# Table of Contents

Design and Construction of Integral Drilled Shaft-Columns for the Boscawen-Canterbury Bridge .................................................................1  
Frederick C. Rhyner PE, Mueser Rutledge Consulting Engineers; John Byatt PE, CLD Consulting Engineers; Erin F. Wood PE, Haley & Aldrich, Inc.; Jeffrey Cicerello PE, The Louis Berger Group, Inc.; John R. Roma PE

New Tacoma Narrows Bridge Caissons.................................................. 13  
R. Bruce Patterson, Kiewit Pacific Co.

Murphy’s Law and the Pile Prediction Event at the 2002 ASCE GeoInstitute’s Deep Foundations Conference................................................. 27  
Bengt H. Fellenius, Bengt Fellenius Consultants Inc.; Moh Hussein, GRL Engineers Inc.; Paul Mayne, Georgia Institute of Technology; Ross T. McGillivray, Ardaman & Associates Inc.

Vertical Load Carrying Capacity of Concrete Expanded Base Piles ...... 45  
Mustapha Zergoun, Trow Associates Inc.; Derek Harris, Agra Foundations Inc.

PVC and Steel Access Tube Debonding during Sonic Logging Testing for the SC 170 Bridge Replacement Project......................................................... 57  
Edward L. Hajduk, Donovan L. Ledford, William R. Christopher, WPC

Evolution of Deep Foundation Systems used at the Port Ivory Intermodal Facility Site: 1906-2004................................................................. 71  
Aly M. Mohammad PhD PE, Karen C. Armfield PE, DMJM+Harris Inc.; Raymond Sandiford PE, Port Authority of NY & NJ

Load in a Drilled Foundation. Where did it go & when did it get there? .................................................................................................................. 81  
Walter E. Vanderpool, Terracon, Inc.

Improvements in Deep Compaction using Vibratory Pile Hammers .... 91  
Dennis Nottingham PE, PND Incorporated

Advantages and Limitation of Integrity Tests for Large Diameter Bored Piles in Bangkok Subsoil ......................................................................... 99  
Narong Thasnanipan, Zaw Zaw Aye, Thayanan Boonyarak, Seafco Public Co. Ltd.; Natamon Kampananon, STS Instruments Co. Ltd.

Design and Installation of Pretensioned Spun Concrete Piles to Support a Large Diameter Sewer................................................................. 109  
Naresh Koirala, EBA Engineering Consultants Ltd.; Paul Wilting, Greater Vancouver Regional District; Entzu Hsieh, AMEC
Micropiles to Support Electric Power Transmission Towers

Wendy L. Mathieson PE, Carole L.B. Mitchell PE, Christopher A. Robertson PE, Shannon & Wilson Inc.; Jim Rustvold PE, Bonneville Power Administration

St. Joseph Hospital of Bellingham, Washington Addition supported on Helical Pulldown Micropiles

J. L. Goen PE, Hubbell Power Systems; C. M. Davis, Davis Construction Services; R. A. Vickars, Vickars Developments Company

The Construction and Performance of Post-grouted Micro-piles for Vancouver International Airport Domestic Terminal Building

Design and Construction of a Micropile Wall to Stabilize a Railway Embankment

Jim Bruce PEng, Geo-Foundations Contractors Inc.; Nadir Ansari PEng, Matthew Janes PEng, Isherwood Associates

Design, Construction and Testing of Micropiles used to Support a Concrete Arch Bridge

William Auyeung PEng, Kani Foundation Technologies Inc.; Trevor Fitzell PEng, Golder Associates

Design, Prediction and Performance of Tied Back Shotcrete Walls Supporting Masonry Hospital Structures

Frank Borda CET, Carol Domitric PEng, Matthew Janes PEng, Isherwood Associates; Martin Halliwell PEng, HC Matcon Ltd.

Permanent Soil Nail Earth Retention System, Stanley Hall Replacement Project, UC Berkeley

Pirooz Barar SE, Toorak Zokaie PE, PB&A Inc.

The First Cut-Off Wall in the Indian Himalayas for the Dam of Dhauliganga Hydroelectric Project

Wolfgang G. Brunner, BAUER Maschinen GmbH

Underpass Support using Secant Pile Walls and Cement Deep Soil Mix Bottom Seal

Carole L.B. Mitchell PE, Ming-Jium (Jim) Wu PhD PE, Shannon & Wilson Inc.

Anchored Pile Foundations in British Columbia

Cory J.E. Yacyshyn PEng, Southwest Contracting Ltd.

Approach to Reliability Based Design on Deep Mixing Improved Ground

Masaki Kitazume, Port and Airport Research Institute
Seven Mile Dam Retrofit - A Global Challenge ................................. 251
  Arvindh Gupta PEng, Eberhard Heinzemann, Horst Aschenbroich, Con-
  Tech Systems Ltd.

Laterally Loaded Piles in Jointed Soft Rock Masses ....................... 259
  B. Francis MSc student, J. Kodikara, Monash University; C. Haberfield,
  Golder Associates Pty. Ltd. & Monash University

A Case Study of a Vibratory Pile Installation Monitoring of a Precast
Prestressed Concrete Pile ............................................................. 271
  K. Viking, Fugro-McClelland Marine Geosciences Inc.; R. Dietel, Piling
  Inc.; T. Roberts, Fugro Consultants LP

Behavior of Large Bored Piles with Grouted End ........................... 283
  Zhang Yaonian, Liu Xi-an, Fujian Institute of Building Research

Dynamic Characterization of Drilled Shafts on Doremus Avenue
Bridge ......................................................................................... 291
  Martina Balic, Rutgers University (DFI 2004 Student Paper Competition
  Winner)

Non-Destructive Geophysical Evaluation Of Deep-Mixed Soil: A
Computer Modeling Study ............................................................. 303
  David A. Staab, University of Wisconsin-Madison (DFI 2004 Student
  Paper Competition Runner-up)
