15~17 October 2001, Beijing, China

Proceedings of Sixth Pacific Structural Steel Conference

Volume 2

Organizer
China Steel Construction Society

Editor
Wanzhong Liu  Boqing Wang

Seismological Press
TABLE OF CONTENTS

VOLUME 2

VI. STEEL STRUCTURE CONNECTION TECHNOLOGY

Connection Flexibility of C-Shape Cold-Formed Steel Connections
Lei Xu and Jia Cui (Canada) ................................................................. 667

Rigid Bolt Connection for Rod Bracing
Nobuyoshi Yashima and Kiyokazu Kobayashi (Japan) .......................... 673

Design & Research of Intersecting Welding Joint of Steel Pipe
Yingru Lin (China) ............................................................................... 679

Streamline Geometry Optimization in Beam-Column Connection
Wu-bo Qi and Hiroaki Mimura (Japan) ................................................. 687

Experimental Research on Flexible Rigidity of Uni-planar KK Tubular Joints
Wei Wang, Yiyi Chen, Yangji Chen, Xianzhong Zhao and Peng Liu (China) ........................................................................... 693

Ultimate Strength and Failure Modes of Tension Angles Jointed with High-Strength Bolts
Kuniaki Udagawa and Takao Yamada (Japan) ........................................ 699

Experimental Studies on the Fundamental Properties for High-Strength Bolt Connections at Elevated Temperatures
Guoqiang Li, Yingzhi Yin and Mingfei Li (China) ..................................... 705

Study on the Static Characteristics of WBFW Type Beam-to Column Connections
Tatsuya Nakano, Hiroshi Masuda and Atsuo Tanaka (Japan) .................. 713

Research on Dynamic Property of Steel Structural Joints
Yongchun Xu and Jingzheng Liu (China) ................................................. 719

Characteristics of Friction Type Connection on Longitudinally Profiled Plates with High-Strength Bolts
Kyoung-Seok Eo, Kyoung-Sup Jung, Sang-Ik Woo and Myoun-Mo Kim (Korea) .............................................................................. 726

Simplified Second-Order Analysis of Semi-Rigidly Connected Steel Frames
Weiliang Xu, Han Jiang and Yukun Sun (China) ...................................... 739

Cyclic Tests of Bolted-Angle Connections
Yanghui Xu and Kazuhiko Kasai (Japan) ............................................... 745

An Investigation into the Load-carrying Behavior of Gusseted Joints in Welded Steel Trusses
Zeyuan Shen and Xiyuan Zhao (China) .................................................. 751

Two New Semi-Rigid Joints For Moment-Resisting Steel Frames
G Charles Clifton and John W Butterworth (New Zealand) .................... 764

</table>
Manufacturing Technique of Steel Box Girder of Long-spanned Suspension Bridges and Cable-stayed Bridges in China
Ling Bai, Zhibin Zeng, Feng Wen and Yongji Shi (China) ................................................................. 885

Design and Construction of the Nanjing Second Yangtze River Bridge (Steel Box Girder Cable-stayed Bridge) in China
Zhiquang Shi, Jian Yu, Feng Wen and Xiaoguang Liu (China) ............................................................... 891

Fabrication of Steel Girders with Integral Joints for Wuhu Yangtze River Bridge
Zhaoqi Guo, Junping Li, Suili Wang and Lifen Ma (China) ................................................................. 897

Development of CD-ROM for a Steel Suspension Bridge-Tsing Ma Bridge
Hongxian Guo and Jizhi Wang (China) ................................................................................................. 903

Design and Construction of Steel Structure in Artificial Cliff
Yufan Liang, Yuanqing Wang, Xinjun Liao and Yongjiu Shi (China) ....................................................... 909

Research on Fatigue Design Strength for Steel Construction of Wuhu Changjiang River Great Bridge
Yuling Zhang, Jianmin Zhang and Jiyan Pan (China) ............................................................................... 915

VII. BUILDING STEEL STRUCTURE

Design on Steel Structure of Central Rotating Rotunda of China Millennium Monument
Jianzhong Xie, Qing Chao, Zengqing Shen, Jingjun Liu and Zhenzhong Xiao (China) ......................... 923

Site Activities on Quality Assurance of Steelwork Construction
Koichiro Okuto (Japan) ......................................................................................................................... 932

A New Type of Spatial Structure — Beam String Structure
Zhengxiang Bai and Xiliang Liu (China) ............................................................................................... 938

The Expert Treatment System of Fatigue Loading Spectrum for Large-Span Grid Structures
Honggang Lei, Chao Dong and Yan Pei (China) ...................................................................................... 944

The Steel Structure Design for Xi'an International Exhibition Center
Shuangling Wen, Zhaoxin Hou, Jianping Yang, Yun Wang, Fansheng Zeng, Qi Yang and Shibin Wang (China) ......................................................................................................................... 950

The Study and Design on Flexibly Supported System for Glass Claddings with Point-Supporting System in the Tsinghua University’s Aquatic Center
Zhe Wang, Yuanqing Wang, Yongjiu Shi and Yue Xu (China) ................................................................ 956

The Testing Research on Equal-Amplitude Fatigue Behavior of Large-span Grid Structures
Honggang Lei, Yan Pei and Chao Dong (China) ..................................................................................... 962

Aerological Slide-form Construction Method of Long-span Spatial Steel Structure
Hugen Jin, Jinrong Liu and Xin Jin (China) ............................................................................................. 967

Integral Hydraulic Lifting Construction of Communication Tower Crossing-Over Roofs
Minda Yin, Jinhui Pang, Dongyun Ge and Zhengxi Li (China) ............................................................ 975

Large-Span Arch Steel Structures Design and Construction
Zhen Huang and Muquan Li (China) ....................................................................................................... 984

The Constructional Method of Removal of Dual Tower Crane in the Construction of Two-direction Overhanging Roof Structure
Guangjian Bao, Xu Wang and Zhenmin Chen (China) ........................................................................ 988
New Technology of Large-span Space Pipe Truss Erection —— Erection Technology of Shanghai New International Expo. Center
Zixiang Liu (China) ........................................................................................................ 996

Organic Connections among Energy-Saving, Lighting, Ventilating and Modelling in Design of Industrial Building with Light Steel Structures
Anyu Zhu (China) ........................................................................................................ 1003

Some Key Techniques for the Static Overall Model Test on Super Spatial Structures
Xianzhong Zhao, Zuyan Shen, Yiyi Chen and Yangji Chen (China) ................................ 1006

Study of Elastic Horizontal Transmutation Checking in High-Rise Buildings
Zhiyong Yang and Ruoquan He (China) ........................................................................ 1012

Steel Structure Design of Guangzhou Ocean Apartment/Parking/Office Building
Weijun Chen (China) .................................................................................................... 1018

The Design and Analysis of Steel Industrial Buildings with Heavy Cranes
Quan Chen, Xiumin Li, Yuanqing Wang and Yongjiu Shi (China) ............................... 1024

The Design and Analysis of Steel Portal Frame in Hydropower Plant Building
Xiaomin Shi, Yuanqing Wang and Hong Chen (China) ................................................. 1030

Monolithic Removing Technology in Light-steel Structure Buildings
Hangxian Hu (China) ................................................................................................... 1036

Stability Analysis of Tower Crane in the Erection of Tower Buildings
Yongjian Liu, Xuhong Zhou and Qishi Zhou (China) ................................................. 1042

Work Behavior of Tapered Portal Steel Frame with Holes in Web
Jinsan Ju and Liang Yu (China) ..................................................................................... 1048

IX. STEEL AND CONCRETE COMPOSITE STRUCTURE

The Continuity of Behaviors for Circular, Square and Octagonal Forms for Concrete Filled Steel Tube (CSFT) Members under Axial Compression
Shantong Zhong, Hongtao Cheng and Suimei Zhang (China) ...................................... 1057

Structural Characteristics and Strength of Concrete-Filled Steel-Box(SC) Wall
Katsuhiko Emori (Japan) ............................................................................................. 1064

A New Type of Steel-Concrete Composite Plate
Keijian Ma, Jianchun Xiao, Huagang Zhang, Hong Zhang, Hanping Zhang, Xin Qi, and Fengjun Bai (China) ................................................................. 1070

Strength and Ductility Prediction of Concrete-filled Steel Columns through Cyclic Lateral Load Analysis
Hanbin Ge, K. A. S. Susantha and Tsutomu Usami (Japan) .......................................... 1076

The Research and the Use of Centrifugal Concrete Filled Thin-wall Steel Tubular Structures in China
Guoling Xu (China) ..................................................................................................... 1082

The Evolution of Tubed Concrete Columns
Yan Xiao (USA) ......................................................................................................... 1088

Experimental Study on the Ultimate Bearing Capacity of Concrete Filled Steel Tubular Short Columns
Jiansuo Ma, Caiping Liu and Guangquan Xu (China) ................................................. 1094
The Behavior of CFT Column with Air Cavity
Jin-Ho Kim, Sang-Woo Jeon, Myung-Jae Lee and Mun-Sik Choi (Korea) ........................................ 1100

Bearing Capacity of Gangue Concrete Filled Steel Tubular Columns under Axial Compression
Guochang Li and Shantong Zhong (China) ......................................................................................... 1106

Behaviour of a Semi-Continuous Beam-Column Connection for Composite Slim Floors
Mikko Malaska and Pentti Mäkeläinen (Finland) ............................................................................. 1112

Influence of Concrete Compaction on the Behavior of Concrete Filled Steel Tubes with Rectangular
Sections
Linhai Han, Youfu Yang and Shanzhang Yan (China) ....................................................................... 1118

Tensile Behavior of CFT Column-to-H Beam Connections with External T-stiffeners
Chang-Hoon Kang, Kyung-Jae Shin, Young-Suk Oh and Tae-Sup Moon (Korea) ............................. 1124

Hysteretic Behaviors of Concrete-filled SHS Beam-Columns Subjected to Low-cycle Loading
Zhong Tao and Linhai Han (China) ...................................................................................................... 1130

Long Term Analysis of Continuous Steel-Concrete Composite Bridge Beams
F. Mola, M. Mapelli and R. Sicilia (Italy) ............................................................................................ 1136

Study of the Concrete Slab-Steel Truss Composite Structures
Meixin Ye (China) ............................................................................................................................... 1142

Effect of Uncertainties of Material Strengths on Load Carrying Capacity and Ductility of CFT Column
Hiroyuki Nakahara, Kenji Sakino and Kazuo Matsumura (Japan). .................................................... 1147

Experimental Studies on Concrete-Filled Steel Tubular Frames Subjected to Horizontal Cyclic Loading
with Constant Vertical Loading
Wenfu Zhang, Shantong Zhong and Linhai Han (China) .................................................................. 1153

Time Dependent Second Order Effects in Slender Composite Columns
Franco Mola and Alessandro Palermo (Italy) ..................................................................................... 1159

Experimental Studies on Dynamic Properties of Braced CFT Tube System
Wenfu Zhang and Shantong Zhong (China) ......................................................................................... 1165

Shear Strength of Steel and Concrete Composite Columns
Yan Xiao, J. C. Anderson and Tolga T. Yaprak (USA) ...................................................................... 1171

Numerical Simulation and Research on Hysteretic Model for Concrete-Filled Square Steel Tube
Columns
Zhihao Lu and Yiyi Chen (China) ........................................................................................................ 1177

Behavior of Axially Loaded Concrete Filled Square Steel Tubular Stub-Columns with Spiral
Reinforcement
Se-Wook Ko, Myung-Ho Lee, Young-Suk Oh, Kyung-Jae Shin and Tae-Sup Moon (Korea) ............. 1183

Separated Stress-Strain Models of Steel and Concrete of CFSST Short Columns
Ming Zhou and Sumei Zhang (China) .................................................................................................... 1189

Behavior of Concrete-Filled Rectangular Steel Tube Short Columns
Zaili Ye and Sumei Zhang (China) ......................................................................................................... 1195

Behavior of Braced Frame with Concrete-filled Steel Tube Columns
Feng Li and Sumei Zhang (China) ........................................................................................................... 1201
