SCANMET II

2nd International Conference on Process Development in Iron and Steelmaking

6-9 June 2004, Luleå, Sweden

Nordkalotten Hotel & Conference

Volume 2

Organised by

MEFOS
Metallurgical Research Institute AB
# TABLE OF CONTENTS — VOLUME 2

## PREFACE

### CONFERENCE ORGANISATION

### CASTING II

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Soft reduction at voestalpine Stahl Linz</td>
<td>9</td>
</tr>
<tr>
<td>Andreas Schiefermüller, Peter Narzt, Peter Reisinger, Hubert Presslinger, Sergiu Ilie</td>
<td></td>
</tr>
<tr>
<td>Soft reduction technology for high quality steel in Nippon Steel Corporation</td>
<td>19</td>
</tr>
<tr>
<td>Shozo Shima, Yasuo Maruki, Junji Nakashima, Hideaki Yamamura, Yousuke Oka</td>
<td></td>
</tr>
<tr>
<td>Development of a sensor for non-contact velocity measurements for continuous casting slab moulds</td>
<td>29</td>
</tr>
<tr>
<td>Ulf Sjöström, Håkan Kelvesjö</td>
<td></td>
</tr>
<tr>
<td>How to maximize metal cleanliness in transient casting periods in tundish?</td>
<td>39</td>
</tr>
<tr>
<td>Marc Burty, J. F. Domgin, C. Pussé, H. Soulard</td>
<td></td>
</tr>
</tbody>
</table>

## STAINLESS I

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thermodynamics of high alloy steel production</td>
<td>49</td>
</tr>
<tr>
<td>Yuhsuke Mizukami, Tsuneo Itoh, Masahazu Kimoto, Ken-ichi Higuchi, Takahiro Miki, Tetsuya Nagasaka, Mitsutaka Hino</td>
<td></td>
</tr>
<tr>
<td>Vibration measurement of oscillation of melt bath in 150-ton AOD-converter</td>
<td>59</td>
</tr>
<tr>
<td>Petri Mure, Petri Karkinen, Timo Fabritius, Jouko Härkki</td>
<td></td>
</tr>
<tr>
<td>New decarburization technology for high-chromium hot metal in combined blowing converter with nitrogen top blowing</td>
<td>69</td>
</tr>
<tr>
<td>Yu-ichi Uchida, Naoki Ōkuchi, Koji Yamaguchi, Yasuo Kishimoto, Shuji Takeuchi, Hiroshi Nishikawa</td>
<td></td>
</tr>
<tr>
<td>Prediction of exhaust gas composition during AOD reduction stage</td>
<td>79</td>
</tr>
<tr>
<td>Yong Tang, Timo Fabritius, Jouko Härkki</td>
<td></td>
</tr>
</tbody>
</table>

## ON-LINE PROCESS ANALYSIS

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Potential of on-line gas analysis using microwave technology</td>
<td>89</td>
</tr>
<tr>
<td>Johan Malm, Donald Malmberg, Lars Bäåth</td>
<td></td>
</tr>
<tr>
<td>Process optimisation with advanced mould monitoring</td>
<td>99</td>
</tr>
<tr>
<td>Oliver Lang, Michael Traugott, Michael Pillwax</td>
<td></td>
</tr>
<tr>
<td>Investigation of slag systems with microwave technology</td>
<td>109</td>
</tr>
<tr>
<td>Johan Eriksson, Johan Björkvall, Donald Malmberg</td>
<td></td>
</tr>
</tbody>
</table>
Ladle Metallurgy II

The role of partial pressure on the viscosity and the inclusion separation capacity of slags during secondary steelmaking ................................................................. 117
Rob Dekkers, B. Blanpain, J. Plessers, P. Wollants

Desulfurization of molten iron with magnesium vapor injection ........................................ 127
Jian Yang, Keiji Okumura, Manoru Kawabara, Masamichi Sano

Elements distribution in metallurgical slags ................................................................. 135
Milan Raclauský, Miroslav Krayzel, Vlastimil Vodárek

Stainless II

Mathematical modeling of gas injection in AOD converters ........................................... 145
Anders Tillander, Lage T. I. Jonsson, Pär G. Jonsson

Top lance practice for refining of high chromium melt in converter .............................. 155
Esa Värtianen, Timo Fabritius, Jouko Härkkö

Optimization of Pyrejet™ wall mounted multi-function injection tool for stainless steel and flat bath steelmaking operations ............................................. 165
Vincent Rouvier, Laurent Coudurier, Mike Grant, Serban Cantacuzene, Nicolas Vassart

Alternative Ironmaking

Development of alternative ironmaking processes in POSCO .................................. 173
Jin Sik Choi

Development of TTmk3 process ................................................................................. 175
Hidetoshi Tanaka, Isao Kobayashi, Osamu Tsuge, Shoichi Kikuchi, Koji Tokuda, Shuzo Ito

Direct reduction of iron ore fines applying the coal based Circofer® process ................ 185
Andreas Orth, Katharina Förster, Heinz Eichberger

How did Hismelt survive? ....................................................................................... 197
R J Dry, S D Gull

Modelling II

Converter oxygen blowing model based on neural networks ...................................... 199
José Flávio Viana, Luiz Fernando Andrade de Castro

Deoxidation modeling of steelmaking process ......................................................... 207
Xiaobing Zhang

Thermodynamically consistent use of sulfide capacity correlations for steelmaking problems ......................................................................................... 217
Friedrich Kokert, Helmut Gfrerer

CFD database and its application in process metallurgy ........................................... 227
Liping Gu, Jonas Alexis, Jan-Olov Wikström
BY-PRODUCTS AND ENVIRONMENT I

How to make valuable products from in plant by-products and waste .................................................. 237
Elisabeth Nilsson

Use of slag and merit as binders in cold bonded briquettes ................................................................. 243
Fenwei Su, Hans-Olof Lampinen, Håkan Johansson

Filter dust as filler in concrete – from laboratory to full scale .............................................................. 253
Helena Moosberg-Bustnes, Leif Hunsbedt

Injection of BF flue dust into the BF – A full-scale test at BF no. 3 in Luleå ........................................... 265
Björn Jansson, Lena Sundqvist Ökvist

REDUCTION METALLURGY

Rapid in-flight reduction of fine iron ore carried by CH₄ gas ................................................................. 275
Yohei Nomura, Hiroshi Nakagawa, Takayuki Maeda, Koki Nishio, Masakata Shimizu

Characterization of the reoxidation behavior of sponge iron produced from different type of iron ore ................................................................. 285
Ali Saidi, J. Izadi, J. Safarian

Kinetics and morphological assessment of self-reducing briquettes of hematite and magnetite ores ........................................................................................................ 295
José Carlos D’Abreu, José Henrique Nordin Júnior, Karla de Melo Martins, Denilson Rodrigues de Araujo

Reactions of iron ore-carbonaceous materials composite pellets in moving bed and simulation by mathematical model ................................................................. 307
Yoshiaki Iguchi, Kazuhiko Yagita, Satoshi Endo, Hiromitsu Tomiyama

EAF I

The ever-changing face of EAF steelmaking: Looking back and the journey forward ......................... 315
Jeremy A. T. Jones

Preheating and precleaning of scrap for production increase, lowered environmental impact and improved safety ........................................................................ 325
Jan Nilsson, Staffan Granström, Joachim von Schéele

Continuous fumes monitoring for dynamic control of oxygen injections in EAF ................................. 335
Bruno Allemand, Savine Bockel-Macal, Pierre Bruchet, Fabien Januard, Jacky Laurent

Experience from more than two years of several laser installations to measure O₂, CO and temperature in the offgas ................................................................. 345
Andreas Dietrich, Peter Kasperson, Helmut Sommerauer

BY-PRODUCTS AND ENVIRONMENT II

Iron and steel slags as sustainable construction resources and fertilisers ........................................ 347
Herbert Motz, Michael Kühm

Treatment of slags – A part of sustainable steelmaking ................................................................. 359
Aimo Hiltunen, Rita Hiltunen
Treatment of liquid EAF-slag from stainless steelmaking to produce environmental
friendly construction materials ............................................................... 369
Michael Kühn, Dirk Mudersbach

Recycling of ladle furnace slags ............................................................. 379
Sima Aminorroaya, Hossein Edris, Ali Tobidi, Jafar Parsi, Babram Zamani

IRONMAKING IV

Development of a reducing gas injection technology at blast furnace 5 and 6 of
voestalpine Stahl GmbH ................................................................. 385
Thomas Buergler, Guenter Brunnbauer, Alfred Fersil, Per Hellberg, Bror-Erik Sköld, Kurt Wieder,
Johann Wurm, Robert Mullner

Hearth phenomena and hot metal composition in blast furnace ......................... 395
Kalevi Raipala

Application of softening-melting test data in blast furnace .......................... 405
Sheng Chew, Paul Zulli, Robert Nightingale, Ai-Bing Yu

Different reductant injectants influence on BF raceway ................................ 417
Peter Sikström, Bo Lindblom

EAF II

Numerical simulation of a supersonic oxygen lance for industrial application in EAF .......... 429
Enrico Malfa, Fabio Maddalena, Cesare Giavani, Francesco Memoli

DynArCOS™ - A novel EAF optimizing strategy .................................. 439
Franz Rubenzucker, Richard Krump, Michael Traugott

Multivariate prediction of end conditions for electric arc furnaces ................. 447
Erik Sandberg, Barry Lennox, Patrik Undvall

EAF process optimization using Goodfellow EFSOP™ ................................ 457
Howard D. Goodfellow, Euan J. Evenson

BY-PRODUCTS AND ENVIRONMENT III

Development of a new metallurgical process for the production of valuable metallic and
mineral materials from by-products generated by the steel industry and other major
activity sectors ..................................................................................... 469
Jean Borlee, A. Fleischanderl, U. Gennari, M. Gimenez, F. Sorrentino, J-M. Delbecq, C. Grisvard,
J. Hoffmann, J. Calloens, K. Kubica, E. Roubaud, M. Raclavsky

In-plant recycling of dust and sludge: Experience from the OXYFINEST™ concept .......... 481
Pasi Aalto, Mats Johannson

High heat and material recovery of plastic waste including PVC using SMI’s waste gasi-
fication and smelting system based on high temperature metallurgy ................. 491
Takaku Yamamoto, Hirotaka Sato, Yoshinori Maisukura, Yutaka Ujisawa, Hiroaki Ishida, Shuichi
Sasaki, Yasyuki Hata

REZIN – New ways to recover zinc from EAF dust .................................. 501
Guozhu Ye, Eric Burström, Massimo Maccagni, Loris Bianco, Håkan Stripple
