CONTENTS (PART TWO)

Radial and axial engines

BJ1 Turbulent convective heat transfer for accelerating radial flows with special emphasis on buoyancy
Beyers JHM, Kröger DG and Harms TM

DD1 Improvement of gas turbine power plants
Scott R and Dyer D

DM2 Thermodynamic analysis of steam injected gas turbine cycles
De Paepe M

GZ1 Generalized correlations for determining heat transfer in turbine rotor-stator systems
Guzovic Z, Matijašević B and Tuković Z

KJ2 Efficiency improvement through indexing of stators of a two-stage turbine
Krysinski JE, Blaszczak JR and Smolny A

SA1 Quasiadiabatic metal - ceramic rotor blades and guide vanes for gas turbine applications
Soudarev AV, Tikhoplov VY, Suryaninov AA, Podgorets VY, Grishaev VV and Molchanov AS

TT1 Interrelation between impeller blades inlet diameter and hydraulic energy jump in turbomachinery
Tanaka T

TS2 Local heat transfer in narrow co-rotating disks with axial through-flow
Teng S and Han JC

SM1 Numerical investigation of single stage radial centrifugal turbine
Sekavčnik M, Drobnič B and Tuma M

Solidification

CM3 Convective flows in directional solidification under inclined rotation
Chang MH and Chen F

HE1 A study on the impact and solidification of the liquid metal droplet in the thermal spray deposition onto the substrate with surface defects
He EJ and Kim WS

KY1 An observation of the growth of a pore trapped in solid during solidification
Wei PS and Kuo YK

MC3 Heat transfer characterization of the solidification process resulting from a spray forming process
Mackie C, Sheng X, Hall III CA and González JE

MM3 Numerical study of heat and mass transfer during directional solidification using the AHP method
Marchenko M, Frjazinov I, Golyshev V, Timchenko V, Leonardi E, De Vahl Davis G and Abbaschian R

WP2 Distinct property effects on heat transfer of a liquid layer rapidly solidified on a substrate
Wei PS and Yeh FB
ZP1 On models for the numerical simulation of crystal growth
Zhao P and Heinrich JC

Natural convection

AF2 Laminar natural convection inside a triangular cavity with a uniform heat flux on one wall
Aquino FRQ and Zanardi MA

BA2 An experimental investigation of melting in the presence of natural convection
Bose A, Scott DA and Baliga BR

BT2 Experimental and numerical investigation of free convection in open ended horizontal rectangular channel heated from the top
Bunnag T, Sarachitti R, Khedari J, Hirunlabh J and Elegant L

EA1 Free convection from a horizontal cylinder in a non-laboratory environment
Emery AF and Van Belle L

FM1 Free convection frost formation on a cold plate in a vertical channel
Fosse M and Tanda G

OP1 Natural convection in a square enclosure with a partially heated wall section covered by a blind-like attachment with heat generation in the attachment
Oosthuizen PH

OP2 Natural convective flow in a square enclosure with a partially heated wall and which is partly filled with a high conductivity porous layer
Oosthuizen PH

Applications

BM1 Critical buckling temperature in composite plates
Wylie S, Bagheri M and Chandra S

CB1 Investigation of turbulent flow in pharmaceutical pipe tee-junctions
Corcoran BG, Esmonde H and Hashmi MSJ

CM1 Polar sub-superficial habitation modules: numerical modelling of heat transfer
Cavaca H, Caldas M and Semião V

DR1 Development of a volumetric flow rate set-up used for the evaluation of a permanent magnet and the effect it has on scale formation in a tube
Da Veiga R and Meyer JP

EH1 Evaporation rates from fresh and saline water in moving air
El-Dessouky HT, Ettouney HM, Alatiqi IM and Al-Shamari MA

FJ2 Heat and moisture transfer through fibrous insulation with phase change and mobile condensates
Fan J and Wen X

GJ2 Appropriate scaling methods for studying blood flow through a distal anastomosis
Gray JD, Owen I and Escudier MP

HM1 Electric storage water heaters - technical and economical efficiency
Hoelbling M and Sekulin M

QY1 Are viscoelasticity, high apparent extensional to shear viscosity ratio and threadlike micelle networks vital for surfactant drag reduction?
Qi Y and Zakin JL
WV3  Similarity for the vortex electro-discharged plasmotron
   Volov VT

YH1  Studies on the co-precipitation of calcium oxalate and amorphous silica
   Yu H, Sheikholeslami R and Doherty WOS

KY4  Effects of heat loss and finite pulse-time on the measurement of thermal diffusivity of
   molten slag using double hot thermocouple technique
   Kashiwaya Y and Ishii K

   Thermal systems and environment

AA3  Numerical investigation of human thermal response to extreme environmental
   conditions: Part I, Nude body
   Alfaahad AF

CK1  Saddle points in the optimization of thermo fluid systems
   Craig KJ

DN1  The economic viability of a micro turbine cogeneration system
   Denys N and Meyer JP

DW2  Temperature control in refrigerated transport with a snow bag
   Da Veiga WR and Meyer JP

LC3  An experimental study of a ceiling-type free convected thermoelectric air conditioner
   Lertsatithanakorn C, Hirunlabh J, Khedari J and Daguenet M

SM2  Thermodynamic analysis of a vapor compression refrigeration system
   Sasso M, Sibilio S and Vanoli L

SR1  Efficient equipment with special heat exchanger for thermal treatment of polluted air
   - experiments, computations, applications
   Stulir R, Stehlik P and Oral J

TP2  Optimization of the equipping and operation of the thermal process substations in
   the district heating systems
   Terzi P

WS3  Analysis of finned heat exchanger working in adsorption refrigeration system using
   zeolite and methanol
   Waszkiewicz S, Saidani-Scott H and Tierney M

   Power plants

AS1  Analyses of loss of flow accidents in the XADS demonstration facility
   Aliotta S, Castiglia F, Giardina M, Vaghetto R, Alemberi A and Barucca L

AS2  Experimental investigation of heat transfer coefficient in fluidized beds with
   immersed heating surface
   Abu-Ein S

AZ1b  The effect of magnetic field on wall-to-bed heat transfer coefficient in magneto-air
   fluidized beds
   Al-Qodah Z and Al-Busoul M

DC1  The pebble-bed reactor: effect of wall channeling on the flow in the core
   Du Toit CG

</table>
MEMS, electronic cooling and micro channels

PS1 Experimental study and computer simulation of heat transfer for high flux cooling applications with micro channels in micro-electro-mechanical system (MEMS)
Peng S and Chandratilleke T

SM3 Transient thermal analysis of a micro processor using a heat spreader with variable thermal storage characteristics
Steinke ME and Kandlikar SG

TX1 Liquid superheat during flow boiling in micro channels
Tu X and Hmjak P

Heat exchangers

BE1 Pressure drop in a plate evaporator for refrigerators
Björk E

CI1 Frictional performance of small diameter return bend
Chen IY, Yang YW, Yang BC and Wang CC

CJ1 Discrepancy between calculated and measured superheated area in an evaporator plate heat exchanger
Claesson J and Palm B

DG2 Modelling the thermal performance of rotary regenerative boiler air heaters
De Klerk GB, Sheer TJ and Jawurek HH

DJ1 Heat transfer coefficients in concentric annuli
Dirker J and Meyer JP

DM1 Three-dimensional time accurate unstructured finite volume technique for modelling ground-coupled heat exchangers
De Paepe M

ES1 Methods for assessment of heat transfer coefficient in a 180°-bend by means of CFD for engineering applications
Etemad S, Celik E, Ewaldsson M and Sundén B

GA3 Compact heat exchangers based on finned heat pipes

GJ1 Analysis of staggered tube bank heat transfer in cross foam flow
Gylys J, Jakubcionis M, Sinikunas S and Zdankus T

HP1 Heat transfer in single phase secondary refrigerants at low temperatures: effects of long thermally developing region in straight pipe and horizontal U bend
Hmjak P and Hong SH

HP2 Experimental investigation of mixed angled plate heat exchangers
Heggs PJ and Walton C

MM2 Contributions to the study of compact heat exchangers assemblies obtained by different connection of modules
Muresan M, Serbanaciu N and Ungureanu VB

WS4 Experimental and theoretical investigation of heat transfer and pressure drop in a plate-type evaporator
Wellsandt S and Vamling L
WS5  Heat transfer measurements for an evaporator plate - discussion of hysteresis and ice formation phenomena
Wellsandt S and Gabrieli C 1145

WM1  Liquid crystal thermography for heat transfer investigation in a fin-tube heat exchanger element
Wierzbowski M and Stasiek J 1151

Author Index 1156
