International RILEM Conference on the Use of Recycled Materials in Buildings and Structures

Barcelona, Spain
8 – 11 November 2004

Organized by
RILEM TC 198-URM: Use of Recycled Materials

UPC
Universitat Politècnica de Catalunya, Materials Section of the Department of Construction Engineering

Edited by
Enric Vázquez
Universitat Politècnica de Catalunya, Barcelona, Spain
Charles F. Hendriks
Delft University of Technology, The Netherlands
and Gabriëlla M. T. Janssen
Delft University of Technology, The Netherlands: Enviro Challenge / DUT, Opoeteren, Belgium

RILEM Publications S.A.R.L.

III
Contents

Volume 2

Topic 5: Recycled Aggregates in Concrete (continued)

61. Influence of recycled concrete aggregates on concrete durability 554
   A. Gonçalves, A. Esteves, M. Vieira

62. Petrographic analysis on recycled aggregate-produced concrete 563
   M. J. Estefano de Oliveira, M. C. Barros Oliveira, C. Silveira de Assis,
   J. Tavares de Mattos

63. Precast concrete building blocks made with aggregates derived from 571
    constructions and demolition waste
   M. N. Soutsos, N. Jones, S. G. Millard, J. H. Bungey, R. G. Tickell, J. Gradwell

64. Properties of self-levelling concrete made with industrial wastes 580
   F. Colangelo, M. Marroccoli, R. Cioffi

65. Properties of steam cured recycled aggregate fly ash concrete 590
   S. C. Kou, C. S. Poon, D. Chan

66. Self-compacting concrete: a great opportunity for recycling materials 600
   V. Corinaldesi, G. Moriconi

67. Shear behavior of reinforced recycled concrete beams 610
   M. Sogo, T. Sogabe, I. Maruyama, R. Sato, K. Kawai

68. Shear strength of concrete with recycled aggregates 619
   B. González, F. Martinez

69. Study on ARC’s aggregate utilization recycled of concrete 629
   T. M. Mendes, G. Morales, G. Carbonari

70. Study on compressed stress, water absorption and modulus of elasticity of 636
    produced concrete made by recycled aggregate
   M. J. Estefano de Oliveira, C. Silveira de Assis, A. W. Termi

71. Study on corrosion of reinforcing bar in recycled concrete 643
   K. Tanaka, K. Yada, I. Maruyama, R. Sato, K. Kawai

72. Surveys concerning the capacity of some cement-aggregate combinations to 651
    mitigate the Gamma radiation
   G. Poteraş

73. The compressive strength of concrete containing tile chips, crushed scallop 658
    shells, or crushed roofing tiles
   M. Sugiyama

74. The role and influence of recycled aggregate, in "recycled aggregate 665
    concrete"
   M. Etxeberria, E. Vázquez, A. Mari, Ch. F. Hendriks, M. H. J. van Maasakkers
75. Use of concrete recycled aggregates in roller compacted concrete
   P. Delhez, X. Willem, F. Michel, L. Courard

76. Use of recycled construction materials for mortar production
   M. L. C. Martins, A. da S. Torres, R. B. A. Gonçalves

77. Utilization of recycled concrete aggregate for structural concrete
   P. Alaejos Gutiérrez, M. Sánchez de Juan

**Topic 6: Rice Husk and Fibres**

78. Application of maturity concept in concrete with RHA addition
   C. A. Rufino da Silva, M. P. Barbosa, J. L. Akasaki, R. C. de Andrade Pinto

79. Assessment of the pozzolanic reaction of crystalline and amorphous RHA
   J. H. da Silva Rêgo, A. A. Nepomuceno, N. P. Hasparyk, F. L. Vieira

80. Effect of cellulose fibre on the thermal and mechanical properties of cement paste
   M. Bentchikou, A. Guidoum, K. L. Scrivener, K. Silhadi, S. Hanini

81. Influence of mechanical grinding on the pozzolanic activity of residual sugarcane bagasse ash

82. Qualitative study of the degradation of vegetable fibre subjected to the alkaline environment of mortar obtained from Portland cement by means of dyeing techniques
   J. Claramunt Blanes, E. Vázquez Ramonich, M. Barra Bizinotto

83. Study of the influence of amorphous rice husk-ash on concrete properties
   N. P. Hasparyk, L. A. Farias, M. A. S. de Andrade, R. M. Bittencourt

84. Study of the applicable low-cost previous treatments to the vegetable fibers for their incorporation in the Portland cement mortars
   J. Claramunt Blanes, E. Vázquez Ramonich, M. Barra Bizinotto, P. Cano Saladrigas

85. Study on the environmental impact of lightweight aggregates production incorporating cellulose industrial residues
   S. Pinto, M. Almeida, A.M.S. Correia, J.A. Labrincha, V.M. Ferreira, K. Rosenbom

86. The possibility of adding rice husk ash (RHA) to concrete
   M. M. Tashima, C. A. R. da Silva, J. L. Akasaki, M. Beniti Barbosa
Topic 7: Sludges, Sediments and Drill Cutting

87. New cement formulations made of industrial wastes  
F. Raupp-Pereira, D. Hotza, A.M. Segadães, J.A. Labrincha  

88. Potentiality of sewage sludge ash as mineral additive in cement mortar and high performance concrete  
C. M. A. Fontes, M. C. Barbosa, R. D. Toledo Filho, J. P. Gonçalves  

89. River sediments contaminated by heavy metals and organic compounds: characterisation, treatment and valorisation  
L. Boucard, Z. Lafhaj, F. Skoczylas  

90. Some strategies for reusing residues from waste water treatment plants: preparation of binding materials  
J. Payá, J. Monzó, M. V. Borrachero, J. J. Morenilla, M. Bonilla, P. Calderón  

91. Stabilisation of heavy metals from dredged sediment. Tailoring of residue properties  
S. Kribi, A. Nzihou, P. Sharrock  

92. Stabilisation/solidification of synthetic North Sea drill cuttings containing oil and chloride  
M. S. Al-Ansary, A. Al-Tabbaa  

93. Incorporation of sludge from a water treatment plant in cement mortars  
A. Gonçalves, A. M. Esteves, M. Carvalho, A. Machado, E. Correia  

94. Valorisation addition dry sludge sewage in concrete  
A. Yague, S. Valls, E. Vázquez  

Topic 8: Use of Industrial By-Products: Coal Fly Ash

95. Alkaline activation of fly ashes. Manufacture of concretes not containing Portland cement  
A. Fernández-Jiménez, A. Palomo  

96. Microstructure and shrinkage behavior of massive concrete containing PFBC coal ash  
A. Nakashita, S. Kondo, I. Maruyama, R. Sato  

97. Recycling of power station coal fly ashes as building elements to be used in passive fire protection  

98. Strength development and drying shrinkage of steam-cured concrete containing PFBC coal ash  
Masa-aki Tanaka, R. Sato, A. Nakashita, T. Omura, Masatsugo Tanaka, M. Mizogaki  

VII
99. The problems of utilizing industrial by-products contaminated with natural radionuclides in construction
K. Kovler

**Topic 9: Use of Industrial By-Products: Other Industrial By-Products**

100. A study of concretes containing thermoplastic wastes as aggregates
S. Gavela, C. Karakosta, C. Nydriotis, V. Kaselouri-Rigopoulou, S. Kolias, P. A. Tarantili, C. Magoulas, D. Tassios, A. Andreopoulos

101. Characterization of magnesium slag aiming the utilization as a mineral admixture in mortar
C. A. S. Oliveira, A. G. Gumieri, A. M. Gomes, W. L. Vasconcelos

102. Comparative study with alternative materials for manufacture of machine tool structures
V. A. Ducatti, R.C. Lintz, J.M. Santos

103. Environmental impact study of unmodified sulfur mortar
V. Gracia, E. Vázquez

104. Evaluation of concretes for high level nuclear waste repositories
A. Hidalgo, I. Llorente, C. Alonso, C. Andrade

105. Glass frit in concrete as an alternative cementitious material
S. Laldji, G. Fares, A. Tagnit-Hamou

106. Monitoring corrosion and determining of the gravimetric corrosion rate of concretes with high and low reactivity additions subject to chloride action

107. Production of lightweight concrete with E.V.A. residues as recycled aggregate
M.L. C. Martins, J. L. K. dos Santos, A. A. de Azevedo

108. Recycling of coal fly ash by ceramic processing
R. C. C. Monteiro, C. S. Mota, M. M. A. R. Lima

109. Relationship between results of accelerated and natural carbonation in various concretes

110. Removal of contaminants from aqueous solutions by beds made of rejects of the lightweight aggregates production
C. M. Albuquerque, J. A. Labrincha

111. Reusing of spent FCC catalyst as a very reactive pozzolanic material: formulation of high performance concretes
J. Monzó, J. Payá, M. V. Borrachero, S. Velázquez, L. Soriano, P. Serna, J. Rigueira
112. Stabilization of fly ashes by binder obtained from processed oil sludge in road constructions
C. Kraszewski

113. Studies on development of the Tunisian phosphogypsum for construction bricks
A. Belaïba, H. Sfar Felfoul, A. Beddey, M. Ben Ouezdou

114. Study of the behavior of different mineral and pozzolanic admixtures in conventional and roller-compacted concrete with respect to their microstructure and durability
N. P. Hasparyk, L. A. Farias, A. dos Santos Lituário, F. Chein Muniz, M. A. S. Andrade

115. The behaviour of structural-wall recycled plastic pipes for underground sewerage without pressure
A. Rocha, S. Cabral-Fonseca, L. Godinho, R. Pereira

116. Utilization of by-produced sulfur for the manufacture of unmodified sulfur concrete
V. Gracia, E. Vázquez, S. Carmona

Topic 10: Use of Industrial By-Products: Slags from Metallurgical Process

117. Characteristics of steel slag granulated in a steel plant – Valuation of the microstructure through electron probe micro analysis
A.G. Gumieri, D.C.C. Dal Molin, A.C.F. Vilela

118. Development of a hydraulic structure protection against the action of sea waves using concrete containing alkali-activated slag (AAS)

119. Reuse of Waelz slag as recycled aggregate for structural concrete
S. Sorlini, C. Collivignarelli, G. Plizzari, M. Delle Foglie

120. Stainless steel slags in hydraulic bound mixtures for road construction, two case studies in Belgium
L. P. De Bock, H. Van den Bergh

121. Stainless steel slag as aggregate in hot mix asphalt pavements
L. P. De Bock

122. The use of metallurgical wastes in reactive barriers
R. Rodriguez, M. Hidalgo, V. Salvadó, L. Candela, A. Lloret, I. Queralt
