Proceedings of the
Sixth Baiona Workshop on
Signal Processing in Communications

Baiona, Spain, September 2003

Edited by:
Carlos Mosquera and Fernando Pérez-González
CONTENTS

A polynomial time algorithm for exact maximum likelihood decoding of MIMO channels: A discrete geometric approach
Ejaz Khan, Dirk Slock
Eurecom Institute (France) 1

Analysis of semidefinite programming relaxation approach for maximum likelihood MIMO detection
Ejaz Khan, Dirk Slock
Eurecom Institute (France) 7

Orthogonalized spatial multiplexing for MIMO WCDMA downlink over frequency-selective Rayleigh fading channels
Djordje Tujkovic, Emiliano Sottani
University of Oulu (Finland) 13

Data-Aided Channel Estimation for MC-CDMA Systems with Transmit Diversity in Wireless Channels
Fabrizio Argenti, Tiziano Bianchi, Irene Giannini
University of Florence (Italy) 17

Diversity techniques for OFDM based WLAN systems in Rice and Rayleigh Channels
Pablo Corral González, Juan Luis Corral González, Vicenc Almenar Terré
Universidad Miguel Hernández, Universidad Politécnica de Valencia (Spain) 23

How Accurate are the Gaussian and Gamma Approximations to the Outage Capacity of MIMO Channels?
Ming Kang, Mohamed-Slim Alouini, Geir E. Øien
University of Minnesota (USA), Norwegian University of Science and Technology (Norway) 29

On the Limiting Behavior of Directional Models
Mérouane Debbah, Ralf Muller
Forschungszentrum Telekommunikation (Austria) 35

Multiuser Detection in MIMO OFDM Systems Using Blind Source Separation
Daniel I. Iglesia, Adriana Dapena, Carlos J. Escudero
Universidade da Coruña (Spain) 41

Optimality of Extended Maximal Ratio Transmission
Chandra R. Murthy, June Chul Roh, Bhaskar D. Rao
University of California at San Diego (USA) 47

Symbol Decision via Genetic Optimization of Mutual Information
Jose Miguel Leiva Murillo, Ricardo Santiago Mozos, Sancho Salcedo Sanz, Antonio Artes Rodriguez
Blind iterative decision feedback equalizers for block QAM transmission systems
Roberto López Valcarce
Universidad de Vigo (Spain)

Design Considerations of Trellis-based Blind Sequence Estimators
Chen Xiao-Ming, Peter A. Hoeher
University of Kiel (Germany)

Low-Complexity Serial Equalization of Doubly-Selective Channels
Geert Leus, Imad Barhumi, Marc Moonen
K.U.Leuven - ESAT (Belgium)

A New Beamforming Method for Single Carrier Modulation System with Cyclic Prefix
Kazunori Hayashi, Taku Kojima, Hideaki Sakai
Kyoto University (Japan)

Optimal Block Based DMT Transceivers
J.P. Cances, G.R. Mohammad-Khani, V. Meghdadi
University of Limoges (France)

MMSE Estimation Approach for Karhunen-Loeve Expansion Coefficients of Multipath Channel in OFDM
Habib Senol, Hakan A. Cirpan, Erdal Panayirci
Kadir Has University, Istanbul University, ISIK University (Turkey)

Widely-linear receivers for multicarrier transmission
Donatella Darsena, Giacinto Gelli, Luigi Paura, Francesco Verde
Università degli Studi Federico II di Napoli (Italy)

Error Probability Minimizing Pilots for OFDM over Fading Channels
Xiaodong Cai, Georgios B. Giannakis
University of Minnesota (USA)

Frequency-domain Equalization for OFDM over Doubly-Selective Channels
Imad Barhumi, Geert Leus, Marc Moonen
K.U.Leuven-ESAT (Belgium)

Widely linear subspace-based blind identification of single-input single-output FIR systems with improper random inputs
Donatella Darsena, Giacinto Gelli, Luigi Paura, Francesco Verde
Università degli Studi Federico II di Napoli (Italy)

New Criteria for Dynamic Mobile Assignment Using Joint Power Control and Optimal Beamforming
G. Piñero, C. Botella, A. González, M. de Diego, O. Lázaro
Efficient Soft Admission Control Technique for Wireless FDD-CDMA Networks
Giada Mennuti, Francesco Chiti, Daniele Tarchi, Romano Fantacci
Università di Firenze (Italy)

Multiuser interference cancellation for OFDM systems with frequency offset
Romano Fantacci, Dania Marabissi, Simone Papini
University of Firenze (Italy)

Joint multipath combining and ICI rejection for multicode system
Rafal Krenz
Poznan University of Technology (Poland)

Performance of Game Theoretic Power Control Algorithms In Interference Limited Wireless Fading Channels
Mohammad Hayajneh, Chaouki T. Abdallah
University of New Mexico (USA)

Blind iterative receiver for multiuser space-time coding systems
Ejaz Khan, Dirk Slock
Eurecom institute (France)

Adaptive Signature Generation for DS/CDMA Systems over Dispersive Channels
Angel M. Bravo Santos, Antonio Artés-Rodríguez
Universidad de Alcalá, Universidad Carlos III de Madrid (Spain)

Single Antenna Cochannel Interference Cancellation in Asynchronous TDMA Systems
Hendrik Schoeneich, Peter Hoher
University of Kiel (Germany)

A Hybrid Multiple Access Scheme Approaching Single User Performance
Hendrik Schoeneich, Peter Hoeher
University of Kiel (Germany)

The Impact of Nonlinearity on Digital Compensation for IQ Modulators
M. Males, John Tuthill, Antonio Cantoni
The University of WA, Perth (Australia)

Design and development of hardware and software architecture for an embedded Frequency Hopping communication system
Giuseppe Razzano, Gianpiero Panci
University of Roma (Italy)

Log Gabor Processing for Universal Software Radios
Mark E. Dunham
Low complexity multi-rate IF sampling receivers using CIC filters and polynomial interpolation
Henk Wymeersch, Marc Moeneclaey
University of Ghent (Belgium)

Signal Processing Technology Challenges for Cognitive Radio
Dr. Joseph Mitola III
US DoD /DARPA (USA)

Using logarithmic arithmetic for FPGA implementation of the Givens rotations
Jan Schier, Jiri Kadlec
Academic of Sciences of the Czech Republic (Czech Republic)

Implementation of W-CDMA Channel Codec by Configurable Processors
Masanao ISE, Yasuhiro OGASAHERA, Takao ONOYE, Isao SHIRAKAWA
Osaka University (Japan)

An adaptive Software Radio receiver architecture for linear bidimensional modulations
Henrique C. Miranda, Pedro C. Pinto, Sérgio B. Silva
FEUP / INESC Porto (Portugal)

Implementation of Software Radio Systems Using Distributed Architectures
Henrique C. Miranda, Gustavo M. Carneiro, Pedro C. Pinto, Sérgio B. Silva
FEUP / INESC Porto (Portugal)

Digital filtering scheme based in LUT, applied to a DSSS wireless optical system
Miguel Angel Bacallado Marrero, José Alberto Rabadán Borjes, Francisco Delgado Rajó, Rafael Pérez Jiménez, F. J. López Hernandez
ETSIT Las Palmas de G.C. (Spain)

Partial Crosstalk Cancellation Exploiting Line and Tone Selection in Upstream VDSL
Raphael Cendrillon, Marc Moonen, George Ginis, Katleen Van Acker, Piet Vandaele, Tom Bostoen
K.U. Leuven (Belgium)

On the equivalence of the joint maximum likelihood approach and the multiple hybrid beamforming in GNSS synchronization
Carles Fernandez Prades, Juan A. Fernandez Rubio, Gonzalo Seco
Universitat Politecnica de Catalunya (Spain), European Space Agency (The Netherlands)

Smart quantizers for recursive parameter estimation of hidden Markov models
Subhrakanti Dey, Felisa Vasquez-Abad
University of Melbourne (Australia) 241

Automatic Recognition Algorithm for Digitally Modulated Signals based on Statistical Approach in Time-Frequency Domain
Le Guen, Ali Mansour
ENSIETA (France) 247

Adaptive Tomlinson-Harashima Precoding for Wireless Communication Systems
Paula Castro, Luis Castedo
Universidade da Coruña (Spain) 253

Blind symbol detection and fixed reference parameters estimation using sequential Monte Carlo methodology
Joaquin Miguez, Monica F. Bugallo, Petar M. Djuric
Universidade da Coruña (Spain), Stony Brook University (USA) 259

Effects of a Carrier Frequency Offset on Wavelet Transceivers
Tiziano Bianchi, Fabrizio Argenti
University of Florence (Italy) 265

Bounds on Average Area Spectral Efficiency for Adaptive Coded Modulation in Cellular Networks
Frode Bøhagen, Geir E. Øien, Mohamed-Slim Alouini, Kjell Jørgen Hole
Norwegian University of Science and Technology (Norway), University of Minnesota (USA) 271

DVB-S Air Interface over Railroad Satellite Channel: Performance and Extensions
Marcos Álvarez Díaz, Sandro Scalise
DLR (Germany) 277

Quality of Service of VoIP over DVB-RCS multimedia satellite with on board processing
María Ángeles Vázquez Castro, Francisco-Javier González Serrano, Andrés Martínez Fernández, Germán Mohedano Moya
Universidad Carlos III de Madrid (Spain) 283

The Marriage of Subband Coding and OFDM Transmission
Tor A. Ramstad
Norwegian University of Science and Technology (Norway) 289

A Rate Control Algorithm for the H.264 Encoder
Simone Milani, Luca Celetto, Gian Antonio Mian
University of Padova, STMicroelectronics (Italy) 295

Analysis of joint predictive-transform coding
Lorenzo Cappellari, Gian Antonio Mian
University of Padova (Italy) 301
ROI-preserving multiple description coding based on pre- and post-processing to standard encoders
Gabriella Olmo, Tammam Tillo
Politecnico di Torino (Italy) 307

Error correcting arithmetic coding for robust video compression
Marco Grangetto, Enrico Magli, Gabriella Olmo
Politecnico di Torino (Italy) 313

General Factorization of Oversampled Filter Banks
Ricardo F. von Borries, C. Sidney Burrus
Rice University (USA) 319

Optimal Reconstruction from Frame Based Multiple Descriptions for Low-Delay Applications
Riccardo Bernardini, Marco Durigon, Roberto Rinaldo
University of Udine (Italy) 325

Image Sequence Denoising Using a Fourier-Wavelet Basis
Roland G. Wilson, Nasir M. Rajpoot
University of Warwick (UK) 331

Decreasing the Error Floor of Low-complexity Turbo Codes
J. Ebert, W. Gappmair, O. Koudelka
Joanneum Research, Graz University of Technology (Austria) 337

Bit Interleaved Coded Modulation Using Low-Density Generator-Matrix Codes
Miguel Gonzalez-Lopez, Javier Garcia-Frias
University of A Coruña (Spain), University of Delaware (USA) 343

Performance of Turbo Codes with Max-Log-MAP Decoding on Rayleigh Fading Channels
Piotr Tyczka, Jacek Bogucki
Institute of Electronics and Telecommunications, Poznan University of Technology (Poland) 349
