eWork and eBusiness in Architecture, Engineering and Construction

Edited by
Žiga Turk
University of Ljubljana, Slovenia

Raimar Scherer
University of Technology Dresden, Germany

A.A. BALKEMA PUBLISHERS Lisse/Abingdon/Exton (PA)/Tokyo
# Table of contents

**Preface**  
XIII  

**Organisation**  
XV  

## Keynote papers

**Integration directions**  
*G. Augenbroe*  
3  

**Early lessons from deployment of IFC compatible software**  
*V. Bazjanac*  
9  

**Metaphors for knowledge capture, sharing and reuse**  
*R. Fruchter*  
17  

**European collaborative R&D projects related to the “Smart organisation”. A first evaluation of activities and implications for construction**  
*E. Filos*  
27  

**Harmonization of the IST research and development for the European construction industry: The ICCI project**  
*A. Zarli, P. Katranuschkov, Ž. Turk, Y. Rezgui & A.S. Kazi*  
33  

## Virtual enterprise environments

**Virtual enterprise reference architecture and methodology**  
*A.S. Kazi & M. Hannus*  
43  

**Virtual environments for the AEC sector – the Divercity experience**  
*S. Soubra, M. Marache, P. Christiansson, J.O. Skjaerbaek & L. Da Dalto*  
49  

**Applicability of e-work models in materials management automation systems**  
*D. Castro-Lacouture & M.J. Skibniewski*  
57  

**Inter-enterprise information management in dynamic construction enterprises**  
*A.S. Kazi, Y. Rezgui, A. Zarli & M. Jokela*  
65  

**Product model management in construction virtual environments**  
*A.S. Kazi, O. Nummelin, E. Huittinen & M. Hannus*  
73  

**Benefits of using product and process model data in project management**  
*C. Kuhne & C. Leistner*  
79  

## eBusiness

**Assessment of e-business implementation in the US construction industry**  
*I. Flood, R.R.A. Issa & G. Caglasin*  
87
A prototype system for material procurement management based on the SCOR and CPFR models
R.R.A. Issa, I. Flood & A. Jiang

Can the ECOS platform contribute to e-business interoperability in AEC?
M. Borras, R. Goncalves, J. Vidagan, P. Maló & A. Steiger-Garçao

Harmonization of standards and eBusiness technology for the AEC industrial sector
R. Jardim-Goncalves, A. Steiger-Garçao, A. Llambrich & M. Martinez

The benefits of contractual support for ICTs
C.D. Carter, T.M. Hassan, M.A. Shelbourn & A.N. Baldwin

Future aspects of industrial vertical markets
R. Delina, M. Grohol & A. Lavrin

Developing electronic models to support Internet bidding
M. Ekström & H.C. Björnsson

Internet based simulation of the resource requirement of buildings
F. Neuberg, E. Rank, C. Ekkerlein & M. Faulstich

Capabilities of utilisation of information systems in facilities management
M. Naaranoja

A unified environment for life cycle cost analysis for construction products
T.E. El-Diraby

e-Infrastructure: an interoperable GIS system for infrastructure decision making
T.E. El-Diraby

IT to support cooperation in supply-chain management strategies
M. Allegra, A.Z.P. Vitrano & G. Fulantielli

**Construction management**

A model-based process component approach for construction project management
V. Karhu

State of the art of implementing new technologies for the management of construction projects in Spain
M. Casals, N. Forcada & X. Roca

VEWA: value engineering web-based application
C.W.F. Che Wan Putra & B.K. Ho

Guideliness for implementing web based models for construction management, the lack
N. Forcada, F. Peharanda & X. Roca

Construction project management tool
M. Casals, M. Calvet & N. Forcada

Construction project management: a new concept dedicated to the small- and medium-sized enterprises
B. Otjacques & P. Post

**Simulation and planning**

Next generation of construction planning and control system: The LEWIS approach
E. Sriprasert & N. Dawood

Integration of genetic algorithms and simulation for stockyard layout planning
R. Marasini & N. Dawood

Process approach to production management in a construction company
A. Sobotka, S. Biruk & P. Jaskowski

A simulation tool for multi-perspective site layout analysis
H. Tawfik, T. Fernando & R.A. Aspin
Simulation of concrete batch plant production
Z. Orlowski

4D modelling of precast concrete building constructions
A. Rönneblad & T. Olofsson

Visual simulation in the construction of buildings
P.G. Henriques & A.Z. Sampaio

Process modelling

Exchanges of process information between software tools in construction – the PSL language
A.F. Cutting-Decelle, G.T. Tesfagaber, A.N. Baldwin, C.J. Anumba & N.M. Bouchlaghem

Comprehensible process models – a case study on the communication of process models
B. Lundgren

Process models as a base for communication in revitalization projects
D.G. Beer

On modelling of the building process by a computer expert system
Č. Jaršík

Are workflow management systems useful for collaborative engineering?
A. Kokoszka, K. Siekierska, N. Quang Trung, P. Fraś & A. Pawlak

Workflow process views
Y. Zhu & G. Augenbroe

Process modelling of validation and product lifecycles
S.V. Lord, H. Aleem, T.J. McCarthy & P.N. Sharratt

Conceptual modelling

An engineering ontology framework as advanced user gateway to IFC model data
P. Katranuschkov, A. Gehre & R.J. Scherer

Using ontologies for intelligent information retrieval in an e-commerce application case study
L.A.S. Eulalia, E.S. Moreira, H. Rozenfeld & A.P.L.F. Carvalho

Dynamic information consistency checking in the requirements analysis phase of data modeling
G. Lee, R. Sacks, C.M. Eastman

From rough to final designs by incremental set-inclusion of properties
A. Eir & A. Ekholm

Serving building product information with design knowledge servers
S. Fridqvist & J.P. van Leeuwen

Using grammars for collaborative design: an experiment and impacts on industry practice
J.P. Duarte

Development and exploration of conceptual building function-to-form relationships
R.A. Aspin & T. Fernando

Project data management

The application of an integrated information modelling system for the construction industry
A.G. Kimmance, C.J. Anumba, A.N. Baldwin & D. Bouchlaghem

Current use of EDM systems in the Finnish construction industry
M. Bäckblom & B.-C. Björk

An eDocument approach for improving communication in AEC projects
K. Zreik, R. Stouffs, B. Tunçer, S. Ozsarıyıldız & M.R. Beheshti
Principles and strategies for applying data warehouse technology to construction industry
J.-K. Lee & H.-S. Lee 343

A performance-based approach for product selection from e-catalogues
S. Jain & G. Augenbroe 353

VIRCON: a proposal for critical space analysis in construction planning
S. North & G.M. Winch 359

Standard models
Overview of IFC model server framework
Y. Adachi 367

Mapping IFC versions
R.W. Amor & C.W. Ge 373

Structural analysis extension for the next IFC release
M. Weise, P. Katranuschkov & T. Liebich 379

From LexiCon to XTD
K. Woestenenk 387

The bcXML prototype: the eConstruct approach supporting eCommerce in the building and construction industry
C. Lima, J. Stephens & M. Böhms 393

BcXML enabled VR project information front-ends
R. van Rees, R. Beheshti & F. Tolman 401

Product models
Product and process integration for 4D visualisation at construction site level: A Uniclass-driven approach
N. Dawood, E. Sriprasert, Z. Mallasi & B. Hobbs 409

An integrated product and process model for steel framed buildings
W.T. Tizani, D. Ruikar & R. Smith 417

Integration of product life cycle knowledge in CAD
W. Skarka 421

Unification as a standardization tool in the design of information systems and a unified project model: MITOS
A. Kanoglu & K. Ercoskun 427

Intelligent structural modeling – technological watch and proof of concept
J.P. Rammant & M. Novak 431

Intelligent data management in building design process
R. Žiūrienė & L. Ėupaila 433

An information portal for the house building sector in TMAD

Role of design characteristics in the development of simple flats in Jakarta
S. Kosasih 437

Geometric models
Remote collaborative virtual walkthroughs utilizing 3D game technology
M.F. Shiratuddin & W. Thabet 441

Interactive 3D environment on Internet
R. Gole 447
Online integration of 3D architectural design
Y. Luo

Taking-off and 3D data modeling from 2D CAD data
W. Kim, P.-Y. Jung, J.Y. Park & H.-S. Lee

Solid modeling as a basis of co-operative planning in structural engineering
R. Romberg, A. Düster & E. Rank

The problems of modeling and rendering of the realistic complex scenes
R.V. Malcheva, Y.E. Korotin & A. Chute

Highway geometric modeling method by curvature and gradient functions
K. Makanæ

Conformance checking

Speeding-up the building plan approval – the Singapore e-plan checking project offers automatic plan checking based on IFC
T. Liebich, J. Wix, J. Forester & Z. Qi

A normative product model for integrated conformance checking of design standards in the building industry
I.A. Santos, F. Hernández-Rodríguez & G. Bravo-Aranda

Knowledge based checking of building designs, based on digital regulations
E. Pascual, R. Vankeisbelck & A. Zarli

A product model and a structural detail checking system for performance specification-based construction order
N. Yabuki, M. Furukawa, T. Yamashita & T. Yokota

Collaborative engineering

Distributed process coordination for collaborative design
M. Cumming

Managing knowledge navigation in design with mixed-initiative dialogue
S. Datta

Intelligent modeling for cooperative engineering
I.S. Sariyildiz, R. Stouffs & Ö. Ciftcioglu

Human-computer interaction: a cognitive intervention approach
P. Clarke

Web-based situated communication model for construction management
S.C. Shih & T.W. Chang

Modelling the ‘online’ information seeking patterns of construction industry professionals
S. Shaaban, J. McKechnie & S. Lockley

Concurrent engineering

Multi-project, multi-user, multi-services integration: the ISTforCE integration approach
P. Katranuschkov, R.J. Scherer & Ž. Turk

A personal planning approach for the integration and coordination of multi-project process information
M. Keller, R.J. Scherer & K. Menzel

User-centred multi-project model access
A. Gehre, P. Katranuschkov & R.J. Scherer

Virtual testing laboratory on the web
J. Červenka & P. Braniš
E-commerce and engineering consulting services
M. Mangini & F. Pelli

Use of ISTforCE concurrent engineering services platform – a case study in conceptual structural design
M. Eisfeld, R.J. Scherer & J. Červenka

Web services

Web service integration in AEC supply chain management
J.U. Min & H.C. Björnsson

WebSpec: web services and XML vocabulary for specifications in construction
G. Gudnason

Computer integrated construction at the services level – first experiences
T. Cerovsek, I. Kovacic & Ž. Turk

UDDI for a manufactured product brokering service
G. Cope & R.W. Amor

Designing distributed component-based finite element software
M. Dolenc & J. Dušovnik

A service collaboration platform for the construction industry
T. Järvinen & K. Lassila

EPIC – a transaction based integration system for building construction
H. Lu, R.R.A. Issa & R. Chow

Mobile computing

The COSMOS integrated IT solution at railway and motorway construction sites – a case study
A. Meissner, I. Mathes, L. Baxevanaki, G. Dore & C. Branki

Context-sensitive process and data management on mobile devices
K. Menzel, K. Eisenblätter, M. Keller & R.J. Scherer

Satellite-based remote multi-project reporting and controlling in construction industry applying IFCs and XML standardization
H. Boehling

Mobile product models
D. Rebolj, N. Čuš-Babič, A. Tibaut, A. Magdić & M. Radosavljević

3D visualization using the pocket PC
M.F. Shiratuddin, J.L. Perdomo & W. Thabet

Knowledge management

European research for smart organisations – a winning formula?
M.A. Shelbourn, T.M. Hassan, C.D. Carter & M. Hannus

The e-CKMI: the e-COGNOS infrastructure to support KM in the construction industry
C. Lima & A. Zarli, M. Bourdeau, M. Wetherill & Y. Rezgui

Obstructions to knowledge sharing in construction: the salesman dilemma
T. Andersen & F. Madsen

SciX: open repository for scientific information exchange and value added publication services for the construction industry
G. Gudnason, B.-C. Björk & Ž. Turk

Knowledge sharing and creating through asynchronous distributed system based on web technology
B. Shao, S. Ogata, I. Kobayashi & Y. Hoshino
Using the Internet to transfer knowledge on concrete durability: improving and fostering knowledge exchange
  I.L. Kondratova & I. Goldfarb

Constructing collective knowledge
  A. Tibaut, D. Rebolj, N. Ćuš-Babič, A. Magdič & M. Radosavljevič

Education

Models and metaphors for content organisation and content presentation
  K. Menzel, S.-E. Schapke, T. Eisenreich & C. Otto

Educating AEC professionals for e-construction
  J.M. Kamara & R.J. Watson

E-learning as a basis of e-business in AEC
  M. Casals, N. Forcada & F. Peñaranda

euroCADcrete, a computer aided learning tool for education in reinforced concrete
  R. Weener

An application of the object-oriented approach in the engineering education
  D. Tzanev

Internet technology in the remote engineer education systems
  S.V. Koloskov, V.A. Shakhnov & A.I. Vlasov

Author index
