Proceedings of the 9th IEEE International Conference on

Methods and Models in Automation and Robotics

EDITOR
R. Kaszyński

Robotics
Modeling and Simulation
Artificial Intelligence
Discrete Processes and Scheduling Problems

IEEE Conference Number: 8780

VOLUME 2 of 2
REGULAR SESSION
Adaptive and predictive control, part II

Norm-optimal Iterative Learning plus-prediction Control
T. Townley, S. Townley, D. Owens, H. Yu ........ 539

Comparison of Two Virtual Microphone Based Adaptive Systems for Active Noise Control
M. Pawelczyk (Poland) ......................... 545

Filtered-Reference, Filtered-Error and Shaped-Error LMS Algorithms for Noise Control in an Active Headrest System
M. Pawelczyk (Poland) ......................... 549

Adjustment Parameter Choices of GPC Algorithms
S. Djebrani, F. Abdessemed and K. Benmahammed (Algeria) ......................... 555

Solving the Input-Constrained CRHPC with Barrier Function Method
D. Jerzy and A. Krolikowski (Poland) ............. 561

REGULAR SESSION
Adaptive and predictive control, part III

Improved Adaptive Control Scheme with Ball and Beam Application
L. Marton and B. Lantos (Hungary) ............... 569

Anti-Windup Compensators for Adaptive PID Controllers
D. Horla and A. Krolikowski (Poland) ............. 575

General Methodology for the Adaptive Control of a Class of Distributed Parameter Reactors
J. Czeczot (Poland) ......................... 581

REGULAR SESSION
Adaptive and predictive control, part IV

Comparison between PI Controller and B-BAC Methodology in the Application to the Control of the Neutralization Process
J. Czeczot (Poland) ......................... 589

Remarks on Model Algorithmic Control Based on Approximate Models
K. Arent (Poland) ......................... 595

Supervised Adaptive PID Controller with Anti-windup Circuit
D. Horla and A. Krolikowski (Poland) ............. 601

REGULAR SESSION
Applications of control techniques

Selecting Pole-Locations under Constraints on Plant-Inputs
T. Kawasumi, N. Hori and M. Fukuzawa (Japan) 609

Chattering Reduction by Second-Order Sliding Mode Control of Time Delay Systems
J. Fišer and P. Zítek (Czech Republic) ............. 615

Constraint Transfer in Cascade of Pfc Controllers
P. Laszczyk (Poland) ......................... 621

Closed-Loop Control Using a Low-Frequency PWM Signal
T. Sakamoto, N. Hori and U. Toru (Japan) .......... 627

REGULAR SESSION
Control of non-linear systems, part I

Non-linear Control of Crane Modules for High Rack Storage Areas
H. Aschemann and E. P. Hofer (Germany) .......... 635

Robust Longitudinal Aircraft Flight Control Under Atmospheric Turbulence
R. Czyba and M. Blachuta (Poland) ............. 641

Low Oscillations in Nonlinear Servomechanisms Described by Duffing-Type Equations
M. V. Nemescu and D. D. Lucache (Romania) .... 647

Analysis of the Superheater Nonlinear Model of a Drum Boiler
T. Liang, Z. Deliang, C. Taihua, L. Jizhen .......... 653

Derivation Approach of Lyapunov Function for Large Scale Nonlinear System
M. Kidouche (Algeria) ......................... 657

REGULAR SESSION
Identification methods and techniques

Two-Stage Identification of Hammerstein Systems
Z. Hasiewicz and G. Mzyk (Poland) .......... 665

Model (In-)Validation for Uncertain Systems with Generalized $\mu$
O. Mouhib and D. Beauvois (France) .......... 671

Application of Empirical Median for Nonlinear Systems Identification
G. Mzyk (Poland) ......................... 677

An Evolutionary Algorithm for Identification of Linear Plants with Time Delay
J. P. Paplinski (Poland) ......................... 683

Parameters Identification with Nonsymmetrical Quadratic Loss Function for Optimal Control
P. Kulczycki and A. Mazgoj (Poland) .......... 689

Application of the Averaged Differentiation Method to the Parameter Estimation of Non-Linear Systems
M. Bockowska (Poland) ......................... 695

AUTHOR INDEX ......................... 701

Volume II ......................... 718

PLENARY SESSION

Kinematics of Mobile Manipulators: an Endogenous Configuration Space Approach
K. Tchon (Poland) ......................... 721

PLENARY SESSION

Diesel Engine Emissions Aftertreatment Technologies for Removing or Controlling Particulate Matter (PM)
A. Ogut (USA) ......................... 735
PLENARY SESSION
Dynamic Pricing for Management and Control of Communication Networks
K. Malinowski (Poland) ........................................ 741

INVITED SESSION
Recent Developments in Cooperative Robotics, part I
A Layered Approach To Multiple Robot Control
J. Sequetra and M. I. Ribeiro (Portugal) ................. 745
Relative Position Estimation in a Group of Robots
F. E. Schneider, D. Wildermuth, M. Moors and A.
Kraussling (Germany) ........................................ 751
Robot-Soccer System - a Test Bed for Multiple Mo-
bile Robot Cooperation
B. Honzik and F. Solo (Czech Republic) .................. 757
Metaphor of Italian Politics: Coalition Formation
in a Robot Agency
A. Chella, R. Sorbello, D. Ribaudo, I. V. Finazzo and
L. Papuzza (Italy) ............................................ 763
Cooperative Object Localization Using Fuzzy Logic
J.P. Canovas (Spain), K. LeBlanc and A. Saffiotti (Swe-
den) ................................................................. 773
Motion Planning for Multi Robot Systems with
Closed Kinematic Chains
W. Szymkiewicz (Poland) ................................... 779

INVITED SESSION
Recent Developments in Cooperative Robotics, part II
Coordinate Strategy for Formation of Mobile Robots
W. Kowalcyz (Poland) ........................................ 789
STRING-MAN: A New Wire Robot for Gait Reha-
bilitation
D.Surdilovic and R. Bernhardt (Germany) ................. 797
A Motor Schema-Based Model for Mobile
S. Pennacchio, F. M. Raimondi ............................... 803
Modular System for Multiagent Applications
M. Kowalski, M. Kielczewski (Poland) .................... 809

INVITED SESSION
Analysis and Control of Discrete Event and Hy-
brid Systems (part I: Logic Discrete Event Sys-
tems)
Event driven Controller for an AGV System
E. Roszkowska, M. Ratke (Poland) ......................... 817
Liveness Enforcing Supervision for Resource Al-
location Systems with Complex Workflows
S. F. Chew, M. Lawley and S. Revelliotis (USA) .... 823
An Integrated Approach for the Development of Logic Controllers Based on Signal Interpreted
Petri Nets
G. Frey (Germany) ............................................. 831
Admissible Control for Resource Sharing in Com-
 pound Processes
E. Roszkowska (Poland) ....................................... 837
Towards Automation of Distributed Control Pro-
totyping Part 1-Modeling
Z. Banaszak, P. Majdzik, W. Muszynski and M. Polak
(Poland) ......................................................... 843
Towards Automation of Distributed Control Pro-
totyping Part 2-Performance Evaluation
W. Muszynski, P. Majdzik, M. Polak and Z. Banaszak,
(Poland) ......................................................... 849

INVITED SESSION
Analysis and Control of Discrete Event and Hy-
brid Systems (part II: Timed DES and Hybrid Systems)
The Max-Plus Algebra Approach to the Prototyp-
ing of Concurrent Processes
J. Stanczyk and A. Obuchowicz .............................. 857
On Supervisory Control for Timed Automata Us-
ing Urgency
M. P. Spathopoulos (UK) ...................................... 863
Throughput Optimal Scheduling for Cyclically Re-
peated Processes
E. Mayer and J. Raisch (Germany) ........................... 871
Structural Methods in Performance Analysis of
Discrete-Event Systems
W. M. Zumberek (Canada) ................................... 877

INVITED SESSION
Soft Computing Techniques and Their Applica-
tions, part I
Combining A Priori Knowledge with Neural Net-
works: Applications for System Identification and
Fault Detection
E. Arinton and J. Korbicz (Poland) ......................... 885
Nonparametric Regression Estimation by Radial
Basis Function Networks and Empirical Risk Min-
imization
A. Krzyzak (Poland) and D. Schafer (Germany) ....... 891
Kernel-Based Instrumental Variables for Nonlin-
ear System Identification
G. Mzyk (Poland) ............................................... 899

INVITED SESSION
Soft Computing Techniques and Their Applica-
tions, part II
Sensor Fusion Based on Adaptive Kalman Filter-
ing
J. Sasiadek (Canada) ........................................... 907
Integration of Soft-Computing Techniques for Seg-
mentation of Multi-Spectral Satellite Imagery
M. B. Zaremba (Canada) ........................................ 915
RBF Nets Based on Equidistributed Points
E. Rafajlowicz and E. Skubalska-Rafajlowicz .......... 923
Neural Networks with Orthogonal Activation Functions Approximating Space-Filling Curves
E. Skubalska-Rajujlowicz (Poland) 927

REGULAR SESSION
Robot control, part I.1

Discrete-Time Control of Underactuated Manipulation Systems by Nonlinear Online Optimization
D. Weidemann, N. Scherm and B. Heimann (Germany) 937

Closed Form Inverse Kinematic Solution for an 8-Degree-of-Freedom Serial Manipulator
Z. Kemeny and B. Lantos (Hungary) 947

Control and Real Time Optimization of Overactuated Cooperative Manipulators
M. Naghshineh and M. Keshmiri (Iran) 953

REGULAR SESSION
Robot control, part I.2

Compliant Control on a Domestic Service Robot Designed for Cleaning Tasks
F. Marrone, F.M. Raimondi (Italy) and M. Strobel (Germany) 963

Comparison of Sliding Mode Control and Decoupled Sliding Mode Control of Robot PUMA 560
J. Mozaryn and J. Kurek (Poland) 969

Placing of Objects in Unknown Environments
B. Finkemeyer, T. Kroeger and F. Wahl (Germany) 975

Control of Redundant Manipulators with Load Distribution Consideration
M. J. Sadigh and S. Tahmasian (Iran) 981

A Genetic Approach For Solving the Inverse Kinematics Problem of Redundant Robots
P. Kalra, P.B. Mahapatra and D. Aggarwal (India) 987

REGULAR SESSION
Robot control, part II.1

Control of Parallel Robots with Input Constraints
V. Assuncao and W. Schumacher (Germany) 995

Simple Guidance Device for Remotely Controlling Teleoperators in Real Time
J. Baczynski and M. Baczynski (Poland) 1001

Dynamic Modeling of Stewart Platform Using a Vector Bond Graph Approach
M. Duralt and S. Etemadi (Iran) 1005

REGULAR SESSION
Robot control, part II.2

Adaptive Tracking Control for Systems with Program Constraints
E. Jarzebowska (Poland) 1015

Robust Vibration Control of Flexible Planar Parallel Robot
K. Stachera and W. Schumacher (Germany) 1021

Controller for a Prismatic Robot Link with Friction-Design and Implementation
M. Petko and G. Karpel (Poland) 1027

Personal Digital Assistant as Master Manipulator of Teleoperation System
J. Baczynski and M. Baczynski (Poland) 1033

Measurement System of Force Response of Intra-Abdominal for Laparoscopy
P. Sauer, K. Kozlowski, W. Waliszewski (Poland) 1037

REGULAR SESSION
Trajectory planning, part I

Global Time Optimal Trajectory Planning for Mobile Robots by Differential Evolution Algorithm and Fuzzy Inference System
S. Aydin and H. Temeltas (Turkey) 1045

Simulation-based Kinematic Modeling of a High Precision Parallel Manipulator
N. Fazenda, T. - F. Niartitsiry and R. Clavel (Switzerland) 1051

Visual Servoing by Image Trajectory Generation and Sequential Control
O. Hornung and B. Heimann (Germany) 1059

REGULAR SESSION
Trajectory planning, part II

Using the Boundary Cubes Algorithm for Terrain Modelling and Robot Motion Planning
C. Maple (UK) 1067

Markov Localization for Mobile Robots using Omnidirectional Vision and Histogram Matching
B. Kwolek (Poland) 1073

Autonomous Mobile Robot Based on HMM and Graphs Method in the Navigation Problem
G-J. Choi and D-S. Ahn (Korea) 1079

REGULAR SESSION
Mobile robots

Path Following Problem for Mobile Manipulators with Mobile Platform of (2,0) Class
A. Mazur (Poland) 1087

Adaptive Control Algorithm for Single-Support Phase of Motion of a New Biped Robot
F. Najafi, A. Bagheri and R. Farrokhi (Iran) 1093

Using Color Image Features in Discrete Self-Localization of a Mobile Robot
W. Kasprzak and W. Szynkiewicz (Poland) 1101

A Multiple Obstacle Avoidance Using Fuzzy Approach
F. Abdessamed (Algeria) 1107

REGULAR SESSION
Computer Integrated Manufacturing and scheduling problems, part I

The Multi-Mode Resource-Constrained Project Scheduling Problem with Schedule-Dependent Setup Times in Grid Environments
M. Mika, G. Waligora and J. Weglarz (Poland) 1115
Office-Automation in Production Enterprises with an Integrated Workflow Based Information System
I. Krebs (Germany) ........................................... 1121

Reactive Heuristic Procedure for Preemptive Scheduling of Related Tasks
R. Rozycki (Poland) ......................................... 1125

REGULAR SESSION
Computer Integrated Manufacturing and scheduling problems, part II

Sampled Time Flow Controller for Fast Multi-Source Communication Networks
A. Bartoszewicz and T. Molik (Poland) ................. 1133

A Single Processor Scheduling Problem with a Single Change of Job Value
A. Janiak and T. Krysiak (Poland) ......................... 1139

Effective Algorithms for a Single Processor Scheduling Problem with Deteriorating Job Values
A. Janiak, A. Kozik and M. Winczaszek (Poland) 1145

Control Model of Rack Stacker and Rail Carrier in Flexible Manufacturing System
J. Honczarenko, A. Jardzioch and S. Jalowicki ... 1149

REGULAR SESSION
Computer Integrated Manufacturing and scheduling problems, part III

Dynamics Analysis of Cyclic Processes with Periodic Resource Allocation Function
R. Wojcik, Z. Banaszak and M. Polak (Poland) . 1157

Multi-Mode Resource-Constrained Project Scheduling Problem with Discounted Cash Inflows and Fixed Number of Payments
M. Mika, G. Waligora and J. Weglarz (Poland) . 1163

Multi-Processor Scheduling Problem with Due Interval Assignment Subject to Generalized Min-Max Type Criterion
A. Janiak and M. Marek (Poland) ......................... 1169

REGULAR SESSION
Computer Integrated Manufacturing and scheduling problems, part IV

A Model of Combined Heat and Power Generating Plant with Urban Heat Distribution Network for Production Scheduling
R. Smierzchalski, A. Augusiak and K. Dziedzicki (Poland) ........................................... 1177

Agent-Based Simulation of Flexible, Distributed Control Systems
M. Metzger (Poland) ....................................... 1183

A Single Processor Scheduling Problem with a Step Function of Change of Job Value
A. Janiak, T. Krysiak and M. Winczaszek .......... 1189

REGULAR SESSION
Computer Integrated Manufacturing and scheduling problems, part V

Use of Semi-Industrial Pilot Plants for Distributed Control System Testing
M. Metzger (Poland) ....................................... 1195

Sampled Time Congestion Control Strategy for ATM Networks
A. Bartoszewicz and M. Karbowanczyk (Poland) 1201

Similarity of Some Single Processor Scheduling Problems with Due Interval Assignment
A. Janiak and M. Marek (Poland) ......................... 1207

An Optimal Algorithm for a Single Processor Scheduling Problem with a Common Due Window
A. Janiak and M. Winczaszek (Poland) ................. 1213

REGULAR SESSION
Modeling and simulation, part I

Flatness-Based Control of a Carriage Driven by Pneumatic Muscles
H. Aschemann and E. P. Hofer (Germany) .......... 1219

Control of a Timoshenko Beam System: Theoretical and Computer Simulation Results
W. Mikowski and P. Skruch (Poland) .................... 1225

Vision Based Control and Measurement
P. Kohut (Poland) ........................................ 1231

REGULAR SESSION
Modeling and simulation, part II

Optimal Measurement Policies for Discrimination between Models of Dynamic Systems
B. Kucezewski and D. Ucinski (Poland) ............... 1239

Mapping Discretization of a System involving Delays
H. Shimamura and N. Hori (Japan) ...................... 1245

Recursive Calculations of Digital Differentiators
W. Zapala (Poland) ........................................ 1251

Estimation Of Uncertainty Measurements Linear Static Mathematical Model Coefficients
Z. Sobczyk (Poland) ...................................... 1257

REGULAR SESSION
Modeling and simulation, part III

Modeling of Hot Metal Desulfuration Processes
X.-B. Chen, Q. Qu and Z. Yu (P.R. China) ....... 1265

New Aspect in Electorate preferences Modelling Using Machine Learning
J. Holubiec, G. Szkatula and D. Wagner (Poland) 1271

Modeling of Vrage Pump Flow in Application to Neutralization Pilot Plant
K. Stebel (Poland) ........................................ 1277

Cooperative Solutions in an Education System
L. Kras (Poland) ........................................... 1283

REGULAR SESSION
Modeling and simulation, part IV

Reduction of a Disturbance Effect in PIM Digital Redesign
H. Shimamura, N. Hori and S. Nazhand (Japan) 1291
TCP/IP Accessed Real-Time Simulator of Continuous Sedimentation Process
W. Nocon (Poland) ........................................ 1297

Modeling and Parameter Estimation of Open-Loop Unstable Systems By Means Of Orthonormal Basis Functions
K. J. Latawiec, C. Marcjak, R. Rojek (Poland) and G. H. C. Olveira (Brazil) .............. 1303

REGULAR SESSION
Modeling and simulation, part V
Chemical Stabilization of Sewage Sludge: Mathematical Model of the Process
J. Kotowski and T. Marcinkowski (Poland) ..... 1311
Steady-State Values for a Physical System with Bond Graph Approach
G.A. Gilberto and R. Galindo (Mexico) .............. 1317
Qualitative Analysis for Regional Modeling
J. Holubić and G. Petriczek (Poland) .............. 1323
The Simplification of the Dynamic Models Simultaneously with an Approximate Evaluation of Their Accuracy
M. Bockowska and A. Zuchowski (Poland) ....... 1329

REGULAR SESSION
Modeling and simulation, part VI
Stochastic Harmonic Oscillators Analysis
E. Zulueta and P. M. Iriondo (Spain) .............. 1337
H. Bury and D. Wagner (Poland) .................... 1343
Analysis of Physical Appropriateness of Semi-Analytical Solution of Phenomenological Ph Models For Real-Time Simulation
K. Stebel (Poland) ........................................ 1349

REGULAR SESSION
Fault detection and isolation
Parametric Approach to Fault Detection and Isolation in Steam Turbine Control System
T. Barszcz, P. Czop and T. Uhl (Poland) ............ 1357
Fault Diagnosis in Dynamic Systems using Parametric Statistical Approach
B. Athamena (Algeria) and H. A. Abbassi (UK) 1363
Transient Response Processing for Supervisory Control with the use of Wavelet Packed Transform
M. Klemiato (Poland) ................................. 1371
Designing GMDH Neural Networks with the Bounded-Error Approach: Application to Robust Fault Detection
M. Witczak and M. Mrugalski (Poland) ............ 1377
Second-Order Stochastic Approximation for Dynamic Neural Network Training. Fault Diagnosis Study
K. Patan (Poland) ........................................ 1383

MATLAB Based Software for Computer Vision Quality Inspection
T. Bojko and P. Osuch (Poland) .................... 1389

REGULAR SESSION
Artificial Intelligence, part I
Genetic Algorithm Based Tuning of an Extended Kalman Filter
K. Rapp and P-O. Nyman (Norway) .............. 1397
Fuzzy Identification of Fuzzy Models
K. B. Janiszowski (Poland) .......................... 1403
Exploitation Indicator of Traveling Cranes Modeling Through Simulation
J. Szpytko, J. Smoczek and J. Schab (Poland) ... 1409

REGULAR SESSION
Artificial Intelligence, part II
Modeling of Closed Line Manufacturing Systems Using Neural Networks
A. Shlay, T. El-Fauhy and G. M. Aly (Egypt) .. 1417
Modelling of Adjoint Neural Networks by Generalized Nets
M. Krawczak (Poland) ................................. 1423
Decision Support System for Deflection Yoke Tuning Based on Fuzzy Logic
V. Vaitkus, A. Getzinis and R. Simutis ............ 1433
Exploitation Control Model of Transportation Devices with Telematic Use
J. Szpytko (Poland) ................................. 1439

AUTHOR INDEX ......................... 1445
