Contents

Preface XVII

Foreword XXI

Prevention of cracks in pavements: achievements and open questions XXIII
L. Francken

SESSION 1 – CAUSES OF SURFACE CRACKING
Chairperson: Prof. T. Scarpas, Delft University, The Netherlands

Effects of segregation on the initiation and propagation of top-down cracks 3
M. Schorsch, C.-M. Chang and G. Y. Baladi

Causes for surface fatigue cracks on asphalt pavements 11
V. Vodopivec, V. Oštir and B. Lipoglavšek

Surface cracking: origin and causes, theoretical and field studies 19
A.O. Abd El Halim, Y. Hassan, M. Farha and W. Bekheet

SESSION 2 – APT INVESTIGATIONS OF PAVEMENT CRACKING AND MAINTENANCE
Chairperson: Prof. D. Perraton, Quebec University, Canada

Development of fatigue cracking test protocol and life prediction methodology using the third scale model mobile loading simulator 29
S.J. Lee and Y.R. Kim

Evaluation of UTW fatigue cracking using FHWA’s accelerated loading facility 37
X. Qi, T. Mitchell and J.A. Sherwood

Maintenance of cracked pavements within the Format project 45
M.L. Antunes, A. van Dommelen, P. Sanders, J.M. Balay and E.L. Gamiz

SESSION 3 – USING FRACTURE MECHANICS TO MODEL CRACK INITIATION AND PROPAGATION
Chairperson: Prof. A. Ehrlacher, ENPC, France

Numerical approach of the pavement structure fracture behavior in fatigue loading 55
F. Dubois and C. Petit

Cohesive zone modeling of fracture in asphalt concrete 63
G.H. Paulino, S.H. Song and W.G. Buttlar

A fracture mechanics approach towards evaluating the cracking potential of a concrete pavement due to corrosion of a dowel basket assembly 71
SESSION 4 – EFFECTIVENESS OF INTERLAYER SYSTEMS TO ABATE CRACKING
Chairperson: Dr. M. Marienfeld, BP, USA

Effect of coating on fiberglass geogrid performance
C.M. Aldea and J.R. Darling
81
The development of a crack prevention system for buried joints with a grid panel and sliding sheets
O. Takahashi and T. Inaba
89
Field installation and design considerations of steel reinforcing netting to reduce reflection of cracks
I.L. Al-Qadi and M.A. Elseifi
97
Stress relieving function of paving fabrics when used in new road construction
E. Ramberg Steen
105
Complexe anti-fissure d’efficacite demontrée à base de treillis métalliques et d’enrobés bitumineux
M. Ballié
113

SESSION 5 – HMA LABORATORY TESTING METHODS
Chairperson: Prof. R. Lytton, Texas A&M, USA

Better assessment of bituminous materials lifetime accounting for the influence of rest periods
D. Breysse, V. Domec, S. Yotte and C. De La Roche
123
A simplified test and analysis procedure for fatigue characterization of asphalt mixtures
J. S. Daniel and Y.R. Kim
131
Laboratory test methods to uniquely characterize the presence and contribution of SBS modifiers on the cracking performance of asphalt mixtures
B. Kim, R. Roque, B. Birgisson and J. Kim
139
Design of a new laboratory test simulating the reflective cracking in pavements with cement treated bases
C. Florence, G. Foret, P. Tamagny, J.Y. Sener and A. Ehrlacher
147
The mechanical testing of asphalt concrete mixtures using digital image correlation
Y. Seo and Y.R. Kim
155

SESSION 6 – HMA CRACK MODELING AND SIMULATION – PART A
Chairperson: Dr. M. Partl, EMPA, Switzerland

Modelling of flexible airport pavements subjected to thermal cracking
E. Santagata and M. Bassani
165
Effect of temperature variations on mid-slab cracking in jointed concrete pavements
S.N. Shoukry, G.W. William and M.Y. Riad
173
Modélisation de la fissuration transversale d'origine thermique de chaussées souples et semi-rigides
E. Boucart, J.M. Konrad et M. Pigeon

Le rôle de la couche de base dans la propagation des fissures : confirmation et atténuation
M. Zeghal

Shakedown theory and related programming method applications to pavement structures design
M. Boulbibane and A.R.S. Ponter

SESSION 7 – INTERLAYER MODELING AND VALIDATION
Chairperson: Dr. A. De Bondt, Ooms, The Netherlands

Effect of thermal and vehicular loading on rehabilitated jointed concrete pavement with and without steel reinforcing netting
M.A. Elseifi and I.L. Al-Qadi

Evaluation of debonding of geosynthetics on critical stress inducement in AC overlays over PCC pavement: a numerical investigation
V. Tandon, S. Mahalungkar and K. Sobhan

Deep analysis on interlayer restraining reflective cracks in asphalt overlay old concrete pavement
J. Yang, G. Fu, Q. Lu, R. Chen and X. Deng

Stop of reflective crack propagation with the use of pet geogrid as asphalt overlay reinforcement
G. Montestruque, R. Rodrigues, M. Nods and A. Elsing

SESSION 8 – EFFECT OF HMA COMPOSITION ON PAVEMENT CRACKING
Chairperson: Dr. A. Vanelstraete, BRRC, Belgium

Influence of binder and mixture properties on thermal cracking of asphalt pavements
A. Shah, J. Olek and R.S. McDaniel

Low temperature fracture test for asphalt mixtures
M.O. Marasteanu, X. Li and J.F. Labuz

Contribution of aggregate quality on crack formation of wearing courses
L. Drüscher, T. Hagner, O. Harders and F. Stephan

Effect of Malaysian cellulose oil palm fiber in the tensile cracking of stone mastic asphalt
R. Muniandy, A.A. Selim and S. Hassim

SESSION 9 – HMA CRACK MODELING AND SIMULATION – PART B
Chairperson: Dr. Trenton M. Clark, Virginia DOT, USA

Bottom-up fatigue cracking: myth or reality?
A.A.A. Molenaar

Multi-scale micromechanical lattice modeling for cracking in hot-mix asphalt
Z. Feng, P. Zhang, M.N. Guddati and Y.R. Kim
Micro-cracks and their effect on crack modeling of thin AC surfacings
H. Norrison and J. Holden

A simplified modeling for cracking in pavements
Q.D. Tran, A. Chabot, A. Ehrlacher and P. Tamagny

SESSION 10 – REFLECTIVE CRACKING IN STABILIZED PAVEMENTS
Chairperson: Dr. M.H. Farha, Transport Canada

Control of reflective cracking in cement stabilized pavements
W.S. Adaska and D.R. Luhr

Cracking resistant cement-based material
A. Turatsinze, S. Bonnet and J.-L. Granju

Pre-cracking as a technique to minimize reflection cracking in semi-rigid
pavement structures – Long term performance monitoring
S.J. Ellis and R.P. Dudgeon

Performance of HMA overlays over concrete pavements in Nevada
P.E. Sebaaly, J. Ambroz and G. Bazi

Pavement damage by cracking under severe frost conditions
M. Boutonnet, Y. Savard, N. Pouliot and P. Hornych

SESSION 11 – EFFECT OF BINDER PROPERTIES ON HMA CRACKING –
PART A
Chairperson: Prof. H. Di Benedetto, ENTPE, France

Effect of ageing on the low temperatures cracking properties of bituminous
binders: new insights from bending beam rheometer measurements
V. Mouillet, J.C. Molinengo, F. Durrieu and J.P. Planche

Fracture toughness and fracture energy of bituminous binders at low
temperatures
F. Olard and H. Di Benedetto

Mapping crack susceptibility of bituminous materials with binder durability
I. Widyatmoko, R.C. Elliott and M.W. Heslop

Characterization of fracture and fatigue resistance of recycled polymer-
modified asphalt pavements
L.N. Mohammad, Z. Wu and M.A. Aglan

A comparison of bitumen/mastic fatigue data from different test methods

SESSION 12 - TOP-DOWN CRACKING: MODELING AND VALIDATION
Chairperson: Dr. L. Myers, FHWA, USA

Prediction of top-down crack initiation and crack growth in hot-mix asphalt
pavements
B. Sangpetngam, B. Birgisson and R. Roque

Three-dimensional finite element analysis of the causes of top-down cracks
in rubblized pavements
T. Svasdisant and G. Baladi

A model for top-down reflection cracking in composite pavements
K. Nesnas and M. Nunn
An analysis scheme for the evaluation of surface (top-down) longitudinal wheel path cracking in Indiana
G. Rowe and T. Pellinen

A new explanation of pavement cracking from top to bottom: visco-elasticity of asphalt materials?
P. Tamagny, L. Wendling and J.M. Piau

SESSION 13 – TREATMENT TECHNIQUES FOR PAVEMENT CRACKS
Chairperson: Dr. W.G. Buttlar, Illinois University, USA

Fiberglass pavement reinforcements used in dissimilar climatic zones for retarding reflective cracking in asphalt overlays
J.R. Darling and J.H. Woolstencroft

Technique de réhabilitation des chaussées aéroportuaires pour éviter la remontée de fissures – Études de cas – Aéroports internationaux de Montréal - Dorval et Mirabel (Canada)
E. Elhindy et D. Richer

Reducing reflection cracking in asphalt pavements
S. Shuler and D. Harmelink

Asphalt reinforcement for the prevention of cracking in various types of pavements: long term performance and overlay design procedure
C.G.J. Jenner and B.G.J. Uijting

Transverse cracking progression in asphalt shoulders adjacent to concrete pavements
S. Owusu-Ababio and R. Schmitt

SESSION 14 - EFFECT OF BINDER PROPERTIES ON HMA CRACKING – PART B
Chairperson: Prof. A. Collop, Nottingham University, UK

Effect of different SBS modifiers on superpave low temperature specification parameters including \( T_{cr} \)
R.Q. Kluttz and R. Dongré

Cracking characteristic of asphalt rubber mixtures
K.E. Kaloush, A. Zborowski, M. Abojaradeh, G.B. Way and J. Sousa

Fatigue damage of crumb rubber modified mixtures
I. Artamendi and H. Khalid

Short-term and long-term ageing influence on modified bitumens resistance to low temperature cracking and fatigue cracking
P. Radziszewski, J. Pilat and R. Ziolkowski

Long term effect of modified binder on cracking resistance of pavements
A.G. Dumont and M. Ould-Henia

SESSION 15 – CRACKING IN BRIDGE OVERLAYS
Chairperson: Prof. S. Shoukry, West Virginia University, USA

Bond strength and crack bridging behavior of bridge deck surfacing for concrete bridges
E.J. Vater and C. Recknagel
A proposed fatigue based design methodology for asphaltic mixes applied on orthotropic steel bridges
T.O. Medani, M. Huurman, L.J.M. Houben and A.A.A. Molenaar

Longitudinal surface cracking in asphalt pavement on steel bridge deck
T. Nishizawa, K. Himeno, K. Uchida, K. Nomura and S. Higashi

Assessment of high-performance concrete mix designs for Tennessee bridge decks
R. Salem and E. Burdette

SESSION 16 - MAINTENANCE TECHNIQUES TO INHIBIT PAVEMENT CRACKING
Chairperson: Prof. A.O. Abd El Halim, Carleton University, Canada

Field study of repair methods for transversal cracks
J. Valtonen and I. Hyyppä

Survey and field performance evaluation of hot and cold pour pavement crack sealants
M. Solaimanian and Y. Yildirim

Chip sealing over fabric in Borrego Springs, California, USA
L. Davis

Practical method for urgent repairs of cracked airport pavements
Y. Hachiya, K. Himeno and Y. Tsubokawa

SESSION 17 – LABORATORY TESTING OF PAVEMENT CRACKING TREATMENT TECHNIQUES
Chairperson: Dr. M. Nunn, TRL, UK

Laboratory simulation of the growth and propagation of reflection cracks in geogrid reinforced asphalt overlays
K. Sobhan, T. Crooks, V. Tandon and S. Mattingly

Overlay tester: a simple test to evaluate the reflective cracking resistance of asphalt mixtures
F. Zhou, D. Chen, T. Scullion and R. Williammee

Laboratory method for assessing shrinkage cracking potential in stabilized pavements
S. Chakrabarti and J. Kodikara

Laboratory and field experimental investigations for a new preventive maintenance treatment
G. Dondi, A. Simone and C. Sangiorgi
SESSION 18 - HMA CRACKING: SPECIFICATIONS, CHARACTERISTICS AND MODELING
Chairperson: Dr. J.-P. Planche, TotalFinaElf, France

Fatigue crack propagation and performance of bituminous mixes as per Indian specifications
R. Dwivedi and A. Das

Fatigue crack characteristics of HMA mixtures containing RAP
B. Huang, Z. Zhang, W. Kingery and G. Zuo

Characterization of crack propagation in bituminous mixtures
L. Wendling, E. Xolin, D. Gimenez, P. Reynaud, C. de la Roche, J. Chevalier and G. Fantozzi

Relation between crack growth parameters and mechanical characteristics in high modulus asphalt concrete
A. Montepara, G. Tebaldi and A. Costa

SESSION 19: PROBABILISTIC APPROACHES FOR FATIGUE CRACKING
Chairperson: Prof. D. Breysse, Univ. Bordeaux I, France

Probabilistic analysis of fatigue cracking in asphalt pavements
D. Bouwmeester, M. Huurman, F. Tolman and A.A.A. Molenaar

Intégration de la maintenance dans les modèles de fissuration
M. Réche, A. Vergne et P. Lepert

SESSION 20: MODELING AND FIELD EVALUATION OF PAVEMENT CRACKING
Chairperson: Dr. L. Francken, BRRC, Belgium

Thermomechanical modeling for fatigue damage of bituminous materials
D. Bodin, F. Belzung, C. de la Roche and A. Chabot

Modeling of cracking in asphalt concrete with regularized continuum damage mechanics
R. Wu and J.T. Harvey

Assessment of the resistance to crack propagation in asphaltic materials using the compact tension test
A.C. Collop, A.J. Sewell and N.H. Thom

Long-term performance on site of interface systems
A. Vanelstraete and J. De Visscher
