# TABLE OF CONTENTS

**Foreword** ........................................................................................................... i

**Organization** .................................................................................................. ii

**International Advisory Committee** ................................................................ ii

**Table of Contents** .......................................................................................... iii

## KEYNOTE & INVITED PAPERS ............................................................................. 1

**Role of Aerodynamic Investigation for Structural Design of Bridges** .................. 3

* Naruhito Shiraishi

**Cable Aerodynamics of Cable Stayed Bridges** .................................................. 21

* M. Matsumoto

**Diagnosis of a Sick Building by the Wind Doctors** .......................................... 43

* Robert N. Meroney, David E. Neff and Cheng-Hsin Chang

**Design of Tall Residential Buildings in Singapore for Wind Effects** ...................... 53

* T. Balendra and Ma Zhou

**Quasi-static Wind Load Combinations for Buildings** ......................................... 61

* Yukio Tamura, Hirotoshi Kikuchi and Kazuki Hibi

**Dynamic Measurements on Tall Buildings and Structures** ............................... 69

* K. C. S. Kwok and P. A. Hitchcock

**Brancusi Endless Column, Romania: Dynamic Response and Reliability under Wind Loading** ................................................................. 79

* G. Solari, D. Lungu, Gianni Bartoli, M. Righi, R. Văcăreanu and A. Villa

**Buffeting Response of Long Span Cable-supported Bridges under Skew Winds** 87

* Y. L. Xu, Le-Dong Zhu and H. F. Xiang

**Wind Pressure on a Roof Tile** ............................................................................ 97

* H. Kawai and H. Nishimura

**Computer Modeling of Tornado Forces on Buildings** ...................................... 105

* R. Panneer Selvam
Present and Future of Wind Power Utilization in Japan ........................................ 115
Izumi Ushiyama and Yasuyuki Nemoto

WIND DAMAGE ASSESSMENT / CFD ................................................................. 125

Computation of Failure Probability of Building Systems due to Cyclonic Winds .......... 127
A. Meher Prasad, Devdas Menon and J. Phani Ramakrishna

Real-time Estimate of Damage due to Cyclonic Winds ........................................... 135
A. Meher Prasad, Satyanarayana Kalidindi, Devdas Menon, Koshy Varghese, V. P. Christopher Charlesraj and Battu Sriama Krishna

Computational Analysis and an Application of Wind Environmental Effects
for High-rise Buildings .................................................................................. 143
Yung Bea Chung and Seonuk Na

Numerical Simulation of Flow Past 2D Hill .......................................................... 151
Jaeyong Chung and Bogusz Bienkiewicz

Modelling State-of-knowledge Uncertainties in Probability and Characteristics of
Wind-borne Missile Impact ............................................................................. 159
Egidijus R. Vaidogas

WIND TUNNEL MODELING ............................................................................. 167

Simulation of Turbulent Flow in a Wind Tunnel of Multi-fan Type .................... 169
S. Ozono, H. Miyagi and A. Nishi

PIV Measurements on the Flow Characteristics around a Low-rise Building Model .... 177
Ho Seong Ji, Jae Min Choo and Kyung Chun Kim

Analysis Methods for Integral Length of Turbulence ......................................... 185
Jianbin Pang, Y. J. Ge and Ye Lu

Effects of Free End Shape on the Flow Structure around a Finite Circular Cylinder .... 193
Cheol-Woo Park and Sang Joon Lee

BLUFF BODY AND BRIDGE AERODYNAMICS (M. MATSUMOTO) ................. 201

Aerodynamic Characteristics of 2-box Girder with Windshield .................... 203
Hideki Shimodoi, Tamami Oryu and Koichiro Fumoto
Prediction of Flutter Characteristics of Rectangular Cross-sections by $k$-$\epsilon$ Model .......... 211
Kenji Shimada, Takeshi Ishihara and Toshihiro Wakahara

Spanwise Coherent Structure of Surface Pressure and Velocity Fluctuation for Buffeting Force Evaluation of 2-D Bluff Body ................................................ 219
M. Matsumoto, H. Shirato, T. Haramura, Y. Odawara and Y. Matsuura

Wind Tunnel Experiments and 3-D Flight Formulation of Trajectory Analysis of Golf Ball ...... 227
Taketo Mizota, Takeshi Naruo, Hitoshi Shimozono, Hiroaki Konishi,
M. Zdravkovich and Fuminobu Sato

Aerodynamic Improvement of One Box Girder for Super Long Suspension Bridge ............ 235
Shinsuke Tokoro, Akihiro Honda, Ichiro Masuda, Yukihiro Nakashima,
Jun Murakoshi and Koichiro Fumoto

A Study on Static Aerodynamic Forces of Box Girders Using Computational Fluid Dynamics ........................................................................................................ 243
Shigeru Watanabe, Hiroo Inoue and Koichiro Fumoto

Aerodynamic Study on Box Girder Section with Windshields for Super-long Suspension Bridge .......... 249
Takuya Murakami, Katsuakii Takeda, Rokusui Yui, Jun Murakoshi and Koichiro Fumoto

Flutter Stabilization of Long Span Bridges ................................................................. 257
M. Matsumoto, Hiromichi Shirato, Rikuma Shijo, Akitoshi Eguchi and Tetsuya Hikida

Wind Tunnel Test for a Nielsen Bridge Using Inclined Plates .................................................. 265
Hidesaku Uejima, Kazutoshi Matsuda, Shinji Takamori, Katsuya Ogihara, Hiroki Wakisaka,
Hiroshi Terada and Toru Higuchi

Aerodynamic Characteristics & Stabilization of Two Edge-girders for Long Span Cable-stayed Bridges ................................................................. 273
Yoshiyuki Daito, Takafumi Takeuchi, Minoru Sakaida and M. Matsumoto

Aerodynamic Properties of Egret Bridge with I-girders Cross-section .......................... 281
F. Nagao, H. Utsunomiya, M. Noda and K. Negayama

On Cable Aerodynamics - Field Observation and Wind Tunnel Test ..................................... 289
M. Matsumoto, Tomomi Yagi, Seiichiro Sakai, Jun Ohya and Takao Okada

Numerical Investigation on Stabilizers Installed in Slotted Box Girder of Suspension Bridge ................................................................. 297
Shuji Shirai and Toshio Ueda
A Further Study on Prediction of Vortex-induced Oscillation of Bridge Girders with Span-wise Varying Geometry
Takehiko Harada, Takeshi Yoshimura, Yoji Mizuta, Takahisa Tanaka, Takaaki Hashiguchi, Shinji Noda and Makoto Sudo

A Stochastic Typhoon Simulation Model and the Possibility of its Application to the Insurance Industry in Asia
Hiroyuki Watabe and Masaru Matsumoto

First Excursion Probability in Dynamic Responses of a Tall Building to Fluctuating Wind Loads
Jong-Seop Oh, Young-Moon Kim and Jong-Gil Jeon

Acrosswind Pressure Distribution on a Rectangular Tall Building
Young-Moon Kim, Ji-Eun Cho and Han-Young Kim

Cable Aerodynamics: The State-of-the-Art
Shaohong Cheng and Hiroshi Tanaka

Structural Behaviour under Wind Loading of a 90m Steel Chimney
Pär Tranvik and Göran Alpsten

Aerodynamics of Dry Inclined Cables
Shaohong Cheng and Hiroshi Tanaka

Fatigue Design of Preloaded Bolted Flange Connections in Wind Turbine Steel Towers
Herbert Schmidt and Alexander Jakubowski

Acceleration Responses of Acrovista to Wind Loads
Young-Moon Kim, Jong-Kook Kim, Jong-Soo Kim and Ki-Pyo You

Buffeting Characteristics of Suspension Bridges
Saeid Pourzeynali and T. K. Datta

Effects of TMD on Buffeting Response of a Bridge Pylon
Haili Liao, Yonglin Jiang and Yongle Li

3-D Simulation of Turbulence Fields Based on Turbulence Principal Components
F. Tubino and G. Solari

Study on the Stability of Catwalk of Suspension Bridges
Shixiong Zheng and Haili Liao
WIND LOADS ON STRUCTURAL SYSTEMS ................................................................. 417

Pressure Distribution on Curved Canopy Roof .................................................. 419
M. B. Natalini, O. Canavesio, B. Natalini and M. J. Paluch

Reliability Analysis of Temporary Scaffolding System in Strong Winds behind Scaffolds .... 427
Katsutoshi Ohdo, Yasumichi Hino, Songpol Phongkumsing and Ahsan Kareem

Non-stationary Coupled Buffeting Analysis of Long-span Bridges ...................... 435
Gao Liu and Jiahao Lin

A Study on the Characteristics of Surface Pressure of Rectangular Cylinder in Atmospheric Boundary Layer ........................................................................................................ 443
Jwo-Hua Chen and Jih-Chang Chen

Wind Tunnel Studies on Wind Pressure Loads on Water Tanks in Terrain Category II .... 451
M. Paramasivam and K. Jayaraman

Wind Pressure Acting on Scaffolds Erected Alongside of the Building with Holes in Exterior Walls ...................................................................................................................... 463
Yasumichi Hino, Songpol Phongkumsing, Katsutoshi Ohdo and Seiji Takanashi

Application of EPG Model to Simulation of Pressure Fluctuations on a Square Building .... 471
Nag-Ho Ko, Dong-Hwan Kim and Young-Moon Kim

WIND-STRUCTURE INTERACTIONS ........................................................................ 479

Simulation of Aerodynamic Behavior of Structures by means of New Hybrid Vibration Technique ...................................................................................................................... 481
Makoto Kanda, Ichiro Hirata, Tetsuo Matsuyama and Eizo Maruta

Flutter Control by Bridge Configuration of Long-span Suspension Bridge .......... 489
Toshio Miyata, Hitoshi Yamada and Hiroshi Katsuchi

Effect of Corner Cutting on Wind Load and Response of RC Stack ..................... 497
Kang-Pyo Cho, Yukio Tamura, Noriaki Okamoto and Katsutoshi Yoshida

Ground Roughness Effects on the Flow around a Building .................................... 505
Aishe Zhang and Ling Zhang

Acrosswind Aerodynamic Damping of Rectangular Tall Buildings ....................... 515
Chii-Ming Cheng and Yi-Chang Chiang
