Proceedings of the Twenty-Fifth Annual Conference of the Cognitive Science Society

Part 1 of 2

Richard Alterman and David Kirsh
Editors

July 30 - August 2, 2003
Park Plaza Hotel
Boston, Massachusetts
USA
Tutorials

Teaching the How of Cognitive Science: The Inquiry Website
Adele Abrahamsen, (Center for Research in Language, University of California)
William Bechtel (Department of Philosophy, University of California)
Peter Bradley (Philosophy-Neuroscience-Psychology Program, Washington University)
Carl F. Craver (Philosophy-Neuroscience-Psychology Program, Washington University)

Latent Semantic Analysis: Theory, Use and Applications
Simon Dennis, (Institute of Cognitive Science, University of Colorado)
Tom Landauer (Institute of Cognitive Science, University of Colorado)
Walter Kintsch (Institute of Cognitive Science, University of Colorado)
Jose Quesada (Institute of Cognitive Science, University of Colorado)

How to Plan and Run Online Seminars
Lisa Neal, (eLearn Magazine)
Donna Anastasi (Aptima, Inc.)

Using Eye Movements to Study Cognitive Processes
Keith Rayner, (University of Massachusetts)

Rumelhart Prize Talk

Complicate Locally, Simplify Globally: Starting With Complex Primitives Pays Off
Aravind Joshi, (Department of Computer and Information Science and Institute for Research in Cognitive Science University of Pennsylvania)

Rumelhart Plenary

The Convergence of Language and Computation: A Symposium in Honor of Aravind K. Joshi
Fernanda Ferreira, (Psychology, Michigan State University)
Robert Frank (Cognitive Science, Johns Hopkins University)
Edward Stabler (Linguistics, University of California, Los Angeles)
Bonnie Webber (Informatics, University of Edinburgh)

Plenary

Positioning and Identities in Collaborative Cognition and Learning
James Greeno, (Stanford University)

Cognitive Ethnography
Edwin Hutchins
The Cultural Origins of Human Cognition ................................................................. 19
Michael Tomasello

Symposium

Development and Cognitive Architecture ................................................................. 23
Robert Hadley, (School of Computing Science, Simon Fraser University)
Gary Marcus (Department of Psychology, New York University)
Robert Jacobs (Department of Brain and Cognitive Sciences, University of Rochester)

Representation and Activity ...................................................................................... 24
Ronald N. Giere, (University of Minnesota)
Participants: Timo Honkela, (Helsinki University of Technology)
Jonna Kangasoja, (University of Helsinki)
Tarja Knuuttila, (University of Helsinki)

Redefining Collaboration to Make it Work in Classrooms ......................................... 25
Naomi Miyake, (School of Computer and Cognitive Sciences, Chukyo University)
Janet L. Kolodner (College of Computing, Georgia Institute of Technology)
Margaret Jacks (Professor of Education, Stanford University)

Representational, Textual, and Experimental Practices: The Case of Michael Faraday .... 28
Ryan D. Tweney Department of Psychology, Bowling Green State University
Ronald Anderson Department of Philosophy, Boston College
Elizabeth Cavicchi

Structure-Mapping: Twenty Years After .................................................................... 30
Phillip Wolff,
Ken Forbus,
Arthur Markman,
Kenneth Kurtz,
Dedre Gentner
Discussant: Mike Tomasello

Publication-Based Talk

Beyond Switch Cost as a Measure of Cognitive Control .............................................. 33
Erik Altmann, (Department of Psychology, Michigan State University)

Simulating Activities: Relating Motives, Deliberation, and Attentive Coordination .... 34
William Clancey, (NASA-Ames Research Center, Computational Sciences Division)
A New Vision of Language
Shimon Edelman, (Department of Psychology, Cornell University)

Computation and Agency in Scientific Cognition
Ronald Giere, (Department of Philosophy & Center for Philosophy of Science, University of Minnesota)

Wayne Gray, (Cognitive Science Department, Rensselaer Polytechnic Institute)
Michael J. Schoelles (Cognitive Science Department, Rensselaer Polytechnic Institute)

The Social Emergence of Communication in Spatialized Arrays of Neural Nets
Patrick Grim, (Group for Logic & Formal Semantics, Dept. of Philosophy, SUNY Stony Brook)
Paul St. Denis (Group for Logic & Formal Semantics, Dept. of Philosophy, SUNY Stony Brook)
Trina Kokalis (Group for Logic & Formal Semantics, Dept. of Philosophy, SUNY Stony Brook)

Inductive Simplicity and the Matrix
Gilbert Harman, (Department of Philosophy, Princeton University)
Sanjeev Kulkarni (Department of Electrical, Princeton University)

Epistemic Mediators and Manipulative Abduction in Model-Based Reasoning
Lorenzo Magnani, (Department of Philosophy and Computational Philosophy Laboratory)

iSTART: An Automated Reading Strategy Tutor
Danielle McNamara, (University of Memphis)
Irwin Levinstein (Old Dominion University)
Keith Millis (Northern Illinois University)
Joe Magliano (Northern Illinois University)
Katja Wiemer-Hastings (Northern Illinois University)

Explanatory Content and Multi-Turn Dialogues in Tutoring
Stellan Ohlsson, (Department of Psychology, University of Illinois at Chicago)
Andrew Corrigan-Halpern (Department of Psychology, University of Illinois at Chicago)
Barbara Di Eugenio (Department of Computer Science, University of Illinois at Chicago)
Xin Lu (Department of Computer Science, University of Illinois at Chicago)
Michael Glass (Department of Mathematics and Computer Science, Valparaiso University)

Effects of Dialogue Structure on the Activation of Syntactic Information
Martin Pickering, Holly P. Branigan and Janet F. McLean (Department of Psychology, University of Edinburgh)
An Attentional Constraint on Spatial Meaning ................................................................. 50
Terry Regier, (Department of Psychology, University of Chicago)
Mingyu Zheng (Department of Psychology, University of Chicago)

Neural Voting Machines ..................................................................................................... 51
Whitman Richards, (Artificial Intelligence Lab MIT)
Sebastian Seung (Artificial Intelligence Lab MIT)

Improving statistical reasoning: representational format and valid intuitions .................. 56
Peter Sedlmeier, (Department of Psychology, Chemnitz University of Technology)

How Studies of Hypertext-Assisted Learning Inform Educational System Design .......... 57
Amy Shapiro, (University of Massachusetts)
Dale S. Niederhauser (Iowa State University)

Computational Explorations of Cognitive Development .................................................. 59
Thomas Shultz, (Department of Psychology and School of Computer Science, McGill University)

How space binds objects and words .................................................................................. 60
Linda Smith, (Indiana University)

On the Continuity of Mind .................................................................................................. 61
Michael Spivey, (Department of Psychology, Cornell University)

Construction and use of cultural environment structure through simple decisions .......... 62
P.M. Todd

The Role of Motion in Segmenting Simple Events ............................................................ 64
Jeffrey Zacks, (Psychology Department, Washington University)

Papers

The Interaction between Informational and Computational Properties of External Representations on Problem-Solving and Learning .................................................. 67
Shaaron Ainsworth, (School of Psychology, University of Nottingham)
Gareth Peever (School of Psychology, University of Nottingham)

Squashing, Rotating, Seeing, and Going: On Visual Knowledge in fMRI Research itself? 73
Morana Alac, (Department of Cognitive Science)

Conceptual Maps: a metacognitive strategy to learn concepts ........................................ 79
Maria Suzana Amoretti

(xii)
Distributed Metacognition during Peer Collaboration
Christopher Andersen, (School of Teaching and Learning, The Ohio State University)

Sex and Seniority: The Effects of Linguistic Categories on Conceptual Judgments and Memory
Florencia Anggoro, (Department of Psychology, Northwestern University)
Dedre Gentner (Department of Psychology, Northwestern University)

Implications of Distributed Representations for Semantic Processing: Evidence from Alzheimer’s Disease
Justin Aronoff, (Departments of Linguistics)
Laura M. Gonnerman (Department of Psychology, Lehigh University)
Elaine S. Andersen (Departments of Linguistics, Psychology, and Program in Neuroscience, University of Southern California)
Daniel Kempler (Communication Sciences and Disorders, Emerson College)
Amit Almor (Department of Psychology)

Instructional Focus Does Not Effect Implicit Pattern Learning
Ivan Ash, (Department of Psychology, University of Illinois at Chicago)
Timothy J. Nokes (Department of Psychology, University of Illinois at Chicago)

There Is No Naked Eye: Higher-Order Social Concepts Clothe Visual Perception
Emily Balcetis, (Department of Psychology, Uris Hall, Cornell University)
Rick Dale (Department of Psychology, Uris Hall, Cornell University)

The Use of Mass Nouns to Quantify Over Individuals
David Barner, (Department of Psychology, William James Hall, Harvard)
Jesse Snedeker (Department of Psychology, William James Hall, Harvard)

A Negative Effect of Evaluation Upon Analogical Problem Solving
Christopher Bearman, (Psychology Department, Lancaster University)
Thomas C. Ormerod (Psychology Department, Lancaster University)
Linden J. Ball (Psychology Department, Lancaster University)

The Flexible Use of Deontic Mental Models
Sieghard Beller, (Department of Psychology, University of Freiburg)

Polynesian Tapu in the ‘Deontic Square’: A Cognitive Concept, its Linguistic Expression and Cultural Context
Andrea Bender, (Department of Psychology, University of Freiburg)
Sieghard Beller (Department of Psychology, University of Freiburg)
Embodied Verbal Semantics: Evidence from an Image-Verb Matching Task
Benjamin Bergen, (Department of Linguistics)
Shweta Narayan (International Computer Science Institute)
Jerome Feldman (International Computer Science Institute)

Temporal Processing for Syntax Acquisition: A simulation study
Jean-Marc Blanc, Christelle Dodane and Peter Ford Dominey (Institut des Sciences Cognitives UMR 5015 CNRS-Université Claude Bernard Lyon 1)

The effect of emotion on conditional reasoning
Isabelle Blanchette, (Department of Psychology, University of Manchester)
Anne Richards (Department of Psychology, Birkbeck College, University of London)

Content Effects in Conditional Reasoning: Evaluating the Container Schema
Amber Bloomfield, (Department of Psychology, Northwestern University)
Lance J. Rips (Department of Psychology, Northwestern University)

Literal meaning and context categories in the attribution of communicative intentions: A developmental study
Francesca Bosco, (Centro di Scienza Cognitiva, Università di Torino)
Monica Bucciarelli (Centro di Scienza Cognitiva, Università di Torino)
Bruno G. Bara (Centro di Scienza Cognitiva, Università di Torino)

Analysis of Adaptive Dynamical Systems for Eating Regulation Disorders
Tibor Bosse, (Vrije Universiteit Amsterdam, Department of Artificial Intelligence)
Martine F. Delfos (PICOWO, Psychological Institute for Consultancy, Education and Research)
Catholijn M. Jonker (Vrije Universiteit Amsterdam, Department of Artificial Intelligence)
Jan Treur (Vrije Universiteit Amsterdam, Department of Artificial Intelligence, Universiteit Utrecht, Department of Philosophy)

Deference and Essentialism in the Categorization of Chemical Kinds
Nick Braisby, (Department of Psychology, The Open University, Walton Hall)

Something Old, Something New: Addressee Knowledge and the Given-New Contract
Holly Branigan, (Department of Psychology)
Janet F. McLean (Department of Psychology)

Syntactic Alignment Between Computers and People: The Role of Belief about Mental States
Holly Branigan
Martin J. Pickering (Department of Psychology, Edinburgh)
Jamie Pearson (Department of Psychology, Edinburgh)
Janet F. McLean (Department of Psychology, Edinburgh)
Clifford Nass (Department of Communication, Stanford University)
When it is Adaptive to Follow Streaks: Variability and Stocks

Bruce Burns, (Department of Psychology; Michigan State University)

Causality and Reasoning: The Monty Hall Dilemma

Bruce Burns, (Department of Psychology; Michigan State University)
Mareike Wieth (Department of Psychology; Michigan State University)

A Mechanism-Based Framework for Predicting Routine Procedural Errors

Michael Byrne, (Department of Psychology, Rice University)

The Statistical Brain: Reply to Marcus’ The Algebraic Mind

Francisco Calvo, (Department of Philosophy, University of Murcia)
Eliana Colunga (Department of Psychology, University of Colorado)

Do we think about time in terms of space?

Daniel Casasanto, (NE20-457, MIT)
Lera Boroditsky (NE20-456, MIT)

The Prescriptive Destiny of Predictive Attitudes: From Expectations to Norms via Conventions

Cristiano Castelfranchi, (Institute of Cognitive Science and Technology – CNR)
Francesca Giardini (University of Siena, Cognitive Science Doctorate)
Emiliano Lorini (University of Siena)
Luca Tummolini (University of Siena, Cognitive Science Doctorate)

Learning Spurious Correlations instead of Deeper Relations

Norma Chang, (Department of Psychology, Carnegie Mellon University)
Kenneth R. Koedinger (Human-Computer Interaction Institute, Carnegie Mellon University)
Marsha C. Lovett (Department of Psychology, Carnegie Mellon University)

Diagrammatic Re-codification of Probability Theory: A Representational Epistemological Study

Peter Cheng, (Department of Informatics/COGS, University of Sussex)

When A’s and B’s are C’s and D’s: The effect of the cross-classification of items on learned concepts

Seth Chin-Parker, (Department of Psychology, University of Illinois)
Brian H. Ross (Beckman Institute, University of Illinois)

Seven Factors that Make Learning Successful in Networked Collaboration

Kwangsu Cho, (Learning Research and Development Center, Univ. of Pittsburgh)
Christian D. Schunn (Learning Research and Development Center, Univ. of Pittsburgh)
Automaticity of Number Perception .................................................................................. 252
Jessica Choplin, (Vanderbilt University Psychology Department)
Gordon D. Logan (Vanderbilt University Psychology Department)

Imagistic Simulation in Scientific Model Construction ....................................................... 258
John Clement, (Scientific Reasoning Research Institute College of Natural Sciences and
Mathematics and School of Education)

PAM: A Cognitive Model of Plausibility ........................................................................... 264
Louise Connell, (Department of Computer Science, University College Dublin)
Mark Keane (Department of Computer Science, University College Dublin)

When Less is Less and When Less is More: Starting Small with Staged Input .............. 270
Christopher Conway, (Department of Psychology; Cornell University)
Michelle R. Ellefson (Department of Psychology; University of Warwick)
Morten H. Christiansen (Department of Psychology; Cornell University)

Hesitation in speech can...um...help a listener understand ............................................. 276
Martin Corley, (School of Philosophy, Psychology and Language Sciences University of Edinburgh)
Robert J Hartsuiker (Department of Experimental Psychology, Ghent University)

Strategic, Metacognitive, and Social Aspects in Resource-oriented Knowledge Exchange .... 282
Ulrike Cress, (Department of Applied Cognitive Psychology and Media Psychology, University of Tuebingen)

A Neurocomputational Account of Short- and Long-Term Recency Effects .................... 288
Eddy Davelaar, (School of Psychology, Birkbeck College)
Marius Usher (School of Psychology, Birkbeck College)

Tick Talk .................................................................................................................................. 294
Douglas Davidson, (Beckman Institute University of Illinois)
Kathryn Bock (Beckman Institute University of Illinois)
David E. Irwin (Beckman Institute University of Illinois)

Representation Issues in Visual Analogy ........................................................................... 300
Jim Davies, (Artificial Intelligence Laboratory, College of Computing, Georgia Institute of Technology)
Ashok K. Goel (Artificial Intelligence Laboratory, College of Computing, Georgia Institute of Technology)

Analogical Inference in Automatic Interpretation .............................................................. 306
Samuel Day, (Department of Psychology, Northwestern University)
Dedre Gentner (Department of Psychology, Northwestern University)
Working Memory Span and Everyday Conditional Reasoning: A Trend Analysis

Wim De Neys, (Department of Psychology, K.U.Leuven)
Walter Schaeken (Department of Psychology, K.U.Leuven)
Géry d'Ydewalle (Department of Psychology, K.U.Leuven)

“Slow Mapping” in Children’s Learning of Semantic Relations

Gedeon Déak, (Department of Cognitive Science, UCSD)
Jennifer Hughes Wagner (Department of Psychology and Human Development, Vanderbilt University)

Contingent Behavior, Biases, and Adaptivity in Distributive Negotiation

Fabio Del Missier, (ITC-IRST, Trento)
Danilo Fum (Department of Psychology, University of Trieste)

A Comparison of Statistical Models for the Extraction of Lexical Information from Text Corpora

Simon Dennis, (Institute of Cognitive Science, University of Colorado)

An Alignment-based Account of Serial Recall

Simon Dennis, (Institute of Cognitive Science, University of Colorado)

Independent Representation of Abstract Arguments and Relations

Derek Devnich, (Department of Psychology, University of California)
Greg T. Stevens (Department of Psychology, University of California)
John E. Hummel (Department of Psychology, University of California)

Naïve Meanings of Force: Coherence vs. Fragmentation

Andrea diSessa, (Graduate School of Education, UC Berkeley)
Nicole M. Gillespie (Graduate School of Education, UC Berkeley)
Jennifer Esterly (Department of Psychology, CSU Stanislaus)

Learning Grammatical Constructions in a Miniature Language from Narrated Video Events

Peter Ford Dominey, (Institut des Sciences Cognitives, CNRS)

Explaining Color Term Typology as the Product of Explaining Color Term Typology as the Product of Cultural Evolution using a Bayesian Multi-agent Model

Mike Dowman, (School of Information Technologies, F09, University of Sydney)

Exploiting Cognitive Psychology Research for Recognizing Intention in Information Graphics

Stephanie Elzer, (Dept of Computer Science, University of Delaware)
Nancy Green (Dept of Mathematical Sciences, Univ. of N. Carolina)
Sandra Carberry (Dept of Computer Science, University of Delaware)
The Misattribution of Relations in Similarity Judgments of Person Concepts .............................................. 372
Zachary Estes, (Department of Psychology, University of Georgia)
Roger Alix-Gaudreau (Artificial Intelligence Program, University of Georgia)

"I Can’t See Your Eyes Well ‘Cause Your Nose is Too Short": An Interactivity Account of Face Processing .................................................................................................................. 378
Reza Farivar, (Dept. of Psychology, McGill University)
Avi Chaudhuri (Dept. of Psychology, McGill University)

Understanding Interactive Graphical Communication .................................................................................. 384
Nicolas Fay, (ATR Media Information Science Labs, 2-2-2 Hikaridai, Keihanna Science City)
Simon Garrod (Department of Psychology, University of Glasgow)
John Lee (HCRC, University of Edinburgh)
Jon Oberlander (HCRC, University of Edinburgh)

Factors Involved in the Use of In and On ............................................................................................... 390
Michele Feist, (Department of Psychology, Northwestern University)
Dedre Gentner (Department of Psychology, Northwestern University)

Mapping Self-Similar Structure: Commutative Expressions in Structure Mapping ................................ 396
Ronald Ferguson, (College of Computing, Georgia Institute of Technology)

Mechanisms of induction in children and adults: Evidence from the study of memory distortions...... 402
Anna Fisher, (Center for Cognitive Science & Department of Psychology Ohio State University)
Vladimir M. Sloutsky (Center for Cognitive Science, Ohio State University)

Perception and Perspective in Robotics ..................................................................................................... 408
Paul Fitzpatrick, (MIT Artificial Intelligence Laboratory)

Augmented Naïve Bayesian Model of Classification Learning ................................................................. 414
Lewis Frey, (Computer Science Department, Vanderbilt University)
Douglas Fisher (Computer Science Department, Vanderbilt University)

A Bayesian Satisficing Model of Human Adaptive Planning .................................................................. 420
Wai-Tat Fu, (Department of Psychology, Carnegie Mellon University)

Outcome Evaluation and Procedural Knowledge in Implicit Learning ................................................... 426
Danilo Fum, (Department of Psychology, University of Trieste)
Andrea Stocco (Department of Psychology, University of Trieste)

Contextual Focus: A Cognitive Explanation for the Cultural Revolution of the Middle/Upper Paleolithic ................................................................................................................. 432
Liane Gabora, (Department of Psychology, University of California)
Facilitated Rule Discovery in Wason’s 2-4-6 Task: The Role of Negative Triples
Maggie Gale, (Institute of Behavioural Sciences, University of Derby)
Linden J. Ball (Psychology Department, Lancaster University)

Effect of background knowledge on object categorization and generalization in preschool children...
Sabine Gelaes, (Department of Psychology, Belgium)
Anne-Sophie Detiffe (Department of Psychology, Belgium)
Jean-Pierre Thibaut (Department of Psychology, Belgium)

Reducing Cognitive Load and Fostering Cognitive Skill Acquisition: Benefits of Category-Avoiding Instructional Examples
Peter Gerjets, (Multimedia and Hypermedia Research Unit, Knowledge Media Research Center)
Katharina Scheiter (Department of Applied Cognitive Psychology and Media Psychology, University of Tuebingen)
Richard Catrambone (School of Psychology, Georgia Institute of Technology)

Perception of e-mail personality at zero-acquaintance: Extraversion takes care of itself; Neuroticism is a worry
Alastair Gill, (School of Informatics, University of Edinburgh)
Jon Oberlander (School of Informatics, University of Edinburgh)

The Distribution of People to Resources in a Networked Multi-player Environment
Robert Goldstone, (Cognitive Science Program Indiana University)
Benjamin C. Ashpole (Cognitive Science Program Indiana University)

Literary Evidence for the Cultural Development of a Theory of Mind
Andrew Gordon, (Institute for Creative Technologies, University of Southern California)
Anish Nair (Institute for Creative Technologies, University of Southern California)

Why/AutoTutor: A Test of Learning Gains from a Physics Tutor with Natural Language Dialog
A.C. Graesser, (Institute for Intelligent Systems, University of Memphis)
G.T. Jackson (Rhodes College)
E.C. Mathews (Institute for Intelligent Systems, University of Memphis)
H.H. Mitchell (Institute for Intelligent Systems, University of Memphis)
A. Olney (Institute for Intelligent Systems, University of Memphis)
M. Ventura (Institute for Intelligent Systems, University of Memphis)
P. Chipman (Institute for Intelligent Systems, University of Memphis)
D. Franceschetti (Institute for Intelligent Systems, University of Memphis)
X. Hu (Institute for Intelligent Systems, University of Memphis)
M.M. Louwerse (Institute for Intelligent Systems, University of Memphis)
N.K. Person (Institute for Intelligent Systems, University of Memphis)

Probability, algorithmic complexity, and subjective randomness
Thomas Griffiths, (Department of Psychology, Stanford University)
Joshua B. Tenenbaum (Brain and Cognitive Sciences Department, MIT)
Cognitive Design Principles for Visualizations: Revealing and Instantiating
Julie Heiser, (Department of Psychology, Stanford University)
Barbara Tversky (Department of Psychology, Stanford University)
Maneesh Agrawala (Microsoft Research)
Pat Hanrahan (Department of Computer Science, Stanford University)

Animal Models of Expertise Development
William Helton, (Department of Psychology, Wilmington)

Proximity in agreement errors
Barbara Hemforth, (Laboratoire Parole et Langage, Univ. de Aix en Provence)
Lars Konieczny (Center for Cognitive Science, IIG, Univ. Freiburg)

Semantic Illusion in Sentence Processing: a Right-Hemisphere Mechanism?
John Hoeks, (Behavioral and Cognitive Neurosciences)
Ingeborg Prinsen (Behavioral and Cognitive Neurosciences)
Laurie A. Stowe (Behavioral and Cognitive Neurosciences)

Timo Honkela, (Laboratory of Computer and Information Science, Helsinki University of Technology)
Kevin Ilmari Hynna (Laboratory of Computer and Information Science, Helsinki University of Technology)
Tarja Knuuttila (Center for Activity Theory and Developmental Work Research, University of Helsinki)

Predicting Cognitive Strategies and Eye Movements in Hierarchical Visual Search
Anthony Hornof, (Department of Computer and Information Science, University of Oregon)
Tim Halverson (Department of Computer and Information Science, University of Oregon)

A Split Model to Deal with Semantic Anomalies in the Task of Word Prediction
Janet Hui-wen Hsiao, (Division of Informatics, University of Edinburgh)

LSA: First dimension and dimensional weighting
X. Hu, (University of Memphis)
Z. Cai (University of Memphis)
D. Franceschetti (University of Memphis)
P. Penumatsa (University of Memphis)
A. C. Graesser (University of Memphis)
M.M. Louwerse (University of Memphis)
D. S. McNamara (University of Memphis)

A Race Model of Perceptual Forced Choice Reaction Time
David Huber, (Department of Psychology, 1147 Biology/Psychology Building)
Denis Cousineau (Département de psychologie, University Montreal)
Comparative Search Reveals the Tradeoff between Eye Movements and Working Memory Use in Visual Tasks.............................................................................................................. 599
Shantanu Inamdar, (Department of Computer Science, University of Massachusetts Boston)
Marc Pomplun (Department of Computer Science, University of Massachusetts Boston)

On the Use of Intelligent Agents as Partners in Training Systems for Complex Tasks......................... 605
Thomas Ioerger, (Department of Computer Science, Texas A&M University)
Joseph Sims (Department of Computer Science, Texas A&M University)
Richard A. Volz (Department of Computer Science, Texas A&M University)
Judson Workman (Department of Psychology, Wright State University)
Wayne L. Shebilske (Department of Psychology, Wright State University)

Mundane Comparisons Can Facilitate Relational Understanding......................................................... 611
Jason Jameson, (Department of Psychology, Northwestern University)
Dedre Gentner (Department of Psychology, Northwestern University)

Statistical Detection of Local Coherence Relations in Narrative Recall and Summarization Data......... 616
Cynthia Jaynes, (School of Human Development, GR4.1 University of Texas at Dallas)
Richard M. Golden (School of Human Development, GR4.1 University of Texas at Dallas)

Automatic Contextonym Organizing Model....................................................................................... 622
Hyungsuk Ji, (Institut National Polytechnique de Grenoble)
Sabine Ploux (University of Lyon I, Institut des Sciences Cognitives)

Event Reasoning as a Function of Working Memory Capacity and Long Term Working Memory Skill........................................................................................................................................... 628
Mark Jodlowski, (Department of Psychology, Mississippi State)
Stephanie M. Doane, Ph.D. (Department of Psychology, Mississippi State)

The Additive Judge: On the Abstraction of Explicit Knowledge of Cue-Criterion Relations............. 634
Linnea Karlsson, (Department of Psychology, Umeå University)
Peter Juslin (Department of Psychology, Umeå University)
Henrik Olsson (Department of Psychology, Uppsala University)

Distributed Tutorial Strategies............................................................................................................ 640
Sandra Katz, (Learning Research and Development Center, University of Pittsburgh)

A Probabilistic Parser as a Model of Global Processing Difficulty.................................................... 646
Frank Keller, (School of Informatics, University of Edinburgh)

A Psychophysical Law for Linguistic Judgments............................................................................... 652
Frank Keller, (School of Informatics, University of Edinburgh)
Theory-Based Induction.............................................................................................................. 658
Charles Kemp, (Department of Brain and Cognitive Sciences Massachusetts Institute of Technology)
Joshua B. Tenenbaum

The Fallacy of Single-Source Explanations: The Multiple Difficulties of the Nine-Dot Problem...... 664
Trina Kershaw, (Department of Psychology, University of Illinois)
Stellan Ohlsson (Department of Psychology, University of Illinois)
Colleen Coyne (Department of Psychology, University of Illinois)

The effect of cultural differences in fear of isolation on dialectical reasoning................................. 670
Kyungil Kim, (Department of Psychology, University of Texas)
Arthur B. Markman (Department of Psychology, University of Texas)

Differences in How English and German Speakers Talk and Reason about CAUSE.......................... 675
Bianca Klettke, (Department of Psychology, Memphis)
Phillip Wolff (Department of Psychology, Memphis)

Actions and Roles: using depicted events for disambiguation and reinterpretation in German and English...................................................................................................................... 681
Pia Knoeferle, (Saarland University, Department of Computational Linguistics)
Matthew W. Crocker (Saarland University, Department of Computational Linguistics)
Christoph Scheepers (University of Dundee)
Martin J. Pickering (The University of Edinburgh)

Toward a mutual adaptive interface: An interface induces a user’s adaptation and utilizes this induced adaptation, and vice versa............................................................................................... 687
Takanori Komatsu, (Future University-Hakodate)
Atsushi Utsunomiya (The University of Tokyo)
Kentarou Suzuki (The University of Tokyo)
Kazuhiko Ueda (The University of Tokyo)
Kazuo Hiraki (The University of Tokyo)
Natsuki Oka (Matsushita Electric Industrial Co., Ltd.)

The Role of Causal Models in Reasoning Under Uncertainty................................................................. 693
Tevya Krynski, (Department of Brain & Cognitive Sciences, Massachusetts Institute of Technology)
Joshua B. Tenenbaum (Department of Brain & Cognitive Sciences, Massachusetts Institute of Technology)

Inferring Hidden Causes.................................................................................................................... 699
Tamar Kushnir, (Department of Psychology, Tolman Hall, University of California)
Alison Gopnik (Department of Psychology, Tolman Hall, University of California)
Laura Schulz (Department of Psychology, Tolman Hall, University of California)
David Danks (Carnegie Mellon University)
