PAPER INDUSTRY TECHNICAL ASSOCIATION

2004
PAPERMAKING CONFERENCE

COST EFFECTIVE
PAPERMAKING

CONFERENCE PROCEEDINGS

9th & 10th March 2004
SESSION 1 … “SAFETY – ALWAYS TOP OF THE AGENDA”

Achieving and Sustaining Threading Safety Benchmarks
Elisabeth Rooney .................................................. 7

Living with Making Paper Safely
Derek Coulson .......................................................... 11

The Safety Web
Tim Watts, George Farrell, Nick Fedo & Clive Wilson .................. 13

Keeping the Safety Standards Movement up to Standard
Geoff Sword ............................................................ 15

SESSION 2 … “OPTIMISE THE WATER MEDIUM”

Water Management: An Essential Element with a
Positive Return on Investment: “A Golden Catch from
a River of Investments”
Len Dewhurst ........................................................... 19

A Novel Control Method for Cost Effective Papermaking
Marko Virta, Hong Wang & John Roberts ..................... 25

Insights and Experience with Compact Wet End Systems
Paul Olof Meinander .................................................. 31

Optimised Retention: The Key to Process, Quality and Productivity
Improvements
Rainer Rauch, Wolfgang Falkenberg & Daniel Wätzig ............. 39

Cost Effective Wet End Measurements
John Middleton ........................................................ 49
SESSION 3 — "INNOVATION — THE ROUTE TO SUCCESS"

Paper Mill Process Simulation and Data-Mining Concepts, and Integration into a System-Wide Approach
Ron Slucky & Peter Svensson ........................................ 55

New Press Felt Designs for Enhanced Papermaking
Dr Hippolit Gstrein .................................................... 65

"Bring me Sunshine"
Tim Klemz & Clive Ward ............................................. 71

Efficient Recycled Fibre Preparation, Developments in Process Design and Management
Matthew Watts & Klaus Steinbild ................................ 77

Manufacturing Improvements in The Paper Industry
Mike Johnson ................................................................. 85

Yankee Dryers for High Press Loads
Clive Butler ............................................................... 88

Using New Forming Fabric Technology and Detailed Trial Monitoring to Optimise Sheet Quality, Runnability and Minimise Cost
Andrew White ............................................................ 91

SESSION 4 — "REBUILD TO MAXIMISE YOUR ASSETS"

Short Payback Solutions for Rebuilds
Petteri Halme, Tapani Kultaranta, Arto Kumpulainen, Tomi Ulmanen & Kyösti Leppäkorpi ......................... 97

Multi-ply Board Machine Forming Section Rebuilds using New Pressure Formers
Brian Attwood ............................................................ 109

Water Quality Improvement and Cost Savings at Stoneywood Paper Mill
Ross Holliday ............................................................. 115

Shotton PM2 Rebuilds
Kerst Aengeneyndt ...................................................... 119

New Three-Fourdrinier Wet End for Whakatane
Steve Halsall ............................................................. 121
