Joint International Congress and Exhibition

ELECTRONICS GOES GREEN 2004+

Driving Forces for Future Electronics

Proceedings

Glassdome designed by John Forster, Reichstag, Berlin

September 6–8, 2004
Berlin, Germany

Fraunhofer IRB Verlag · Stuttgart
# Table of Contents

**PREFACE** .................................................................................................................. 25  
**CONFERENCE SCOPE** ............................................................................................ 26  
**CONFERENCE BOARDS** ......................................................................................... 27

## OPENING KEY NOTES

**SUSTAINABILITY BY INNOVATION** ........................................................................... 31  
Bulmahn, Edelgard · Federal Minister of Research and Education, Bonn, Germany

**THE SUSTAINABILITY CHALLENGES FOR THE INDUSTRY** ........................................ 33  
Graß, Gotthard · Chief Manager, German Electrical and Electronic Manufacturers’ Association (ZVEI), Frankfurt a. M., Germany

**A NEW BUSINESS PERSPECTIVE – TURNING GREEN MANUFACTURING INTO YOUR COMPETITIVE ADVANTAGE** ................................................. 35  
Chan, Kei Bill · Chairman, Hong Kong Electronics Industries Association (HKEIA), Hong Kong, China

**SUSTAINABILITY: FAR BEYOND ECO-DESIGN** ....................................................... 37  
Ehrenfeld, John · Executive Director, International Society for Industrial Ecology, USA

**THE RESPONSIBILITY OF THE ELECTRONICS INDUSTRY** ....................................... 43  
Toepfer, Klaus · Executive-Director of the United Nations Environment Programme (UNEP), Nairobi, Kenya

**ELECTRONICS GOES GREEN - CURRENT AND FUTURE ISSUES** ............................. 45  
Stevels, Ab · Design for Sustainability Lab. Fac. IO, Delft University of Technology, Delft, The Netherlands  
Griese, Hansjoerg · Dept. Environmental Engineering, Fraunhofer IZM, Berlin, Germany

**TECHNOLOGY TRENDS AND IMPLICATIONS FOR ENVIRONMENTAL HEALTH AND SAFETY IN SEMICONDUCTOR INDUSTRY** ..................................................... 55  
Bolanos, Mario · Director of Semiconductor Packaging Development Organization, Texas Instruments, USA

**INDUSTRY CHALLENGES TOWARDS A RECYCLING-BASED ECONOMY** ................ 59  
Yonemura, Noriyuki · Counselor, Fuji-Xerox, Japan

**SUSTAINABILITY, A BIG CHALLENGE FOR BUSINESS** ........................................... 63  
Campino, Ignacio · Head of Environmental Affairs Office, Deutsche Telekom AG, Germany

**ACHIEVING SUSTAINABLE SOCIETY BY ECO-DESIGN** .......................................... 67  
Yamamoto, Ryoichi · Professor and Director Center of Collaborative Research, The University of Tokyo, Japan
TECHNICAL SESSIONS

WEEE/ROHS: PERCEPTION; CRITIQUE AND OPTIONS

Take Back of Electric and Electronic Equipment, a European phenomenon? ........................................... 75
Hieronymi, Klaus • Alliances & Partnerships, Global Take Back Operation, Hewlett-Packard, Germany

WEEE recycling and legislation development in China ................................................................. 77
Chen, Panfeng • INSEAD, Fontainebleau, France

Green Electronics: A U.S. Perspective on Policy, Risk and Product Design ........................................... 83
Schoenung, Julie M. • Department of Chemical Engineering & Materials Science, University of California, USA
Ogunseitan, Oladele A. • Department of Environmental Health, Science, and Policy, University of California, USA
Saphores, Jean-Daniel M. • School of Social Ecology & Economics Department, University of California, USA
Shapiro, Andrew A. • Jet Propulsion Laboratory, California Institute of Technology, USA; University of California, USA

Are WEEE Recycling Rates Technologically and Economically attainable? ........................................... 89
Hornberger, M.; Hieber, M. • Fraunhofer Institute for Manufacturing Engineering and Automation, Stuttgart, Germany

WEEE/ROHS: CORPORATE ACTIVITIES FOR IMPLEMENTATION

Take back of Electronics – The need to re-engineer business processes ................................................. 97
Hieronymi, Klaus • Hewlett-Packard Europe, Böblingen, Germany

Take back program for ICN products – a B2B solution for WEEE implementation ................................... 99
Renner, Horst • Siemens ICN, Munich, Germany
Chryssos, Georgios • eds-r GmbH, Thierhaupten, Germany

Definition of Standard Components to Streamline Material Declarations for Complex Electrical and Electronic Products – Experiences from Siemens Medical Solutions and Agfa-Gevaert .......................................................... 103
Nissen, Nils F. • Siemens AG, Corporate Technology CT MM DM, Berlin, Germany
Bock, Hans-Christian • Siemens AG, Medical Solutions, EH&S, Erlangen, Germany
Karl, Georg • Agfa-Gevaert AG, Corporate Ecodesign Equipment, Munich, Germany

Good Declaration Practice ...................................................................................................................... 109
Schulz, Gerd • Epcos AG, Germany
Pophal, Christian • ZVEI, Fachverband Bauelemente, Frankfurt a. M., Germany
Sartorius, Ingo • PlasticsEurope Deutschland, Frankfurt/Main, Germany
Dietrich, Marcus • ZVEI, Frankfurt/Main, Germany

WEEE/ROHS: NATIONAL IMPLEMENTATION IN EUROPE

WEEE legislation treatment and reuse activities in Hungary .............................................................. 115
Garamvolgyi, Erno; Istvan, Zoltan • Bay Zoltan Foundation for Applied Research, Institute of Logistics and Production Systems (BAY-LOGI), Miskolctapolca, Hungary

WEEE in Slovenia – before and after the 13th of August 2004 ......................................................... 121
Laurencic, Sergej • Ministry of the Environment, Spatial Planning and Energy for the Republic of Slovenia, Slovenia
Development of a sustainable WEEE recovery infrastructure in Finland, and stages of end-of-life management of electronics

Pongracz, Eva; Ylä-Mella, Jenni • University of Oulu, Department of Process and Environmental Engineering, Finland
Tanskanen, Pia • Nokia Research Center, Finland
Kaakinen, Juhani • Northern Ostrobothnia Environmental Centre, Oulu, Finland
Phillips, Paul S. • University College Northampton, SITA centre for Sustainable Wastes Management, UK
Keiski, Riitta L. • University of Oulu, Department of Process and Environmental Engineering, Oulu, Finland

Implementation of WEEE and RoHS within SMEs in Austria

Luckner, Ernst • KERP – Center of Excellence for Electronic Scrap Recycling and Sustainable Product Design, Austria

WEEE/ROHS: TECHNICAL ASPECTS OF COMPLIANCE

Experiences with WEEE Take Back Systems using the Example of Mobile Phones

Beigl, P.; Schneider, F.; Salhofer, S. • Institute of Waste Management, BOKU – University for Applied Life Sciences and Natural Resources, Vienna, Austria

Comparison of European Monitoring Standards for the Recycling of CFC-Containing Refrigerators and Freezers

Hug, Erhard • Roos+Partner AG, Luzern, Switzerland
Chappot, Anne-Christine • Ecoservices Sàrl, Yverdon-les-Bains, Switzerland
Franov, Emil • Carbotech AG, Basel, Switzerland
Gaughlhofer, Johannes; Hischier, Roland; Wäger, Patrick • EMPA, St. Gallen, Switzerland
Hediger, Robert • S.EN.S, Zürich, Switzerland

Safe Recovery of Liquid Crystal Displays (LCDs) in compliance with WEEE

Martin, Roland; Simon-Hettich, Brigitte; Becker, Werner • Merck KGaA, Darmstadt, Germany

WEEE/ROHS: HOLISTIC PERSPECTIVE

Sustainable Products and Non-Sustainable Manufacturing Systems: a Paradigm Shift Cannot be Missed

Nagel, M. H.; Tomiyama, T. • Delft University of Technology, Section Design & Life Cycle Engineering Faculty of Mechanical Engineering and Marine Technology, Delft, The Netherlands

“Never change a running process?” – Key factors for substitution decisions in complex products and production processes

Lohse, Joachim • Oko-Institut e.V, Freiburg, Germany
Lißner, Lothar • Kooperationsstelle Hamburg, Germany

Theoretical consideration on optimization of self sustainable recycling system

Hayashi, Hidetaka; Suga, Tadamoto • The University of Tokyo, Tokyo, Japan

WEEE/ROHS: ECO-LABEL AND MARKING

WEEE Marking

Schneider, Andreas • Sony International (Europe) GmbH
Baynes, Andrew • Apple Computers Europe
Crone, Joachim • Agfa-Gevaert AG, Germany
Kreis, Horst • AEG Haushaltsgeräte GmbH, Germany
Lead-free Board Marking as Marking for Environmental Issues
Stobbe, Irina · TU Berlin, Research Center Microperipherics, Berlin, Germany
Liong, Budianto · Fraunhofer Institute for Reliability and Microintegration IZM, Berlin, Germany
Nimmo, Kay · Soldertechnology ITRI, St. Albans, UK

The communication tool for environmental attributes of IT products
Wendschlag, Hans · Hewlett-Packard, Stockholm, Sweden

Blue Angel for Green Electronics
Böttcher-Tiedemann, Christiane; Jacobs, Brigitte · Federal Environmental Agency, Berlin, Germany

INTEGRATED APPROACHES FOR LEGAL COMPLIANCE

Life-Cycle Impacts of Lead and Lead-Free Solder use in Reflow Soldering of Electronics Manufacturing
Geibig, Jack; Socolof, M. L. · University of Tennessee Center for Clean Products and Clean Technologies, USA

A DfE Framework for Sustainable IT Products
Brady, Todd; McManus, Terry · Intel Corporation, Chandler, Arizona, USA

Evaluating the sustainability impacts of emerging regulations in the electronics industry – A comparison of US and European approaches
Darby, Lauren; Hines, Frances; Williams, Andrew · ESRC Centre for Business Relationships, Accountability, Sustainability and Society (BRASS), Cardiff, United Kingdom

Virtual Teams and Legal Compliance
Sweatman, Andrew; Aitchison, Katie · ESHconnect, San Jose, USA and Melbourne, Australia

EXTENDING THE LIFE-SPAN OF PRODUCTS

Partnerships for e-waste recycling
Spies, Sandra; Wucke, Anja · GTZ, Eschborn, Germany

Substituting computers for services – potential to reduce ICT’s environmental footprint
Plepys, Andrius · International Institute for Industrial Environmental Economics at Lund University, Sweden

Pay-per-use models in the IT sector – A driver for re-use and refurbishment?
Nittnaus, P.; Brandstötter, M. · Austrian Society for Systems Engineering and Automation, Vienna, Austria
Knoth, R. · ReUse Elektro(nik)produkte- und Bauteilverwertung GmbH, Vienna, Austria
Kopacek, B. · Ecotronics Eco-Efficient Electronics and Services, Vienna, Austria
Kopacek, P. · Vienna University of Technology, Department for Sustainable Development and Business, Vienna, Austria

Environmental, Social, and Economical Implications of Cross-border Second-hand EE Product Flows
Sleinotaite-Budriene, Lina · Apini, Institute of Env. Engineering, Vilnius, Lithuania
EFFICIENT TAKE-BACK SYSTEMS AND LOGISTICS

Simulation Analysis of Globally Integrated Logistics and Recycling Strategies
 Song, Sang J.; Kubota, Hiroshi · Hiroshima Institute of Technology, Graduate School of Mechanical Systems Engineering, Department of Information and Intelligent Systems Engineering, Hiroshima, Japan

Supply Chain Management in Take Back of WEEE
 Eckerth, Gregor · INTERSEROH AG, Cologne, Germany

Take Back needs Logistics
 Hansen, Uwe · University of Applied Sciences RheinAhrCampus, Remagen, Germany

Take-back systems – a logistic and economic comparison
 Hauser, Henrik; Hohaus, Christian · Fraunhofer Institute for Materialflow and Logistics, Dortmund, Germany

TAKE-BACK QUANTITIES AND MONITORING

Disposal-behaviour prognosis for electrical consumer goods
 Hora, Maike · econcept, agency for sustainable design, Cologne, Germany

Approaches to Estimate Future Quantities of Waste Electrical and Electronic Equipment (WEEE)
 Walk, Wolfgang · Forschungszentrum Karlsruhe, Institute for Technical Chemistry, Department of Technology-Induced Material Flow (ITC-ZTS), Karlsruhe, Germany

Rules on compliance with Article 7 of the WEEE Directive – Monitoring reuse, recycling and recovery rates
 Sander, Knut; Zangl, Stéphanie · Ökopol GmbH, Hamburg, Germany

DISASSEMBLY TECHNOLOGIES

“Active Disassembly Using Smart Materials” End of Life Technology for WEEE – Results from the Framework V project
 Arnaiz, Sixto · GAIKER Centro Tecnológico, Zamudio, Spain
 Bodenhofer, Karl · Sony International (Europe) GmbH, Stuttgart, Germany
 Harrison, David; Hussein, Habib · Brunel University, Runnymede, United Kingdom
 Herrmann, Constantin · PE Europe GmbH, Stuttgart, Germany
 Irasarri, Luis; Malaina, Mercedes · Indumetal Recycling, Bilbao, Spain
 Schnecke, Doreen · Motorola Advanced Technology Center-Europe, Taunusstein, Germany
 Tanskanen, Pia · Nokia Research Centre, Helsinki, Finland

Hybrid Disassembly System for Cellular Telephone End-of-Life Treatment
 Kniebel, Martin; Seliger, Günther; Basdere, Bahadir · Technical University Berlin, Institute for Machine Tools and Factory Management, Dept. of Assembly Technology and Factory Management, Berlin, Germany

Increased Reliability through Assessment of Standard Components with Life Cycle Units...
 Buchholz, Alexander · Institut für Werkzeugmaschinen und Fabrikbetrieb, TU Berlin, Germany
 Middendorf, Andreas · TU Berlin, Research Center Microperipherics, Dept. Sustainable Technologies, Germany
 Ray, Priyadip · TU Berlin, Germany
 Reichl, Herbert · TU Berlin, Research Center Microperipherics, Berlin, Germany
 Seliger, Günther · Institut für Werkzeugmaschinen und Fabrikbetrieb, TU Berlin, Germany
SUSTAINABILITY STRATEGIES FOR BUSINESS

Using Sustainability to Manage Risk, especially Reputational Risk .................................................. 295
Golüke, Ulrich • blue-way, Diessen, Germany

Governance of new technologies for innovations towards sustainability ............................................. 299
Türk, Volker; Von Geibler, Justus; Kuhndt, Michael • Wuppertal Institute for Climate, Environment and
Energy, Research Group Sustainable Production and Consumption, Wuppertal, Germany

NTT Group Activities and Initiatives on Environmental Protection ......................................................... 301
Aoki, Tadahito • Nippon Telegraph and Telephone Corporation, Tokyo, Japan
Ibata, Yasuhiro • NTT Communications Corporation, Tokyo, Japan
Nakamura, Jiro; Nishi, Shiro • NTT Information Sharing Laboratory Group, Tokyo, Japan

Integrated Product Policy (IPP) as an Opportunity for Enterprises to Meet Ecological and
Economical Goals - A Combined Approach of Bavaria and Siemens Medical Solutions ................. 307
Steinmetzer, Hans-Christian • Bavarian State Ministry of the Environment, Public Health and Consumer
Protection, München, Germany
Schröder, Freimut • Siemens Medical Solutions, Erlangen, Germany

LEADFREE ELECTRONICS: TRENDS AND TRANSITION

Technological Innovation started by Environmental Concerns ............................................................ 315
Müller, Jutta • Fraunhofer IZM, Department Environmental Engineering, Berlin, Germany
Hagelüken, Marcel • Research Center for Microperipheric Technologies, TU Berlin, Germany
Griese, Hansjörg • Fraunhofer Institute for Reliability and Microintegration IZM, Department
Environmental Engineering, Berlin, Germany
Reichl, Herbert • Research Center for Microperipheric Technologies, TU Berlin, Germany

Trends in soldering have to match with lead-free solders ................................................................. 321
Diepstraten, Gerjan • Vitronics Soltec BV, Oosterhout, The Netherlands
Barbini, Denis • Vitronics Soltec Inc., Stratham, NH, USA

Requirements, Solutions and Conversion Roadmap for Lead Free- and
Halogen Free IC-devices and Components ......................................................................................... 325
Burger, Klaus • Atmel Germany GmbH, Heilbronn, Germany

Pb-free Production of Telecommunication Network Equipment: Technological and
Logistical Challenges ....................................................................................................................... 329
Michel, Hans-Jürgen • Siemens AG, ICN M&L TDC CE MC2, Bruchsal, Germany

LEADFREE ELECTRONICS: COMPONENTS

Global Collaboration for Lead-Free – IMS Project EFSOT ................................................................. 337
Okamoto, Masahide; Serizawa, Koji; Harada, Masahide • Production Engineering Research Laboratory,
Hitachi Ltd., Yokohama, Japan
Deubzer, Otmar • TU Berlin, Research Center Microperipherics, Dept. Sustainable Technologies, Berlin, Germany
Cho, Il-Je; Chae, Kyu-Sang • LG Production engineering Research Center, Korea

Current status of lead-free solder in Japan and energy consumption of soldering process ........ 343
Fujino, Masahisa; Suga, Tadatomo • Research Center for Advanced Science Technology,
The University of Tokyo, Japan
Whisker Formation on Sn-Plated Components
Oberndorff, P.; Klerk, J. • Philips Centre for Industrial Technology, Eindhoven, The Netherlands
Dittes, M. • Infineon Technologies AG, Regensburg, Germany
Crema, P. • ST Microelectronics, Agrate Brianza, Italy

Proposal of Accelerated Life – Test Methodology for Lead-Free Electronic Products
Drozd, Zdzislaw; Drozd, Jaroslaw; Szwech, Marcin • Warsaw University of Technology, Institute of Precision and Biomedical Engineering, Division of Precision and Electronic Product Technology, Warszawa, Poland

LEADFREE ELECTRONICS: SOLDERS

Optimization of lead free solder paste for robust process and reliable solder joint
Laugt, Anne-Marie • Avantec, France
Evers, C.J. • Philips CFT, The Netherlands
Caban, D. • Thomson Multimedia, France
Wilczek, P.; Spilka, G. • AB Mikroelektroniks, Austria

Effect of Interfacial Microstructure on Joint Strength between Sn-Ag-Cu and Sn-Zn-Bi solders and Cu Substrate
Hirose, Akio; Yanagawa, Hiroto; Ide, Eiichi; Kobayashi, Kojiro F. • Department of Manufacturing Science, Graduate School of Engineering, Osaka University, Japan

Development of Micro-structured Sn-2Ag-0.1Al Solder with Highly Thermal Fatigue Durability
Tanaka, Junichi • Graduate School of Engineering, Hokkaido University, Sapporo, Japan
Takashima, Toshiyuki • Department of Mechanical Engineering, Hokkaido Institute of Technology, Sapporo-shi, Japan
Yoshimi, Kenji; Serizawa, Koji • Hitachi, Ltd. Production Engineering Research Laboratory, Yokohama, Japan
Narita, Toshio • Graduate School of Engineering, Hokkaido University, Sapporo, Japan

Simple Removal Method of Enriched Copper from Lead-free Soldering Bath
Nishikawa, Hiroshi • Center for Advanced Science and Innovation, Osaka University, Japan
Takemoto, Tadashi • Joining and Welding Research Institute, Osaka University, Osaka, Japan
Takahashi, Toshihide • Graduate School, Osaka University, presently at Toshiba Corporation, Japan

LEADFREE ELECTRONICS: PRINTED WIRING BOARDS

PCBs with immersion tin finish – some experiences with lead-free reflow process
Bukat, Krystyna; Kozioł, G.; Sitek, J.; Borecki, J.; Hackiewicz, H. • Tele and Radio Research Institute, Poland
Merkle, H.; Schröder, S. • Ormecon Chemie GmbH & Co.KG, Ammersbek, Germany
Girulska, A.; Gardela, K. • Eldos Sp. z o.o., Wroclaw, Poland

An optimizing method of Printed Wiring Board design compatible with lead-free soldering
Kikuchi, Shunichi; Yamada, Mitsutaka; Iketaki, Kenji; Yamamoto, Tsuyoshi; Higashi, Osamu • Fujitsu Limited, Kawasaki, Japan

The influence of the micro alloying element Ni on mechanical and soldering properties of tin-copper alloys
Läntzsch, Michael; Jost, Gregor; Berger, Thomas • Balver Zinn, Balve, Germany

LEADFREE ELECTRONICS: IMPLEMENTATION

Practical application of lead free solder in Electronic production
Chae, Kyu-Sang; Min, Jae-Sang; Kim, Ik-Joo; Cho, Il-Je • LG Electronics, Corea

ECO-DESIGN SUPPORT

Implementing ecodesign for EEE-products
Eikelenberg, N.L.W.; Kok, I. C.; Tempelman, E. • TNO Industrial Technology, Eindhoven, The Netherlands

Integrating Life Cycle Analysis (LCA) with Process Modelling
Chen, Yue; McRae, Gregory • Massachusetts Institute of Technology, Cambridge, MA, USA

Designing Environmentally Friendly Products in Conformity with the Market – A Holistic Analysis of Product Characteristics
Oberender, Christof; Birkhofer, Herbert • Darmstadt University of Technology, Institute for Product Development and Machine Elements, Darmstadt, Germany

Requirements and solutions for a practicable ecological product assessment
Nissen, Nils F. • Siemens AG, CT MM DM, Berlin, Germany
Paeglow, Sabrina • PhD student at Technical University of Berlin, Germany
Walachowicz, Frank • Siemens AG, CT MM DM, Berlin, Germany

ECO-DESIGN TOOLS

Analysis of the characteristics of QFDE and LCA for ecodesign support
Sakao, Tomohiko • Mitsubishi Research Institute, Inc., Tokyo, Japan
Kaneko, Kazuhiro • Ebara Corporation, Japan
Masui, Keiji • The New Energy and Industrial Technology Development Organization, Tokyo, Japan
Tsubaki, Hiroe • University of Tsukuba, Japan

“Welcome to the Jungle” – Survival of the Fittest Environmental Screening Indicators?
Hagelüken, Marcel; Schischke, Karsten • TU Berlin, Research Center Microperipherics, Dept. Sustainable Technologies, Berlin, Germany
Müller, Jutta; Griese, Hansjörg • BeCAP c/o Fraunhofer IZM Dept. Environmental Engineering, Berlin, Germany

Integrating FMEA with TRIZ for Eco-Innovation
Yen, Sheng-Bou; Chen, Jahau Lewis • Department of Mechanical Engineering, National Cheng Kung University, Tainan, Taiwan

Simple LCA by Response Surface Method for Multidisciplinary Design of Eco-Product
Chen, Jahau Lewis; Chien, Hsiao-Wen • Department of Mechanical Engineering, National Cheng Kung University, Tainan, Taiwan

PRODUCT DATA MANAGEMENT: IMPLEMENTATION

Integrated Environmental Compliance Management – The Importance of Being Smart
Schulze, Bert • TechniData AG, Markdorf, Germany

Enabling the Paperless World with RosettaNet
Robson, Colin • RosettaNet, United Kingdom

Trials for Product’s data Management through RosettaNet using RosettaNet Technical Dictionary (RNTD) and Partner Interface Processes (PIP) 2A10
Hashimoto, Shinya, • NEC Electronics Corp., Kanagawa, Japan
Sato, Katsumi • Sony Corp., Japan
Ito, Seigo • Toshiba Corp., Japan
Imamura, Eita • Fujitsu Ltd., Japan
Fukuda, Hisashi; Mackin, John • RosettaNet, Japan
PRODUCT DATA MANAGEMENT: CONCEPTS

Environmental Life Cycle Information Management and Acquisition – First Experiences and Results from Field Trials .......................... 541
Bodenhöfer, Karl; Schneider, Andreas • Sony International (Europe) GmbH (SIE), Stuttgart, Germany
Cock, Tim; Brooks, Andrew; Sands, Graham • Merloni Elettrodomestici, Stoke-on-Trent, United Kingdom
Allman, Lee; Simon, Matthew • Sheffield Hallam University, Sheffield, United Kingdom
Chong, Seng Kwong; Yang, Kevin • De Montfort University, Leicester, United Kingdom
Delannoy, Olivier; Catanese, Bruno • Cybernetix, Rousset, France
Müller, Katrin • Motorola GmbH, Taunusstein, Germany

Environmental product information management in the automotive electronics sector – integrated reporting on material contents and product recyclability .................. 547
Jürgens, Gunnar • Continental Automotive Systems, Frankfurt, Germany

Strategies for Compliance and DfE: Managing Data throughout the Supply Chain .......... 551
Goodall, Catherine • EPI, Jamestown, RI, USA

UBIQUITOUS ELECTRONICS

The Future Impact of ICT on Environmental Sustainability ........................................ 559
Van Wunnik, Christine; Rodríguez Casal, Carlos; Delgado Sancho, Luis; Burgelman, Jean Claude; Desruelle, Paul • Institute for Prospective Technological Studies, European Commission, DG-JRC, Spain

The Impacts of Pervasive Computing on Health and Environment ................................ 565
Erdmann, Lorenz; Behrendt, Siegfried • Institute for Futures Studies and Technology Assessment (IZT), Germany

Polytronics: Technology Trends and Environmental Issues ........................................ 571
Bock, K.; Burghart, M.; Klink, G.; Pöttter, H.; Müller, J. • Fraunhofer Institute for Reliability and Microintegration, Munich and Berlin, Germany
Hageluken, M. • TU Berlin, Research Center Microperipherics, Dept. Sustainable Technologies, Berlin, Germany

Design for a Sustainable Society utilizing Information & Communication Technologies ...... 577
Fujimoto, Jun • Research Center for Advanced Science & Technology, University of Tokyo, Japan
Matsumoto, M. • Fundamental and Environment Laboratories, NEC Corporation, Japan

ECO-DESIGN IN PRACTICE

Fujitsu Siemens Computers Green Design Concept ............................................. 585
Podratzky, Harald • Fujitsu Siemens Computers, Augsburg, Germany

A Practical Approach to Implementing CSR in the Electronics Industry:
Global Supply Chain Management focusing on Corporate Social Responsibility .......... 591
Jamieson, Saul • Panasonic Mobile Communications Development of Europe (PMCDE), United Kingdom
Hilbron, Raphael • Vodafone Group Plc, UK
Rice, Gareth • Panasonic Mobile Communications Development of Europe (PMCDE), United Kingdom
Clift, Roland; Wehrmeyer, W. • Centre for Environmental Strategy, University of Surrey, United Kingdom

Environmental Assessment of products at Philips Electronics .................................. 597
Van der Wel, Hans; Bisschop, Marielle • Philips CFT, Eindhoven, The Netherlands
ENERGY SUPPLY: PHOTOVOLTAIC AND FUEL CELL TECHNOLOGY

Portable fuel cell performance; the influence of environment and user profile ........................................... 611
Flipsen, B.; Coremans, B. · Delft University of Technology, Delft, the Netherlands

A MEMs Based Planar Micro Fuel Cell with Self Breathing Cathode Side ....................................................... 617
Wagner, Stefan; Hahn, Robert; Krumbholz, Steffen; Reichl, Herbert · Fraunhofer Institute for Reliability and Microintegration IZM, Berlin, Germany

Solar Energy makes SENSE
Analysis, Development, Improvements at the Example of Solar Modules ..................................................... 623
Warburg, Niels · Universität Stuttgart, IKP, Abt. Ganzheitliche Bilanzierung, Echterdingen, Germany
Springer, Johann · Zentrum für Sonnenenergie- und Wasserstoff-Forschung Baden-Württemberg, Germany
Wörsing, Katharina · Fraunhofer-Gesellschaft, Institut für Chemische Technologie, Pfinztal, Germany
Irasarri, Miguel · GAIKER Technology Center, Zamudio, Spain

ENERGY EFFICIENCY

Energy Efficient Microprocessor Design: More Performance With Less Power ............................................... 629
Sadowy, Donna · Advanced Micro Devices, Inc., Sunnyvale, CA, U.S.A;
AMD Saxony Limited Liability Company & Co. KG, Dresden, Germany

Eco-Design And Human Powered Devices ........................................................................................................ 635
Kazazian, Thierry · O2 France, Paris, France
Jansen, Arjen · PES research group, Delft University of Technology, The Netherlands

Energy consumption issues in portable electronics .............................................................................................. 641
Strijk, R. · Delft University of Technology, The Netherlands

SMEs Helping Close the Digital Divide – RE Powered ICTs ............................................................................. 647
Agbemabiese, Lawrence; Otto, Martina · United Nations Environment Programme, Division of Technology, Industry and Economics, Paris, France

METAL-ORIENTED MATERIAL RECYCLING

Gold recovery from printed wiring board using bioleaching ............................................................................. 653
Kita, Yoshito · Faculty of engineering, Osaka university, Japan
Nishikawa, Hiroshi · Center for Advanced Science and Innovation, Osaka University, Japan
Takemoto, Tadashi · Joining and Welding Research Institute, Osaka University, Japan

Eco Efficient Optimization of Pre-processing and Metal Smelting ................................................................. 657
Van Heukelem, Arnout; Reuter, Markus; Huisman, Jaco · TU Delft, Delft, The Netherlands
Hagelüken, Christian; Brusselaers, Johan · Umicore Precious Metals Refining, Hoboken, Belgium
**SEES Project – How to improve the Recyclability Potential of Automotive Electronics** ........................................... 663
Alonso, Juan Carlos · Lear Automotive (EEDS) Spain SL, Valls, Spain
Lichtenvort, Kerstin · Technical University of Berlin, Systems Environmental Engineering, Germany
Arnaiz, Sixto · GAIKER Centro Tecnológico, Zamudio, Spain

**PLASTICS-ORIENTED MATERIAL RECYCLING**

**Screening QWERTY Analysis on Printer Cartridges Recycling** ................................................................. 671
Huisman, Jaco · Design for Sustainability Research Group, TU Delft, Delft, The Netherlands
Scheijgrond, Jan Willem · EPSON Europe, Amsterdam, The Netherlands

**Industrial Network: Recycling plastics from WEEE** .................................................................................. 677
Mäurer, Andreas; Schlummer, Martin · Fraunhofer-Institute for Process Engineering and Packaging,
Department Product Safety and Analysis, Freising, Germany

**Re cyclable IMD: A Solution for Decorated Plastic Parts?** ................................................................. 683
Schnecke, Doreen · Motorola GmbH, Motorola Advanced Technology Center - Europe, Taunusstein, Germany
Günther, Jörg · Kunststoff-Institut Lüdenscheid GmbH, Germany

**GREEN ICT APPLICATIONS**

**WLAN versus LAN – Environmental Impacts of Small and Medium Sized Local Area Networks** ................................................................. 691
Quack, Dietlinde; Hottenroth, Heidi · Öko-Institut e.V., Freiburg, Germany

**Key Environmental Performance Indicators (KEPIs): A New Approach to Environmental Assessment** ................................................................. 697
Singhal, Pranshu · International Institute for Industrial Environmental Economics (IISEE) at Lund University, Sweden
Ahonen, Salla · Nokia Corporation, Finland
Rice, Gareth · Panasonic Mobile Communications Europe (PMCE), United Kingdom
Stutz, Markus · Motorola Advanced Technology Centre, Germany
Terho, Markus · Nokia Corporation, Finland
Van der Wei, Hans · Philips CFT, The Netherlands

**Life Cycle Assessment of 3rd Generation Nokia Handset** ................................................................. 703
McLaren, Jake · Nokia Multimedia, Imaging Business Unit, Summit Avenue, Farnborough, Hampshire, UK
Piukkula, Niina · Tampere University of Technology, Department of Environmental Technology,
Occupational Safety Engineering

**Ecological and Economical Effects of Future Services by Information and Communications Technology** ................................................................. 707
Nakamura, Jiro; Nishi, Shiro · NTT Information Sharing Laboratory Groups, NTT Corporation, Japan

**GREENING THE GLOBAL SUPPLY CHAIN**

**Role and Strategy of OEM in a Green Supply Chain** ................................................................. 715
Shih, Li-Hsing · Department of Resources Engineering, National Cheng Kung University, Tainan, Taiwan

**Product Chain Collaboration and Environmental Innovations – A Task for Different Stakeholders** ................................................................. 719
Remmen, Arne; Moosgard, Mette · Aalborg University, Aalborg, Denmark
Strengthening the Capacity of SMEs and Local Authorities in Developing Countries to Tackle Environmental Requirements in the Supply Chain
Sonnemann, Guido • Division of Technology, Industry and Economics (DTIE), United Nations Environment Programme (UNEP), Paris, France

“Made in China” – Challenges and Opportunities for Companies from a Socially Responsible Investment Point-of-View
Plinke, Eckhard; Ashida, Makiko • Sarasin Sustainable Investment, Bank Sarasin & Cie. AG, Basel, Switzerland

Managing Global Responsibility
Saur, Konrad • Five Winds International, Donzdorf, Germany

NEW MATERIALS: PRINTED WIRING BOARDS
New Technology for a Sustainable Printed Circuit Board Manufacturing Process
Bains, Narinder; Geraghty, Kate; Goosey, Martin • Rohm and Haas Electronic Materials, Coventry, UK

Thermoplastic Printed Circuit Boards for Future Electronics
Möller, Martin; Gensch, Carl-Otto • Öko-Institut e.V., Freiburg, Germany
Altsstädt, Volker • Universität of Bayreuth, Bayreuth, Germany
Behrendt, Mathias • Reifenhäuser GmbH & Co. KG, Troisdorf, Germany
Glöde, Stefan • Lübeg Elektronik GmbH & Co. KG, Weiden, Germany
Kostelnik, Jan • Würth Elektronik GmbH & Co. KG, Rot am See, Germany
Langenfelder, Dieter • Universität of Bayreuth, Bayreuth, Germany
Landdeck, Hubert • KEW Konzeptentwicklung GmbH, Kronach, Germany
Park, Heyje • Würth Elektronik GmbH & Co. KG, Rot am See, Germany
Scheel, Wolfgang • Fraunhofer IZM, Berlin, Germany
Wahlen, Lars • Lehmann & Voss & Co., Hamburg, Germany

Renewable resources for use in printed circuit boards
Nägele, Helmut; Pfitzer, Jürgen • TECNARO GmbH, Eisenach/Stedtfeld, Germany
Lehnberger, Christoph • Andus Electronic GmbH, Berlin, Germany
Landdeck, Hubert • KEW Konzeptentwicklung GmbH, Germany
Birkner, Klaus • Loewe Opta GmbH, Germany
Viebahn, Ulrich • Maschinenfabrik Viebahn GmbH, Germany
Müller, Jutta; Schmidt, Ralf; Scheel, Wolfgang • Fraunhofer Institute for Reliability and Microintegration IZM, Berlin, Germany
Hagelüken, Marcel • TU Berlin, Research Center Microperipherics, Dept. Sustainable Technologies, Berlin, Germany

Measurement of VOC and SVOC Emissions from Electronic Consumer Products with a 1 m³ Emission Test Chamber
Wensing, Michael • Fraunhofer Wilhelm-Klauditz-Institute (WKI), Material Analysis and Indoor Chemistry, Braunschweig, Germany

NEW MATERIALS: FLAME RETARDANTS
Highly Efficient Flame Retardant Curing Agent for Epoxy Resins
Blundell, Cefn • Akzo Nobel Chemicals bv, Amersfoort, The Netherlands.
Levchik, S.; Piotrowski, A. • Akzo Nobel Chemicals, Dobbs Ferry, NY, USA
New environmentally-friendly Phosphorus based Flame Retardants for Printed Circuit Boards as well as Polyamides and Polyesters in E&E Applications

Dietz, Mathias · Clariant GmbH, Knapsack, Germany
Hoerold, Sebastian; Nass, Bernd; Schacker, Ottmar · Clariant GmbH, Gersthofen, Germany
Schmitt, Elmar · Clariant GmbH, Sulzbach am Taunus, Germany
Wanzke, Wolfgang · Clariant GmbH, Gersthofen, Germany

Sustainability Concerns For Flame Retarded Plastics Used in Electrical and Electronic Equipment Applications

Dawson, Raymond B.; Landry, Susan D. · Albemarle Corporation, Baton Rouge, LA, USA

Environmental and Economic Implications of a Shift to Halogen-Free Printed Wiring Boards

Bergendahl, Carl Gunnar · IVF Industrial Research and Development Corporation, Mölndal, Sweden
Lichtenvort, Kerstin · Technical University of Berlin, Systems Environmental Engineering, Germany
Johansson, Glenn; Zackrisson, Mats · IVF Industrial Research and Development Corporation, Mölndal, Sweden
Nyssönen, Jonna · Aspocomp Oy, Salo, Finland

GREEN SEMICONDUCTOR PROCESSES

Implementing Cleaner Production in Semiconductor and Printed Circuit Board Industry in India

Sethi, V. C.; Pandey, U. C. · Ministry of Communication and Information Technology, Department of Information Technology, CGO Complex, New Delhi, India
Schischke, Karsten · TU Berlin, Research Center Microperipherics, Dep. Sustainable Technologies, Germany
Griese, Hansjoerg · Fraunhofer Institute for Reliability and Microintegration IZM, Department Environmental Engineering, Berlin, Germany
Reichl, Herbert · TU Berlin, Research Center Microperipherics, Berlin, Germany

Improving the Environmental Performance of In Situ PECVD Chamber Cleaning Processes by studies of CVD Reactor Clean Performance and Field Evaluation of Optimised Processes

Sistem, Mark · Air Products PLC, Crewe, United Kingdom
Johnson, Andrew D.; Elder, Delwin L.; Ji, Bing; Karwacki, Eugene J. · Air Products and Chemicals, Inc., Allentown, USA

Green Technological Process of Dry Laser Vacuum Microlithography and Equipment Cluster for its Realisation in ASIC Manufacturing

Tochitsky, E. I.; Obukhov, V. E. · "Plasmoteg" SEC of the Physical Technical Institute of the National Academy of Sciences of Belarus, Minsk, Belarus
Tochitsky, Y. I. · Concern "Planar", Minsk, Belarus
Hoepfl, R. · University of Applied Sciences, Deggendorf, Germany

GREEN SEMICONDUCTOR MANUFACTURING

Decision making for the installation of environment protection equipment in Semiconductor Manufacturing

Lässig, B.; Rall, F. · M+W Zander, Stuttgart, Germany
Schmidt, M. · University of applied science, Pforzheim, Germany
Schottler, M. · M+W Zander, Stuttgart, Germany

Selection Experience and Analysis of Point-of-Use Abatement Systems for the Semiconductor Industry

Oetjen, Eckhard · AMD Saxony Limited Liability Company & Co. KG, Dresden, Germany
Beyond the walls of Semiconductor Fabs: Energy intensity of high grade materials

Plepys, Andrius • The International Institute for Industrial Environmental Economics at Lund University, Sweden
Schischke, Karsten • TU Berlin, Research Center Microperipherics, Dept. Sustainable Technologies, Germany

SEMICONDUCTOR EQUIPMENT DECOMMISSIONING

Decommissioning - Five critical steps to minimize both risk and cost
Barnes, Robert • Robert Barnes Associates, Scottsdale, Arizona, USA

Disposition of Assets –Tools
Melief, Ron • ASML & SEC/N, The Netherlands

SEMI Guidelines for Decommissioning and Decontamination
Lucas, Pierre • Semiconductor Equipment and Materials International (SEMI), Brussels, Belgium

SPECIAL: 10 YEARS OF CARE ELECTRONICS AND 5 YEARS OF SCARE

Introduction to CARE Electronics and SCARE
Kopacek, Bernd; Scheidt, Lutz-Günther • International CARE Electronics Office, Vienna, Austria

NOVEL APPROACHES

Ecodesign in industry is not an environmental issue
Pascual, Oriol • Design for Sustainability Program, Delft University of Technology, The Netherlands
Stevels, Ab • Environmental Competence Centre, Philips Consumer Electronics, Eindhoven, The Netherlands

Beyond Eco-Efficiency: A Strategy for Eco-Effective Product and System Design
Braungart, Michael • EPEA Internationale Umweltforschung GmbH, Hamburg, Germany and McDonough Braungart Design Chemistry, Charlottesville, USA
Bollinger, Andrew • McDonough Braungart Design Chemistry, Charlottesville, VA, USA

Visualising the Environmental Appearance of Audio Products
Stilma, Margot • University of Twente, Enschede, The Netherlands
Stevels, Ab • TU Delft, The Netherlands and Philips Consumer Electronics, Eindhoven, the Netherlands
Christiaans, Henri; Kandachar, Prabhu • TU Delft, The Netherlands

Managing Energy Related Green House Gas Emissions: What Are Your Options?
Meissen, Ronald • Baxter International, Deerfield, IL, USA
Eagan, Patrick • University of Wisconsin-Madison, Madison, WI, USA

EDUCATION AND TRAINING

New Subject “Life Cycle Engineering” at Technical University Braunschweig to Bring Topics of Actual Concern into Students’ Education
Herrmann, Christoph; Ohlendorf, Martin, Dettmar, Tina • Institute of Machine Tools and Production Technology (IWF), Technical University Braunschweig, Germany

Using Life Cycle Assessment in Design for Environment Education of Product Development Staff
Jauhiainen, Hannu • Vaisala Oyj, Helsinki, Finland
Kaipainen, Jukka; Ristolainen, Eero; Valkama, Jani • Tampere University of Technology, Institute of Electronics, Tampere, Finland
The Life Cycle of Mobile Phones – A School Teaching Project

Schmidt, Christine; Wichmann, Anka • wibz wartenberger innovations- & bildungszentrum gGmbH, Germany
Middendorf, Andreas; Schischke, Karsten • TU Berlin, Research Center Microperipherics, Dept. Sustainable Technologies, Germany

Benchmarking ICT companies on the management of social and environmental issues in their supply and disposal chains

Kruse, Claudia • ISIS Asset Management, London, United Kingdom

GREEN ELECTRONICS PACKAGING

Environmentally Friendly Semiconductor Packages: The Design of an Innovative Leadless Package Concept

Kilger, T.; Theuss, H.; Paulus, S.; Dangelmaier, J.; Dittes, M.; Pressel, K. • Infineon Technologies AG, Regensburg, Germany

Practical study of implementing measures for EuP on the example of an environmental roadmap of embedded components

Herrmann, Constantin • PE Europe GmbH, Leinfelden-Echterdingen, Stuttgart, Germany

Environmental Assessment of Embedded Chip Manufacturing Technology

Andrae, Anders S. G.; Chen, Caroline • SMIT, Sino-Swedish Microsystems Integration and Technology Centre and Division of Electronics Production, Chalmers University of Technology, Gothenburg, Mölndal, Sweden
Schischke, Karsten; Hagelüken, Marcel • TU Berlin, Research Center Microperipherics, Dept. Sustainable Technologies, Berlin, Germany
Liu, Johan • SMIT, Sino-Swedish Microsystems Integration and Technology Centre and Division of Electronics Production, Chalmers University of Technology, Gothenburg, Mölndal, Sweden; IVF, Industrial Research and Development Corporation, Sweden

REACH REGULATION

Towards a EU Regulation on Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH): impact on the microelectronic industry

Lucas, Pierre • Semiconductor Equipment and Materials International (SEMI), Brussels, Belgium

REACH and the Electronic Industry: Tasks, Problems and Chances for Downstream Users

Bunke, Dirk; Harms, Wiebke; Hermann, Andreas • Oeko-Institut e.V, Freiburg, Germany

REACH – What are we facing?

Lendle, Hubert • BASF AG, Ludwigshafen, Germany

SYSTEM RELIABILITY, LIFETIME AND FAILURE ESTIMATION

Failure Rate Prediction Models used for Reliability Monitoring of Electronic Systems

Held, Marcel; Sennhauser, Urs • Swiss Federal Laboratories for Materials Testing and Research (EMPA), Duebendorf, Switzerland

Application of Health Monitoring to Product Take-back Decisions

Vichare, Nikhil; Rodgers, Peter; Azarian, Michael H.; Pecht, Michael • CALCE Electronic Products and Systems Center, University of Maryland, MD, USA

System Reliability – A Key to Eco-Efficiency

Middendorf, Andreas; Ness, Olaf; Reichl, Herbert • Berlin Center of Advanced Packaging, TU Berlin, Germany
Prediction of the technical life of strongly innovative products using dynamic reliability models
Hulsken, Guus · Flextronics, Venray, The Netherlands
Van den Bogaard, J.A.; Brombacher, A.C. · Eindhoven University of Technology, The Netherlands, and National University of Singapore
Theunissen, T.; Peeters, B. · Flextronics, Venray, The Netherlands

SPECIAL LECTURES

FUTURE TECHNOLOGY AND PRODUCTS

NEMI's Activities to Strengthen the Electronics Manufacturing Supply Chain
Pfahl, Robert C. Jr. · National Electronics Manufacturing Initiative (NEMI), Herndon, VA, USA

Packaging Trends seen by ITRS
Wolf, Jürgen · Fraunhofer IZM, Germany
Adams, Joe · Skyworks Solutions, Corp., USA
Reichl, Herbert; Aschenbrenner, Rolf · Fraunhofer IZM, Germany

The Future of Electronics and EHS
McManus, Terrence J. · Intel Corporation, Chandler, AZ, USA

REALIZATION OF THE EUP-DIRECTIVE

The EuP Directive proposal: a framework for continuous improvement of the environmental performance of energy-using products
Papadoyannis, Michail; Brisaer, André · European Commission, DG Enterprise, Brussels, Belgium

Towards an optimization of the proposed framework Directive for the setting of eco-design requirements for energy-using products (EuP)
Schoenmakers, Theo · Environmental Competence Centre, Philips Consumer Electronics, Eindhoven, The Netherlands
Stevels, Ab · Faculty of Industrial Design Engineering, TU Delft, Delft, The Netherlands

The Energy Using Products (EuP) Directive and product chain innovation
Van Rossem, Chris; Dalhammar, Carl · International Institute for Industrial Environmental Economics at Lund University, Sweden

GUIDING INITIATIVES

TOWARDS SUSTAINABILITY IN THE ICT INDUSTRY

Sustainability needs Communication - German ICT- industry's strategy to promote Sustainability
Tobias, Mario · BITKOM, Berlin, Germany
Pongratz, Siegfried · Motorola Advanced Technology Center, Taunusstein, Germany

Virtual Worlds and Real Worlds: Substitution or Addition?
Schauer, Thomas · European Support Center, Club of Rome, Vienna, Austria

The Project NIK: Sustainability in Information and Communication Technologies
Weigmann, Uwe; Dompke, Mario; Folk, Kerstin; Lahser, Kerstin · German Aerospace Center (DLR), Berlin, Germany
A Sustainability Approach to Future Microsystems Technology
Reichl, Herbert · Research Center for Microperipheric Technologies, Technical University Berlin; Germany
Griese, Hansjoerg; Stobbe, Lutz · Fraunhofer Institute for Reliability and Microintegration, IZM Berlin, Germany

BUSINESS MODELS FOR E-WASTE AND REUSE
SOLVING THE E-WASTE PROBLEM: TOWARDS IMPLEMENTATION
Kuehr, Ruediger · United Nations University, Zero Emissions Forum, European Focal Point, Hamburg, Germany

CLOSING KEY NOTES
Global Marshall Plan Initiative
Finkbeiner, Frithjof · Global Contract Foundation German Association of the Club of Rome

Growth into smaller dimensions
Kroy, Walter · CEO, Tharsos AG, Germany

POSTER SESSIONS
Measurement of flame retardants in technical plastics with different spectroscopic methods and their application
Becker, W.; Eisenreich, N. · Fraunhofer Institut für Chemische Technologie, Plinztal, Germany

Reliable testing of the RoHS compliance by flame retardant analysis with online-GPC-HPLC-UV and HPLC-UV/MS
Mäurer, Andreas; Schlummer, Martin, Brandl, Fritz · Fraunhofer-Institute for Process Engineering and Packaging, Germany

Chemical Analysis of Electrical and Electronic Equipment in the Context of the RoHS Directive
Wolf, Marion; Pöhlein, Manfred; Al-Twaq, Abdel Mnim; Urpi Bertran, Raquel; Van Eldik, Rudi · Institute for Inorganic Chemistry, University of Erlangen-Nürnberg, Erlangen, Germany

Investigation on emissions of volatile and semi volatile compounds (VOC, SVOC), dust and ozone from electronic consumer products
Kemmlein, Sabine; Rockstroh, Jens; Jann, Oliver · Federal Institute for Materials Research and Testing (BAM), Germany

X-Ray Inspection of Lead-Free Solder Joints
Roth, H. · Phoenix X-Ray Systems + Services GmbH, Wunstorf, Germany

Development of reuse and recycling technologies for lead-free printed circuit boards
Miguel, Rafael; Cacho, Iñigo · GAIKER Centro Tecnológico, Parque Tecnológico, Zamudio, Spain
Irasarri, Luis · Indumetal Recycling, S.A.; Asua-Erandio, Spain

Environmental Product Assessment The Rapid Environmental Assessment Lab REAL
Riess, Michael; Smirnow, Julia; Müller, Katrin; Stutz; Markus · Motorola GmbH, Physical Realization Research Center – Europe, Taunusstein, Germany
