Session 56

POWER SYSTEM ENGINEERING
Power Systems Reliability

Session Chair: Bill Braun, Owens Corning Science & Tech.
Session Organizer: Bill Braun, Owens Corning Science & Tech.

56p1
A Fuzzy-Norm Approach for Optimal Multi-Objective Single-Tuned Harmonic Filter Planning
Yuan-Lin Chen, MingChi Institute of Technology

56p2
Optimal Sensor Placement Technique for Locating Multiple Harmonic Sources on a Radial Distribution Feeder
Mandhir Sahni and Wei-Jen Lee, The University of Texas at Arlington

56p3
Application of Colored Petri Nets to Distribution Systems Temperature Adaptive Switching Operation
Yu-Lung Ke, Kun Shan University of Technology

56p4
Reliability Assessment of a Backup Gas Turbine Generation System for a Critical Industry Load Using Monte Carlo Simulation Model
A. A. Chowdhury, MidAmerican Energy Company
D. O. Koval, University of Alberta

56p5
System Reliability Worth Assessment Using the Customer Survey Approach
A. A. Chowdhury and T. C. Mielnik, MidAmerican Energy Company
D. O. Koval, University of Alberta

56p6
Algorithm to Evaluate Substations Reliability with Cut and Path Sets
Miguel Vega and Héctor G. Sarmiento, Instituto de Investigaciones Eléctricas

56p7
Reliability and Availability Data Collection Program for Power Distribution, Power Generation, and HVAC Components of Commercial, Industrial, and Utility Installations
Peyton S. Hale Jr., U.S. Army Corps of Engineers
Robert G. Arno and D. David Dylis, Alixon Science and Technology

Session 57

INDUSTRIAL POWER CONVERTER
PWM and Control Techniques

Session Chair: Edison da Silva, University of Campina Grande
Session Organizer: Jeff Reichard, Integrated Electronics

57p1
A Neural-Network-based Space Vector PWM of a Five-Level Voltage-fed Inverter
Nicolau Pereira Filho, Univ. Federal de Mato Grosso do Sul and Universidade Federal de Itajubá
João O. P. Pinto, Univ. Federal de Mato Grosso do Sul
Bimal K. Bose, University of Tennessee
Luiz E. Borges da Silva, Universidade Federal de Itajubá
Control Method of NPC Inverter for Continuous Operation under One Phase Fault Condition
Gun-Tae Park, Tae-Jin Kim, Dae-Wook Kang, and Dong-Seok Hyun, Hanyang University

Harmonics Optimization of the Voltage Balancing Control for Multilevel Converter/Inverter Systems
Zhiguo Pan and Fang Z. Peng, Michigan State University

A PWM Strategy for Four-Leg Voltage Source Converters and Applications
to a Novel Line Interactive UPS in a Three-Phase Four-Wire System
Jang-Hwan Kim and Seung-Ki Sul, Seoul National University
Hyosung Kim, Cheonan National Technical College
Jun-Keun Ji, Soonchunhyang University

Harmonic Elimination for Multilevel Converter with Programmed PWM Method
Zhong Du, Leon M. Tolbert, and John N. Chiasson, The University of Tennessee

A Generalized Over-Modulation Methodology for Current Regulated Three-phase Voltage Source Converters
Gan Dong and Olorunfemi Ojo, Tennessee Technological University

Carrier-based Discontinuous PWM Modulation for Current Source Converters
Olorunfemi Ojo and Sravan Vanaparthy, Tennessee Technological University

Session 58

INDUSTRIAL POWER CONVERTER
Utility Interface and Power Quality II

Session Chair: Frede Blaabjerg, Aalborg University
Session Organizer: Sewan Choi, Seoul National University of Technology

Novel Topology of a Line Interactive UPS Using PQR Instantaneous Power Theory
Hyosung Kim, Cheonan National Technical College
Jun-Keun Ji, Soonchunhyang University
Jang-Hwan Kim and Seung-Ki Sul, Seoul National University
Kyung-Hwan Kim, EWHY Technologies Information Company in Korea

Protection Schemes for a Dynamic Voltage Restorer
Sidemlo M. Silva, Fernando Albert Eleutério, André de Souza Reis, and Braz J. Cardoso Filho
Universidade Federal de Minas Gerais

A Control Scheme in Hybrid Synchronous-Stationary Frame for PWM AC/DC Converter under Generalized Unbalanced Operating Conditions
Yongsug Suh, ABB Switzerland Ltd.
Thomas A. Lipo, University of Wisconsin–Madison

Closed-Loop State Variable Control of Dynamic Voltage Restorers with Fast Compensation Characteristics
Géza Joós, McGill University
Su Chen and Luiz Lopes, Concordia University
Sidemlo M. Silva, Bruno M. Lopes, Braz J. Cardoso Filho, Rodrigo P. Campana, and Wallace C. Boaventura, Universidade Federal de Minas Gerais

A Controlling Method for Charging Photovoltaic Generation Power Obtained by an MPPT Control Method to Series Connected Ultra-Electric Double Layer Capacitors ........................................... 2264
Nobuyoshi Mutoh and Takayoshi Inoue, Tokyo Metropolitan Institute of Technology

Session 59

INDUSTRIAL AUTOMATION & CONTROL
Electro-Thermal Issues

Session Chair: K. Suzuki, Hatsuoi-Cho
Session Organizer: R. McCann, University of Arkansas

Automatic Profiling of a Steady State Temperature Field in Thermo-Chemical Systems and Devices ........... 2272
Piotr Ostrowski, Warsaw Technical University
Wojciech Lobodziński, Industrial Institute of Electronics
Adam Skorek, University of Quebec at Trois-Rivieres

Current Rating of Multicore Cables ........................................................................................................ 2280
Heinrich Brakelmann, University of Duisburg
Peter Lauter, Steag Enctec Ltd.
George Anders, Kinectrics Inc.

Increasing Ampacity of Cables by an Application of Ventilated Pipes ...................................................... 2288
Heinrich Brakelmann, University of Duisburg
George Anders, Kinectrics Inc.

Session 60

POWER ELECTRONIC DEVICES
Thermal Management

Session Chair: Jean-Luc Schanen, Xerox Corporation, and Jean-Francois de Palma, Ferraz
Session Organizer: Jean-Luc Schanen, Laboratoire d'Electrotechnique de Grenoble

Analytical Investigation of Flat Silicon Micro Heat Spreader ........................................................................ 2296
S. Tzanova, M. Ivanova, Y. Avcnas, and C. Schaeffer, Laboratoire d'Electrotechnique de Grenoble

Power Density Improvement in Integrated Electromagnetic Passive Modules with Embedded Heat Extractors .................................................................................................................... 2303
Wenduo Liu and J. D. van Wyk, Virginia Polytechnic Institute and State University
Jaco Dirker, Rand Afrikaans University

Assessment of Thermo-Mechanics for an Integrated Power Electronics Switching Stage .......................... 2309
Y. Pang, E. P. Scott, N. Zhu, J. D. van Wyk, and Z. Liang, Virginia Polytechnic Institute and State University

Improving the Thermal Management of AC–DC Converters using Integration Technologies .................. 2315
E. C. W. de Jong, J. A. Ferreira, and P. Bauer, Delft University of Technology
A Modular, Laminar 42/14 V DC/DC Converter Concept with Integrated Thermal Busbar

J. Popović and J. A. Ferreira, Delft University of Technology

Thermal Analysis for Improved Packaging of Four-Channel 42 V/14 V DC/DC Converter

J. D. van Wyk, Virginia Polytechnic Institute and State University

The Analyses of Pre-Arcing Period and Modeling of a High Breaking Capacity Fuse-Link in SABER

Alexandru Fogorosi and Frede Blaabjerg, Aalborg University

Session 61

ELECTROSTATIC PROCESSES

Computational Electrostatics and Electrohydrodynamics

Session Chair: Palghet Ramesh, Xerox Corporation
Session Organizer: Jamal Yagoobi, Illinois Institute of Technology

Control of Liquid Flow Distribution Utilizing EHD Conduction Pumping Mechanism

Yinshan Feng and Jamal Seyed-Yagoobi, Illinois Institute of Technology

Molecular Dynamic Simulation of Electron Bubble Transport in n-Hexane Liquid

T. Funakawa and W. Balachandran, Brunel University

Modeling of Gas Reactions in Denitrification from Flue Gas by Discharge Plasma

Li-Min Dong and Zhi-Qiang Zhou, Harbin University of Science and Technology

Simulating Digital Exposure of Xerographic Photoreceptors using the Domain Decomposition Method

P. S. Ramesh, Xerox Corporation

Induction Charging of Granular Materials in an Electric Field

Y. Wu, G. S. P. Castle, and I. I. Inculet, University of Western Ontario

Electrostatic Droplet-Formation in Water/Oil Flow in a Microchannel System

Michihiko Nakano, Naohito Nakai, Masahumi Inoue, Kazunori Takashina, Shinji Katsura, and Akira Mizuno, Toyohashi University of Technology

Session 62

INDUSTRIAL DRIVES

Brushless and Synchronous Reluctance Motor Drives

Session Chair: Alfredo Vagati, Politecnico Di Torino
Session Organizer: John Miller, Design Services

Novel Initial Position Detection Technique for Three-Phase Brushless DC Motor without Position and Current Sensors

Yen-Shin Lai and Fu-San Shyu, National Taipei University of Technology
AC Brushless Drive with Low Resolution Hall-Effect Sensors for an Axial Flux PM Machine .......................... 2382
F. Giulii Capponi, G. De Donato, L. Del Ferraro, and O. Honorati, University of Rome “La Sapienza”
M. C. Harke and R. D. Lorenz, University of Wisconsin-Madison

Direct Torque Control of Brushless DC Drives with Reduced Torque Ripple .............................................. 2390
Y. Liu, Z. Q. Zhu, and D. Howe, University of Sheffield

A New Starting Method of BLDC Motors without Position Sensor ................................................................. 2397
Wook-Jin Lee and Seung-Ki Sul, Seoul National University

A Direct Torque Controller for Limited Speed Range Applications of Brushless Doubly-fed Reluctance Motors ................................................................. 2403
Milutin Jovanović, Northumbria University
Jian Yu, PB Power
Emi Levi, John Moores University

A Maximum Torque per Ampere Vector Control Strategy for Synchronous Reluctance Motors Considering Saturation and Iron Losses .................................................. 2411
E. M. Rashad, T. S. Radwan, and M. A. Rahman, Memorial University of Newfoundland

Reversible Six-Phase AC Motor Drive Systems with Reduced Switch Count .................................................. 2418
C. B. Jacobina, T. M. Oliveira, and E. R. C. da Silva, Universidade Federal de Campina Grande
M. B. de R. Corrêa, Universidade Federal de Campina Grande and Centro Federal de Educação Tecnológica de Alagoas
C. R. da Silva, Universidade Federal de Campina Grande and Centro Federal de Educação Tecnológica do Ceará

Session 63
POWER SYSTEM PROTECTION
Power Systems Protection 1

Session Chair: Carey J. Cook, S&C Electric Company
Session Organizer: Rasheet Rifaat, Jacobs Canada, Inc.

Fault Location Using Traveling Wave for Power Networks ............................................................................. 2426
Xiangjun Zeng and Zhengyi Liu, Changsha University of Science and Technology
K. K. Li, The Hong Kong Polytechnic University
Xianggen Yin, Huazhong University of Science and Technology

Real-Time Testing of a WPT-based Protection Algorithm for Three-phase Power Transformers .................. 2430
S. A. Saleh and M. A. Rahman, Memorial University of Newfoundland

Application of Numeric Protective Relay Circuit Breaker Duty Monitoring .................................................. 2437
Gerald Dalke and John Horak, Basler Electric Company

Reprinted by permission: MV Generator Low-Resistance Grounding and Stator Ground Fault Damage ...... 2445
Alex Wu and Yousin Tang, Global Engineering Company
Dale Finney, GE Power Management
Some Ground Fault Protection Schemes Implemented on FTU for Industrial Power Systems
Xiangjun Zeng, Guo Zigang, and Sheng Su, Changsha University of Science and Technology
K. K. Li, The Hong Kong Polytechnic University

Using EMTP for Evaluation of Surge Current Distribution in Metallic Gridlike Structures
Q. B. Zhou and Y. Du, Hong Kong Polytechnic University

Evaluation and Performance Comparisons of Digital Distance Protection Algorithms
H. Khorashadi-Zadeh, The University of Birjand
H. Daneshi, Illinois Institute of Technology

Session 64
ELECTRIC MACHINES
Induction Motors—2

Session Chair: Malakondaiah Naidu, Delphi
Session Organizer: Malakondaiah Naidu, Delphi

TEFC Induction Motors Thermal Models: A Parameter Sensitivity Analysis
A. Boglietti, A. Cavagnino, and D. A. Staton, Politecnico di Torino

An Efficient Thermal Model for Induction Machines
Ogbonnaya I. Okoro, University of Nigeria
Bernd Weidemann, University of Kassel
Olorunfemi Ojo, Tennessee Tech University

Implementation and Calorimetric Verification of Models for Wide Speed Range Three-Phase Induction Motors for Use in Washing Machines
P. D. Malliband and R. A. McMahon, Cambridge University

No Tooling Cost Process for Induction Motors Energy Efficiency Improvements
A. Boglietti, A. Cavagnino, L. Ferraris, and M. Lazzari, Politecnico di Torino
G. Luparia, FIMET Motori & Riduttori

Design Optimization of Induction Motors for Aerospace Applications
Christian Koechli and Yves Perriard, Swiss Federal Institute of Technology Lausanne
Barry K. Fussell, University of New Hampshire
Steven R. Prina, Applimotion, Inc.
Darwin A. James, Parker Hannifin

The Implications of Winding Faults in Induction Motor Drives
C. Gerada, K. J. Bradley, M. Sumner, P. Wheeler, S. Pickering, and J. Clare, University of Nottingham
C. Whitley and G. Towers, Smiths Aerospace Actuation Systems

Split-Phase Claw-Pole Induction Machines with Soft Magnetic Composite Cores
Ronghai Qu and Ralph Carl, General Electric Company
Gerald B. Kliman, affiliation not indicated
Session 65

POWER ELECTRONIC DEVICES

Semiconductor Models and Capacitors

Session Chair: John Siefken, ABB Semiconductors
Session Organizer: Jean-Luc Schanen, Laboratoire d'Electrotechnique de Grenoble

65p1
The Use of Condition Maps in the Design and Testing of Power Electronic Circuits and Devices
A. T. Bryant, N-A. Parker-Allotey, and P. R. Palmer, Cambridge University

65p2
Multi-Level Device Models Developed for the Virtual Test Bed (VTB)
X. Wang, L. Lu, S. Pytel, D. Franzoni, and E. Santi, University of South Carolina
J. L. Hudgins, University of Nebraska
P. R. Palmer, University of Cambridge

65p3
Physics-based Modeling of NPT and PT IGBTs at Deep Cryogenic Temperatures
A. Caiafa, A. Snezhko, E. Santi, and R. Prozorov, University of South Carolina
J. L. Hudgins, University of Nebraska
P. R. Palmer, University of Cambridge

65p4
Destruction-free Parameter Extraction for a Physics-based Circuit Simulator IGCT Model
X. Wang, J. L. Hudgins, and E. Santi, University of South Carolina
P. R. Palmer, University of Cambridge

65p5
Half-Order Modelling of Supercapacitors
D. Riu and N. Retière, Domaine Universitaire
D. Linzen, University of Technology

65p6
Stacked Foil Type Large-Sized Aluminum Electrolytic Capacitors
Genho Takano, Makoto Shimizu, and Kentar Nakaaki, Nippon Chemi-Con Corporation
Mitchell Weaver and Masayuki Kudo, United Chemi-Con, Inc.

65p7
DC Bus Electrolytic Capacitor Stress in Adjustable-Speed Drives under Input Voltage Unbalance and Sag Conditions
Kevin Lee and William E. Berkopec, Eaton Electrical
Thomas M. Jahns and Giri Venkataramanan, University of Wisconsin-Madison

Session 66

POWER SYSTEM ENGINEERING/POWER SYSTEM PROTECTION/CS

Power Systems Engineering and Protection

Session Chair: Jim Harvey, University of Michigan Hospital
Session Organizer: Matt Dozier, iDesign Services, Inc.

66p1
Practical Problems Associated with the Operation of ASDs Based on Active Front End Converters in Power Distribution Systems
Luis Morán, José Espinoza, and Mauricio Ortiz, Universidad de Concepción
José Rodríguez, Universidad Técnica Fed. Sta. Maria
Juan Dixon, Universidad Católica de Chile
Voltage Sag Analysis and Solution for an Industrial Plant with Embedded Induction Motors .......................... 2573
Angel Felce, Guillermo Matas, and Ysmael Da Silva, Inelectra S.A.C.A.

Modeling Effects of Voltage Unbalances in Industrial Distribution Systems with Adjustable Speed Drives ................................................................. 2579
Kevin Lee, Eaton Electrical
Giri Venkataramanan and Thomas M. Jahns, University of Wisconsin–Madison

Impact Assessment of Automated Meter Reading Systems on Diary Cows ................................................................. 2587
Arindam Maitra and Doug Dorr, EPRI PEAC Corp.

The Application of Silicon Avalanche Diodes on Low-Voltage Power Systems ................................................................. 2594
Andreas Beutel and John Van Coller, University of the Witwatersrand

Session 67

INDUSTRIAL AUTOMATION & CONTROL
Intelligent Controls & Applications

Session Chair: A. Rubaai, Howard University
Session Organizer: Z. Gao, Cleveland State University

Neural Network Based Sensorless Maximum Wind Energy Capture with Compensated Power Coefficient ................................................................. 2600
Hui Li, K. L. Shi, and P. McLaren, Florida State University

A Current-Sensorless Three-Phase Active Rectifier with Fuzzy-Logic Control ................................................................. 2609
C. Cecati, Univ. of L’Aquila
A. Dell’Aquila, A. Lecci, and M. Liserre, Polytechnic of Bari

Fuzzy Logic Average Current-Mode Control for DC–DC Converters Using an Inexpensive 8-Bit Microcontroller ................................................................. 2615
Dake He and R. M. Nelms, Auburn University

Hardware Implementation of an Adaptive Network-based Fuzzy Controller for DC–DC Converters ................................................................. 2623
Ahmed Rubaai and Abdul Ofoli, Howard University

Development of a Self-Tuned Neuro-Fuzzy Controller for Induction Motor Drives ................................................................. 2630
M. Nasir Uddin and Hao Wen, Lakehead University

Modified Takagi-Sugeno Fuzzy Logic Based Controllers for a Static Compensator in a Multimachine Power System ................................................................. 2637
Salman Mohagheghi and Ronald G. Harley, Georgia Institute of Technology
Ganesh K. Venayagamoorthy, University of Missouri–Rolla

Dynamic Optimization of a Multimachine Power System with a FACTS Device Using Identification and Control ObjectNets ................................................................. 2643
Ganesh K. Venayagamoorthy, University of Missouri–Rolla
Session 68

POWER ELECTRONIC DEVICES
Filtering and EMI

Session Chair: Rich Lukaszewski, Rockwell, and Adam Konopka, Baldor Electric
Session Organizer: Jean-Luc Schanen, Laboratoire d'Electrotechnique de Grenoble

68p1
Analytical Estimation of Common Mode Conducted EM in PWM Inverter
Xuejun Pei, Kai Zhang, Yong Kang, and Jian Chen, Huazhong University of Science and Technology

68p2
EMC Study of a Three Phase Inverter-fed Motor Drives
B. Revol, J. Roudet, and J. L. Schanen, Domaine Universitaire
P. Loizelet, Schneider Toshiba Inverter Europe

68p3
Active and Passive Series Compensation of Common Mode Voltage in Adjustable Speed Drive System
Adam Kempski, Robert Smolenski, Emil Kot, and Zbigniew Fedyczak, University of Zielona Gora

68p4
Extraction of Parasitic Parameters of EMI Filters Using Scattering Parameters
Shuo Wang, W. G. Odendaal, and F. C. Lee, Virginia Polytechnic Institute and State University

68p5
Application of Structural Winding Capacitance Cancellation for Integrated EMI Filters by Embedding Conductive Layers
Rengang Chen, J. D. van Wyk, Shuo Wang, and W. G. Odendaal, Virginia Polytechnic Institute and State University

Session 69

ELECTROSTATIC PROCESSES
Electrostatic Measurement and Controls

Session Chair: Norbert Grass, Siemens
Session Organizer: William Greason, University of Western Ontario

69p1
Analysis, Design and Experimentation of a High Voltage Power Supply for Ozone Generation Based on the Current-fed Parallel-Resonant Push–Pull Inverter
J. M. Alonso, J. García, A. J. Calleja, J. Ribas, and J. Cardesín, Universidad de Oviedo

69p2
A Critical Approach to Measure Streaming Current: Case of Fuels Flowing through Conductive and Insulating Polymer Pipes
J. Vazquez-Garcia, J. Rivenc, and A. Agneray, Renault
T. Paillat and G. Touchard, Laboratoire d'Etudes Aérodynamiques

69p3
Characteristic Evaluation for Synchronous Motors Using a Universal Drive System
Yoko Amano, Maizuru National College of Technology
Satoshi Ogasawara, Utsunomiya University

69p4
Imbalance of the Charge on a Carrier Moving through a Gaseous Medium
Zdenek Kucerovsky and William D. Greason, The University of Western Ontario
Measurement of Flowing Charges with an Electrostatic Voltmeter
Maciej A. Noras, Trek, Inc.

Electrification of Jets of Diesel Oil: Comparison between Malvern and PDPA Measurements
P. Baudel, P. Braud, C. Refin, and H. Romat, Laboratoire d'Etudes Aérodynamiques
A. Agneray, Renault

Session 70
INDUSTRIAL DRIVES
Drives Applications

Session Chair: Michael Giesselmann, Texas Tech. University
Session Organizer: Vladimir Blasko, Otis Elevator

Development of a Traction System for the Gauge Changing Train
Kciihiro Kondo, Hiroshi Hata, Kenichi Uruga, and Nobuo Terauchi, Railway Technical Research Institute

Different Viable Torque Control Schemes of Induction Motor for Electric Propulsion Systems
M. Vasudevan, St. Joseph's College of Engineering
R. Arumugam, Anna University

Torque Tracking Strategy for Anti-Slip Control In Railway Traction Systems with Common Supplies
J. N. Verhille, Siemens Transportation Systems and L2EP Lille
A. Bouscayrol, P. J. Barre, J. C. Mercieca, J. P. Hautier, and E. Semail, L2EP Lille

A Control Method to Suitably Distribute Electric Braking Force between Front and Rear Wheels in Electric Vehicle Systems with Independently Driven Front and Rear Wheels
Nobuyoshi Mutoh and Kazuya Takita, Tokyo Metropolitan Institute of Technology

Design and Control of a Kilo-Amp DC/AC Inverter for Integrated Starter-Generator (ISG) Applications
Jingbo Liu, Jiangan Hu, and Longya Xu, The Ohio State University

Double-fed Asynchronous Motor-Generator Equipped with a Three-Level VSI Cascade
A. Hodder and J.-J. Simond, Swiss Federal Institute of Technology of Lausanne
A. Schwery, Alstom Power

The Electrical Variable Transmission
Martin J. Hoeijmakers and Jan A. Ferreira, Delft University of Technology
ENERGY SYSTEMS
Energy System II

Session Chair: Greg Nolan, PSEG Power, LLC
Session Organizer: Greg Nolan, PSEG Power, LLC

71p1
Model of a Regenerative Fuel Cell-Supported Wind Turbine AC Power Generating System

W. Carter and B. M. Diong, The University of Texas at El Paso

71p2
by Using Boost and Buck Converters

Kodjo Agbossou, Sousso Kélowani, Adil Anouar, and Mohanlal Kolhe, Université du Québec à Trois-Rivières

71p3
Remote Micro-Hydroelectric Power Generation System

Ben Seitz, Cesar Salire, Gary Harwood, James N. Peterson, and Herbert L. Hess, affiliations not indicated

71p4
State Space Modeling of Parallel Self-Excited Induction Generators for Wind Farm Simulation

F. A. Farret, The Federal University of Santa Maria
B. Palle and M. Godoy Simões, Colorado School of Mines

71p5
Modeling, Control and Power Quality Evaluation of a PEM Fuel Cell Based Power Supply System for Residential Use

M. Tanrioven and M. S. Alam, University of South Alabama
