INNOVATIVE DEVELOPMENTS IN ARCHITECTURE, ENGINEERING AND CONSTRUCTION

Edited by
C. J. Anumba
Centre for Innovative Construction Engineering (CICE)
Department of Civil and Building Engineering
Loughborough University
United Kingdom

Millpress
MILLPRESS ROTTERDAM NETHERLANDS 2003
Table of contents

Foreword IX
Conference scientific committee X

**Innovation in design**

From lean construction to lean design - Experience from real-life projects in Denmark
*Thomassen, M.A., Sander, D. & Christoffersen, A.K.*

A framework for the assessment of design constructability
*Zin, R.M., Che Wan Putra, C.W.F. & Abd. Majid, M.Z.*

A framework for building design process modeling with parameter-based design structure matrices
*Pektas, S.T.*

Innovative construction and design in cardboard
*van Iersel, T.M.*

Human vision mimicry for design
*Alves, N. & Bartolo, P.*

**Innovative use of IT in design and construction**

A conceptual virtual prototyping model for hybrid concrete structure performance measurement
*Oloke, D., Olomolaiye, P., Mahdjoubi, L. & Proverbs, D.G.*

Coping strategies to aid effective Information Technology implementation in construction
*Stewart, R.A. & Mohamed, S.*

Determining the optimal cross section of beams
*Griffiths, D.R. & Miles, J.C.*

Enhanced decision-making in construction industry by intelligent technologies
*Ciftcioglu, O.*

A Web-based database system for conceptual integration of free-form building design and production
*Kocaturk, T.*

An integrated architecture for concurrent conceptual design
*Shang, H., Anumba, C.J., Bouchlaghem, D.M., Miles, J.C., Cen, M. & Taylor, M.*

A framework for investigating human factors issues associated with the implementation of new ICT systems in construction organisations
*Soetanto, R., Dainty, A.R.J., Price, A.D.F. & Glass, J.*

Software agents in Internet-based specification and procurement of construction products
*Obonyo, E.A., Anumba, C.J. & Thorpe, A.*

Rebuilding e-learning in construction
*Ahmed, V., Mahdjoubi, L. & Molyneux, S.*
HyCon: A visual prototyping system to support hybrid concrete design
Zhang, X., Goulding, J.S., Sexton, M.G., Aouad, G. & Kagioglou, M.

Mobile communications in construction - Trends and prospects
Anumba, C.J., Aziz, Z. & Obonyo, E.A.

Electronic Document Management Systems in Construction: A project-based case study implementation
Stephenson, P. & Turner, P.

E-Union: A platform for communicating construction material information between e-commerce system
Kong, S.C.W., Li, H. & Shi, J.W.Z.

A knowledge based design system
Bártolo, P. & Bártolo, H.

Innovative construction technologies
Procurement and modelling of the observational method for managing geotechnical uncertainty

Condition monitoring of reinforced concrete structures at risk from reinforcement corrosion
Ing, M., Austin, S. & Lyons, R.

Why stop innovating? Recent weathertightness problems in New Zealand
Gjerde, M.

Innovative approaches to information and knowledge management for the repair of concrete structures
Moodi, F.

Lightweight, blast-resistant doors for retrofit protection against the terrorist threat
Anderson, M., Dover, D. & Vickers, R.N.

Sealed, blast-resistant windows for retrofit protection against the terrorist threat
Anderson, M. & Dover, D.

Novel construction and planning and scheduling methods
Using virtual prototyping to evaluate panelized construction
Johnston, B. & Wakefield, R.

Evaluation on various forecasting models using Artificial Neural Networks (ANN)
Zainun, N.Y. & Abd. Majid, M.Z.

Manpower forecasting in construction - Identification of stakeholders’ requirements
Wong, J.M.W., Chan, A.P.C. & Chiang, Y.H.

Environmental priority evaluation for construction planning
Chen, Z., Li, H. & Wong, C.T.C.

Production scheduling in construction
Thiengburanathum, P., Wang, Y., Diekmann, J.E. & Molenaar, K.

Environmental quality and the productive workplace
Clements-Croome, D.J.

Learning and innovation
Learning from biological systems
Bártolo, H. & Bártolo, P.

George Mason University Intelligent Educator
Oguejiofor, E., Kicinger, R., Popovici, E., Arciszewski, T. & De Jong, K.
Innovative approaches to construction and project management

Integrating project management applications as Web services
Cheng, J., Law, K.H. & Kumar, B.

Clients’ feedback and its importance in professional services firms
Fong, F.S.W.

Utilizing architectural space programming for early cost estimating: A Web-based solution for UAE healthcare projects
Abdou, A., Lewis, J. & Radaideh, M.

A comparison of risk analysis techniques in construction project management
McCowan, A. & Mohamed, S.

Using learning curve models to estimate labor time
Taemthong, W.

Strategic client briefing using performance indicators: A case study
Smith, J. & Wyatt, R.

A novel approach towards decision-making in the valuation of variations
Sutrisna, M., Potts, K. & Proverbs, D.G.

Improving safety risk analysis through the application of case based reasoning concepts
Goh, Y.M. & Chua, D.K.H.

Supporting construction processes using workflow technologies

A project requirements definition tool for the AEC industry
Hansen, K.L. & Vanegas, J.A.

Innovation and industry practice

Determinants of innovations in the building and construction innovation system
Bougrain, F.

A review of the use of demonstration projects to achieve widespread adoption of innovative practices
Gray, C. & Bowman, N.

Informal communication networks and the diffusion of innovations in UK construction projects: A research design
Larsen, G.

Why isn’t construction more innovative?
Cripps, A.

Innovation adoption behaviour in the construction sector: The case of the Queensland road industry
Manley, K. & McFallan, S.

Innovation in information and knowledge management

Knowledge management and e-business initiatives - Deriving an appropriate synergy for the benefit of the construction industry
Vines, M. & Egbu, C.

Knowledge management and the strategic development of the architectural firm: A case study
Heintz, J.L.

Better information management approach for construction joint ventures in China
Hao, J.J.L., Scott, D. & Hills, M.
Knowledge management for small and medium enterprises - Issues concerning culture and Information Technology
Hari, S., Egbu, C. & Kumar, B.

A new framework for strategic information systems planning in construction
Gyampoh-Vidogah, R. & Moreton, R.

Innovative approaches to project delivery
ConMBSCM: Construction Mobile-Based Supply Chain Management system
Lin, Y-C., Lin, S-T. & Tserng, H.P.

Relationally integrated value networks

Determinants of trust and relationship commitment in supply chain partnerships
Mohamed, S.

Improving design fragmentation in the construction industry: Value engineering approach
Che Wan Putra, C.W.F. & Ho, B.K.

Identifying the issues associated with the optimal delivery of globalised infrastructure services
Duffield, C.F., Baldwin, A.N., Wood, D. & Young, D.M.

Changing perceptions of value in construction standardisation and pre-assembly
Blismas, N., Gibb, A., Pasquire, C. & Aldridge, G.

Negotiated design and build: The Malaysian experience
Rashid, K.B.A.

New capital procurement in the NHS: A case study of Sandwell Healthcare Trust
Proverbs, D.G. & Riley, G.

Foreign contractors’ design-and-build model in China
Xu, T.

Refurbishment of public housing - The Singapore experience
Wong, C.W.

Innovative construction processes
A system’s model for maintenance support and decision making in building services systems
John, G.A., Loy, H.M., Clements-Croome, D.J., Fairey, V. & Neale, K.

Performance metrics to encourage change in the construction industry
Melia, K. & Dooley, L.

An innovative approach to the assessment of change implementation in construction projects

A model for integrated building design process management
Vieira Romano, F., de Oliveira, R. & Back, N.

The cultural Web in business improvement - An industrial case study
Beatham, S., Anumba, C.J. & Thorpe, T.
