# TABLE OF CONTENTS – VOLUME 1

## PREFACE

## CONFERENCE ORGANISATION

## PLENARY SESSION I – STEELMAKING IN EUROPE

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Novel developments in steelmaking</td>
<td>9</td>
</tr>
<tr>
<td><em>Stuart Pettifor, Rob Boom</em></td>
<td></td>
</tr>
<tr>
<td>Steel research and networking in the European Union</td>
<td>19</td>
</tr>
<tr>
<td><em>Rolf Steffen</em></td>
<td></td>
</tr>
<tr>
<td>Significant transformation processes in the central European steel industry</td>
<td>21</td>
</tr>
<tr>
<td><em>Jan Lasota, Karel Klimek</em></td>
<td></td>
</tr>
</tbody>
</table>

## PLENARY SESSION II – STEELMAKING OUTSIDE EUROPE

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>South American steel industry: market and process development</td>
<td>31</td>
</tr>
<tr>
<td><em>Jorge Madias</em></td>
<td></td>
</tr>
<tr>
<td>Current activities and future challenges on science and technology of ironmaking and steelmaking in Japan</td>
<td>43</td>
</tr>
<tr>
<td><em>Tateo Usui, Hideki Ono-Nakazato</em></td>
<td></td>
</tr>
<tr>
<td>Ironmaking and steelmaking developments in North America</td>
<td>53</td>
</tr>
<tr>
<td><em>Joseph J. Poveromo</em></td>
<td></td>
</tr>
</tbody>
</table>

## PLENARY SESSION III – CO₂ EMISSIONS IN THE STEEL INDUSTRY

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chinese steel industry and research &amp; practice on minimizing CO₂ emission</td>
<td>63</td>
</tr>
<tr>
<td><em>Daqiang Cang, Chenxi Wang, Lingzhen Li, Yanbing Zong, Heng Cui, Peng He</em></td>
<td></td>
</tr>
<tr>
<td>CO₂ mitigation technologies in the steel industry: A benchmarking study based on process calculations</td>
<td>73</td>
</tr>
<tr>
<td><em>Jean Pierre Birat, Francois Hanrot, Gerard Danloy</em></td>
<td></td>
</tr>
<tr>
<td>Can CO₂ capture and storage make a contribution to reduced steel plant emissions</td>
<td>81</td>
</tr>
<tr>
<td><em>Tore A Torp</em></td>
<td></td>
</tr>
<tr>
<td>Steel industry in CO₂ emission trading</td>
<td>83</td>
</tr>
<tr>
<td><em>Toni Hemminki</em></td>
<td></td>
</tr>
</tbody>
</table>

## IRONMAKING I

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Numerical investigation of blast furnace performance under innovative operations</td>
<td>93</td>
</tr>
<tr>
<td><em>Jun-ichiro Yagi, Chu Mansheng, Hiroshi Nagami</em></td>
<td></td>
</tr>
<tr>
<td>Simulation of the liquid levels in the blast furnace hearth</td>
<td>103</td>
</tr>
<tr>
<td><em>Johnny Brännbacka, Henrik Saxén</em></td>
<td></td>
</tr>
</tbody>
</table>
Influence of various in-furnace conditions on drainage rate and residual amount of slag and metal in blast furnace hearth .......................................................... 113
Koki Nishioka, Masakata Shimizu, Takayuki Maeda

Effect of packed bed state on the liquid flow in blast furnace hearth ................................................. 123
Jeong-bo Lee, Jinkyung Chung

CASTING I

Continuous caster design for high quality steel in Nippon Steel Corporation ................................... 133
Shozo Shim, Yasuo Maruki, Keiji Tsunenari, Yousuke Oka

Feasibility study of a swirling flow tundish ......................................................................................... 143
Zongshu Zou, Qinfu Hou, Shibo Kuang, Huan Li

Modeling study of steel flow and inclusion removal using a gas bubble curtain in a trough type tundish ......................................................................................................................... 151
José de Jesús Barreto-Sandoval, José Angel Ramos-Banderas, Rodolfo Morales Davila

The status of twin-roll strip casting technology – CASTRIP® process .............................................. 161
Rama Mahapatra, Walter Blejde, Gerry Gillen, Peter Campbell, Richard Wechsler

PROCESS INTEGRATION I

An integrated benchmarking and energy savings tool for the iron and steel industry .................. 173
Ernst Worrell, Lynn Price

Improved energy and material efficiency using new tools for global optimisation of residue material flows .................................................................................................................. 183
Mikael Larsson, Chuan Wang, Jan Dahl, Anita Wedholm, Caisa Samuelsson, Marcel Magnusson, Hans-Olov Lampinen, Fenwei Su, Carl-Erik Grip

Iron and steel production process and plant simulations with Factory simulation tool ................. 193
Mikko Angerman, Markus Harju, Paul Fedory, Jukka Sippola

Energy network SSAB – Lulekraft – City of Luleå: Two decades’ experience of co-production of steel, electric power and district heating ................................................................. 195
Hans Petrini, Eric Sandström, Gunnar Lundkvist, Carl-Erik Grip, Axel Boden

BOF

Development of oxygen blowing using coherent jet at Usiminas ................................................... 205
José Flávio Viana, Luiz Octávio Barros de Souza, Ismar Sardinha

Development of BOF blowing control at Rautaruukki Steel, Raahe Works ................................... 215
Seppo Ollila, Jarmo Lilja

Investigation on post combustion phenomena in BOF by in-situ gas analysis ........................... 225
Ilkka Lasila, Eero Valovirta, Lauri Holappa

Slag free automatic tapping of BOF at Rautaruukki Steel, Raahe Works ...................................... 233
Jarmo Lilja, Seppo Ollila
MODELLING I

Recent advances in computational modeling of continuous casting of steel........................................................................... 243
Brian G. Thomas

Simulation of Al-addition in an inductive stirred ladle ............................................................................................................. 253
Eva Johansson, Jonas Alexis, Branka Vidacak

The new generation slag-droplet model ........................................................................................................................................ 263
Elizabeth Graveland-Gisolf, Paul Mink, Albert Snoeijer, Ed Barker, Rob Boom, D. Dixit, Brahma Deo

A multiphase model of combustion zone of COREX process ..................................................................................................... 273
Subrata Pal, Ashok Kumar Labiri

CO₂ EMISSIONS

Short-term opportunities for decreasing CO₂ emissions from the steel industry ................................................................. 283
Joachim von Schelle

Carbon dioxide emissions in stainless steel production: case study Outokumpu integrated mills in Tornio ........................................................................................................... 293
Riikka Viitala, Olli Dahl, Tuomo Koskenkari, Leeni Hirsivaara, Risto Liisanantti

Comprehensive study regarding greenhouse gas emission from iron ore based production at the integrated steel plant SSAB Tunnplät AB ........................................................................ 301
Mikael Larsson, Carl-Erik Grip, Hans Ohlsson, Staffan Ruqvist, Jan-Olov Wikström, Sten Ångström

Chemical utilization of CO₂ emissions from metallurgical industry – The role of thermodynamics calculations in designing laboratory scale experiments ........................................................................ 313
Riitta Raudaskoski, Esa Turpeinen, Katariina Rahkamoa-Tolonen, Riitta L. Keiski

IRONMAKING II

Improved blast furnace casting performance through implementation of hearth drainage mathematical and physical models ........................................................................................................... 321
Francis W. B. U. Tanzil, Robert J Nightingale, Paul Zulli, Bryan D Wright, Ian Bean

Evolution of charging strategies in the blast furnace by genetic algorithms .................................................................................. 333
Frank Pettersson, Henrik Saxén, Jan Hinnelä

A study of successive sampling during tapping of a full-scale production blast furnace ......................................................... 341
Annika J. Andersson, Margareta T. Andersson, Pär G. Jönsson, Bo Sundelin

Trials with mixed burden in the LKAB experimental blast furnace .......................................................................................... 353
Nicklas Ekblad
LADLE METALLURGY I

Control of size and composition of nonmetallic inclusion by oxygen content of molten steel at deoxidation and composition of deoxidizer ................................................................. 365
Hideaki Yamamura, Yoshiyuki Ueshima, Tooru Matsumiya

The use of CCTP – Cyclic cellbased tracking and prediction to control secondary steelmaking practices ................................................................. 375
Mselly Nzotta, Alf Sandberg, Henrik Issal, Mikael Engholm, Jonas Alexis

An attempt at hydrogen steelmaking ................................................................. 387
Masahiro Kawakami, Takahiko Maeda, Toshibide Takenaka, Seiji Yokoyama

Development of norms for cored wire injection in steel melts ................................................................. 397

PROCESS INTEGRATION II

Swedish national research program for energy saving by means of process integration ............... 407
Carl-Erik Grip, Anna Thorsell

Investment evaluation of an integrated steel mill using multiple criteria .......................................... 417
Marko Kekkonen, Mari Tuomaala, Lauri Holappa, Markku Hurme, Pekka Abtila

In search of stability – investigating flexible and stable production strategies for an optimised steel plant ................................................................. 427
Peter Sandberg, Mikael Larsson, Jan Dahl, Mats Söderström, Henrik Vuorinen

Increased energy recovery: Problems and possibilities ................................................................. 437
Birgitta Lindblad, Maria Bleckingberg, Carl-Erik Grip

IRONMAKING III

Properties and desulfurizing ability of dripping slag at high pulverized coal rate ......................... 447
Takashi Orimoto, Morimasa Ichida, Masatoshi Sakatani, Kiichiro Nakamura, Hisashi Kumaoka, Hiromitsu Ueno

Research on the utilization ratio of pulverized coal in large PCI at BF in Baosteel .................... 457
Keng Wu, Wanren Xu, Weizhong Jiang, Xin Wei, Fei Zhang, Xiao Li

Study of gasification reaction of cokes excavated from pilot blast furnace ........................... 467
Veena Sabajwalla, Tobias Hilding, S. Gupta, B. Björkman, R. Sakurovs, M Grigore, N. Saha-Chaudhury
