2nd International Conference on Thermomechanical Processing of Steels

TMP '2004

June 15–17, 2004
Liege, Belgium

Editor Marcel Lamberigts:
Centre de Recherches Métallurgiques (CRM)
# Table of Contents

Current status of thermo-mechanical processing in hot strip mill .................................................. IX
H. Vergote

Harvesting metallurgical knowledge for commercial yield ........................................................... XVIII
C.P. Jongenburger, R. Koenis, M.R. van der Winden, P.J. van der Wolk

## Session 1

### Process and Product Developments in TMP (Carbon and High-Alloy Steels) .......................... 1

**Hot strips**

A study of friction in non-lubricated high temperature steel processing ..................................... 3
S.P. Jupp, J.H. Beynon

Application of microstructural modelling for quality control and process improvement .................. 11
in hot rolled steels
A. Perlade, D. Grandemange, T. Iung

Laboratory rolling conditions and its effects on rolling parameters as material properties ............. 17
of hot rolled products
R. Kawalla, G. Goldhahn, W. Jungnickel

Simulation of runout table cooling by water jet impingement on moving plates – A novel .......... 25
experimental method
V. Prodanovic, D. Fraser, M. Militzer

## Session 2

### Investigations into the Metallurgy of TMP ................................................................. 33

**Recrystallisation Control**

Effect of interpass time on the processes of dynamic and static softening during rolling .................. 35
J. J. Jonas

Effects of complex deformation history on flow stress and recrystallisation of ......................... 43
hot-deformed austenite and ferrite
M.C. Somani, L.P. Karjalainen

Effect of alloying elements on the microstructure and texture of warm rolled and annealed .......... 51
low carbon steel
I.B. Timokhina, A.I. Nosenko, A.O. Humphreys, J.J. Jonas, E.V. Pereloma

Influence of hot working process parameters on abnormal grain growth in Ti-V medium ............. 59
carbon microalloyed steels

Microstructure transformation in a warm rolled low carbon steel during subsequent heating ........ 67
C. Medrea Bichtas, G. Negrea

## Session 3

### Process and Product Developments in TMP (Carbon and High-Alloy Steels) ...................... 75

**Hot Strips (cont’d)**

Process window for hot-rolled dual phase steel ............................................................................ 77
W. Bleck, U. Lorenz, U. Prahl, A. Guidani

Effect of alloying elements on the microstructure and the mechanical properties of .......... 85
hot-rolled multiphase steels
T. Heller, Nuss

Optimization of forming parameters of three modified type AISi 316 stainless steels ................. 93
M. Carsi, M.T. Larrea, F. Peñalba, R. Allende, O.A. Ruano
Issues of divergence in hot strip rolling
M. Venkatraman, T. Venugopalan

The bake-hardening effect by shaping of thin hot rolled steel sheet
H. Palkowski, T. Anke

Low carbon Niobium-alloyed high strength steel for automotive hot strip
W. Haensch, C. Klinkenberg

Session 4
Investigations into the Metallurgy of TMP
Phase Transformation Control and Precipitation Engineering
Acicular ferrite in low and medium carbon steels: Morphology and mechanical behaviour
M. Díaz-Fuentes, I. Gutierrez

Inter-critical deformation of low carbon steel
M. Abbas, A. Ismail, S. El-Ghazaly, T. El-Bitar

Interphase precipitation hardening in commercial hot strip steels
J. Gallego, E.V. Morales, S.S. Campos, H.-J. Kestenbach

Model of precipitation kinetics induced by strain for microalloyed steels
S.F. Medina, A. Quispe, M. Gómez

Influences of preheating (880-1150°C) and hot rolling on transformation to annealed structure of Hypo-, Hyper- and Eutectoid Steels
H.J. McQueen, V.M. Khlestov, E.V. Konopleva

Influence of accumulated stress on austenite microstructure and induced precipitation state during hot rolling of a low Nb-Microalloyed Steel
M. Gómez, S. F. Medina, P. Valles

Session 5
Process and Product Developments in TMP (Carbon and High-Alloy Steels)
Thin Slab Casting and Direct Rolling
Rolling and coiling technology for the production of thin strip on a casting rolling line
H.-P. Schmitz, H. Janssen, M. Bössler

The physical metallurgy of HSLA strip steel production using the CSP Process
C. I. Garcia, C. Tokarz, C. Graham, A. J. DeArdo

Development of HSLA steels in POSCO Mini Mill
S.-J. Seo, H.-J. Kang, K.-G. Chin

Processing of Nb-microalloyed X52 line pipe steel on Ansck’s CSP plant

Session 6
Investigations into the Metallurgy of TMP
Modelling
Microstructure engineering of hot-rolled dual-phase steels
M. Militzer, F. Fazeli, P. Petkov

Influence of the carbon content on the high temperature response of plain carbon steels
J.M. Cabrera, F. Escobar, J.M. Prado

Computed assisted design of models for the thermomechanical processing of steels by means of a new modelling tool
A. Schmitz, C. Mesplont, X. Vanden Eynde
### Session 7

**Process and Product Developments in TMP (Carbon and High-Alloy Steels)** 221

**Thin Slab Casting and Direct Rolling (Cont'd)**

- The influence of an under-cooling thermal cycle on the hot ductility of C-Mn-Al-Ti and C-Mn-Nb-Al-Ti steels 223
- C. Spradbery, B. Mintz

**Mesoscopic model of intergranular cracks in low carbon steel during cooling** 233
- F. Pascon, S. Castagne, J. Lecomte-Beckers, A. M. Habraken

### Session 8

**Investigations into the Metallurgy of TMP** 241

**Modelling (Cont'd)**

- Analysis of hot formability of a low alloyed steel 243
  - M.EI-Mehtedi, E.Evangelista, A.Poli, H.J.McQueen, S.Spigarelli

- A unified description of non-steady state deformation for steels in the austenitic temperature range 251
  - O. Bouaziz, D. Quidort, D. Feuillu

- Accurate adaptation and verification of constitutive model for hot rod rolling 256
  - T. El-Bitar, I. Rashid, A. Ismail

- Test and FEM analysis of the rolling process and die load of the sizing press mill 265
  - W. Yingjie, J. Guangbiao, W. Yingrui

### Session 9

**Process and Product Developments in TMP (Carbon and High-Alloy Steels)** 273

**Heavy Plate Rolling**

- Process developments in TMCP to produce heavy plates in high strength steel grades 275
  - A. Streisselberger, V. Schwinn, J. Kirsch

- Production and properties of thermomechanical rolled high-strength steel plates 285
  - with minimum yield strengths up to 700 MPa
  - A. Kern, T. Niessen, U. Schriever

- Microstructure and properties of TMCP-steels 293
  - J. Bauer, P. Flüß, E. Amoris, V. Schwinn

### Session 10

**Process Developments in TMP (Carbon and High-Alloy Steels)** 301

**Heavy Plate Rolling (Cont'd)**

- Processing and properties of ultrafine bainitic plate steels 303
  - I. Yakubtsov, D. Boyd, T. Turi, D. Emadi

- Development of low carbon NbTiB micro-alloyed steels for high-strength large-diameter linepipe 311

- Effects of TMP processing and accelerated cooling on continuous cooling transformation and microstructure in low carbon HSLA steels with/without Boron 319

- The "Mulpic" cooling equipment and the resulting steel products at Clabecq plate mill 328
  - X. Cornet, P. Hernaut

- Tensile properties prediction of intercritically rolled steel plates 332
  - G. Herman, L. Poissonnet, V. Schwinn
### Session 11

#### Investigations into the Metallurgy of TMP

**Complex Microstructures**

</table>
Microstructure characterization of cold-rolled dual-phase steels

S. Traint, A. Pichler, K. Spiradek-Hahn, P. Stiaszny, C.Krempaszky, E. Werner

Session 15

Process Developments in TMP (Carbon and High-Alloy Steels)

Long Products

TMCP applications in sections, bars and rails

J. Hoffmann, B. Donnay

Real time discrete techniques for distortion and microstructure of long product sections

A. Richardson, D.C.J. Farrugia, J. Wen

Recent developments in the use of quenched and self-tempered hot rolled H-beams

L. Weber, L.-G. Cajot

Formation of ferrite-cementite microstructure by strain induced dynamic transformation in medium carbon steels

Session 16

Process Developments in TMP (Carbon and High-Alloy Steels)

Cold Rolling and Annealing (Cont'd)

Development of dual phase-multiphase high strength steels by using a new cooling technology: the HOWAQ-TWICE process

C. Elgoyhen, A. De Paepe, L. Laquerbe, V. Lhoist, P. Harlet

Influence of the temper rolling conditions on the microstructure and texture development during decarburising annealing in non-oriented electrical steel

M. Dzubinsky, Y. Bi, T. Irons

Microstructures and Properties of Cold Rolled HSS: A Comparison between conventional Continous/Annealing and Galvanising Lines and a new flexible line

A. De Paepe, C. Elgoyhen, A. Lucas, J. Crahay, P. Simon, J.C Herman

Microstructure and favourable texture development in non-oriented electrical steels

Y. Sidor, F. Kovac, M. Dzubinsky

Reactive continuous annealing: What is possible?

A. Hennion

Session 17

Process Developments in TMP (Carbon and High-Alloy Steels)

Long Products (Cont'd)

Latest developments and results in rolling & on-line heat-treatment of speciality steels

F. Alzetta, F. Toschi, L. Gori

Determination of flow stress and strain ageing behaviour in 0.8% Carbon steel

Z. Husain

Effect of blowing mode and layheading temperature on microstructure of a pre-stressed and stranded wire rod made of SWRH 82B steel

L. Jiang, C. Zhang, W. Hua, W. Lu
