201**, No. 4, 625–694 (2004). You may find papers with phys. stat. sol. (a) and phys. stat. sol. (c) citations in the two sections of this volume, separated by coloured sheets for easy orientation.

Note from the Publisher: This issue of physica status solidi (c) has been produced from publication-ready manuscript files, written by the authors using the provided Word or LaTeX templates.

| | |
|--|---------------|
| Preface | 1331 |
| Committees | 1332 |
| | |
| Polariton lasing in a microcavity (<i>invited</i>) Gregor Weihs, Hui Deng, David Snoke, and Yoshihisa Yamamoto | (a) 625–632 |
| Polariton parametric amplifier: pump dynamics in the coherent regime (<i>invited</i>) J. Tignon, A. Huynh, Ph. Roussignol, C. Delalande, R. André, R. Romestain, and Le Si Dang | (a) 633–640 |
| Electron-polariton scattering, beneficial and detrimental effects (<i>invited</i>) P. G. Lagoudakis, J. J. Baumberg, M. D. Martin, A. Qarry, E. Cohen, and L. N. Pfeiffer | (c) 1333–1338 |
| Spontaneous coherence buildup in a polariton laser Fabrice P. Laussy, G. Malpuech, and A. Kavokin. | (c) 1339–1350 |
| Kinetics of the polariton condensate formation in a microcavity (<i>invited</i>) Yuri G. Rubo | (a) 641–645 |
| Quantum beats between light and dark polariton states in semiconductor microcavities I. A. Shelykh, L. Viña, A. V. Kavokin, N. G. Galkin, G. Malpuech, and R. André. | (c) 1351–1356 |
| Exciton–polaritons in a crystalline anisotropic organic microcavity (<i>invited</i>) M. Litinskaya, P. Reineker, and V. M. Agranovich | (a) 646–654 |
| Theory of excitonic Mott transition in double quantum wells (<i>invited</i>) V. V. Nikolaev and M. E. Portnoi | (c) 1357–1362 |
| Exact solutions for a few-particle exciton in the fractional quantum Hall regime D. G. W. Parfitt and M. E. Portnoi | (c) 1363–1366 |
| Monte Carlo simulation of high-order harmonics generation in bulk semiconductors and submicron structures D. Persano Adorno, M. Zarcone, G. Ferrante, P. Shiktorov, E. Starikov, V. Gružinskis, S. Pérez, T. González, L. Reggiani, L. Varani, and J. C. Vaissière. | (c) 1367–1376 |
| Dynamic localization in quantum dots D. M. Basko | (c) 1377–1382 |
| Mechanism of exciton emission ring pattern in doped quantum wells (<i>invited</i>) R. Rapaport, Gang Chen, D. Snoke, Steven H. Simon, Loren Pfeiffer, Ken West, Y. Liu, and S. Denev | (a) 655–660 |
| Guided waves in semiconductor patterned microcavities A. D’Andrea, L. Pilozzi, D. Schiumarini, and N. Tomassini | (c) 1383–1390 |

| | |
|--|---------------|
| Strong electron-phonon coupling regime in self-assembled quantum dots E. Deleporte, S. Hameau, J. N. Isaia, Y. Guldner, O. Verzellen, R. Ferreira, G. Bastard, J. Zeman, and J. M. Gérard | (c) 1391–1396 |
| Experimental evidence of bistability in a semiconductor microcavity M. Gurioli, L. Cavigli, G. Khitrova, and H. Gibbs | (a) 661–664 |
| Recombination dynamics in InGaN/GaN quantum wells: role of the piezoelectric field versus carrier localization A. Vinattieri, M. Colocci, F. Rossi, C. Ferrari, N. Armani, G. Salviati, A. Reale, A. Di Carlo, P. Lugli, and V. Grillo. | (c) 1397–1402 |
| Optical properties of Ga _{1-x} In _x As/GaAs(001) quantum well superlattices: Exciton and polariton dispersion curves N. Tomassini, A. D’Andrea, L. Pilozzi, and D. Schiumarini | (c) 1403–1409 |
| Optical response in multi-quantum wells under Bragg conditions L. Pilozzi, A. D’Andrea, and K. Cho | (c) 1410–1419 |
| Strain-induced correlations between the phonon frequencies of indium nitride O. Briot, B. Gil, B. Maleyre, S. Ruffenach, C. Pinquier, F. Demangeot, and J. Frandon | (c) 1420–1424 |
| The value of the direct bandgap of InN: a re-examination O. Briot, B. Maleyre, S. Clur-Ruffenach, B. Gil, C. Pinquier, F. Demangeot, and J. Frandon | (c) 1425–1428 |
| Topical questions in the photophysics of <i>J</i> aggregates D. Embriaco, D. B. Balagurov, G. C. La Rocca, and V. M. Agranovich | (c) 1429–1438 |
| THz fractal antennas for electrical and optical semiconductor emitters and receptors (<i>invited</i>) Cédric Gaubert, Laurent Chusseau, Alain Giani, Daniel Gasquet, Frédéric Garet, Fabien Aquistapace, Lionel Duvillaret, Jean-Louis Coutaz, and Wojciech Knap | (c) 1439–1444 |
| Recent progress in growth and physics of GaN/AlN quantum dots (<i>invited</i>) N. Gogneau, F. Enjalbert, F. Fossard, Y. Hori, C. Adelman, J. Brault, E. Martinez-Guerrero, J. Simon, E. Bellet-Amalric, D. Jalabert, N. Pelekanos, J.-L. Rouvière, B. Daudin, Le Si Dang, H. Mariette, and E. Monroy. | (c) 1445–1450 |
| Intersubband absorptions in doped and undoped GaN/AlN quantum wells at telecommunication wavelengths A. Helman, M. Tchernycheva, A. Lusson, E. Warde, F. H. Julien, E. Monroy, F. Fossard, Le Si Dang, and B. Daudin | (c) 1451–1455 |
| Spectroscopy of the electron states in self-organized GaN/AlN quantum dots A. Helman, M. Tchernycheva, Kh. Moumanis, A. Lusson, F. H. Julien, F. Fossard, E. Monroy, B. Daudin, Le Si Dang, B. Damilano, and N. Grandjean | (c) 1456–1460 |
| High-power GaN-based semiconductor lasers (<i>invited</i>) M. Ikeda, T. Mizuno, M. Takeya, S. Goto, S. Ikeda, T. Fujimoto, Y. Ohfuji, and T. Hashizu | (c) 1461–1467 |
| II–VI/III–V structures with a heterovalent interface in the active region: New opportunities in band engineering (<i>invited</i>) S. V. Ivanov, V. A. Kaygorodov, S. V. Sorokin, V. A. Solov’ev, A. A. Sitnikova, O. G. Lyublinskaya, Ya. V. Terent’ev, Yu. B. Vasilyev, V. L. Berkovits, A. A. Toropov, and P. S. Kop’ev. | (c) 1468–1476 |
| Yellow-green emitters based on beryllium-chalcogenides on InP substrates (<i>invited</i>) Katsumi Kishino and Ichirou Nomura | (c) 1477–1486 |
| Cathodoluminescence spectral mapping of III-nitride structures (<i>invited</i>) R. W. Martin, P. R. Edwards, K. P. O’Donnell, M. D. Dawson, C.-W. Jeon, C. Liu, G. R. Rice, and I. M. Watson | (a) 665–672 |
| Recent development of InN RF-MBE growth and its structural and property characterization (<i>invited</i>) Yasushi Nanishi, Yoshiki Saito, Tomohiro Yamaguchi, Tsutomu Araki, Takao Miyajima, and Hiroyuki Naoi | (c) 1487–1495 |

| | |
|--|---------------|
| GaN-free transparent structure for ultraviolet light emitting diodes (<i>invited</i>) T. Nishida | (c) 1496–1504 |
| Development of CdSSe/CdS VCSELs for application to laser cathode ray tubes K. P. O'Donnell, C. Trager-Cowan, F. Sweeney, P. I. Kuzenov, V. A. Jitov, L. Yu. Zakharov, G. G. Yakushcheva, V. I. Kozlovsky, V. Yu. Bondarev, and D. A. Sannikov | (a) 673–677 |
| Polarized photoluminescence of exciton–polaritons in free-standing GaN P. P. Paskov, T. Paskova, P. O. Holtz, and B. Monemar | (a) 678–685 |
| GaN based light emitters fabricated on bulk GaN substrates. New class of low dislocation density devices P. Perlin, M. Leszczyński, P. Prystawko, C. Skierbiszewski, M. Siekacz, G. Franssen, S. Grzanka, P. Wiśniewski, I. Grzegory, and S. Porowski | (c) 1505–1510 |
| Electronic and optical properties of [N11] grown nanostructures Michael Povolotskyi, Aldo Di Carlo, and Stefan Birner | (c) 1511–1521 |
| Anisotropic polariton migration and its effect on photoluminescence amplification in a GaAs/AlAs microcavity containing a two-dimensional electron gas (<i>invited</i>) A. Qarry, R. Rapaport, E. Cohen, and L. N. Pfeiffer | (a) 686–694 |
| Stimulated emission due to light localization in the bandgap of disordered opals S. G. Romanov, M. A. Kaliteevski, C. M. Sotomayor Torres, J. Manzanares Martinez, D. Cassagne, J. P. Albert, A. V. Kavokin, F. Laussy, V. V. Nikolaev, S. Brand, R. A. Abram, N. Gaponik, A. Eychmueller, and A. L. Rogach | (c) 1522–1530 |
| Photonic crystal heterostructure waveguides J. Salzman and O. Katz | (c) 1531–1536 |
| Group III-nitride distributed Bragg reflectors and resonant cavities grown on bulk GaN crystals by metalorganic vapour phase epitaxy H. P. D. Schenk, R. Czernecki, K. Krowicki, G. Targowski, S. Grzanka, M. Krysko, P. Prystawko, P. Wisniewski, M. Leszczynski, H. Teisseyre, G. Franssen, J. Muszalski, T. Suski, and P. Perlin | (c) 1537–1548 |
| To the development of the transfer matrix formalism I. A. Shelykh and V. K. Ivanov | (c) 1549–1553 |
| The atypical temperature evolution of the phonon modes of GaAsN U. Tisch, E. Finkman, S. Prawer, and J. Salzman | (c) 1554–1559 |
| Author Index | 1560 |

DOI: The fastest way to find an article online is the *Digital Object Identifier* (DOI).

Starting in Vol. 0, No. 2 (2003), DOIs have been printed in the header of the first page of every article. On the WWW, one can find an article for example with a DOI of 10.1002/pssc.200306190 at <http://dx.doi.org/10.1002/pssc.200306190>.

Please use the DOI of the article to link from your home page to the articles in Wiley Interscience.

The DOI is a result of a cross-publisher initiative to create a system for the persistent identification of documents on digital networks. More information is available from www.doi.org.
