20. QoS-based Signaling for Traffic Engineering
Tae-IL Kim, Jeong-Ju Yoo, Hyeong-Ho Lee (ETRI, Korea), and Seong-IL Jin (Chung-Nam Univ., Korea) ..................................................515

21. A Development Platform of the WDM/SCM FTTH
Jeong-Ju Yoo, Tae-Yeon Kim, Hyun-Ho Yun, Nam-Uk Kim, and Byoung-Whi Kim (ETRI, Korea) ......520

22. NGN Architecture for Supporting Composite Services in NGN
Jeong-Yun Kim, Kyung hyu Lee, Sanggi Kim (ETRI, Korea) ..................................................524

23. All CMOS Current-Mode Exponential Function Generator
Quoc-Hoang Duong, Hoang-Nam Duong, Trung-Kien Nguyen, Lee Sang-Gug (Information and Communication University, Korea) ..................................................................................528

24. Pseudo-Exponential current-to-Voltage converter
Quoc-Hoang Duong, Hoang-Nam Duong, Trung-Kien Nguyen, Lee Sang-Gug (Information and Communication University, Korea) ..................................................................................532

25. Implement Role-Based Access Control with Attribute Certificates
Wei Zhou, Christoph Meinel (University of Trier, Germany, Germany) ...........................................536

Volume II

Session 5A: Next Generation Network Technology (V)

Jiann-Liang Chen, Yao-Chung Chang, Chien-Hsiu Lin (National Dong Hwa University, Taiwan) ......545

2. Fast Handover Support in Hierarchical Mobile IPv6
Hee-Young Jung, Seok-Joo Koh (ETRI, Korea) ..............................................................................551

Riri Fitri Sari (Center for Information and Communication Eng, Indonesia) ................................555

4. Design and Implementation of a JAVA RMI Caching Mechanism on Active Networks
Meng-Chun Wueng, Cheng-Zen Yang (Yuan Ze University, Taiwan, R.O.C., Taiwan) ..................561

5. MAMI: Mobile Agent based System for Mobile Internet
Mohammad Aminul Haq, Mitsuji Matsumoto (Waseda University, Japan) ..................................567

Session 5B: Communication Policy & Market

1. The Business Trends in FMC Service Market
Hyun-Cheol Kim, Eok-Soo Han (ETRI, Korea) ..............................................................................575

2. Network Elements Demand Estimating Model for Mobile LRIC
Jae-Ho Byun, Hyun-Mi Baek (ETRI, Korea), Sung-Lyong Kang (Chungbuk National University, Korea) ..........................................................................................................................579
3. A new pricing mechanism for a high-priority DiffServ-based Service
Christos Bouras (Univ. of Patras and RACTI, Greece), Afrodite Sevasti (GRNET, Greece) .......... 585

4. Trend of IP phone in Korea and other country
Hyun-Moon Shin (ETRI, Korea) ........................................................................................................ 591

5. Fair Traceable Off-line Electronic Cash in Wallets with Observers
Xiaosong Hou, Chik How Tan (Nanyang Technological University, Singapore) ......................... 595

Session 5C: Optical Networking Technology (V)

1. Design of fully-integrated 5GHz differentially-tuned CMOS LC VCO
Seung Ik Song, Jong Kil Shin, Sub Han (ICU, Korea), Ho-Yong Kang, Tae Hwan Yoo (ETRI, Korea), Man Seop Lee (Information and Communications University, Korea) ............................................. 603

2. A Heuristic Converter Placement Scheme for Wavelength-routed Optical Networks
Quang-Dzung Ho, Nga Dinh-Thi-Thuy, Minh-Ho Kang, Man-Seop Lee (Information and Communications University, Korea, Korea) ................................................................. 607

3. An Efficient Heuristic for Virtual Topology Reconfiguration in Optical WDM Networks
Okan Kocak, Cicek Cavdar, Aysegul Gencata, Feza Buzluca (Istanbul Technical University, Turkey) 611

4. Novel method of gain clamping in C-band Erbium doped fiber amplifier
Tran Thien Chinh (PTIT - VNPT, Viet Nam), Sun Hyok Chang, Hee Sang Chung, Hyun Jai Lee (ETRI, Korea) .......................................................................................................................... 615

5. OBS WDM Ring Networks with Tunable Transmitters and Fixed Receivers
Min-Bum Kim, Joon-Pyo Park, Dong-Soo Lee, Man-Seop Lee (ICU, Korea) ........................................ 621

Session 5D: Multimedia & Internet Systems (I)

1. A Simple Rendering System for Web Presentation
Liang Zhao, Hideo Yamamoto (Utsunomiya University, Japan) ...................................................... 627

2. A Study on ACK Message Processing in SIP transaction layer
Jae Cheon Han, Wook Hyun, Mi Young Huh, Sun Ok Park, Shin Gak Kang (ETRI, Korea) .......... 632

3. Design and Implementation of XMT-A to/from MP4 converter for Authoring and Retrieving Interactive MPEG-4/7 Based Interactive Contents
In-Jae Lee, Won-Sik Cheong, Kyu-Heon Kim (ETRI, Korea) .......................................................... 636

4. Enhanced Error Diffusion Halftoning using Edge Information and Linear Gain
Tae-Sung Yun, Wun-Mo Yang, Nae-Jung Kwak, Dong-Woo Kim, Jae-Hyung Ahn (Chungbuk University, Korea) .................................................................................................................... 640

5. The Design of Presence Information Management Mechanism for IMPP Services based on SIP
Mi-Young Huh, Wook Hyun, Sun-Ok Park, Jae-Chon Han, Shin-Gak Kang (ETRI, Korea) .............. 644
Session 6A: Network Management

1. An Efficient Dynamic Multicast Routing Algorithm with Advance Resource Reservation Awareness
   Ruttikorn Varakulsiripunt, Praphan Pavarangkoon (KMITL, Thailand), Apipol Gunabhibal (TOT, Thailand), Chotipat Pornavalai (KMITL, Thailand) ..............................................................651

2. QoS Sensitive Domain Routing for Load Balancing Network
   Ye Wu (Huazhong University of Science and Technology, China) ..............................................................656

   Sang-Chul Shin, Sun-Young Shin (NCA, Korea), Sun-Yong Han (Kunkuk Univ., Korea) .........................661

4. Performance comparison of CAC schemes using limited access probability in a two-type traffic environments
   A. Bukkonprasert, C. Aswakul, L. Wuttisittikulkij (Chulalongkorn University, Thailand) .........................665

5. Active Queue Management by Means of Fuzzy Sliding Mode Control Theory
   Mahdi Jalili-Kharaajoo (Islamic Azad University, Iran) .................................................................................670

Session 6B: System & Software Engineering

1. Snapshot Technique Using Snapshot Status Table for Shared Storage Supporting Large Capacity
   Young-Ho Kim, Seong-In Jung, Myung-Joon Kim (ETRI, Korea) ..............................................................677

2. Odd-Periodic Complementary Set
   Hong Wen, Fei Hu, Fan Jin (Southwest Jiaotong University, China) ..........................................................683

3. UMTS Core Network Planning Model and Comparison of Vendor Product Performance
   Ramzi Shalak, Kumbesan Sandrasegaran, Johnson Agbinya, Sittampalam Subenthiran (U.T.S., Australia) ..........................................................685

4. The Framework of a Web-Enabled Defect Tracking System
   Aedah Abd Rahman (Universiti Tun Abdul Razak, Malaysia) ...............................................................690

5. A Methodology for Developing Component-Based Software with Generation and Assembly Processes
   Ji-Hyun Lee, Jin-Sam Kim (ETRI, Korea) ........................................................................................................696

Session 6C: Converged Network Technology

1. Design Concepts: Wireless Moving Networks (WMN)
   Johnson Agbinya (University of Technology, Sydney, Australia) ...............................................................703

2. Developing the new VPN services for hybrid Ethernet/TDM system
   Seung-Woo Hong, Byung-Ho Yea (ETRI, Korea) ..........................................................................................709

3. Controlling Non IP Bluetooth Devices in a UPnP Home Network
   Sun-Mi Jun, Nam-Hoon Park (ETRI, Korea) .................................................................................................714
4. Mobility-incorporated Dynamic and Adaptive Provisioning mechanism in Differentiated Service Network
Gui-Soon Park (ADD, Korea), Chang-Min Park, Cheung-Heuk Bang (ETRI, Korea), Shang-Ha Kim
(Chungnam National Univ., Korea) ................................................................. 719

5. Directional Shadow Registration Region (DSRR) Organizing
Heyi-Sook Suh, Sang-Bum Han, Kuen-Ho Lee, Chong-Sun Hwang (Korea University, Korea) 726

Session 6D: Multimedia & Internet Systems (II)

1. Event-based Multimedia Object Scheduling Algorithm
Min Hong Yun, Sun Ja Kim, Heung Nam Kim (ETRI, Korea) ........................................ 735

2. Design of SIP-based IMPP Client
Sun Ok Park, Wook Hyun Whyun, Mi Young Huh, Jae Cheon Han, Shin Gak Kang (ETRI, Korea) 741

3. Multiagent based Adaptive QoS Control Mechanism in Flexible Videoconference System
Sung-Doke Lee, Dong-Soo Han (ICU, Korea) ......................................................... 745

4. Development of Interactive Contents Streaming System based on MPEG-4
Hyun-Cheol Kim, Jong Myeon Jeong, Kyuheon Kim (ETRI, Korea) .............................. 751

5. Study on robust billing mechanism for SIP-based Internet Telephony services
Wook Hyun, Jae-Cheon Han, Mi-Young Huh, Sun-Ok Park, Shin-Gak Kang (ETRI, Korea) 756

Poster Session 6E

1. Mobile IP Using Private IP Address through Stateful Network Address Translation
Hyung-Jin Lim, Jong-Pil Jeong, Tae-Myung Chung (Sungkyunkwan University, Korea) ........... 765

2. Automatic Prefix Delegation: Design Principal and Implementation
Kyeong-Jin Lee, Jung-Soo Park, Hyoung-Jun Kim (ETRI, Korea) ...................................... 770

3. Automated Connection Provisioning and Restoration Framework in All Optical Network
Hyun-Soon Nam, Eun-Young Cho, Seong-Soon Joo, Byung-Ho Ye (ETRI, Korea) .................. 774

4. Component based Architecture of SLA Management System
Byung-Yun Lee, Gil Haeng Lee (ETRI, Korea) ....................................................... 778

5. A Network Element Management System for managing H.323 Gatekeepers
Hyun-Bong Go (Ajou University, Korea), Jong-Hyuk Park (Anyuser Net, Korea), Byeong-Hee Roh, Seung-Wha Yoo (Ajou University, Korea) .................................................. 782

6. Design and Implementation of Web-based EPON EMS System
Eui-Hyun Paik, Jae-Doo Huh, Tae-II Kim, Hyeong-Ho Lee (ETRI, Korea) ......................... 786

7. An Infrastructure of Distributed Network Management System for 1Gbps E-PON using Mobile Agents
Gwan-Joong Kim, Tae-II Kim, Jea-Hoon Yu (ETRI, Korea) ............................................ 791
8. Conceptual Design of the Ka-band Communication Payload for Communication, Oceanographic, and Meteorological Satellite (COMS)
Yong-Min Lee, Jong-Won Eun, Seong-Pal Lee (ETRI, Korea) .......................................................... 797

9. A Continuous Stream Service and High Service Availability Mechanism for Continuous Media Servers
Sung-In Jung (ETRI, Korea), Cheol-Hoon Lee (Chungnam National University, Korea) ...................... 803

10. Design and Implementation of Windows based DSTM Client
Hee-Cheol Lee, Myung-Ki Shin, Hyong-Jun Kim, Ki-Shik Park (ETRI, Korea) ..................................... 809

11. Embedded Healthcare System based on SIP using Telephone
Sung-Ho Ahn, Vinod C. Joseph, Ji-Young Kwak, Kyoung-Hee Lee, Doo-Hyun Kim (ETRI, Korea) ....... 813

12. Design of Rule Object Model for Business Rule Systems
Sang-Seung Kang, Min-Su Jang, Joo-Chan Sohn (ETRI, Korea) ......................................................... 818

13. An Efficient Handoff Mechanism for Real-Time Service in Micro Domain
Eung-Do Kim, Hwa-Sung Kim (Kwangwoon Univ., Korea), Sang-Ho Lee, Young-Jin Kim (ETRI, Korea) . 823

Gyoung-Bae Kim, Sung-In Jung, Myung-Joon Kim (ETRI, Korea) ...................................................... 828

15. A redundancy method of AS traffic in Signaling Gateway using loadsharing scheme
Hyun-Jeong Lee, Byung-Sun Lee (ETRI, Korea) ................................................................................... 833

16. An Auto-Recovery Method of SCTP Association between Media Gateway Controller and Signaling Gateway
Jong-Choul Yim, Byung-Sun Lee (ETRI, Korea) .................................................................................... 838

17. SIP/SDP Signaling of Media Gateway with Transcoding Function in Converged Network
Tae-Gyu Kang, Hyun-Joo Bae, Do-Young Kim, Dae-Ung Kim (ETRI, Korea) ....................................... 842

18. Design of Modified NRCTS to Reduce the Additional Network Path to External Network
Yang-Seo Choi, Dong-Il Seo (ETRI, Korea), Sang-Ho Lee (Chung-Buk University, Korea) ................. 846

19. SHT: Adaptive DHT Topology Model Based on Session Heterogeneity for Dynamic Network
Zou Futai, Li Uin, Zhang Liang, Ma Fanyuan (Shanghai Jiao Tong University, China) ....................... 851

20. Design of a dynamic path protection mechanism in MPLS networks
Pyung-Koo Park, Ho-Sun Yoon, Sun-Cheul Kim (ETRI, Korea), Jae-Hyung Park (Chonnam Nat, Korea), Sun-Hee Yang (ETRI, Korea) ................................................................. 857

21. Traffic Measurements Supporting End-to-End QoS Requirements in MPLS Networks
Eun-Ah Kim, Woo-Jik Chun (Raonet Systems, Inc., Korea), Sang-Yong Ha, Yong-Seon Jang, Sung-Uk Rha (National Computerization Agency, Korea) .............................. 862

22. Implementation of Monitoring Mechanism for MPLS networks
Hye-Won Song, Il-Hyung Jung, Jun-Kyun Choi, Chan-Hyun Youn (ICU, Korea), Ho-Yong Ryu, Sun-Hee Yang (ETRI, Korea) ................................................................. 868

23. Protection System for MPEG-2 Streaming Media
Jeong-Hyun Kim, Yeong-Jeong Jeong, Ki-Song Yoon (ETRI, Korea) ..................................................... 873
24. 1.25Gb/s Burst-mode Optical Receiver for the Ethernet PON using 0.35um CMOS Technology
Hyun-Su Ko, Sub Han, Man-Seop Lee, Sang-Hoon Chai (Information and Communications University, Korea)

Session 7A: Communication Network Topology & Planning

1. Fast Hierarchical FLP Model for VoD Server Deployment
Zu-Beng Sun, Pi-Chung Wang, Chia-Tai Chan, Chun-Liang Lee (Chunghwa Telecom. Labs., Taiwan) 883

2. Assessment of VoIP Network Using an R-Value Embedded Simulation Model
Chance Chung-Shih Tang (Chunghwa Telecom, Taiwan) 888

3. A New considerations of the distributed computing applications
Han Yu, David Parish (Loughborough University, United Kingdom) 892

4. Economic and Reliability of Telecommunication Network Design Using Multiple Tabu Search Algorithm
P. Premprayoon (Mahanakorn Univ. of Technology, Thailand), P. Wadkean 898

5. Scale-Free, Small-World Model for Network Communication
Yihjia Tsai, Ping-Nan Hsiao, Ching-Chang Lin, Wen-Fa Huang (Tamkang University, Taiwan) 903

Session 7B: Broadband Internet with MPLS

1. Topological Routing in Large-Scale networks
Jens Myrup Pedersen, Thomas Phillip Knudsen, Ole Brun Madsen (Aalborg University, Institute of Electr. System, Denmark) 911

2. Evaluation of TCP/IP in Satellite Networks with the Proposed sliding windows
G.Leerujikul, C. Jittawiriyanukoon (Assumption University, Thailand) 917

3. Availability Analysis of a Broadband IP Network in Taiwan
Jih-Wei Tsai, Chung-Shih Tang, Chii-Lian Lin, Chin-Ywu Twu, Sheng-Wang Yu (Chunghwa Telecom Co., Taiwan) 923

4. MPLS Network Internetworking Reference Model based on Layered Architecture
Eun-Ah Kim, Woo-Jik Chun (Raonet Systems, Inc., Korea) 927

5. A Bandwidth-Based Constraint Routing Algorithm for Multi-Protocol Label Switching Networks
Ruttikorn Varakulsiripunth, Sakchai Thipchaksurat, Ruttikorn Varakulsiripunth (KMITL, Thailand) 933

Session 7C: Distributed Computing (I)

1. On Algorithms for Minimum-Cost Quickest Paths with Multiple Delay-Bounds
Hak-Suh Kim, Byung-Jun Ahn (ETRI, Korea), Soo-Hyun Kim, In-Ki Hong, Young-Cheol Bang (Korea Polytechnic University, Korea) 941
2. A Method for enhancing the snapshot performance in SAN Volume Manager
Chang-Soo Kim, Yoo-Hyeon Bak, Dong-Jae Kang, Young-Ho Kim, Hag-Young Kim (ETRI, Korea) 945

3. Multiple Classes of QoS Guarantee in Distributed Multicast Routing
Ren-Hung Hwang, Wen-Cheng Hsiao (National Chungcheng Univ., Taiwan), Ben-Jye Chang (Chaoyang Univ. of Tech., Taiwan) 949

4. Enhanced Algorithm for Efficient Communication at Warehouse Environment
Hyun-Chang Lee (Dept. of Computer Engineering, Hansei University, Korea) 955

5. Tree-based Replica Location Scheme (TRLS) for Data Grids
Dong Su Nam (ICU, Korea), Sang Jin Jeong (ETRI, Korea), Byung Sang Kim, Chan Hyun Youn (ICU, Korea) 960

Session 7D: Multimedia & Internet Systems (III)

1. ACL-based data storage controlling the access from processes in DRM client environment
Do-Won Nam, Seong-Oun Hwang, Ki-Song Yoon (ETRI, Korea) 967

2. Improvement of Channel Zapping Time in IPTV Services Using the Adjacent Groups Join-Leave Method
Chunglae Cho, Intak Han, Yongil Jun, Hyeongho Lee (ETRI, Korea) 971

3. DRM for Streamed MPEG-4 Media
Ji-Hyun Park, Jeong-Hyun Kim, Ki-Song Yoon (ETRI, Korea) 976

4. Design and Implementation of License-based content Streaming System
Yeon-Jeong Jeong, Ki-Song Yoon (ETRI, Korea), Jae-Cheol Ryu (Chungnam National University, Korea) 980

5. Extracting Key Moving Objects in Video
Dong XU, ZhengKai LIU (University of Science and Technology of China, China), Yuan YUAN (University of Bath, United Kingdom), Xuelong LI (University of Ulster, United Kingdom) 984

Session 8A: e-Commerce & m-Commerce

1. ebXML-Based e-Logistics Enactment Service Architecture and System
Dong-Keun Oh (Kyonggi University, Korea), Yong-Joon Lee (ETRI, Korea), Joon-Ki Min (TTA, Korea), Kwang-Hoon Kim (Kyonggi University, Korea) 991

2. The implementation of Work management contact and Message inflow contract in Java Connector Architecture 1.5
Beom-Su Seo, Seung-Woog Jung, Sung-Hoon Kim, Joong-Bae Kim (ETRI, Korea) 997

3. Design of a Web Services Based eAI Framework
Dong-Soo Han, Jong-Yong Goo, Song-Dae Song, Song-Doke Lee (ICU, Korea), Beom-Su Seo (ETRI, Korea) 1003
4. Modeling of Policy-based Mobile Payment
   Sang Ki Kim (ETRI, Korea) ................................................................. 1009

5. Global-workflow Modeling Methodology and System for Workflow-driven e-Commerce
   Jae-Kang Won, Kwang-Hoon Kim (Kyonggi University, Korea) ....................... 1012

Session 8B: Internet Application

1. Peer-to-Peer Workflow Model for Clustering and Scheduling Resources on Grid/P2P
   Sang-Bae Kim, Jae-Kang Won, Su-Ki Park, Kwang-Hoon Kim (Kyonggi University, Korea), Hak-Sung Kim (Dongnam Health College, Korea), Byeong-Nam Yoon (NCA, Korea), Il-Kyeun Ra (University of Colorado, USA) .................................................. 1021

2. The Strategies for storing RDF Documents using RDBMS
   Sun-Kyung Kim (Hongik University, Korea), Byung-Gon Kim (College of Bucheon, Korea), Jae-Ho Lee (Gyeongin National University of Education, Korea), Hae-Chull Lim (Hongik University, Korea) ......................... 1027

3. The Strategy of Transform from XML and Storage Structure based on RDF for RDF
   Youn-Hee Kim (Hongik University, Korea), Byung-Gon Kim (Bucheon Collage, Korea), Jae-Ho Lee (Gyungin National University of Education, Korea), Hae-Chull Lim (Hongik University, Korea) ......................... 1030

4. Avoidance Routing to Misbehaving nodes in P2P by using Reputation and Variance
   Krit Wongrujira, Tim Hsin-ting, Aruna Seneviratne (University of New South Wales, Australia) ......................... 1035

5. A Segment-Alignment Interactive Broadcasting Scheme
   Hung-Chang Yang, Hsiang-Fu Yu, Li-Ming Tseng, Yi-Ming Chen (National Central University, Taiwan) ............. 1040

Session 8C: Distributed Computing (II)

1. Valhalla - Distributed Information Architecture
   Speck Hendrik, Frédéric Thiele, Sven Wagenhöfer (University of Applied Sciences Kaiserslautern, Germany) ................................................................. 1049

2. Optimal File Replication Scheme (CO-RLS) for Data Grids
   Sang-Jin Jeong (ETRI, Korea), Chan-Hyun Youn (ICU, Korea), Hyoung-Jun Kim (ETRI, Korea) ......................... 1055

3. Design and Implementation of Fault-Tolerance on Lightweight Home Networking Middleware
   Kwang-Man Koh, Min-Seok Pyo, Ho-Jae Hyun, Sun-Young Han (Konkuk University, Korea) ......................... 1060

4. Resource Reconfiguration Policy Based on Execution Time Estimation in Computational Grids
   Byung-Sang Kim, Dong-Su Nam, Eung-Suk An, Chan-Hyoun Youn (Information and Communications University, Korea) .................................................. 1066

5. Thin Clients Via Shadow Objects
   A.K.M. Ashikur Rahman (University of Alberta, Canada) ........................................... 1072
Session 8D: Multimedia & Internet Systems (IV)

1. Audio Contents Adaptation Technology according to User’s Preference on Sound Field in MPEG-21 DIA
   Jeong-Il Seo, Kyeong-Ok Kang (ETRI, Korea), Jae-Guen Hong (Kyungpook National University, Korea) .......................................................... 1081

2. Design of System Management Architecture using Remote Storage
   Dong-Jae Kang, Gyung-Bae Kim, Chang-Won Ahn, Sung-In Jung (ETRI, Korea) ................................. 1087

3. A Study of Movement Tendency and Current Direction in the Electronic Commerce Contents
   Seung-Ryol Lee (Mokwon University, Korea), Hwa-Young Jeong (Yewon University, Korea), Ho-Gun Yoon (Mokwon University, Korea) ........................................... 1091

4. Bandwidth Broker Signaling for Service Level Negotiation over Heterogeneous IPv4/IPv6 DiffServ Networks
   Byeong-Sik Kim, Hee-Sung Chae, Tae-Man Han, Yoo-Hyun Jeong (ETRI, Korea) ............................... 1097

5. Implementation of Management Agents for an OSGi-based Residential Gateway
   Kyu-Chang Kang, Jeon-Woo Lee (ETRI, Korea) ............................................................................. 1103

Author Index .......................................................................................................................... 1109
