Solid Freeform Fabrication as an important and totally integrated approach to design, materials processing and manufacturing research results related to it is contained in this proceedings of the SFF Symposium held in Austin, Texas on August 2-4, 2004

SFF Topics covered in the Symposium include:

- Process Development
- Modeling
- Applications
- Materials

David L. Bourell, Richard H. Crawford, Joseph J. Beaman, Kristin L. Wood, and Harris L. Marcus, Editors

Table of Contents

Preface ................................................................. ix
Organizing/Advisory Committee ........................................ xi

European Assessment of SFF

Overview of the WTEC Additive/Subtractive Manufacturing Study of European Research
David W. Rosen, Georgia Institute of Technology ......................................... 1

Rapid Manufacturing Research Group
Richard Hague, Phill Dickens, Loughborough University .......................... 11

Solid Freeform Fabrication and the Interface with Direct Write
K. G. Watkins, University of Liverpool ......................................................... 14

Research on Layer Manufacturing Techniques at Fraunhofer
C. Ader\textsuperscript{a}, M. Brossemer\textsuperscript{b}, C. Freyer\textsuperscript{c}, H. Fricke\textsuperscript{b}, D. Hennig\textsuperscript{b}, F. Klocke\textsuperscript{c}, V. Kühne\textsuperscript{a}, W. Meiners\textsuperscript{a}, C. Over\textsuperscript{a}, H. Pleteit\textsuperscript{b}, S. Stühmann\textsuperscript{b}, I. Wirth\textsuperscript{b}, T. Wirtz\textsuperscript{a}, K. Wissenbach\textsuperscript{a}, \textsuperscript{a}Fraunhofer Institute for Laser Technology ILT, \textsuperscript{b}Fraunhofer Institute for Manufacturing and Advanced Materials IFAM, \textsuperscript{c}Fraunhofer Institute for Production Technology IPT, \textsuperscript{d}Modelltechnik
Rapid Prototyping GmbH ................................................................. 26

The Reality of Functionally Graded Material Products
G. E. Knoppers, J. W. Gunnink, J. van den Hout, W. P. van Vliet, TNO
Industrial Technology ................................................................. 38

Binding Mechanisms in Selective Laser Sintering and Selective Laser Melting
J. P. Kruth, P. Mercelis, L. Froyen, Marleen Rombouts, University of Leuven (K.U.Leuven) ................................................................. 44

Materials

Creep Behaviour of Polyamide in Selective Laser Sintering
Eef Moeskops, Nico Kamperman, Bart van de Vorst, Rik Knoppers, TNO
Industrial Technology ................................................................. 60

An Investigation of LENS®-Deposited Medical-Grade CoCrMo Alloys
Brent Stucker\textsuperscript{a}, Carson Esplin\textsuperscript{b}, Daniel Justin\textsuperscript{a}, \textsuperscript{a}Utah State University, \textsuperscript{b}MedicineLodge, Inc. ................................................................. 68

Advances in the Production of Infiltrated Aluminium Parts Using Selective Laser Sintering
T. B. Sercombe, G. B. Schaffer, The University of Queensland .......................... 80
Effects of Process Variables and Size Scale on Solidification Microstructure in Laser-Based Solid Freeform Fabrication of Ti-6Al-4V
N. W. Klingbeil\textsuperscript{a}, S. Bontha\textsuperscript{a}, C. J. Brown\textsuperscript{a}, D. R. Gaddam\textsuperscript{a}, P. A. Kobryn\textsuperscript{b}, H. L. Fraser\textsuperscript{c}, J. W. Sears\textsuperscript{d}, \textsuperscript{a}Wright State University, \textsuperscript{b}Air Force Research Laboratory, \textsuperscript{c}The Ohio State University, \textsuperscript{d}South Dakota School of Mines and Technology

A Design of Experiments Approach Defining the Relationships Between Processing and Microstructure for Ti-6Al-4V

Influence of Laser Processing Parameters on the Corrosion Behavior in 316L Stainless Steel Laser Powder Depositions
Eswar R. Yarrapareddy, Alan J. Anderson, James W. Sears, South Dakota School of Mines and Technology

Strain Analysis of Initial Stage Sintering of 316L SS Three Dimensionally Printed (3DP\textsuperscript{TM}) Components
Scott Johnston\textsuperscript{a}, Dustin Frame\textsuperscript{a}, Rhonda Anderson\textsuperscript{ab}, Duane Storti\textsuperscript{a}, \textsuperscript{a}University of Washington-Seattle, \textsuperscript{b}Concurrent Technologies Corporation

The Effects of Pre-Alloyed Steels Powder Compositions on Build Quality in Direct Metal Laser Re-Melting
S. P. Akhtar, C. S. Wright, M. Youseffi, University of Bradford

Scaling Effects in Laser-Based Additive Manufacturing Processes
Andrew J. Birnbaum\textsuperscript{a}, Jack L. Beuth\textsuperscript{a}, James W. Sears\textsuperscript{b}, \textsuperscript{a}Carnegie Mellon University, \textsuperscript{b}South Dakota School of Mines and Technology

Transient Changes in Melt Pool Size in Laser Additive Manufacturing Processes
Pruk Aggarangsf, Jack L. Beuth\textsuperscript{a}, David D. Gill\textsuperscript{b}, \textsuperscript{a}Carnegie Mellon University, \textsuperscript{b}Sandia National Laboratories-NM

Materials Design – Towards a Functionally Graded Electrical Conductor
S. Satapathy, K. Hsieh, C. Persad, Institute for Advanced Technology at UT-Austin

Fabrication of X-Graded H13 and Cu Powder Mix Using High Power Pulsed Nd:YAG Laser
V. E. Beal\textsuperscript{a}, P. Erasenthiran\textsuperscript{b}, N. Hopkinson\textsuperscript{b}, P. Dickens\textsuperscript{b}, \textsuperscript{a}Universidade Federal de Santa Catarina, \textsuperscript{b}Loughborough University

Experimental Investigation of Laser Metal Deposition of Functionally Graded Copper and Steel
Vinay Kadekar, Sashikanth Prakash, Frank Liou, University of Missouri-Rolla

---

ii
Solidification Morphology Analysis of SLM of Cu Powder
Jorge A. Ramos Grez\textsuperscript{a}, David L. Bourell\textsuperscript{b}, \textsuperscript{a}Pontificia Universidad Católica de Chile, \textsuperscript{b}The University of Texas at Austin \hfill \textsuperscript{---} 203

Direct Laser Sintering of Borosilicate Glass
F. Klocke, A. McClung, C. Ader, Fraunhofer Institute for Production Technology \hfill \textsuperscript{---} 214

An Initial Assessment of Infiltration Material Selection for Selective Laser Sintered Preforms
Stacia L. Barrow, David Bourell, Scott Evans, The University of Texas at Austin \hfill \textsuperscript{---} 220

Rapid Manufacturing of Silicon Carbide Composites
R. S. Evans, D. L. Bourell, J. J. Beaman, M. I. Campbell, The University of Texas at Austin \hfill \textsuperscript{---} 228

Preliminary Study for Transparentization of SLS Parts by Resin Infiltration
T. Niino\textsuperscript{a}, H. Yamada\textsuperscript{a}, S. Seki\textsuperscript{b}, \textsuperscript{a}The University of Tokyo, \textsuperscript{b}ASPECT, Inc. \hfill \textsuperscript{---} 236

Fabrication of PEM Fuel Cell Bipolar Plates by Indirect SLS
Ssuwei Chen, David L. Bourell, Kristin L. Wood, The University of Texas at Austin \hfill \textsuperscript{---} 244

Advanced Laminated Object Manufacturing (LOM) of SiSiC Ceramics
L. Weisensel, N. Travitzky, P. Greil, The University of Erlangen-Nuremberg \hfill \textsuperscript{---} 257

Prospect of Making Ceramic Shell Mold by Ceramic Laser Fusion
H. H. Tang\textsuperscript{a}, H. C. Yen\textsuperscript{a}, S. M. Su\textsuperscript{b}, Z. Y. Lin\textsuperscript{b}, \textsuperscript{a}National Taipei University of Technology, \textsuperscript{b}Institute of Manufacturing Technology \hfill \textsuperscript{---} 268

Process Errors and Aspects for Higher Resolution in Conventional Stereolithography
Carsten Tille, Caesar Research Center \hfill \textsuperscript{---} 281

Novel Implementations of Plasma Spraying for Fabricating Components Made of a Multiphase Perfect Material
Feng Wang\textsuperscript{a}, Ke-Zhang Chen\textsuperscript{a}, Xin-An Feng\textsuperscript{b}, \textsuperscript{a}The University of Hong Kong, \textsuperscript{b}Dalian University of Technology \hfill \textsuperscript{---} 293

Process Development
Metal Laminated Tooling – A Quick and Flexible Tooling Concept
Thomas Himmer\textsuperscript{a}, Anja Techet\textsuperscript{b}, Steffen Nowotny\textsuperscript{b}, Eckhard Beyer\textsuperscript{c}, \textsuperscript{a}Fraunhofer USA, Inc., \textsuperscript{b}Fraunhofer IWS, \textsuperscript{c}University of Technology at Dresden \hfill \textsuperscript{---} 304

High Speed Sintering – Early Research into a New Rapid Manufacturing Process
Neil Hopkinson, Poonjolai Erasenthiran, Loughborough University \hfill \textsuperscript{---} 312
Laser-Assisted Photothermal Imprinting of Nanocomposite
Y. Lu, D. B. Shao, S. C. Chen, The University of Texas at Austin

Continuous Ink-Jet Printing Electronic Components Using Novel Conductive Inks
Junfeng Mei, Michael Lovell, Martin Mickle, Steve Heston, University of Pittsburgh

Exploring Vacuum Casting Techniques for Micron and Submicron Features
M. Denouaf, P. Mognot, B. Lepioufle, a Biomis-SATIE, b IRCCyN

Micro Thin Film Sensor Embedding in Metal Structures for Rapid Production of Miniature Smart Metal Tooling
Xudong Cheng, Patrick Schwieso, Hongseok Choi, Arindom Datta, Xiaochun Li, University of Wisconsin-Madison

Extracting Product Performance by Embedding Sensors in SFF Prototypes
Rahul Rai, Matthew Campbell, Kristin Wood, University of Texas at Austin

Application of Machine Learning Methods to the Open-Loop Control of a Freeform Fabrication System
Evan Malone, Oliver Purwin, Cornell University

Simulation of the Process Step Polymer Removal in Indirect Metal Laser Sintering
M. Seefried, M. F. Zaeh, M. Meindl, Technische Universitaet Muenchen

Full-Densification of SLS Parts by Re-Melting
T. Niino, H. Yamada, The University of Tokyo

An Investigation into the Effect of the Shell on SALM Processed Parts
A. K. Egodawatta, D. K. Harrison, A. K. M. De Silva, G. Haritos, a Glasgow Caledonian University, b Softnet Consultancy Ltd.

Study on Incorporating Support Material in Rapid Freeze Prototyping
Frances D. Bryant, Ming C. Leu, University of Missouri-Rolla

On the Interface Between LENS® Deposited Stainless Steel 304L Repair Geometry and Cast or Machined Components
D. D. Gill, J. E. Smugeresky, M. F. Harris, C. V. Robino, M. L. Griffith, Sandia National Laboratories-NM

Characterization of Thin Walled Ti-6Al-4V Components Reduced via Electron Beam Melting
Denis Cormier, Harvey West, Ola Harrysson, Kyle Knowlson, North Carolina State University

Further Developments in Process Mapping and Modelling in Direct Metal Selective Laser Melting
C. Hauser, T. H. C. Childs, M. Badrossamay, University of Leeds
Effect of Surface Treatments on Electron Beam Freeform Fabricated Aluminum Structures

Compensation for Uneven Surfaces When Building Laser Deposited Structures
E. Fearon, K. G. Watkins, University of Liverpool

Quantifying Dimensional Accuracy of a Mask Projection Micro Stereolithography System
Ameya Limaye, David Rosen, Georgia Institute of Technology

Geometry and Procedure for Benchmarking SFF and Hybrid Fabrication Process Resolution
Vito R. Gervasi, Adam Schneider, Joshua Rocholl, Milwaukee School of Engineering

On the Use of Angled, Dynamic Laser Beams to Improve Stereolithography Surface Finish
Benay Sager, David W. Rosen, Georgia Institute of Technology

Numerical and Experimental Analysis of the Powder Flow Streams in the Laser Aided Material Deposition Process
Yogesh Thakar, Heng Pan, Frank Liou, University of Missouri-Rolla

Modeling of the Metal Powder Flow with Carrier Gas in Coaxial Nozzle for Direct Laser Deposition Process
Heng Pan, Frank Liou, University of Missouri-Rolla

Modeling
Converting a CAD Model into a Manufacturing Model for the Components Made of a Multiphase Perfect Material
Feng Zhu, Ke-Zhang Chen, Xin-An Feng, The University of Hong Kong, Dalian University of Technology

SFF-Oriented Modeling and Process Planning of Functionally Graded Materials Using a Novel Equal Distance Offset Approach
Anping Xu, Leon L. Shaw, Hebei University of Technology, The University of Connecticut at Storrs

Morphing Based Approach for Process Planning for Fabrication of Geometries and the Control of Material Composition
Rajeev Dwivedi, Radovan Kovacevic, Southern Methodist University

A Combinatorial Parametric Engineering Model for Solid Freeform Fabrication
J. C. Boudreaux, NIST/Advanced Technology Program
The Approach of Complex Insert Packaging Fabrication in Stereolithography
Y. Y. Chiu, J. H. Chang, Oriental Institute of Technology ----------------------------------- 572

Development of Image Processing Tools for Analysis of Laser Deposition Experiments
Todd Sparks, University of Missouri-Rolla ---------------------------------------------- 584

Analyzing the Cutting Process of a Heated Flexible Blade in Extruded Polystyrene Foam
Bram de Smit, Han J. Broek, Delft University of Technology ----------------------------- 591

Study of Ceramic Slurries for Investment Casting with Ice Patterns
Qingbin Liu, Ming C. Leu, Harish Jose, Von L. Richards, University of Missouri-Rolla ----------------------------- 602

Stereolithography Cure Process Modeling Using Acrylate Resin
Yanyan Tang, Clifford L. Henderson, John Muzzy, David W. Rosen, Georgia Institute of Technology ----------------------------------- 612

Investigation of the Oven Process in Indirect Metal Laser Sintering
M. Seefried, M. F. Zaeh, Technische Universitaet Muenchen ----------------------------- 624

Thermal Optimization of Injection Molds Produced by Layered Manufacturing Techniques
Eric Boillat, Rémy Glardon, Marc Matthey, Ecole Polytechnique Fédérale de Lausanne ----------------------------------- 636

Simulating the Effects of Substrate Pre-Heating on the Final Structure of Steel Parts Built by Laser Powder Deposition
L. Costa, R. Vilar, T. Réti, DEMAT, Szechenyi Istvan University ----------------------------------- 643

Applications

Development of Nickel-Titanium Graded Composition Components
M. S. Domack, J. M. Baughman, NASA Langley Research Center, Lockheed Martin Space Operations ----------------------------------- 655

Ejection Forces and Friction Coefficients from Injection Molding Experiments Using Rapid Tooling Inserts
M. E. Kinsella, B. Lilly, B. Carpenter, K. Cooper, Air Force Research Laboratory, The Ohio State University, NASA Marshall Space Flight Center ----------------------------------- 669

Faster – Better Molds Through RSP Tooling New Research and Advancements
James R. Knirsch, RSP Tooling, LLC ----------------------------------- 681

Freeform Fabrication of Electroactive Polymer Actuators and Electromechanical Devices
Evan Malone, Hod Lipson, Cornell University ----------------------------------- 697
Industrial Freeform Generation of Microtools by Laser Micro Sintering
P. Regenfuß, L. Hartwig, S. Klötzer, R. Ebert, Th. Brabant, T. Petsch,
H. Exner, Laserinstitut Mittelsachsen e. V., 3D – Micromac AG

Direct Freeform Fabrication of Spatially Heterogeneous Living Cell-Impregnated Implants
D. L. Cohen, E. Malone, H. Lipson, L. J. Bonassar, Cornell University

Soft and Hard Implant Fabrication Using 3D-Bioplotting™
C. Carvalho, R. Landers, R. Mühlaupt, Freiburg Materials Research Center

Biomimetic Design and Fabrication of Interior Architecture of Tissue Scaffolds Using Solid Freeform Fabrication
B. Starly, A. Lau, W. Sun, W. Lau, T. Bradbury, Drexel University,
Therics, Inc.

Multiple Material Micro-Fabrication: Extending Stereolithography to Tissue Engineering and Other Novel Applications
Ryan Wicker, Francisco Medina, Chris Elkins, University of Texas at El Paso, Stanford University

Accurate Heart Model for Pacemaker Development in SFF
R. S. Crockett, T. Horvath, M. Koch, M. Yang, California Polytechnic State University-San Luis Obispo, St. Jude Medical

Orthopedic Surgery Planning Based on the Integration of Reverse Engineering and Rapid Prototyping
Dong-Gyu Ahn, Jun-Young Lee, Dong-Yol Yang, Chosun University,
KAIST

Fabrication of Bone Substitute Material by Rapid Prototyping
A. Ott, J. Heinzl, D. Janitza, R. Pelzer, Technische Universität München

Design and Manufacture of an Attachment Fitting for Transtibial Prosthetic Sockets Using Selective Laser Sintering
Danny Burhan, Richard Crawford, University of Texas at Austin

Laser Densification of Extruded Dental Porcelain Bodies in Multi-Material Laser Densification (MMLD) Process
Xiaoxuan Li, Jiwen Wang, Leon L. Shaw, Thomas B. Cameron,
University of Connecticut-Storrs, Dentsply Ceramco

Solid Freeform Fabrication of Artificial Human Teeth
Jiwen Wang, Leon L. Shaw, Anping Xu, Thomas B. Cameron,
University of Connecticut-Storrs, Hebei University of Technology,
Dentsply Ceramco

Multi-Nozzle Biopolymer Deposition for Freeform Fabrication of Tissue Constructs
S. Khalil, J. Nam, A. Darling, W. Sun, Drexel University
Design and Fabrication of Components with Optimized Lattice Microstructures
Vito R. Gervasi, Douglas C. Stahl, Milwaukee School of Engineering

Panel Discussion on Broader Applications of SFF
Harris L. Marcus\textsuperscript{a}, Clinton L. Atwood\textsuperscript{b}, David G. Alexander\textsuperscript{c}, Phill M. Dickens\textsuperscript{d}, Kent Firestone\textsuperscript{e}, \textsuperscript{a}University of Connecticut-Storrs, \textsuperscript{b}Sandia National Laboratory-NM, \textsuperscript{c}Pratt & Whitney, \textsuperscript{d}Loughborough University, \textsuperscript{e}University of Texas at Austin
