3rd European Workshop on
CONFORMAL ANTENNAS
October 22-23, 2003, Bonn, Germany
PROCEEDINGS
incl. CD-ROM

Organized by

FGAN

Sponsored by

CST

SAM Electronics

EADS

In cooperation with

ITG VDE
Contents

Analytical and Asymptotic Modelling Techniques

Analysis of Faceted Conformal Antenna Arrays Using UTD ........................................ 9
Carina Marcus, University of Linköping, Lars Pettersson, Swedish Defence Research
Agency, Sweden

Hybrid Numerical-Asymptotic Method for the Analysis of the Radiation
from a Large Conformal Microstrip Patch Array .................................................. 13
Frédéric Molinet, Société MOTHESIM, France

Radome Impact on Impedance Parameters by an Improved Physical Optics
Algorithm .................................................................................................................. 17
Andrea Neto, Giampiero Gerini, FEL -TNO, The Netherlands

Analysis of Mutual Coupling Between Antenna Elements on Surfaces of
Revolution .................................................................................................................. 21
I.D. King, G.J. Ball, QinetiQ, United Kingdom

Radiation Characteristics of Doubly Curved Array Antennas .................................... 25
Patrik Persson, Royal Inst. of Technology, Sweden, Lars Josefsson, Ericsson
Microwave Systems AB, Sweden

A UTD-OM Technique to Design Slot Arrays on a Perfectly Conducting
Paraboloid .................................................................................................................. 29
T.N. Kaifas, T. Samaras, E. Vafladis, J.N. Sahalos, Aristotle University of
Thessaloniki, Greece

Radiation of a Conformal Field Distribution Using a Gaussian Beams
Discretisation ............................................................................................................ 33
A. Chabory, S. Bolioli, ONERA/DEMR, France, J. Sokoloff, P. Combes, UPS/AD2M,
France

Numerical Modelling Techniques

Miniature Antenna Designs on Metamaterial Substrates (Invited Paper) ............. 37
D. Psychoudakis, G. Kiziltas, J. L. Volakis, J. Halloran, University of Michigan, USA

Conformal Antennas and Complex Materials: A Method of Line Numerical
Analysis .................................................................................................................... 41
Andrea Alù, Filiberto Bilotti, Lucio Vegni, University of Roma Tre, Italy

Time Domain Simulation of Conformal Antennas Using the Finite Integration
Technique (FIT) with PBA Geometry Discretisation and Local Time Step
Adaptive Sub-Gridding ............................................................................................ 45
Frank Demming-Janssen, Holm Krüger, Peter Thoma, CST, Germany, Claudius
Löcker, Thomas Bertuch, Thomas Eibert, FGAN-FHR, Germany
Cylindrical FDTD with Phase Shift Boundaries for Simulation of Cylindrical Antenna Arrays ................................................................. 49
Torleif Martin, Lars Pettersson, Swedish Defence Research Agency (FOI), Sweden

Simulation of Circular Conformal Facetted Stacked Patch Antenna Array with Tight Radius of Curvature by Hybrid Cartesian/Cylindrical FDTD Approach ................................................................. 53
Dominique L. Paul, Ian J. Craddock, Chris J. Railton, University of Bristol, United Kingdom

Conformal Antenna Simulation by Means of an Advanced Method of Moments Code Using Adaptive Frequency interpolation Techniques .................... 57
Ulrich Jakobus, EM Software & Systems, Germany, Johann J. van Tonder, EM Software & Systems, South Africa

Analysis of Conformal Array Antenna by Moment Method in the Spatial Domain .................................................................................. 61
Alexander Svezhentsev, National Academy of Sciences of the Ukraine, Ukraine

Dyadic Green's Function of Multilayer Spherical Sector Structure .................................................. 65
Truong Vu Bang Giang, Michael Thiel, Achim Dreher, German Aerospace Center (DLR), Oberpfaffenhofen, Germany

Theoretical and Experimental Study of Spherical Rectangular Microstrip Patch Arrays ................................................................. 69
Zvonimir Sipus, Juraj Bartolic, University of Zagreb, Croatia, Niksa Burum, Polytechnic of Dubrovnik, Croatia

On the Design of Conformal Slot Arrays on Perfectly Conducting Elliptic Cones ................................................................. 73
T.N. Kaifas, T. Samaras, E. Vafiadis, J.N. Sahalos, Aristotle University of Thessaloniki, Greece

Practical Antenna Design

A Schottky Diode Sheet: Fast and Accurate Assessment of E-field Distributions (Invited Paper) ................................................................. 77
G.C. van Rhoon, A. Ameziane, W.M. Lee, Erasmus MC-Daniel den Hoed Cancer Center, The Netherlands, K. Volenc, ELLA-CS, Czech Republic

Analysis and Design of Conformal Short-Circuited-Strip Antennas ................................................................. 83
Hubregt J. Visser, TNO Industrial Technology, The Netherlands

Patch Array Design for an Active Low Cost Steerable Antenna for Multimedia Satellite Communication (ALCANT) ................................................................. 87
Florian Pivit, Werner Wiesbeck, University of Karlsruhe, Germany, Dietmar Löffler, LStelcom AG, Germany, Martin Bötcher, Michael Eube, IMST GmbH, Germany

Small Lightweight Cylindrical Patch Array with Omnidirectional Pattern ................................................................. 91
Krzysztof Zawrotny, Tomasz Rutkowski, Telecommunications Research Institute Gdańsk, Poland
A Facetted Cylindrically Curved Array for a Conformal Radar Demonstrator ... 95
Thomas Bertuch, FGAN-FHR, Germany

Conformal Phased Array for ESA’s GAIA Mission ........................................ 99
A. Martin Polegre, A. Roederer, ESA-ESTEC, Noordwijk, The Netherlands,
G. Caille, L. Boyer, Alcatel Space, Toulouse, France

2D and 3D Metallized Foam Technology Applied to Conformal Antennas ...... 103
S. Chainon, M. Hindi, Institute of Electronics and Telecommunications of Rennes,
France

Opto-Electronic E-field Probes for Interference Free Antenna Near Field and
Far Field Vector Measurements .............................................................. 107
Wieland Mann, Andreas Kortke, Sherko Zinal, Klaus Petermann, Technical University of Berlin, Germany

Applications

Reconfigurable Co-operative Conformal Array Radar Networked Systems
Based on the Agent Programming Paradigm (Invited Paper) ....................... 111
D. I. Kaklamani, N. C. Athanasopoulos, A. I. Kostaridis, C. G. Biniaris, D. G.
Lymeropoulos, N. K. Uzunoglu, National Technical University of Athens, Greece

Experimental Results for a Wide-Angle Scanning Semi-Circular Microstrip
Array on a Planar Reflector ...................................................................... 117
Jens Freese, Martin Schüller, Rolf Jakoby, Technical University of Darmstadt,
Germany

Efficient Computation of Antenna Currents and Fields in a 434 MHz Scanner
for Microwave Imaging ........................................................................... 121
Anton G. Tijhuis, Eindhoven University of Technology, The Netherlands, Ann
Franchois, Ghent University, Belgium

Conformal Antenna Array for X-Band Data Link Applications ................. 125
R. Sekora, C. Brand, O. Nagy, W. v. Storp, EADS Germany

Design Considerations in the Choice and the Definition of Phased Array
L-Band Conformal (Phalcon) AEW Radar System (Invited Paper) ............ 129
Mark R. Rosenkrantz, ELTA AEW Division, Israel

Conformal Phased Array Antennas on Vibrating Structures ...................... 133
H. Schippers, W. Schaap, J.M.P.C.M. Visser, G. Vos, National Aerospace
Laboratory NLR, Amsterdam, The Netherlands

Shape Optimization of Doubly Curved Conformal Array Antennas .......... 137
Lars Josefsson, Maria Lanne, Ericsson Microwave Systems, Sweden

Adaptive Beamforming for Conformal Antenna Arrays ......................... 141
Peter Knott, FGAN-FHR, Germany

Author Index ............................................................................................ 145
