CONTENTS

Keynote papers

BA1 Constructal design of heat and fluid flow systems
Bejan A

SB1 Imaging of complex compressible flows
Skews BW

KS1 Insight into mechanisms and review of available models for critical heat flux (CHF) in pool boiling
Kandlikar SG

TJ1 On recent advances in modelling of two-phase flow and heat transfer
Thome JR

JA1 Vapor-shear, geometric, and bundle-depth effects on the intertube falling-film modes
Wei YH and Jacobi AM

KJ1 Local heat transfer measurements during phase change processes using microscale heaters
Kim J

VP1 Weak turbulence in natural convection
Vadasz P

WL1 Multiplicity and stability in transport phenomena
Wang L

DA1 Aerospace-related fluid physics, heat transfer, and thermal control research at the NLR space division
Oelij AAM

KD1 Correlating flooding data for countercurrent gas-liquid flow in inclined and vertical ducts
Kröger DG

Entropy

CW1 Thermodynamic optimization of convective heat transfer through cross-flow over single tube
Cai W and Tao Z

LS1 Optimal distribution of hot water in growing tree-shaped networks
Lorentz S, Wechsatal W and Bejan A

DA2 Thermodynamic optimization of a laminar diffusion flame
Datta A and Leipertz A

MJ2 Thermodynamic optimization of metal-forming processes
Maximov JT and Zimparov VD

Visualization/measuring techniques

AS3 The AC-heated wire technique for the measurement of thermal properties of conducting liquids
Atalla SR

JB1 Non steady flow effects upon emulated human lung flow profiles from a positive displacement flow generator
Jones B and Miller M
LA1 Laser-Doppler analysis in the wake of a multiple fins oscillator
Leder A and Jianu A

LY1 Visual observation of wave-type vortex generator in an enlarged fin-and-tube heat exchanger
Liu MS, Lin YT, Lo J and Wang CC

MS1 Measurement of transient double diffusion fields and crystal growth using real-time phase-shifting interferometer
Maruyama S, Ohno K, Sakai S and Takahashi K

Phase change

DW1 Transition boiling phenomena including dry patches interactions
Chai LH and Wen DS

LJ2 Heat transfer of gas mixture with vapor condensation in a vertical tube
Li J and Feng PX

ZC1 Pressure drop and heat transfer measurement on ammonia forced convection boiling in vertical tubes
Zamfirescu C, Machielsen CHM and Nenu M

KT1 Condensation of mixtures in shell-and-tube condensers - the influence of important factors on calculation results
Karlsson T and Vamling L

HS1 Pressure oscillations in horizontal submerged steam jet condensation
Hong SJ, Lim BK, Cho S, Chun SY, Kim YS and Park GC

TJ2 Two-phase flow pattern map for evaporation in horizontal tubes: latest version
Thome JR and Hajal JE

DF1 Two-phase flow with phase change in porous media: a local non-equilibrium model
Duval F, Béchaud C, Fichot F and Quintard M

LV1 Refrigerant outgassing from compressor lubricant oil flowing through pipes
Lacerda VT, Prata AT and Fagotti F

LW1 An experimental study on the flow characteristics of oil-water two-phase mixture in horizontal straight pipes
Liu W, Guo L, Wu T and Zhang X

NO1 Numerical simulations on the transition between stratified and slug flow
Nydal OJ and Wangensteen T

HV1 Simulation of boiling environments using geometrical automata
Herrero V, Guido-Lavalle G and Clausse A

VV2 A semi-theoretical analysis of boiling heat transfer
Vittala CBV, Bhaumik S, Gupta SC and Agarwal VK

WH1 Bubble generation on a heated fine wire
Wang H, Peng XF and Wang BX

BR1 Condensation of R134a inside smooth tubes with and without polyol ester based lubricant
Bassi R and Bansal PK
Validation of in-tube condensation performance
Van der Hoek L, Liebenberg L and Meyer JP

Turbulence

Computation of unsteady complex geometry flows using novel non-linear turbulence models
Tucker PG

Effect of wall inclination and Reynolds number on the mean flow and turbulence characteristics in a two-dimensional wall jet, Part A: Experimental study
Villafruela JM, Villanueva R, Castro F and Parra MT

Effect of wall inclination and Reynolds number on the mean flow and turbulence characteristics in a two-dimensional wall jet, Part B: Numerical study
Villafruela JM, Villanueva R, Castro F and Parra MT

Low turbulence natural convection in an air-filled square cavity with and without partitions
Ampofo F and Karayiannis TG

Experimental study of the effect of hydrodynamic unsteadiness on a turbulent tube gas flow structure and heat transfer
Dreitzer GA, Bukharkin VB and Kraev VM

Large eddy simulation of turbulent flow in a rotating pipe
Feiz AA, Ould-Rouis M and Lauriat G

Numerical investigations of slurry pipeline transportation in fully developed turbulent flow
Ling J, Skudarnov PV, Lin CX and Ebadian MA

Mixing efficiency of turbulence in environmental flows
Venayagamoorthy SK, Stretch DD, Rottman JW and Nomura KK

Simulation

Simulation of flow across circular cylinders with discrete vortex method
Bin C, Liejin G and Xiaogang Y

Employing computational fluid dynamics in the modelling of energy storage in air-conditioning systems: The modelling of latent heat storage
Bothma C and Pretorius L

Numerical modelling of fluid flow and heat transfer processes by generic fundamental components
Chow TT

The thermal boundary layer transfer for non-isothermal surfaces using the modified Merk series of Chao and Fagbenle
Fagbenle RO

Numerical prediction of developing laminar mixed convection in an inclined tube for different Reynolds numbers
Maré T, Noirault P, Mirtel J and Galanis N

A numerical study of energy separation in a jet flow
Han B and Goldstein RJ
Application of quasi-steady-state thermodynamic model of large low-temperature radiant heating system with Takahashi control method
Gass J, Hemzal K and Hach L

Image reconstruction of two-phase flow system with electrical resistance tomography technique
Kim MC, Kim S, Kim KY, Lee HJ and Lee YJ

Swirling wall jets past axisymmetric bodies for non-Newtonian power-law fluids
Kolář V

Modelling of Darcy-Forchheimer drag tensor for fluid flow through a non-orthotropic porous medium
Lee SL and Kao CH

Image reconstruction of two-phase flow system with electrical resistance tomography technique
Kim MC, Kim S, Kim KY, Lee HJ and Lee YJ

2D Localization of a heat source using artificial Neural networks
Lalot S and Lecoeuche S

Modelling of liquid flow in flat heat pipes
Muraleedharan C, Jayaraj S and Jilani G

Modelling of liquid flow in flat heat pipes
Muraleedharan C, Jayaraj S and Jilani G

Modelling of unsteady transfer processes in two-phase flow "droplets-gas"
Miliauskas G and Sabanas V

Modelling and numerical analysis of mixing in an actively controlled micromixer
Volpert M, Meinhart C, Mezic I and Dahleh M

Beating phenomena in an acoustic resonator
Mohd-Ghazali N, McHugh JP and Watt DW

Heat and mass transfer correlations for the design of small indirect contact cooling towers
Oliveira A and Facao J

Numerical analysis of geysering
Sou A and Nakajima T

Two-phase flow separation in the vicinity of an obstacle: two-dimensional liquid film flow hydro-dynamics
Stosic ZV, Stavonovic VD and Serizawa A

Propagation phenomena during asymmetrical collision of thermal waves in a very thin film
Torii S and Yang WJ

A collocated Galerkin method for incompressible flows
Wang G
