Table of Contents

Foreword	XI
Foreword of the President	XIII
Acknowledgement	XV
 <i>1. EU directives and harmonisation work</i>	
<i>Session 1</i>	
EU directives affecting the explosives industry <i>F.M. Murray & B. Hueber</i>	5
Explosion and fire hazard assessment for explosives, ammunition and fertilizing agents facilities after EU directive 96/82/EC "Seveso II": Contribution for guidelines proposal <i>R. Folchi</i>	15
Umsetzung der Richtlinie 93/15/EWG über das Inverkehrbringen von Explosivstoffen aus der Sicht der Herstellerindustrie und Anmerkungen zu Lagerung und Transport von Ammoniumnitrat-Emulsionen (ANE) <i>M. Held</i>	21
Possible evolution of the blasters training in Europe <i>M.-C. Michel</i>	29
 <i>2. Health, safety and environment, HSE</i>	
<i>Session 2</i>	
Safety aspects of permitted explosives for use in underground coal mines <i>R. Zimmermann</i>	43
Blasting safely and efficiently in reactive ground and/or hot ground in sulphide dust explosion generating rock <i>P. Bellairs & Gour Sen</i>	47
Risk management and blasting operations in the demolition industry <i>E.K. Lauritzen & J. Schneider</i>	55
Tunnelling blasting in urban and sensitive areas – risk management and consulting experiences from case histories of some Hellenic projects <i>E. Baliktsis</i>	61
Explosives facilities – a major hazard in urban areas <i>P. Vuillaume</i>	73
 <i>Session 3</i>	
Peak particle velocity modelling <i>A. Wetherelt, P. Hunt & J. Pepper</i>	81

Developments in the use of scaled-distance modelling which allow an increase in the permitted charge weights while still ensuring vibration compliance <i>T.J. White, M. Pegden & W.J. Birch</i>	89
Reducing vibration level using simulation and predictive software with EDD (ten years of history in two Lafarge quarries) <i>T. Bernard</i>	97
Underwater blasting in Algeciras-Spain for the world biggest floating dock <i>H. Espinosa de los Monteros & J.A. Pascual</i>	101
Traffic tunnels in rock – guide levels for blast-induced vibrations <i>S.-E. Johansson & G. Rundqvist</i>	109
 <i>Session 4</i>	
Different evaluation criteria of permissible explosive quantity <i>S. Strelec, B. Bozic & M. Gazdek</i>	119
Influence of different types of explosives on economical and working hygienic aspects in tunnels <i>V. Wetzig</i>	127
Detonation characteristics of commercial ammonium nitrate prills <i>G. Eck, O. Machacek & K. Tallent</i>	133
Modelling of consequences from accidental releases of hazardous industrial chemicals <i>O.J. Mika</i>	141
Sprengknallreduktion durch verdämmende Materialien <i>T. Loose, H. Saal & H.U. Freund</i>	145
 <i>3. Recent technical development – products and processes</i>	
<i>Session 5</i>	
Evaluation of the need for electronic detonator systems for blasting operations <i>C.V.B. Cunningham</i>	157
Electronic detonator technology in open pit mining <i>D.A. Bartley, R. McClure & R. Trousselle</i>	165
Innovative blasting techniques for excavation of long tunnel rounds <i>G.W. Kuzyk, D.P. Onagi & B. Mohanty</i>	173
Large size cylinder expansion tests on ANFO and gassed bulk emulsion explosives <i>U. Nyberg, I. Arvantidis, M. Olsson & F. Ouchterlony</i>	181
The energy balance of production blasts at Nordkalk's Klinthagen quarry <i>F. Ouchterlony, U. Nyberg, M. Olsson, I. Bergqvist, L. Granlund & H. Grind</i>	193
 <i>Session 6</i>	
Temperature and pressure measurements comparison of the aluminized emulsion explosives detonation front and products expansion <i>S. Mencacci, A. Lefrancois, J.Y. Grouffal & P. Bouinot</i>	207
A centralised digital blasting system <i>D. Hummel & P. Reinders</i>	215
Erzeugung eines definierten Kornbandes durch GBS im Festgestein über Tage <i>K. Ziegler, M. Ziegler & C. Brühe</i>	219

Single shot drawbell blasting with Orica's i-kon [®] detonators at Freeport <i>M.B. Lovitt & B. Jr. Degay</i>	225
---	-----

Session 7

Numerical modelling and evaluation of the detonation of non-ideal explosives applied to the optimisation of explosive choice for blasting operations <i>Y. Bleuzen & S. Mencacci</i>	235
Sulphide dust explosions in underground mines <i>R.J. Enright & M. Leonte</i>	243
Practical experiences and possibilities using SSE string charging system <i>A. Fauske</i>	253
TerrEx – terroristic expert computer model for hazard assessment in the asymmetric threat environment <i>J. Pejcoch, M. Vanecek & F. Dittrich</i>	261

4. Shot hole development

Session 8

Selection of inter-hole and inter-row timing for surface blasting – an approach based on burden relief analysis <i>I. Onederra & S. Esen</i>	269
Correlations between physical properties of PPAN and detonation characteristics of ANFO <i>H. Sugihara, Y. Sato & A. Inoue</i>	277
Influence of the pressure wave propagating in compressed explosives on detonator <i>F. Sumiya, Y. Hirotsuki & Y. Kato</i>	283
The Lu-Hustrulid approach for calculating the peak particle velocity caused by blasting <i>W. Lu & W. Hustrulid</i>	291

Session 9

Actual benefits from new technologies related to constant timing with electronic detonators and uniform energy control <i>R. Chavez & R. Chantry</i>	303
Verbesserung des Sprengergebnisses und Verringerung von Erschütterungen durch Anwendung der Impulstheorie bei Gewinnungssprengungen <i>B. Müller & R. Böhnke</i>	313
Breakage energy in rock blasting <i>P. Moser, A. Grasedieck, J. du Mouza & E. Hamdi</i>	323
Less fines production in aggregate and industrial minerals industry <i>P. Moser</i>	335

Session 10

Bottom hole and multiple power decks – independent testing results of the new blasting technique <i>R.F. Chiapetta & J.L. Wyciskalla</i>	347
Calculation of explosives useful work – comparison with cylinder test data <i>J.A. Sanchidrián & L.M. López</i>	357

Relationship of booster size and velocity of detonation in production holes <i>S.G. Giltner</i>	363
WR-ANFO – the explosive for light and medium water conditions <i>A. Arczewski, J. Alin & E.C. Nygaard</i>	369
 <i>Session 11</i>	
Experiences with the deconstruction of multi-hole quarry blast vibration signals <i>R. Farnfield, G. Yuill & W. Birch</i>	375
Impulse contour of cylindrical charges without and with confinements at near distance <i>M. Held</i>	383
Blast induced micro cracks assessment in muckpile blocks: P-wave velocity and porosity measurements <i>E. Hamdi, M. Audiguier, J. du Mouza & K. Fjäder</i>	389
Influence of demilitarised solid propellants on detonation parameters of ammonals <i>K. Lipińska, M. Lipiński, A. Maranda & J. Sobala</i>	401
 <i>5. Blasting experiences</i>	
 <i>Session 12</i>	
Sprengfaltung von Stahlbetonschornsteinen <i>R. Meltzer</i>	409
Sprengabbruch von zwei 150 m hohen Kühltürmen im ehemaligen Kernkraftwerk Stendal <i>B. Augsten & R. Melzer</i>	415
The blasting of the Bernese Wankdorf stadium, August 3rd, 2001, 15:00 to 16:15 (A play in two acts) <i>M. Zimmermann & W. Weber</i>	419
Sprengung von Stahlkonstruktionen in Deutschland – ein Bericht über 10-Jährige Erfahrungen beim Einsatz und der Handhabung von flexiblen Schneidladungen <i>M.Hopfe</i>	423
Road tunnel in Porto: explosives or not, that was the question – a case study <i>J.M. Carvalho, A.T. Cavalheiro & H.B. Miranda</i>	431
 <i>Session 13</i>	
Shock wave pressure in underground explosions <i>L.M. López, J.A. Sanchidrián, L.J. Piedra & J. Ríos</i>	441
Comparison of the blast fragmentation from lab-scale and full-scale tests at Bårarp <i>P. Moser, M. Olsson, F. Ouchterlony & A. Grasedieck</i>	449
Blast fragmentation size assessment analysis for production blasts in Indian mining conditions <i>N.R. Thote & D.P. Singh</i>	459
The measurement and analysis of near-field pressure transients in production blasting <i>S. Mencacci & R. Farnfield</i>	467
Real-time vibration monitoring and control on the Kamppi Center Project, Helsinki, Finland <i>R.A. Lee & P. Paavola</i>	475
 <i>Session 14</i>	
Analysis of bench face movement in quarry blasting <i>P. Segarra, J.A. Sanchidrián, L.M. López, J.A. Pascual, R. Ortiz, A. Gómez & B. Smoech</i>	485

Controlled blasting methods for excavating rock and concrete near critical structures <i>G.F. Revey</i>	497
Drilling and blasting works on a highway construction on the edge of a rock-wall <i>S. Žganec, M. Dobrilović & Z. Ester</i>	503
Blasting water-filled concrete structures <i>G. Berta & G. Ottelli</i>	509
 <i>Session 15</i>	
Lake tap blast for salmon fishery improvement <i>J.R. Wallace</i>	517
Design of the final wall blasting for the Croatian motorway project <i>R. Pisk, D. Vrkljan & Z. Ester</i>	521
Dynamic influence of blasting on primary and secondary tunnel support system <i>Z. Ester, M. Dobrilović & D. Vrkljan</i>	527
 <i>Session 16</i>	
The “Big Bang” at Tucurui – the blasting of the 300 m long downstream cofferdam in Canal II <i>K. Kure, C. Herweg & G.A. Mellios</i>	535
Comparison of the tunnel boring machine and blasting excavation methods at Cappadocian tuff (Turkey), based on efficiency, safety and costs <i>C. Agan</i>	543
Unexploded ordnance and the Kokkola 13 m Channel in Finland <i>H.P. Tomperi</i>	549
Optimal parameters of blasting in tunnels using cartridge and pumped explosives with electric and non-electric initiation <i>Z. Deković, Z. Ester & M. Dobrilović</i>	555
 <i>Session 17</i>	
Spaltprengungen am Widerlager West des Wassertrassenkreuzes Magdeburg <i>M. Schumann</i>	563
Improving slope stability with electronic delays <i>J.L. Floyd</i>	567
Effect of blast design on crack response <i>C.H. Dowding, C. Aimone-Martin & M.L. Snider</i>	573
Predictability and prediction of ground vibrations in demolition blasting <i>R. Mancini, M. Cardu & E. Michelotti</i>	583
 <i>6. Management of blasting operations</i>	
<i>Session 18</i>	
Technical conditions, directions and priorities for blast technology development in Russia <i>V.A. Belin & A.F. Avdeev</i>	593
Use of neural networks to assess economical influence and predict blasting fragmentation <i>J. Schleifer & D. Nourry</i>	597

Electronic blasting and blast management <i>F. Hammelmann & P. Reinders</i>	605
Determination of most active rock mass heterogeneity on blast: their use in an experimental design based on statistical process control <i>A.C. Sauvage & A. Blanchier</i>	609
 <i>Session 19</i>	
An intelligence-expert system for bench blasting design and its application at the Lanjian iron mine <i>J.C. Zhang, S.Y. Zheng & C. Chang</i>	617
Future development of neural network prediction for blast design parameters of production blasting <i>V. Petr, M.G. Simões & T.G. Rozgonoyi</i>	625
 Author index	 631
