Table of Contents

Gene Evolution Algorithm to Determine Minimum Break Point Set for Optimal Coordination of Directional Protection Relays in Multi-Loops Networks
Quanming Yue, Weiyong Yu and Feipeng Lu

Advanced Protection Solutions for Improved Power System Dynamics Performance
Ljubomir Kojovic

New Swing-Blocking Methods for Digital Distance Protection
Shengshi Zhu, Qin Gu and Li Zheng

Superimposed Components Based Sub-Cycle Protection of Transmission Lines
Alexander Apostolov, Damien Tholomier and Simon Richards

Analysis of Adaptive Single Phase Autoreclosing for High Voltage Transmission Lines with Various Compensation Levels
Mark Khoroshiev and Vitaly Faybisovich

Analysis of the Impact of Distributed Generation on Automatic Reclosing
Lauri Kumpulainen and Kimmo Kauhaniemi

A New Algorithm of Improving Fault Location Based on SVM
Jin Zhang and Renmu He

Double-Circuit Line Adaptive Protection Considering Different Operation and Switching Modes
Srdjan Skok, Sejid Tesnjak and Niksa Vrkic

IEC 61850: Open Communication in Practice in Substations
Gordon Wong and Clemens Hoga

An Improvement on Steam Turbine Generator Trip Caused by Voltage Sag
Chia-Ching Ning and Ta-Peng Tsao

A Novel Approach to the Distance Protection, Fault Location and Arcing Faults Recognition
Vladimir Terzija, Hans-Jürgen Koglin and Z. M. Radojević

Substations Committee Poster Session A

Chair: Sakis Meliopoulos, Substation Committee
Sponsored by: Substations

Application of Information Technology in Substation Automation
Vijay Gohokar, Tushar Dhande, Satish Kabra and Mohan Khedkar

Functional Testing of IEC 61850 Based IEDs and Systems
Alexander Apostolov and Benton Vandiver
# 2004 Power Systems Conference and Exposition

## Table of Contents

### Switchgear Poster Session A

Chair: Jerry Heydt, Arizona State University  
Sponsored by: Switchgear  
On-Line Condition Monitoring and Diagnostics of Power Distribution Equipment  
Albert Livshitz, Bella Chudnovsky and Boris Bukengolts  

### Transmission and Distribution Poster Session A

Chair: Mack Grady, University of Texas at Austin  
Sponsored by: Transmission and Distribution  
A Distributed Static Series Compensator System for Realizing Active Power Flow Control on Existing Power Lines  
Deepak Divan, William Brumsickle, Robert Schneider, Bill Kranz, Randal Gascoigne, Dale Bradshaw, Michael Ingram and Ian Grant  
Frequency Estimation of Low-Voltage Distribution Systems in Transient Processes  
Jun Long  
HVDC Supplementary Controller Based on Synchronized Phasor Measurement Units  
Ying Huang and Zheng Xu  
SSR Damping Study on a Generator Connected to TCSC  
Fan Zhang and Zheng Xu  
Shunt-Connected Dynamic Voltage Restorer with Decoupling Inductors  
Ondrej Viktorin, Johan Driesen and Ronnie Belmans  
Toshihiko Ichimura, Shingo Sukemori, Ichiro Takano, Hisao Nishikawa and Yoshio Sawada  
Thermal and Electrical Properties of Brittleness Improved Epoxy for High Voltage  
Kyoung Yong Lee, Kwan Woo Lee, Yong Sung Choi and Dae Hee Park  
Using a STATCOM to Retire Urban Generation  
Eric John, Arastou Oskoui and Ake Petersson  
Power Flow Control in Facts  
N. Satheesh and K. Bakaran  
Investigation of Incipient Conditions Leading to the Failure of Distribution System Apparatus  
Carl Benner and Don Russell
Table of Contents

Meshed Vs. Radial MV Distribution Network in Presence of Large Amount of DG
Gianni Celli, Fabrizio Pilo, Giuditta Pisano, Vittorio Allegranza, Rocco Cicoria and Adriano Iaria .......................................................... 709

Adaptive Over Current Protection for Distribution Feeders with Distributed Generators
Mesut Baran and Ismail El-Markabi .................................................. 715

Commercial and Industrial Applications Getting Ready for Direct-Current Power Distribution
Thomas Key, Dave Crudele, Arshad Mansoor and Faisal Khan ....................... 720

Interconnection of Distributed Power to the Distribution Network
Johan Enslin .................................................................................. 726

Operating Characteristics of the Convertible Static Compensator on the 345 kV Network
Jane Sun, Liana Hopkins, Ben Shperling, Bruce Fardanesh, Mark Graham, Michael Parisi, Stuart MacDonald, Subbashish Bhattacharya, Steve Berkowitz and Aty Edris .......................................................... 732

Fast VSC Transmission Control
Lisa Lamont .................................................................................. 739

Poster Session B

Electric Machinery Analysis and Design Poster Session B

Chair: Osama Mohammed, Florida International University

Co-Chair: John Tegopoulos, National Technical University of Athens

Sponsored by: Electric Machinery

Matlab/Simulink Implementation for Reducing the Motor Derating and Torque Pulsation of Induction Motor Using Matrix Converter
M. Imayavaramban, K. Latha, G. Uma and S. Sunter ........................................ 744

Rotor Configuration Impact on Generator Ventilation Needs
Björn Bolund and Mats Leijon .................................................................. 749

On-Line Hydrogenerator Power Angle and Synchronous Reactances Determination Based on Air Gap Measurement
Marin Despalatovic, Martin Jadric, Bozo Terzic and Josip Macan ...................... 753

Grid Connected Variable Speed Wind Turbine Modeling, Dynamic Performance and Control
Antonios Haniotis, Konstantinos Soutis, Antonios Kladas and John Tegopoulos .............................................................................. 759

Behaviour of Induction Machine Under Various Dynamic Conditions When Operating as an Induction Generator
Jagdish Rathod, Umedbhai Patel, Pankaj Jain and Niranjan Kumar V. ............... 765
# Table of Contents

Hysteresis and Bifurcations in the Classical Model of Generator  
Krishna K. Singh .............................................................. 775

Electric Arc Furnace Impact on Generator Torque  
Mark Baldwin ....................................................................... 776

Physical Modeling of Electric Machines for Motor Drive System Simulation  
Osama Mohammed, Shuo Liu and Zhiqiang Liu ..................... 781

**Energy Development and Power Generation Poster Session B**

Chair: Jerry Hedyt, Arizona State University  
Sponsored by: Energy Development and Power Generation

A Voltage Regulation System for Distributed Generation  
Emanuel Florin Mogos and Xavier Guillaud ......................... 787

Transient Performance and Stability Analysis of a Hybrid Grid-Connected Wind/Pv System  
Li Wang and Kuo-Hua Liu .................................................... 795

Excitation Capacitors on Harmonic-Current Amplification of Self-Excited Wind Induction Generators  
Li Wang and Shiang-Shong Chen .......................................... 802

Analysis of the Prospects for Distributed Generation (DG) for Colombian Electric Power Sector  
Eduardo Marmolejo, Christian Duque, María Teresa Torres, Gustavo Ramos and Alvaro Torres .................. 807

Dynamic Analysis of an Insulated Distribution Network  
Tuan Tran-Quoc, Nouredine Hadjsaid, Guillaume Rami, Luong Le-Thanh, Laurent Bernard, Guillaume Verneau, Chantal Corenwinder, Pascale Michalak, Michael Boll and J. L. Mertz ............. 815

**Insulated Conductors Poster Session B**

Chair: Jerry Heydt, Arizona State University  
Sponsored by: Insulated Conductors

What to Do After the Warning of an On-Line Insulation Diagnostic System? Off-line PD Monitoring with HVAC Testing!  
Wolfgang Hauschild and Bernd Kübler .................................. 822

**Power Engineering Education Poster Session B**

Chair: Peter W. Sauer, University of Illinois at Urbana-Champaign  
Sponsored by: Power Engineering Education

Integration of Exist SCADA/EMS with Dispatcher Training Simulator System  
Bin Hua, Jianzhong Zhou and Jing Yu .................................... 829
2004 Power Systems Conference and Exposition
Table of Contents

Explore the Power of HDVC Light® - A Web Based System Interaction Tutorial
Stefan Johansson, Lennart Carlsson and Gunnar Russberg ........................................... 839

Teaching Renewable Energy Using Multimedia
Biljana Hadzi-Kostova and Zbigniew Styczynski ............................................................... 843

Visualization of Electromagnetic Transients Along Transmission Lines
Cansin Evrenosoğlu, Ergun Akleman and Ali Abur ............................................................... 848

Interactive Training and Planning Tool Using Web-Based Animations
Paul Bauer and Johan Enslin .................................................................................................... 853

Animation Program as a Tool for Teaching Electric Machines' Fundamentals
B. Fardanesh and Soheil Saadat ................................................................................................. 858

Power System Analysis, Computing and Economics Poster Session B

Chair: Edwin Liu, Nexant
Sponsored by: Power System Analysis, Computing and Economics

Transitioning the California Market from a Zonal to a Nodal Framework: An Operational Perspective
Ziad Alaywan, Tong Wu and Alex D. Papalexopoulos .............................................................. 862

The Use of Conduct and Impact Tests in the Mitigation of Market Power
Robert de Mello, Ibrahim Mqasqas and Ricardo Galarza ........................................................ 868

The Impact of Contract for Difference on the Market Power in the Restructured Zhejiang Electricity Market
Li Qi and Weidong Huang ........................................................................................................ 874

Analytical Method of Suppliers' Behaviors in Electricity Market
Dunnan Liu, Guangyu He, Ruiqing Li and Xueqing Chen ......................................................... 881

A Hierarchical Distributed Object-Oriented Architecture for Energy Management System
Badri Ramanathan and Guillermo Gutierrez-Alcaraz ............................................................... 886

Quantitative Techniques for Analysis of Large Data Sets in Renewable Distributed Generation
Aleksandar Pregelj, Miroslav Begovic and Ajeet Rohatgi ........................................................ 892

A Layered Architecture to Model Interdisciplinary Complexity in the Deregulated Power Industry
Vijayanand Bharadwaj, Ramana Reddy, Arvinth Chandramouli and Sumitra Reddy ................ 893
# Table of Contents

**2004 Power Systems Conference and Exposition**

**Characterization and Identification of Electrical Customers Through the Use of Self-Organizing Maps and Daily Load Parameters**
Sergio Valero Verdú, Mario Ortiz García, Francisco García Franco, Nuria Encinas, Antonio Gabaldón Marín, Angel Molina and Emilio Gómez Lázaro .......................................................... 899

**Interpreting GIS Data for Operation and Control of Distribution Networks**
Zhenyuan Wang, Danny Julian, Martin Bass and William Peterson ....................... 907

**Power Quality in a Distribution Network After Wind Power Plant Connection**
Nijaz Dizdarevic, Matislav Majstrovic and Srdjan Zutobradic ............................ 913

**Evaluation of Voltage Stability Based on Sensitivity Analyses of Electric Pricing**
Rui Li, Luonan Chen and Ryuichi Yokoyama ......................................................... 919

**Adaptive Remedial Action Scheme Based on Transient Energy Analysis**
Yi Zhang and Kevin Tomsovic .................................................................................. 925

**Identify Overloaded Transmission Lines in TTC and ATC Determinations**
Soon-Kin Chai and Arun Sekar ................................................................................ 932

**Blackout from the System Operators' Perspective**
Nijaz Dizdarevic, Matislav Majstrovic, Niko Mandic and Snjezana Cujic Coko ................................................................................................................................. 937

**Observability Analysis and Measurement Placement for Systems with PMUs**
Bei Xu and Ali Abur ................................................................................................. 943

**Physical Clearing Mechanisms in Power Industry**
Karla Atkins, Christopher Homan and Achla Marathe ............................................ 947

**Effects of Model Uncertainty on Security Assessment in Deregulated Power Systems**
Andrija Sarić, Aleksandar M. Stanković, Allen Soyster and Brad Lehman ............... 954

**An Optimal Power Flow Formulation Including Detailed Modeling of Generators**
Zulmar Machado, Jr., Glauco Taranto and Djalma Falcão ...................................... 960

**GenCos' Participation in the Unbundled Energy Market**
Guillermo Gutierrez-Alcaraz and Gerald Sheble .................................................... 966

**Including Stability Constraints in Optimal Dispatch Algorithms**
Jorge Valenzuela, S. Mark Halpin and Chan S. Park .............................................. 971

**A Comprehensive Contribution Factor Method for Congestion Management**
Hongbiao Song and Mladen Kezunovic ................................................................. 977
