Non-Lethal Options Enhancing Security and Stability

3rd European Symposium on Non-Lethal Weapons
May 10-12, 2005
The Proceedings are published at the beginning of the Symposium and contain the written versions of the oral presentations and posters. Due to the shortage of time, printing had to commence prior to receipt of all contributions. Therefore partly only the abstract had been printed.

TABLE OF CONTENTS

VIRTUAL WORKING GROUPS

V 1 Critical Legal Aspects of Non-Lethal Weapons (NLW)
   F. Krüger-Sprengel
   International Society for Military Law and the Law of War, Brussels, B

V 2 Human Factors and Implications of Non-Lethal Options Group
   M. Risling
   Swedish Defence Research Agency (FOI), Stockholm, SE

V 3 Current and Emerging Non-Lethal Technologies
   V.V. Selivanov
   Bauman Moscow State Technical University, Moscow, RUS

CURRENT AND DESIRED CAPABILITIES

V 4 HPM against Electronic Systems
   M. Jung, G. Wollmann
   Rheinmetall Waffe Munition GmbH, Unterlüb, D

V 5 High Environmental Compatibility Cargo Projectile
   R. Panesi
   O.T.O. Melara S.p.A., La Spezia, I

V 6 The Netherlands Non-Lethal Weapons Programme
   Z. Verheij
   TNO Defence, Security and Safety, Rijswijk, NL
NEW TECHNOLOGIES

V 7  Liquid Taser
      W. von Entress-Fürsteneck
      Diehl BGT Defence, Röthenbach, D

V 8  Current Research Activities on Non-Lethal Weapons at the
      Fraunhofer ICT
      Fraunhofer ICT, Pfinztal, D

V 9  Optical Distraction and Disorientation
      A. Gibson, R. Ives, G. Perkins, E. Liggins
      QinetiQ, Farnborough, UK

V 10 A Concept Proposal from Beretta
      P. Raffaelli
      Fabbrica d’Armi Pietro Beretta S.p.A., Gardone Val Trompia, I

EFFECTS

V 11 Behavioural and Medical Outcomes of Nonlethal Weapons Use
      C. Heal
      Los Angeles Sheriff’s Department, Monterey Park, USA

V 12 Conceptual Models of Psychological and Behavioral Reactions to
      the Use of Non-Lethal Weapons
      M.D. Silver
      Anacapa Sciences Inc., Santa Barbara, USA
V 13 Physical and Mathematical and Medico-biological Modeling of the Non-Lethal Weapons’ Functioning and Effects

V.I. Khrupkin, V.V. Savostyanov
State Institute of Medical Officers’ Postgraduate Education and Training, Moscow, RUS
V.V. Selivanov
Bauman Moscow State Technical University, Moscow, RUS

V 14 Effectiveness and Risk during Application of NLW from the Medical Point of View

E. David
University Witten/Herdecke, Witten, D

V 15 TASER® Non-Lethal Weapons: Safety Data and Field Results

T. Smith
TASER International, Scottsdale, USA

V 16 Advanced Taser: Neurophysiological Aspects

A. Buguet, J.-F. Jacquet
ETBS, Bourges Cedex, F

V 17 Principles of Modeling of the Scenario of Calmative Application in a Building with Deterred Hostages

V.L. Klochikhin, A.A. Lushnikov, V.A. Zagaynov
Karpov Institute of Physical Chemistry, Moscow, RUS
A.V. Putilov
Federal Agency on Atomic Energy, Moscow, RUS
V.V. Selivanov
Bauman Moscow State Technical University, Moscow, RUS
M.A. Zatevakhin
St. Petersburg State University, St. Petersburg, RUS
V 18 Observations on Changes in the Content of Tubulin Protein in Cell Cultures Exposed to High Power Microwave, in vitro

M. Risling, M. Sköld, E. Malm, A. Sonden, I. Larsson, M. Angeria
Swedish Defence Research Agency FOI, Stockholm, SE
L. Malmgren
University of Lund, Lund, SE

V 19 PSDB Update on UK less Lethal Technologies

G. Smith, M. Symons
Police Scientific Development Branch, St. Albans, UK

V 20 NATO Studies on Non-Lethal Weapons: Effectiveness, Human Effects and Future Technologies

M.R. Murphy
Air Force Research Laboratory, Brooks City-Base, USA

EVALUATION OF EFFECTS II

V 21 Measurement of Vircator Ultra-Short Solitary Electromagnetic Pulses

M. Steinbauer, P. Drexler, P. Fiala
Brno University of Technology, Brno, CZ

V 22 Methods and Equipment for Assessment of Microwave Radiation Influence on Biological Objects

V.N. Makukhin
Center of Scientific Engineering and Social Activities „Trymas”, Moscow, RUS

V 23 Pharmacological Non-Lethal Weapons

L. Hess
Institute for Clinical and Experimental Medicine, Prague, CZ
J. Schreiberova
Department of Anesthesiology, Hradec Kralove, CZ
J. Fusek
Military Medical Academy J.E.P., Hradec Kralove, CZ
MODELLING AND SIMULATION

V 24 Influence of Physical and Geometrical Parameters on Vortex Rings Generated by a Shock Tube

M. Havermann
ISL, Saint Louis, F
M. Kainuma, K. Takayama
Tohoku University Shock Wave Research Center, Sendai, JAP

V 25 Computer System to Simulate NLW Deployment

M.V. Sinitsyn, V.V. Leonov, V.V. Selivanov
Bauman Moscow State Technical University, Moscow, RUS

V 26 Developing a Process to Evaluate Non-Lethal Weapons (NLW)

A. Groll, C. Pick
EADS Deutschland GmbH, Friedrichshafen, D

V 27 Fluid Dynamic Issues in the Development of a Single Shot Vortex Gun

J.A. Edwards
DSTL Fort Halstead, Sevenoaks, UK
K. Kontis
University of Manchester, Manchester, UK

ACCEPTABILITY AND IMPLEMENTATION

V 28 Less Lethal Weapons Development in the UK

C. Ashe
Northern Ireland Police Fund, Holywood, UK

V 29 Prerequisites and Capabilities for Development and Deployment of Special Means of Combined Non-Lethal Effect

V.N. Baranov, V.V. Lazarev
Ministry of Internal Affairs, Moscow, RUS
V.V. Selivanov
Bauman Moscow State Technical University, Moscow, RUS
V 30 Military Use of Chemical Riot Control Agents, a Case for Legal Assessment

M. Annati
Italian Navy, Milano, I

V 31 Non-Lethal Options under Current International Law

A. Vanheusden
Ministry of Defence, Brussels, B

V 32 Issues for the Control of Non-Lethal Weapons Procurement

S. Combes
MOD, London, UK

P 33 Jet Protector Technology

J. Thomann, R. Fleischhauer
Piexon AG, Aarwangen, CH

P 34 Development of Compact Generators of Microwave and TeraHertz Radiation for the Non-Lethal Technology Stop Car

V.G. Baryshevsky, N.A. Belous, A.A. Gurinovich, V.A. Evdokimov,
A.S. Lobko, P.V. Molchanov, V.I. Stolyarsky, B.A. Tarnopolsky,
V.V. Tikhomirov
Belarusian State University, Minsk, BY

P 35 ISL’s Research on Systems with Controlled Effects for Non-Lethal Applications

J.-P. Moeglin, M. Havermann et al.
ISL, Saint Louis, F

P 36 Non-Lethal Ammunition

R. Körver
Rheinmetall Waffe Munition GmbH, Oberndorf, D
P 37 RF-Weapons for Non-Lethal Interference and Destruction of Communication, Information and Electronic Systems

J. Bohl, R. Stark
Diehl BGT Defence GmbH & Co. KG, Röthenbach, D

P 38 Acoustic NLW Working in the Audio Range

J. Altmann
Ruhr-Universität, Bochum, D

P 39 Development of a Multi Functional Rapid Deployable Barrier

Fraunhofer ICT, Pfinztal, D

P 40 Aspects of the Directed Stick Radiator (DSR)

N. Eisenreich, K.-D. Thiel, A. Herzog, E. Walschburger
Fraunhofer ICT, Pfinztal, D

P 41 Method of Calculation of Vortex Generators and Physical Characteristics of Vortex Ring

D. Levin, V. Selivanov
Bauman Moscow State Technical University, Moscow, RUS

P 42 Computer Simulation of Critical Behavior of Localized Masses (Crowd)

A.V. Kozyrev, V.V. Leonov, V.V. Selivanov
Bauman Moscow State Technical University, Moscow, RUS

P 43 Social Aspects of NLW Deployment

N.G. Bagdasaryan, V.V. Leonov, V.V. Selivanov
Bauman Moscow State Technical University, Moscow, RUS

P 44 Problems of Criminalistic Research of Non-Lethal Weapons

V.A. Fedorenko
Saratov Law Institute of the MVD of Russia, Saratov, RUS
P 45 Medical Biological Evaluation of Electroshock Stun Guns Efficiency
G.V. Batanov, V. Stepanov, M. Konturov, O. Grigorev
State Scientific Center Institute of Biophysics, Moscow, RUS

P 46 The New Class of Electroshock Stun Guns
M.D. Kontorov
Group „MARCH“, Moscow, RUS

P 47 Self-Contained Sources of Acoustic Waves Using High-Energy Materials Oscillatory Burning Modes
G. Sakovich, V. Arkhipov, A. Vorozhtsov, B. Vorozhtsov, S. Bondarchuk
Institute for Problems of Chemical and Energetic Technologies RAS, Biysk, RUS
R. Burkina
Tomsk State University, Tomsk, RUS

P 48 The Research of Blast-Acoustic Fields, Generated by a System of Distributed Explosives Charges
G. Sakovich, A. Vorozhtsov, B. Vorozhtsov, S. Bondarchuk, E. Maksimenko
Institute for Problems of Chemical and Energetic Technologies RAS, Biysk, RUS

P 49 Modeling the Effect of Acoustic Non-Lethal Weapons Influence of Acoustic Fields on the Polymer Modified Systems
Bauman Moscow State Technical University, Moscow, RUS

P 50 State of the Art and Development Prospects of Non-Lethal Weapons
N. Varenykh, G. Bideev, A. Sporykhin
Scientific Research Institute of Applied Chemistry, Sergiev Posad, RUS

P 51 International Less Lethal Weapons Database
M. Symons
Police Scientific Development Branch, St. Albans, UK
P 52  Non-Lethal Weapons - Areas of Concern

N. Lewer, N. Davison
University of Bradford, Bradford, UK

P 53  Non-Lethal Weapons for Peacekeeping Operations

R. Rahimi, O.H. Arnesen, S. Hoibraten, H. Kippe
Norwegian Defence Research Establishment, Kjeller, N

P 54  E-Encyclopedia of Less Lethal Weapons© - Status Report

P.L. Bunker, R.J. Bunker
California State University, San Bernardino, USA

P 55  Non-State OPFORs and Tactical Laser Devices & Weapons

R.J. Bunker, M. Begert, D. Lindsay
California State University, San Bernardino, USA

P 56  Diversionary Device History and Revolutionary Advancements

M.C. Grubelich, P.W. Cooper
Sandia National Laboratories, Albuquerque, USA

P 57  Evolution of X-Net® to TruX-Net: A Heavy Vehicle Arresting System

C. Lyddon
QinetiQ Vehicle Systems, Farnborough, UK

P 58  Non-Lethal...Real or Imagined?

D.M. Cole
Shield Defense Corporation, Newport Beach, USA

P 59  Non-Lethal Weapons Bases on Electro-Hydrodynamical Effect

M. Silnikov, S. Kulakov, A. Mikhaylin
NPO „Special Materials”, Sankt-Peterburg, RUS

P 60  Pulsed Power Supplies for Radiation Generators

B. Mircea Novac, I. Ramsay Smith
Loughborough University, Loughborough, UK
