TWENTY-SIXTH NATIONAL
INDUSTRIAL ENERGY
TECHNOLOGY CONFERENCE

April 20-23, 2004
Adam's Mark Hotel
Houston, Texas

W. D. Turner
Conference Director

Host
Energy Systems Laboratory
Texas A&M University

Sponsors
American Chemistry Council
Global Energy Partners & EPRI
Louisiana Department of Natural Resources
Sempra Energy Solutions
Spirax Sarco, Inc.
Texas State Energy Conservation Office
U.S. Department of Energy

Portions or all of this book may be copied with the permission of the authors and Texas A&M only.

The statements and conclusions contained herein do not necessarily reflect the statements and conclusions of Texas A&M University, the Texas Engineering Experiment Station and the Energy Systems Laboratory.

Admission to Texas A&M University and any of its sponsored programs is open to qualified individuals regardless of race, color, religion, sex, age, national origin, or educationally unrelated handicaps.
# Table of Contents

## Steam System Operations

- "Novel Approach to Improve Deaerator Operations," Peter Tung, RCD Engineering ........................................... 1
- "Re-condensation," Puneet Kaur Bhatia, and Dr. Theodore A. Kozman, University of Louisiana at Lafayette ........................................... 7
- "Identifying Steam Opportunity "Impact" Inputs for the Steam System Assessment Tool (SSAT)," Dr. Greg Harrell and Dr. Richard Jendrucko, University of Tennessee/Knoxville, Dr. Anthony Wright, Oak Ridge National Laboratory (Abstract Only) ............. 11
- "Steam System Optimization," Robert Aegerter, Equistar Chemicals, LP ........................................... 13

## Plantwide Optimization 1

- "Real-time Utility System Optimization," Diego-Fernández Polanco and Alan Eastwood, Linnhoff March and Nicola Knight, KBC Advanced Technologies Inc ........................................... 21
- "Advanced Powerhouse Controls Save Pulp Mill $500K in Purchased Energy in First Month - Project reduces pulp production costs by $10/ton by reducing natural gas consumption and increasing power generation," Randall W. Morrison, Automation Applications Inc, LLC. and Stephen C. Hilder, Canadian Forest Products Ltd ........................................... 29
- "Rohm & Haas Company Plantwide Assessments," David J. Montgomery, Frederick P. Fendt, and Raymond Baker, Rohm & Haas Company...Not Available at Press Time

## Energy Efficient Technologies

- "New Technology Successes for Paper Drying," Jerry Aue and Kevin Grabner, Energy Center of Wisconsin and Sue Pierce, Johnson Corporation ........................................... 57
- "U.S. Department of Energy (DOE) Industrial Programs and Their Impacts," Steven Weakley and Joseph M. Roop, Pacific Northwest National Laboratory ........................................... 65
- "Divided Wall Column WITHOUT the Wall," Peter Tung, RCD Engineering ........................................... 73
"Pollution Reduction System that Generates Profits (Cascading Closed Loop Cycle – CCLC),” Daniel H. Stinger and Farouk A. Mian, WOW Energy Inc........................................81

**Plantwide Optimization 2**

“Analyze Constraint Behavior to Discover Hidden Value in your Process – Rule-based Control Systems are Recognized for Excellent Supervisory Control,” David A. Moore, Automation Applications Inc, LLC..................................................................................89

“Overcoming Fuel Gas Containment Limitations to Energy Improvement,” Joseph L. Davis Jr., KBC Advanced Technologies, Inc.................................................................109

“Optimization of Hot Standby,” José de Souza and David Holden, Aspen Technology Inc....125

**Compressed Air Systems**

“Compressed Air Systems Audits...Why? and How?” Henry L. Kemp Jr., Strategic Air Concepts..................................................................................................................143

“Padding with Compressed Air,” Chris E. Beals, Air Science Engineering Inc..............149

“Compressed Air Supply Efficiency,” Babu Joseph, Southern California Edison Company..................................................................................................................157

“Want Some Money Back from Your Compressed Air System?” Hank van Ormer, Air Power USA, Inc........................................................................................................173

**Energy Use Analysis**

“Understanding Manufacturing Energy Use Through Statistical Analysis,” J. Kelly Kissock and John Seryak, Department of Mechanical and Aerospace Engineering, University of Dayton.................................................................183

“Strategic Industrial Energy Efficiency: Reduce Expenses, Build Revenues, and Control Risk,” Christopher Russell, Alliance to Save Energy.........................................................195
“Industrial Fuel Switching – Emerging NGL Opportunities,” Ronald Cascone, Nexant, Inc. Chem Systems

“Six Sigma in Enterprise Energy Management,” Keith Fuller, Itron, Inc

American Chemistry Council Award Winners - 1

“Reduced Nitrogen and Natural Gas Consumption at Deepwell Flare,” Carl L. Williams, Lyondell Chemical Company (Abstract Only)

“Extraction Steam Controls at EPLA-W,” Jason L. Brinker, ExxonMobil Chemical Company (Abstract Only)

“Energy Optimization as Part of Total Plant Optimization,” Sanjay Joshi, Bayer Corporation

“Reduction in Unit Steam Production,” Ron J. Gombos, Arch Chemicals (Abstract Only)

Combined Heat & Power

“CHP Policy: Demand Response?” Richard Brent, Solar Turbines

“Marginal Cost of Steam and Power from Cogeneration Systems Using a Rational Value-Allocation Procedure,” Jimmy D Kumana and Majid M. Al-Gwaiz, Saudi Aramco

“Case Study: Siting, Permitting, and Interconnecting a Small CHP Plant in San Antonio,” Valerie V. Harris, San Antonio City Public Service, Richard Sweetser, Exergy Partners, and Walter Woods, American Gas Association

American Chemistry Council Award Winners - 2

“DTT Energy Reduction Project,” Craig Heinrich, DuPont (Abstract Only)

“Morris Plant Energy Efficiency Program,” Mark Betczynski, Equistar Chemicals, LP

“Energy and Environmental Benefits from Steam and Electricity Cogeneration,” Ray Ratheal, Eastman Chemical
