 Contents

WEDNESDAY, JUNE 25, 2003  CIVILTEX

Plenary Session 1

New trends in biotextiles – M. W. King, Department of Textiles and Apparel, Technology and Management College of Textiles, North Carolina State University, Raleigh, NC, USA

Plenary Session 2

Smart textiles, an overview - L. Van Langenhove, C. Hertleer, Department of Textiles, Ghent University, Belgium

System for fabric appearance evaluation using image analysis methods – J. Hu, E. Newton, Y-C. Fong, The Hong Kong Polytechnic University, Hung Hom, Kowloon, Hong Kong

Simulating fitting cloth model of apparel surfaces – E. A. Elnashar, Lecture of Textiles & Apparel, Faculty of Specific Education, Kafer Elsheikh, Tanta University, Egypt

Parallel Session 1

Novel Fibres and Advanced Materials

Biomimetic manufacturing of customized novel fiber proteins for specialized applications - F. Teulé¹, C. Aubë³, M. Ellison², A. Abbott¹, Dept. of Genetics and Biochemistry, ¹School of Materials Science and Engineering, Clemson University, SC, USA

The mechanism and kinetics of obtaining the biologically active complex fiber - insulin as artificial insulin store – P. Skundric¹, M. Kostic¹, A. Medovic², L. Soasic-Klajic³, Department of Textile Engineering, Faculty of Technology and Metallurgy, University of Belgrade, ²Junior College of Textiles, ³Lenalpharm, Belgrade, Serbia and Montenegro

Electroactive fabrics and wearable biomonitoring devices – D. deRossi¹, F. Carpi¹, F. Lorussi¹, A. Mazzoldi¹, R. Paradiso², E. P. Scilingo¹, A. Tognetti¹, ¹Interdepartmental Research Centre “E. Piaggio”, Faculty of Engineering, University of Pisa, ²Smartex s.r.l, Pisa, Italy

Optical fibres in weaving constructions - possibilities and limitations – A. Harlin, M. Mäkinen, P. Heikkilä, Tampere University of Technology, Fiber Material Science, Finland

Innovative Techniques for Yarn and Fabric Manufacturing

A new approach for determination of yarn hairiness – B. Neckar, J. Voborova – Department of Textile Structures, Technical University of Liberec, Czech Republic

The influence of spindles vibrations on technological process of trapped twisting of chemical fibers - A. Oks, Research and Technological Company ESTA, Riga, Latvia

Innovative systems for giving compactness to continuous bundles of parallel fibres - F. Testore¹, G. Belforte², A. Ivanov², S. Mauro², ¹Department of Chemical Engineering, ²Department of Mechanics, Politecnico di Torino, Italy

Air-textured technical sewing thread mechanical properties’ dependence on manufacturing parameters - M. Balaišis, V. Jonaitienė, S. Stanys, Department of Textile Technology, Kaunas University of Technology, Kaunas, Lithuania
Innovative Techniques for Textile Finishing and Care

Does and don'ts in bioscouring: opportunities for an efficient enzymatic scouring process - P.B. Agrawal, V.A. Nierstrasz, M.M.C.G. Warmoeskerken, Textile Technology Group, Department of Chemical Technology, University of Twente, The Netherlands

Enzymes and textiles – the rate of degradation on different fibers with various types of cellulase-blends - C. Schimper, R. Campos, C. Ibanescu, T. Bechtold, Christian-Doppler Laboratory For „Textile And Fibre Chemistry Of Cellulosics“, Institut Für Textilchemie Und Textilphysik Der Leopold-Franzens-Universität Innsbruck, Austria

Utilising cold-plasma technology in functional textile finishing - M. Isomomppi, P. Nousiainen, P. Vesa, M. Järventaus, P. Heikkilä, M. Heino, E. Leppänen, Institute of Fibre Materials Science, Tampere University of Technology, Finland

The validation of plasma treatment processes used for the fluoro-polymerisation of cotton fabric - A.F. Fotheringham¹, H. de Moncuit², ¹Biomedical Textiles Research Centre (BTRC), Heriot Watt University, UK, ²Ecole Nationale Supérieure Des Arts Et Industries Textiles (ENSAIT), France

Novel Fibres and Advanced Materials

Application of microcapsules of phase change materials to textiles for thermal insulation and comfort without loss of permeability - J. I.N. Rocha Gomes, I.S.M. Cardoso, P.R.B. Santos, Departament of Textile Engineering, University of Minho, Portugal

Porous fibers from Poly (trimethylene terephthalate) - R. Kotek, D.W. Jung, P. Guzman, B. Smith, College of Textiles, Textile Engineering, Chemistry & Science, North Carolina State University, USA

Electrical property of conductive polymers/PET nanocomposites fibers - B. Kim, V. Koncar, E. Devaux, GEMTEX/ENSAIT, France

Morphology and properties of polypropylene/polyester blend fibres - A. Marcinčin, A. Ujhelyiová, E. Kőrmendyová, Slovak University of Technology, Faculty of Chemical and Food Technology, Bratislava, Slovakia

Eco-friendly agro-tech protective clothing - a new fabric from agro waste - Siddhartha Sengupta, Assistant Professor of Textile Chemistry, College of Textile Technology, West Bengal, India

Innovative Techniques for Yarn and Fabric Manufacturing

Interest of a compound yarn to improve fabric performance - M. Ferreira¹, S. Bourbigot¹, X. Flambard¹, B. Vermeulen¹, F. Poutch², ¹Laboratoire De Génie Et Matériaux Textiles (Gemtex), ²Ecole Nationale Supérieure Des Arts Et Industries Textiles (ENSAIT), France

Integral design of preforms from hybrid fibrous material for composite rotor applications - T. Leopold, B-D. Choi, C. Herzberg, P. Offermann, H. Rödel, Institute of Textile and Clothing Technology, Dresden University of Technology, Germany

New capabilities in yarn high speed testing - F. Marques¹, M.E. Cabeço Silva¹, J. Y. Drea², ¹Departamento De Engenharia Têxtil, Escola De Engenharia Da Universidade Do Minho, Portugal, ²Laboratoire De Physique Et Mécanique Textiles, Ecole Nationale Supérieure Des Industries Textiles De Mulhouse, Mulhouse Cedex, France

Modelling the relationship between feeding sliver structures and parameters of cotton - T. Jackowski, B. Chylewska, D. Cyniak, J. Czekalski, L. Jackowska-Strumillo¹, Department of Spinning Technology and Yarn Structure, ¹Computer Engineering Department, Technical University of Łódź, Poland

Weavability of unconventional yarns - B. K. Behera & V. K. Joshi, Department of Textile Technology, Indian Institute of Technology, New Delhi, India
Parallel Session 3/2

Innovative Techniques for Textile Finishing and Care

Ionic crosslinking of cotton - P. J. Hauser¹, C. B. Smith¹, M. M. Hashem²
North Carolina State University, Raleigh, North Carolina, USA, National Research Center, Cairo, Egypt

Surface modification of cellulose fibres with cellulases - M. Lopez-Lorenzo, V.A. Nierstrasz and M.M.C.G. Warmoeskerken
Textile Technology Group, Faculty of Science and Technology, University of Twente, The Netherlands

Ultrasonic-chemical-enzymatic cottonation for bast fibres - C. Sirghie¹, L. van Langenhove³, M. van Parys³, A. de Raeve³
Hogeschool Gent, Department CTO-TO2C, Gent, Universiteit Gent, Textile Department, Hogeschool Gent Department CTO-TO2C, Gent, Belgium

Alternative refinement methods for complex flax fibres using data on their structure and phase composition - A.K. Izgorodin, Y.V. Konoplev, V.N. Galashina
Ivanovo State Textile Academy, Russia

Properties of refined complex flax fibres - A.K. Izgorodin, Y.V. Konoplev, Y.V. Senchenkov
Ivanovo State Textile Academy, Russia

Cellulosic fibres and fabrics with interactive properties - B. Łaszkiewicz¹, R. Kozłowski², P. Kulpinski¹, R. Koztowski², M. Rubacha¹, J. Nowalińska¹, P. Czarnecki¹, B. Niekraszewicz¹
Technical University of Łódź, Men-Made Fibres Dept., Institute of Natural Fibres, Poznań, Poland

Antibacterial cellulose fibres obtained by NMMO process - B. Niekraszewicz, Department of Man-Made Fibres, Technical University of Łódź, Poland

Fine structure characterization of Polyamide 6 fibres through differential solubility test - J. Gacen; D. Cayuela; J. Maillo; A. Naik; M. Tzvetkova
Intexter – UPC Department of Textile and Paper Engineering, Universitat Politècnica de Catalunya, Spain

Physical and mechanical properties of the Mongolian cashmere fiber - S. Ukhnaa, J-Y. Drean
Laboratoire de Physique et Mécanique Textiles, Université de Haute-Alsace, Mulhouse Cedex, France

Quality properties of Aegean, Antalya and Southeastern Anatolia cottons of Turkey - S. Canoglu, S.M. Yükseloglu
Faculty of Technical Education, Textile Department, Marmara University, Istanbul, Turkey

Parallel Session 1/3

Novel Fibres and Advanced Materials

Cellulosic fibres and fabrics with interactive properties - B. Łaszkiewicz¹, R. Kozłowski², P. Kulpinski¹, R. Koztowski², M. Rubacha¹, J. Nowalińska¹, P. Czarnecki¹, B. Niekraszewicz¹
Technical University of Łódź, Men-Made Fibres Dept., Institute of Natural Fibres, Poznań, Poland

Antibacterial cellulose fibres obtained by NMMO process - B. Niekraszewicz, Department of Man-Made Fibres, Technical University of Łódź, Poland

Fine structure characterization of Polyamide 6 fibres through differential solubility test - J. Gacen; D. Cayuela; J. Maillo; A. Naik; M. Tzvetkova
Intexter – UPC Department of Textile and Paper Engineering, Universitat Politècnica de Catalunya, Spain

Physical and mechanical properties of the Mongolian cashmere fiber - S. Ukhnaa, J-Y. Drean
Laboratoire de Physique et Mécanique Textiles, Université de Haute-Alsace, Mulhouse Cedex, France

Quality properties of Aegean, Antalya and Southeastern Anatolia cottons of Turkey - S. Canoglu, S.M. Yükseloglu
Faculty of Technical Education, Textile Department, Marmara University, Istanbul, Turkey

Parallel Session 2/3

Innovative Techniques for Yarn and Fabric Manufacturing

Shedding without dynamic warp loading. The possibility of forming a new woven structure - J. Szosland, Department of Textile Architecture, Technical University of Łódź, Poland

The influence of the interlacement degree of woven fabrics on the ultraviolet protection factor - J. Neves; M. Neves, University of Minho, Textile Department, Portugal

Weavability of chenille yarns on air-jet looms: state of the art - L. Van Langenhove¹, P. Puissant²
Department of Textiles, Ghent University, Gent, Picanol R&D Centre, Ieper, Belgium

Structural mechanics of weft knitted fabrics for technical applications - M. De Araújo¹, R. Fangueiro¹ and H. Hong²
University of Minho, Guimarães, Portugal, Dong Hua Textile University, Xanghay, China

The influence of viscosity of threads for input tension during knitting process - R. Čiukas, D. Sadauskas
Department of Textile Technology, Kaunas University of Technology, Kaunas, Lithuania
Innovative Techniques for Textile Finishing and Care

Dyeing of microfibres and conventional fibres of Polyamide 6.6 with acid and disperse dyes - C.Kacem¹,², A.Lallam¹, F.Sakli², Laboratoire de Physique et Mecanique Textiles, ENSITM, Mulhouse Cedex France, Unite de Recherche Textiles, ISET, Tunisia

Diffusion of disperse dyes into supermicrofibres - K.H. Park, V. Koncar, GEMTEX/ENSAIT, France

The effects of pretreatment processes on printing of viscose fabrics with reactive dyestuffs - I. Tarakcioglu, A. Ozgüney, A. Özerdem, E. Bilgin, Department Textile Engineering, Ege University, Izmir, Turkey

Surfactant dye complex formation in the dyebath - E.Rybicki¹, J.Bemska¹, Technical University of Łódź, Textile Research Institute of Łódź, Poland

Medical Textiles

The use of textile electrodes in a hospital environment - L. Van Langenhove¹, C. Hertleer¹, M.Catrysse², R. Puers², H. van Egmond³, D. Matthys³, Ghent University, Department of Textiles, K.U.Leuven, ESAT-MICAS, Ghent University, Departments of Paediatrics and Genetics, UZ Gent, Belgium

Design of nonwoven scaffold structures for tissue engineering of the anterior cruciate ligament - S.L. Edwards¹, S.J.Russell¹, E.Ingham², J.B. Mathews², W. Mitchell², Department of Textile Industries, School of Biochemistry and Molecular Biology, University of Leeds, Leeds, UK

Structural and morphological aspects of artificial textile limbs blood vessels - V.Kantsevich¹, A.Auzans², L.Feldmane³, Riga Technical University, Latvian Agricultural University, P.Stradina University Hospital, Latvia

Innovative Techniques for Yarn and Fabric Manufacturing

Temperature impact to properties of electrostatically charged fibrous filters - J. Hrůza, Technical University of Liberec, Department of Nonwovens, Czech Republic

Recycled wool based non-woven material for sorption of acid dyes - M. Radetić¹, D. Jocić¹, P. Jovandić¹, Z. Lj. Petrović², H.Thomas³, Textile Engineering Department, Faculty of Technology and Metallurgy, University of Belgrade, Yugoslavia, Institute of Physics, Zemun, Serbia and Montenegro, Deutsches Wollforschungsinstitut an der RWTH Aachen, Germany

The effect of a technique of making nonwoven fabric precursor on the magnitude of electrical resistance of carbon nonwovens - R.Cislo¹, I. Krucińska¹, K. Babe², M. Koszewska³, Department of Textile Metrology, Technical University of Łódź, Institute of Chemical Technology of Wood, Academy of Agriculture, Poznań, Doctoral Studies Centre, Faculty of Textile Engineering and Marketing, Technical University of Łódź, Poland
Parallel Session 4/2

Medical Textiles

New generation of vascular protheses accomplished through weaving technologies - A. Ene, C. Mihai, The National Research-Development Institute for Textile and Leather, Department of Medical Articles, Bucharest, Romania

Optimisation of textile applications in hospitals - Lucas, J.M.1, Miguel, R.A.L.1, Gomes, J.F.2, Ribeiro, A.2, Mendes, C.1, 1University of Beira Interior, Textile Department, 2Hospital Centre Cova da Beira, Covilhã, Portugal

Parallel Session 5/1

Mathematical Modelling and Simulation

Numerical simulation of extension and shear deformation of textile materials - S. Jevsnik, J. Gersak, Faculty of Mechanical Engineering, Department of Textiles, Institute of Textile and Garment Manufacture Processes, Maribor, Slovenia

Influence of shear rigidity on the behaviour and project of wool and blended fabrics - Miguel, R. A. L.1, Lucas, J. M.1, Manich, A. M.2, 1Universidade da Beira Interior, Departamento de Ciência e Tecnologia Têxteis, Portugal, 2Consejo Superior de Investigaciones Científicas, Research & Development Center, Barcelona, Spain

Compressive textiles mechanical behavior - R. Kovar, M.Hlavova, Faculty of Textile Engineering, Technical University of Liberec, Liberec, Czech Republic

Woven fabric macroporosity properties planning - P. Dobnik Dubrovski, M. Brezocnik, Faculty of Mechanical Engineering, University of Maribor, Slovenia

Parallel Session 6/1

Modern Testing Methods and Quality Control

Olfactory properties of fabrics: assessment by sensory panel vs. electronic nose - Martin W. King1,2, Roberta K. York3, Q.Zhang4, 1College of Textiles, North Carolina State University, Raleigh, NC, USA, 2Institut des biomatiéaux du Québec, Université Laval, Québec, Canada, 3Canadian Food Inspection Agency, Winnipeg, Canada, 4Biostystems Engineering, University of Manitoba, Winnipeg, Canada

Air permeability of textile fabrics - M. Havrdová, Department of Textile Evaluation, Technical University of Liberec, Czech Republic

Influence of porosity on capillary flow in textiles - M. Lewandowski, A. Perwuelz, P. Vroman, Gemtex/Ensait, France

The study of thermal properties of linen/PES fabrics using thermovision methods - M. Michalak1, M. Zimmiewska2, I.Krucińska1, B. Więcek3, 1Faculty of Engineering and Marketing of Textiles, 2Faculty of Electrical and Electronic Engineering, Technical University of Łódź, Łódź, 3Institute of Natural Fibres, Poznań, Poland
Parallel Session 4/3

Medical Textiles

Human, protective cloths and surgical drapes as a source of particles in an operating theatre - Nurmi, S.¹, Lintukorpi, A.², Säämänen, A.¹, Luoma, T.¹, Soininen, M.¹, Suikkaknen, V-P.¹, ¹VTT, Tampere, Finland, ²Uudenmaan Sairaalapesula Oy, Finland

Analysis of the surgical gowns properties before and after irradiation: selection of the pertinent properties - M. J. Abreu¹, M. E. Cabeco Silva¹, L. Schacher², D. Adolphe², ¹Department of Textile Engineering, Universidade do Minho, Guimarães, Portugal, ²École Nationale Supérieure des Industries Textiles de Mulhouse, Université d’Haute Alsace, France

The barrier effect of woven fabrics used for surgical gowns - D. Aibibu, B. Lehmann, P. Offermann, Dresden University of Technology, Institute of Textile and Clothing Technology, Germany

Physiological properties in aspect of used yarns and structures - E. Mielicka, T. Massalska-Lipińska, T. Manduk-Chuchla, G. Wykin-Orlikowska, Institute of Knitting Techniques and Technologies TRICOTEXTIL, Łódź, Poland

Parallel Session 4/2

Mathematical Modelling and Simulation

Research on modelling nonwoven fiberswebs sound absorption properties - S. Vasile¹, ²D. Botteldooren, L. Van Langenhove¹, ¹Textile Departament, ²IT Department, Gent University, Gent, Belgium

The influence of fabric construction on the mechanical properties of the compound fabric - P. Filipovic Cebasek, P. Dobnik Dubrovski, Department of Textiles, Faculty of Mechanical Engineering, University of Maribor, Slovenia

Prediction of pilling behaviour of flat weft-knitted fabrics - B. Tvarijonavičienė, R. Čiukas, A. Matulionytė, I. Saulytė, Department of Textile Technology, Kaunas University of Technology, Kaunas, Lithuania

Influence of structure of textile surfaces on colour rendering - A. Moussa¹, D. Dupont², D. Steen1, X. Zeng¹, ¹GEMTEX-ENSAIT, Laboratoire de Colorimétrie – ESTIT, ²ERASM-ESTIT, France

Modern Testing Methods and Quality Control

The modelling and evaluation of electrical resistance and air and water flow in woven liquid filters - P. Nousiainen¹, K. Järvinen², P. Tiainen², A. Puolakka¹, ¹Institute of Fibre Materials Science, Tampere University of Technology, ²Tamfelt Corp., Tampere, Finland

Dielectric spectroscopy study of superabsorbent polymers cross-linking system at sol-gel transition - P. Hana, L. Martinova, P. Burian, ¹Department of Physics, ²Department of Nonwovens, Technical University of Liberec, Czech Republic

Theoretical approach of cotton stickiness measurement - A. Amara, LPMT, Mulhouse, France
Parallel Session 7

Management Solution for Textile and Apparel Industry

Process oriented analysis - A. W. Marin, S.Creux, U.Meyer, Institute for Manufacturing Automation, Zürich, Switzerland

The new methodological application for production of technical documentation through computer applying in the process of clothes producing - D. Ujević, D. Rogale, I. Karabegović, Faculty of Textile Technology, University of Zagreb, Croatia, Faculty of Technical Engineering, University of Bihać, Bosnia and Herzegovina

East European network of marketplaces for textile and apparel industry - M. Scarlat, C. Rusu, M. Verga, Faculty of Textiles and Leather Engineering, Centre for Continuing Education and Training, Gh. Asachi Technical University, Iasi, Romania, ItalianModa.com, Como, Italy

The network of textile and clothing associations of CEECs - R. Gebhardt, R. Naumann, Sächsisches Textilforschungsinstitut e.V., Chemnitz, Germany

Consideration concerning the assessment of the elements which exercise an influence upon the quality of management at higher education level - A. B. Murgu, C. Rusu, Dimitrie Cantemir University, Tg. Mures, Textile Management Department, Technical University of Iasi, Romania

Textile education - production processes of staple fibre yarns - B. Lehmann, Dresden University of Technology, Institute of Textile and Clothing Technology, Germany

Parallel Session 8

Textile Designing

Innovation in textile design - N. Starszakowna, Research Development, The London Institute, London, UK

Metadata for decorative designs: Application of MPEG-7 in automatic design interpretation - P. Bernard, H. Derumet, M. Huiskes, E. Pauwels, P. Vandenborre, S. Sette, L. Van Langenhove, Sophis Systems, NV, Belgium, Centre for Mathematics and Computer Science (CWI), Amsterdam, The Netherlands, Dept of Textiles, Ghent University, Belgium

High quality color reproduction on Jacquard silk textile from digital color images - K. Osaki, International Christian University, Department of Natural Sciences, Tokyo, Japan

Sleeve design in high performance clothing - optimising style and dynamic comfort - C. Liu, R. Kennon, Department of Textiles, UMIST, UK

Influence of dimensional stability and mechanical properties of knitted fabric on knitwear design - M. Kraba, Z. Stjepanovic, J. Gersak, University of Maribor, Faculty of Mechanical Engineering, Department of Textiles, Institute of Textile and Garment Manufacturing, Slovenia

Designing of fancy yarns. To produce better chenille yarns - we can work it out - K. Grabowska, Technical University of Łódź, Department of Textile Architecture, Poland
