ECOC-IOOC 2003
29th European Conference on
Optical Communication
14th International Conference on Integrated Optics
and Optical Fibre Communication

September 21 – 25, 2003 – Rimini – Italy

Promoted by:
AEI - Associazione Elettrotecnica ed Elettronica Italiana

Organised by:
AEI - Associazione Elettrotecnica ed Elettronica Italiana
IIC - Istituto Internazionale delle Comunicazioni
Telecom Italia Lab

Supported by:
EUREL - Convention of National Societies of Electrical Engineers of Europe

in cooperation with:
IEEE/LEOS - Lasers and Electro-Optics Society
IEEE/ComSoc - Communications Society
IEICE/ES - Electronics Society
OSA - Optical Society of America

Proceedings
Volume 4 - Thursday, September 25, 2003
Volume 4 – Table of Contents

Authors Index VI

Th1.2 – TUNABLE SOURCES
Chair: Piero Gambini, Agilent Technologies, Italy

Th1.2.1 Invited - Integrated Tunable Transmitters for WDM Networks
Coldren L.A., Agility Communications and University of California Santa Barbara, USA 878

Th1.2.2 Co-Packaging of Monolithic, Full C-Band Tuneable Lasers with GaAs Modulators for 10Gbps Transmitters

Th1.2.3 Digitally Tuneable Laser Using Ladder Filter and Ring Resonator
Matsuo S., Yoshikuni Y., Segawa T., Ohiso Y., Okamoto H., NTT Photonics Laboratories, Japan 884

Th1.2.4 Small Chip Size, Low Power Consumption, Fully Electronic Controlled Tuneable Laser Source with 40 nm Tuning Range and 20 mW Output Power for WDM Applications

Th1.2.5 12-Channels 200GHz-Spacing Digitally Tuneable External Cavity Laser with Fast Wavelength Switching
Bergonzo A., Brenot R., Locatelli D., Landreau J., Becq Vuong A., Lafragette J.L., Durand O., Jacquet J., Alcatel Research & Innovation, France 888

Th1.2.6 Widely (90 nm) Wavelength Tuneable Laser Using a Semiconductor Optical Amplifier and an Acousto-Optic Tuneable Filter
Takabayashi K., Takada K., Hashimoto N., Doi M., Tomabechi S., Takeuchi T., Nakagawa G., Miyata H., Nakazawa T., Mori K., Fujitsu Laboratories Ltd, Japan 890

Th1.4 – METROPOLITAN NETWORKS
Chair: Kees van Bochove, KPN Royal Dutch Telecom, The Netherlands

Th1.4.1 Invited - Optical Networking for Storage Services
Girardi R., Ferraris G., Telecom Italia Lab, Italy 892

XXI
Th1.4.2  
Circuits over HORNET (CoHo) Demonstration: Guaranteed Bit Rates over a Packet-Based Network  
Rogge M.S., Shrikhande K.V., Bae H., Tosetti C., Kazovsky L.G., Stanford University, USA

Th1.4.3  
Design Considerations for 100-Gigabit Metro Ethernet (100GbME)  
Spencer J., Dueser M., Zapata A., University College London, United Kingdom, de Miguel I., University of Valladolid, Spain, Bayvel P., University College London, United Kingdom, Breuer D., Hanik N., Gladsch A., T-Systems Nova, Germany

Th1.4.4  
Heuristics for Providing Guaranteed Service in DAVID Metro Network  
Careglio D., Solé-Pareta J., Spadaro S., Technical University of Catalonia, Spain

Th1.4.5  
Prototype of 12.5-GHz-Spaced Tapped-Type OADM for DWDM Metro Ring Networks  
Suzuki H., Fujiwara M., Teshima M., Iwatsuki K., NTT Network Innovation Laboratories, Japan

Th1.4.6  
Scalability Analysis for QoS-Aware Optical Networks with Dynamic Wavelength Allocation  
Dueser M., Zapata A., Bayvel P., University College London, United Kingdom

Th1.5 – SYSTEM ISSUES FOR ACCESS NETWORKS  
Chair: José Capmany, Universidad Politécnica de Valencia, Spain

Th1.5.1  
Invited – Wavelength Division Multiplication Technologies for UMTS Radio Coverage Extension by Using the Radio over Fibre Technique  
Casini A., Faccin P., Tekmar Sistemi Srl, Italy

Th1.5.2  
DWDN Multiplexing with 25-GHz Channel Spacing Using an Arrayed Waveguide Grating for 60-GHz-Band Radio-on-Fiber Systems  
Toda H., Yamashita T., Osaka University, Japan, Kuri T., Communications Research Laboratory, Japan, Kiteyama K., Osaka University, Japan

Th1.5.3  
Experimental Demonstration of Multiple-Wavelength Hard-Limiting Receiver for Reducing MAI Noise in a 2-D Time-Wavelength OCDMA System  
Ebrahimi P., Gurkan D., Sahin A.B., University of Southern California, USA, Starodubov D.S., Sabeus Photonics, USA, Willner A.E., University of Southern California, USA

Th1.5.4  
BER Performance Comparison in a Multiuser FFH-OCDMA System with Incoherent and Coherent Sources  
Wei D.P., Ayotte S., LaRochelle S., Rusch L.A., Laval University, Canada

Th1.5.5  
10.7 Gbit/s FSK Transmission with 61 dB Power Budget  
Wedding B., Jung R., Haslach C., Soehnle H., Alcatel SEL AG, Germany

Th1.5.6  
A 40 Gb/s SCM Optical Communication System Based on an Integrated CMOS Transceiver  

XXII
Th1.6 – SEMICONDUCTOR WDM COMPONENTS
Chair: Reinhard März, Infineon Technologies, Germany

920
Th1.6.1
Invited - Recent Progress of a Monolithically Integrated WDM Channel Selector and its Applications
Kikuchi N., Shibata Y., Tohmori Y., NTT Photonics Laboratories, Japan

924
Th1.6.2
100-Channel WDM Channel Selector Monolithically Integrated on InP Substrate
Kikuchi N., Shibata Y., Okamoto H., Kawaguchi Y., Oku S., Kondo Y., Tohmori Y., NTT Photonics Laboratories, Japan

926
Th1.6.3
Over 40-mW Fiber-Coupled Power Wavelength Selectable Light Sources Fabricated Using Advanced Microarray Selective Epitaxy
Sato K., Yashiki K., Morimoto T., Sudo S., Naniwae K., Ae S., Shiba K., Suzuki N., Sasaki T., Kudo K., NEC Corporation, Japan

928
Th1.6.4
Multichannel Transmitter Using Multiwavelength Light Source and Integrated WDM Modulator
Sanjoh H., Suzuki Y., Mawatari H., Yamada E., NTT Photonics Laboratories, Japan, Fujiwara M., NTT Network Innovation Laboratories, Japan, Yasaka H., Yoshikuni Y., NTT Photonics Laboratories, Japan

930
Th1.6.5
Wavelength Conversion over a 50nm Input and 21nm Output Wavelength Range Using a Monolithically Integrated Tunable All-Optical MMI-MZI (TAOMI) Wavelength Converter
Masanovic M.L., Lal V., Barton J.S., Coldren L.A., Blumenthal D.J., University of California Santa Barbara, USA

932
Th1.6.6
Narrow Linewidth and High Power Distributed Feedback Lasers Fabricated without a Regrowth Step
Reid B., Poirier M., Das S.R., Ducharme D., Dowlatshahi R., Langstaff S., Kim N.S., Kuchibhatla R., Djavani-Tabrizi S., Bookham Technology Pic, Canada

Th1.7 – PMD EFFECTS
Chair: Tiziana Tambosso, Telecom Italia Lab, Italy

934
Th1.7.1
Invited - Optimised Spinning Techniques for Ultra-Low PMD Fibres
Galtarossa A., Grigio P., Palmieri L., Pizzinat A., University of Padova, Italy

938
Th1.7.2
Effects of Residual Stress on PMD of Spun Fibers
Li M.J., Chen X., Nolan D.A., Corning Inc., USA

940
Th1.7.3
Properties of Polarization Evolution in Spun Fibers
Chen X., Hunt T.L., Li M.J., Nolan D.A., Corning Inc., USA

942
Th1.7.4
PMD Statistical Properties of Constantly-Spun Fibers
Galtarossa A., Grigio P., Palmieri L., Pizzinat A., University of Padova, Italy

944
Th1.7.5
Jones Matrix Expansion for Second-Order Polarization Mode Dispersion
Heismann F., Technical Consultant, USA

946
Th1.7.6
Characterization of Femtosecond First- and Second-Order PMD
Simova E., Golub l., Institute for Microstructural Sciences, National Research Council, Canada, Solier B., Luna Technologies Inc., USA

XXIII
Th2.2 – WAVEGUIDE DEVICES FOR SIGNAL CONDITIONING
Chair: Christian Lerminiaux, Corning France, France

Th2.2.1 Invited - Tunable Chromatic Dispersion Compensation Using Integrated Allpass Filters
Madsen C.K., Laskowski E.J., Cappuzzo M., Buhl L., Chandrasekhar S., Chen E., Gomez L.,
Griffin A., Rasras M., Stulz L., Wong-Foy A., Bell Laboratories, Lucent Technologies, USA

Th2.2.2 An Electrical Polarization-State Controller and Demultiplexer for Polarization Multiplexed
Optical Signals
Calabro S., Dullweber T., Gottwald E., Hecker-Denschlag N., Mueller E., Opitz B., Sebald G.,
Schmidt E.D., Spinnler B., Weiske C.J., Zech H., Siemens AG, Germany

Th2.2.3 Design and Control of a Reconfigurable Lattice Filter
Schlipf T.R., Institute for System Level Integration, United Kingdom, Street M.W., McBride R.,
Alcatel Optronics UK, United Kingdom, Cumming D.R.S., University of Glasgow, United Kingdom

Th2.2.4 Simultaneous Adaptive Equalization of Group Velocity and Polarization Mode Dispersion
at 40Gb/s with Integrated Optical FIR-Filters and Electrical Spectrum Monitoring as Feedback
Böhm M., University of Kiel, Germany, Horst F., Offrein B.J., Bona G.I., IBM Research,
Switzerland, Rosenkranz W., University of Kiel, Germany, Krummrich P., Siemens AG, Germany

Th2.2.5 A Versatile, Integrated Emulator for First- and Higher-Order PMD
Madsen C.K., Laskowski E.J., Cappuzzo M., Buhl L., Chandrasekhar S., Chen E., Gomez L.,
Griffin A., Stulz L., Wong-Foy A., Bell Laboratories, Lucent Technologies, USA

Th2.2.6 Real-Time PMD Measurement Using an Integrated Wavelength-Scanning Polarimeter
Madsen C.K., Oswald P., Chandrasekhar S., Buhl L., Cappuzzo M., Laskowski E.J., Chen E.,
Gomez L., Griffin A., Kasper A., Stulz L., Wong-Foy A., Bell Laboratories, Lucent Technologies, USA

Th2.3 – ADVANCED TRANSMISSION ISSUES
Chair: Eugenio Iannone, Pirelli Labs, Italy

Th2.3.1 Invited - Lightwave Transmission: Status and R&D Activities in Mainland China
Fan C., Tsinghua University, China

Th2.3.2 Transmission Experiment of 106% Spectral Efficiency over 2276km Utilizing Polarization
and Sideband Interleaved VSB (PSI-VSB)
Yamada Y., Taga H., Kurosawa Y., Goto K., KDDI Submarine Cable Systems Inc., Japan

Th2.3.3 2.5-Gbit/s Wavelength Channel Data Rewriter Using Semiconductor Optical
Saturator / Modulator for Drop-and-Rewrite WDM Networks
Takesue H., Yoshimoto N., NTT Access Network Service Systems Laboratories, Shibata Y., Ito T.,
Tohmori Y., Sugie T., NTT Photonics Laboratories, Japan

Th2.3.4 Transmission Performance of Duobinary 1-Fiber Bi-Directional WDM Self Healing Ring
Lee G., Joo Y., Lee H., Kim R., Park S., Song K., Hwang S., Oh Y., Samsung Electronics Co.,
South Korea

Th2.3.5 On the Accuracy of the Q-Parameter to Assess BER in the Numerical Simulation of
Optical DPSK Systems
Bosco G., Poggio P., Politecnico di Torino, Italy
Th2.3.6  
Low Nonlinearity Medium-Dispersion Fiber-Based Link

Th2.4 – PASSIVE OPTICAL NETWORKS
Chair: Yong Hyub Won, Information and Communications University, Korea

Th2.4.1  
A WDM PON Suitable for Local Private Networking and Dedicated Local Access
Chae C.J., Tucker R.S., The University of Melbourne, Australia

Th2.4.2  
A Group Protection Architecture (GPA) for Traffic Restoration in Multi-Wavelength Passive Optical Networks
Lee C.M., Chan T.J., Chan C.K., Chen L.K., Lin C., The Chinese University of Hong Kong, Hong Kong, China

Th2.4.3  
Dynamically Reconfigurable Real-Time Information-Sharing Network System Based on a Cyclic-Frequency AWG and Tunable-Wavelength Lasers
Okada A., Tanobe H., Matsuoka M., NTT Photonics Laboratories, Japan

Th2.4.4  
High Speed Switched Multiservice AWG-PON Using CWDM and Spectral Periodicity of Arrayed Waveguide Gratings
Martinez A., Muñoz F., Capmany J., Sales S., Ortega B., Pastor D., Polytechnic University of Valencia, Spain

Th2.4.5  
Demonstration of Logical-Topology Reconfiguration in Full-Mesh WDM Networks (AWG-STAR) Based on Wavelength Routing Technology
Tanobe H., Okada A., Noguchi K., Matsuoka M., NTT Photonics Laboratories, Japan

Th2.4.6  
Gigabit WDM-PON System Using Spectrum-Slicing Technologies
Akimoto K., Kani J., Teshima M., lwatsuki K., NTT Network Innovation Laboratories, Japan

Th2.4.7  
ONU Diagnostic Methodology of Passive Optical Network in Disturbance Environment for Physical Layer Security
Horiuchi Y., Ohara K., Tanaka H., Suzuki M., KDDI R&D Laboratories Inc., Japan

Th2.5 – OPTICAL SIGNAL PROCESSING III
Chair: TBD

Th2.5.1  
160 Gb/s Clock Recovery and Demultiplexing Using One Single EAM
Boerner C., Berger J., Ferber S., Hilliger E., Marembert V., Schmidt C., Ludwig R., Weber H.G., Fraunhofer Institute for Telecommunications HHI, Germany

Th2.5.2  
Investigation of Intra-Channel Four-Wave Mixing at 160 Gb/s Using an Optical Sampling System
Schmidt C., Schubert C., Boerner C., Weinert C.M., Fraunhofer Institute for Telecommunications HHI, Germany, Bülow H., Lach E., Alcatel SEL AG, Germany, Weber H.G., Fraunhofer Institute for Telecommunications HHI, Germany

Th2.5.3  
A Novel 160 Gb/s Receiver Configuration Including a Glass Crystal Pulsed Laser, Photonic Crystal Fibre and a Simple Dynamic Clock Recovery Scheme
Ultrafast All-Optical Pattern Matching Using Differential Spin Excitation
Yasui T., Takahashi R., Suzuki H., NTT Photonics Laboratories, Japan

All-Optical Analog-to-Digital Conversion Based on Fiber Nonlinearity
Oda S., Mao X., Maruta A., Kitayama K., Osaka University, Japan

NOLM-Based 3-Stage Regenerator for 160 Gbit/s Transmission Systems
Bogoni A., Gheiffi P., CNIT, Italy, Scaffardi M., Scuola Superiore Sant'Anna, Italy, Potl L., CNIT, Italy

Dynamic Spectral Equalizer Using a Polymer Dispersed Liquid Crystal Attenuator Array
Barge M., Battarel D., de Bougrenet de la Toonaye J.L., Allain A., Bertin N., Loukina T., Optogone SA, France, Brochier J.L., Barbey J.L., France Telecom R&D, France

Invited - Advanced Optical Modulation Formats
Winzer P.J., Essiambre R.J., Bell Laboratories, Lucent Technologies, USA

Comparison of DPSK and OOK Modulation Format in a 160 Gb/s Transmission System
Ferber S., Ludwig R., Boerner C., Fraunhofer Institute for Telecommunications HHI, Germany, Wietfeld A., University of Erlangen, Germany, Schmauss B., Lucent Technologies and University of Erlangen, Germany, Berger J., Schubert C., Fraunhofer Institute for Telecommunications HHI, Germany, Unterboersch G., u2t Photonics AG, Germany, Weber H.G., Fraunhofer Institute for Telecommunications HHI, Germany

System Performance and Tolerances of 43Gb/s ASK and DPSK Modulation Formats
Idler W., Klekamp A., Dischler R., Lazaro J., Alcatel Research & Innovation, Germany, Konczykowska A., Alcatel Research & Innovation, France

Proposal of 8-State per Symbol (Binary ASK and QPSK) 30-Gbit/s Optical Modulation/Demodulation Scheme
Hayase S., Kikuchi N., Sekine K., Sasaki S., Central Research Lab, Hitachi Ltd, Japan

Quaternary Differential-Phase Amplitude-Shift-Keying for DWDM Transmission
Liu X., Wei X., Bell Laboratories, Lucent Technologies, USA, Kao Y.H., Optical Networking Group, Lucent Technologies, USA, Leuthold J., Doerr C.R., Mollenauer L.F., Bell Laboratories, Lucent Technologies, USA

Suitability of Tunable Multi-Section DBR Lasers for Advanced Transmission Formats

Invited - Microstructured Optical Fibres: Why Use Polymers?
Th2.7.2  
Modal Bandwidth Maximization of Plastic Optical Fibers by W-Shaped Refractive Index Profile  
Ishigure T., Endo H., Saito M., Koike Y., Keio University - JST Erato, Japan  

Th2.7.3  
Modal Dispersion Compensation of Graded-Index Multimode Fibers for High Bit Rate Transmission at Multiple Wavelengths  
Guan N., Takenaga K., Ikeda M., Matsuo S., Himeno K., Fujikura Ltd, Japan  

Th2.7.4  
A 2.5Gb/s Combined Wavelength and Polarisation Multiplexing Transmission Experiment over Standard 50um Multimode Fibre  
Rochat E., Walker S.D., University of Essex, United Kingdom, Parker M.C., Fujitsu Laboratories of Europe, United Kingdom, Boord T., APA Optics Inc., USA  

Th2.7.5  
10 Gbit/s 850 nm VCSEL Based Data Transmission over 100 m-long Multimode Photonic Crystal Fibers  
Stach M., University of Ulm, Germany, Broeng J., Petersson A., Mortensen N.A., Simonsen H.R., Crystal Fibre A/S, Denmark, Michalzik R., University of Ulm, Germany  

Th3.2 – PULSE GENERATION AND SWITCHING  
Chair: David J. Richardson, Optical Research Centre, UK  

Th3.2.1  
Polarization-Insensitive All-Optical Time-Division Demultiplexer Using a Fiber Four-Wave Mixer and a Peak-Holding Optical Phase-Locked Loop  
Sakamoto T., Seo K., Taira K., Moon N.S., Kikuchi K., RCAST, University of Tokyo, Japan  

Th3.2.2  
Experimental Validation of Signal Reshaping Capabilities of Dispersion-Imbalanced NOLM at 40Gbit/s  
Seguineau F., Rouvillain D., Lavigne B., Leclerc O., Alcatel Research & Innovation, France  

Th3.2.3  
Nonlinear Optical Loop Mirror with an Optical Bias Controller for Achieving Full-Swing Operation of Gate Switching  
Sakamoto T., Tanemura T., Kikuchi K., RCAST, University of Tokyo, Japan  

Th3.2.4  
A Multi-Wavelength Optical Source Based on Supercontinuum Generation Using Phase and Intensity Modulation at the Line-Spacing Rate  
Wang Y., Pan Z., Luo T., Yu C., Sahin A., Willner A., University of Southern California, USA  

Th3.2.5  
Femtosecond Pulsecompression Using a Comb-Like Dispersion Profiled Fiber (CDPF)  
Quast H., Huhse D., Reimann O., Zimmermann D., Bimberg D., Technical University of Berlin, Germany  

Th3.3 – PACKET TRANSMISSION  
Chair: Lars Thylen, Royal Institute of Technology, Sweden  

Th3.3.1  
Invited - Quantum Communication; Present Status and Possible Impact on Optical Networking  
Karlsson A., Royal Institute of Technology, Sweden  

Th3.3.2  
11-Hop Operation of Optical-Label Switching System with All-Optical Label Swapping  
Cao J., Jeon M.Y., Pan Z., Bansal Y., Taylor J., Wang Z., Zhu Z., Hernandez V., University of California, USA, Okamoto K., Okamoto Laboratory, Japan, Kamei S., NTT Photonics Laboratories, Japan, Yoo S.J.B., University of California, USA
Th3.3.3
A 10-Gbit/s Burst-Mode 3R Receiver Unit with a New Equalizing Amplifier for High-Speed Optical Packet Communications
Kimura S., Okada A., Endo J., Suzuki Y., Matsuoka M., NTT Photonics Laboratories, Japan

Th3.3.4
40-Gbit/s-to-10-Gbit/s Bit-rate Converter for 16-bit Optical Packets Using a Photonic RAM
Takenouchi H., Takahata K., Nakahara T., Takahashi R., Suzuki H., NTT Photonics Laboratories, Japan

Th3.3.5
10 and 20 Gbps All-Optical Circulating Buffer Using a Hybrid-Integrated Mach-Zehnder Switch
McDougall R., Yow C.K., Chai Y.J., Penty R., White I., Wilkes M., University of Cambridge, United Kingdom

Th3.4 – PHOTODETECTORS AND OPTICAL RECEIVERS
Chair: Joe C. Campbell, University of Texas, USA

Th3.4.1
New High Performance Evanescent Coupled Waveguide UTC Photodiodes for > 40 Gb/s Applications
Achouche M., Alcatel Research & Innovation, France, Magnin V., Harari J., IEMN, France, Gentner J.L., Lelarge F., Derouin E., Jany C., Carpentier D., Barthe F., Blache F., Demiguel S., Research & Innovation, France, Decoster D., IEMN, France

Th3.4.2
Asymmetric Waveguide Photodiode over 50GHz with High Sensitivity for Both 1.3um and 1.55um Wavelengths
Nakaji M., Ishimura E., Hanamaki Y., Mihashi Y., Aoyagi T., Omura E., Mitsubishi Electric Corporation, Japan

Th3.4.3
An Extremely Compact (0.3cc) 40-Gb/s Optical Receiver Module with Ease-of-Use Receptacle Interface and Feedthrough Launcher
Fukatsu K., Takeuchi T., Shibata K., Makita K., Amamiya Y., Suzuki Y., Kato T., NEC Corporation, Japan

Th3.4.4
Flat-Top High Responsivity 8-Channel CWDM Photoreceiver Using Silica-Based AWG with Multimode Output Waveguides
Doi Y., Ishii M., Kamei S., Ogawa I., Mino S., Shibata T., Hida Y., NTT Photonics Laboratories, Japan, Kitagawa T., Kato K., NTT Electronics Corporation, Japan

Th3.4.5
Nanosecond Switching Phased-Array Directional Receivers in GaAs-AlGaAs
Matmon G., Tidhar G., Majer D., Shekel E., Ruschin S., Chiaro Networks Ltd, Israel

Th3.4.6
Rapidly Tunable Heterodyne Receiver for Multicast Optical Switch Fabrics
Moeller L., Kauer M., Adamiecki A., Sinsky J., Buhl L., Bell Laboratories, Lucent Technologies, USA

Th3.5 – SEMICONDUCTOR OPTICAL AMPLIFIERS
Chair: TBD

Th3.5.1
Two-Wave Competition for All-Optical Signal Processing: First Experimental Verification in Ultra-Long SOAs
Busolt U., Bramann G., Wünsche H.J., Schmidt C., Sartorius B., Nolting H.P., Rosin T., Fraunhofer Institute for Telecommunications HHI, Germany
Th3.5.2 Phase Dynamics in Gain-Transparent Semiconductor Optical Amplifiers
Schubert C., Fraunhofer Institute for Telecommunications HHI, Germany, Schares L., Swiss Federal Institute of Technology, Switzerland, Schmidt C., Fraunhofer Institute for Telecommunications HHI, Germany, Guekos G., Swiss Federal Institute of Technology, Switzerland, Weber H.G., Fraunhofer Institute for Telecommunications HHI, Germany

Th3.5.3 New Low Chirp and High Power Semiconductor Amplifier for 10 Gbit/s Metropolitan Transmission
Brenot R., Kerboeuf S., Bouché N., Maliecot F., Colson V., Gauthier-Lafaye O., Picq M., Provost J.G., Thedrez B., Alcatel Research & Innovation, France

Th3.5.4 A New Gain Clamped SOA with Low Noise Figure and High Saturation Output Power
Kim H., Lee J., Yun I., Kim S., Shin H., Kim J., Hwang S., Oh Y., Samsung Electronics, South Korea

Th3.5.5 Er-Doped Si Nanocrystals as a Candidate for Optical Amplification
Iacona F., CNR-IMM, Italy, Franzb G., Pacifici D., Irrera A., Miritello M., INFM and University of Catania, Italy, Sanfilippo D., Di Stefano G., Fallica P.G., STMicroelectronics, Italy, Priolo F., INFN and University of Catania, Italy
