

Soft Magnetic Materials, 16th Conference

September 9-12, 2003 - Düsseldorf, Germany

Organized by:

Max-Planck-Institut für Eisenforschung GmbH, Düsseldorf, Germany

Sponsored by:

ABB

<http://www.abb.de/>

Brockhaus Messtechnik

<http://www.brockhaus.net/e-index.html>

Kaschke KG

<http://www.kaschke.de/>

Max-Planck Gesellschaft

<http://www.mpg.de/>

MPI für Eisenforschung GmbH

<http://www.mpie.de/>

Nordrhein-Westfalen, Germany

<http://www.nrw.de/>

Siemens

<http://www.siemens.de/>

Stahlinstitut VDEh

Table of contents

Volume 1

Invited Lecture	1
Secondary recrystallization modelling as a tool for developing innovative grain oriented production cycles	3
<i>G. Abbruzzese</i>	
Characterisation of magnetic materials for electrical machines	13
<i>L. Dupré, M. De Wulf, D. Makaveev</i>	
Design and Cost Effective Production of Soft Ferrites	23
<i>M. Esguerra</i>	
The Market of Nickel and Cobalt Base Alloys	31
<i>B. Gehrman, R.-D. Grosskopf</i>	
Recent Technology Developments in the Production of Grain Oriented Electrical Steel	41
<i>K. Günther, G. Abbruzzese, S. Fortunati, G. Ligi</i>	
Progresses in the production and characterization of high-silicon electrical steel up to 6.5 m% Si	51
<i>Y. Houbaert</i>	
Innovative Technology for Non-Grain-Oriented Electrical Steels	63
<i>R. Kawalla, J. Schneider</i>	
Electrical Steel for Motors of Electric and Hybrid Electric Vehicles	73
<i>M. Kawano, M. Ishida, A. Honda</i>	
Recent Progress on Non-oriented Silicon Steel	79
<i>T. Kubota</i>	
Loss Prediction in Electrical Steel Laminations and Motor Cores	87
<i>A. J. Moses</i>	
Applications of Nanocrystalline Softmagnetic Cores in Modern Electronics	97
<i>J. Petzold</i>	
Microstructure and properties of soft magnetic ferrites	107
<i>J. Rossel</i>	
Optimum Choice and Optimum Use of Electrical Steels in Electrical Machines	115
<i>J. Schneider, A. Schoppa</i>	
Industrial Inline Power Loss Measurements on Complete Stator Packages	127
<i>St. Siebert, J. Stahlschmidt, P. Denke, M. Sauder, A. Knorr</i>	
Magnetic Forces, Magnetostriction and Form Effect in Ferromagnetic Material	133
<i>L. Vandeveld, J. A. A. Melkebeek, M. A. C. De Wulf</i>	
Properties of arrays of Ni nanowires in alumina membranes: influence of spatial ordering and geometrical characteristics	143
<i>M. Vázquez, M. Hernández-Vélez, K. Pirota, A. Asenjo, D. Navas, K. Nielsch, P. Vargas, J. Velázquez, C. Ramos</i>	
 Topic 1	
Basic Problems, Magnetization Processes	153
Reversible Curie-Point Relaxation in FeNiB and FeNiP Amorphous Alloys	155
<i>A. Böhönyey, L. F. Kiss, Cs. Gulyás, G. Tichy</i>	

Detailed features of magnetization processes from magnetoimpedance measurements	161
<i>D. de Cos, A. García-Arribas, J. M. Barandiarán</i>	
Influence of the Manufacturing Process on the Magnetic Properties of Electrical Steel in E-Cores	167
<i>W. Deprez, J. Schneider, T. Kochmann, F. Henrotte, K. Hameyer</i>	
The z Component of Magnetic Field Strength in the Rotational Single Sheet Tester	173
<i>V. Goričan, A. Hamler, M. Jesenik, B. Štumberger, M. Trlep</i>	
Modelling of the Magnetic Properties of Amorphous Fe₈₅B₁₅ in a Toroid compared to Single Strip Measurements	179
<i>H. Hauser, R. Grössinger, D. Holzer</i>	
Ferromagnetic Structures in Graphite and Amorphous Carbon Films Produced by High Energy Proton Irradiation	185
<i>R. Höhne, P. Esquinazi, K.-H. Han, D. Spemann, A. Setzer, U. Schaufuss, V. Riede, T. Butz, P. Streubel, R. Hesse</i>	
Multidirectional Magnetostriction of Different Types of Silicon Iron Materials	191
<i>C. Krell, E. Kitz, L. Zhao, H. Pfützner</i>	
Domain structure and magnetization process of FeNi-based magnetoimpedance multilayers	197
<i>G. V. Kuryandskaya, F. Alves, B. Ahamada, R. Barrué, A. V. Svalov, V. O. Vas'kovskiy</i>	
Advantages and shortcomings of giant magnetoimpedance for new sensor applications	203
<i>G. V. Kuryandskaya, M. L. Sánchez, B. Hernando, V. M. Prida, P. Gorria, M. Tejedor</i>	
Microstructural order and magnetic properties of partially crystallized Fe_{63.5}Cr₁₀Si_{13.5}B₉Nb₃Cu₁ ribbons	209
<i>P. Marín, M. López, P. Agudo, A. Hernando</i>	
Correlation between Angular dependence of A.C. Barkhausen Noise and Hysteresis Loss in a Non-Oriented Electrical Steel	215
<i>A. J. Moses, F. J. G. Landgraf, K. Hartmann, T. Yonamine</i>	
Influence of magnetic domain structure on energy losses in soft magnetic materials	221
<i>M. Najgebauer, K. Chwastek, J. Szczygłowski, P. Kopciuszewski</i>	
Measurement and Calculation of Frequency Dependent Losses in Grain Oriented Electrical Steel Sheets	227
<i>M. Pott-Langemeyer, B. Weidenfeller, W. Riehemann</i>	
A Magnetic Technique for the Evaluation of Mechanical Deformation and its Application to TRIP-Steels	233
<i>L. Vandenbossche, L. Dupré, M. De Wulf, J. Melkebeek</i>	
Assessment of Exchange Bias by Ar Ion Beam Etching of FeMn in Ta/NiFe/FeMn	239
<i>S. M. Yoon, J. J. Lim, Y. K. Hu, C. G. Kim, C. O. Kim</i>	
Topic 2	
Magnetic Characterization, Measurement Techniques	243
Influence of Voltage Impulse Parameters on Webermeter Indications	245
<i>J. Bajorek, J. Kolasa</i>	
Estimation of Deviation of Tangential Magnetic Field Intensity Component Conversion by Flat Coil	251
<i>R. Bajorek, J. Bajorek, J. Nowak</i>	

Accurate Measurement of Magnetic Power Losses and Hysteresis Loops Under Generic Induction Waveforms with Minor Loops	257
<i>E. Barbisio, F. Fiorillo, C. Ragusa</i>	
Neutron diffraction studies of the iron substituted La-Ba-Mn-O perovskite structure ..	263
<i>K. R. Choi, S. J. Kim, I.-B. Shim, C. S. Kim</i>	
Magnetic Properties of Bulk Amorphous FeAlGaPCBSi Samples Prepared by Ball-Milling and Subsequent Hot Pressing	269
<i>J. Degmová, S. Roth, J. Eckert, H. Grahl, L. Schultz</i>	
Iron Loss of Arbitrary Direction of Electrical Steel Sheet	275
<i>M. Enokizono, H. Shimoji, S. Nagata</i>	
Identification of magnetic material with Kohonen artificial neural network	281
<i>T. Giżewski, A. Wac-Włodarczyk, D. Czerwinski, P. Wolszczak</i>	
Sheet Sensor Design for Flux Density Distribution Analysis in Machine Cores	287
<i>E. Kitz, G. Krismanic, L. Zhao, H. Pfützner</i>	
The iron loss characteristics of the magnetic material under the distorted flux waveforms	293
<i>T. Kondo, K. Harada, Y. Ishihara, T. Todaka</i>	
Measuring System Considering Flux Inhomogeneity and Eddy Currents in SST Samples	299
<i>G. Krismanic, E. Kitz, E. Leiss, M. Cundeva, H. Pfützner</i>	
A Systematic Study of Giant Magnetoimpedance in Magnetically Soft Metallic Glass Ribbons	305
<i>M. Kuźmiński, K. Nesteruk, H. K. Lachowicz, Seong-Cho Yu, Cheol Gi Kim</i>	
Composite Core and Its Application to Current Transformers	311
<i>J. Kwiczala, R. Kolano, A. Kolano-Burian</i>	
Variation of Magnetic Flux Density with Distance from the Cut Edge of Non-Oriented Electrical Steel	317
<i>G. Loizos, A. J. Moses</i>	
Induction Machine Magnetic and Thermal Behaviour	323
<i>A. Marino, A. Kedous-Lebouc, B. Cornut, P. Manfé, J.-F. Trigeol</i>	
Iron Loss Prediction under Sinusoidal and Non-sinusoidal Excitation using a Neural Network Approach	329
<i>A. J. Moses, J. Leicht</i>	
Simultaneous measurements of Hall effect and magnetoresistance effect in solid and liquid state of Gallium and Mercury metals	335
<i>M. Ogita, M. Nakao, I. Mogi, S. Awaji</i>	
AC characterization of materials for fluxgate cores	341
<i>A. Platil, J. Saneistr, P. Kaspar, P. Ripka</i>	
Measurement and calculation of rotational loss in silicon steel sheets	347
<i>W. Pluta, J. Anuszczyk, Z. Gmyrek</i>	
Comparison of the methods of determination of complex magnetic permeability for selected amorphous materials	353
<i>A. Roman, J. Szczygłowski, W. Wilczyński</i>	
The Study of Magnetostriction of $\text{Co}_{74-y}\text{Ni}_{6+y}\text{Si}_x\text{B}_{20-x}$, $y=0, 2$, $x=0, 5, 10$ Alloy System ...	359
<i>G. Vlasák, P. Švec, D. Janičkovič</i>	

Digital feedback controlled RSST system	365
<i>S. Zurek, T. Meydan</i>	
Topic 3	
Electrical Steel: GO, NGO, Thin Electrical Steels, Higher Si-Alloys	371
Use of soft magnetic materials in medium frequency magnetic field shielding	373
<i>U. Adriano, O. Bottauscio, M. Zucca</i>	
Overview of Domain Refinement Technology in Grain Oriented Electrical Steel Sheets ...	379
<i>S. Arai, M. Fujikura, Y. Ushigami</i>	
New Method for Improving Magnetic Characteristics of Grain-Oriented Electrical Steel by Laser Scribing	385
<i>G. Bán, G. Songini, G. Abbruzzese</i>	
Advances in the workability of high silicon electrical steel	391
<i>J. Barros, P. R. Calvillo, T. Ros-Yáñez, R. Colás, Y. Houbaert</i>	
On the Relationship Between Magnetic Behaviour and Microstructure Characteristics in Grain Oriented Fe 3%Si	397
<i>S. Cicalè, L. Albini, S. Fortunati, G. Songini</i>	
Effect of Hot Rolling Temperature on the Structure and Magnetic Properties of High Permeability Non-Oriented Silicon Steel	403
<i>M. A. da Cunha, S. C. Paolinelli</i>	
Effect of stress due to stamping and interlocking on magnetic properties of non-oriented electrical steel sheet	409
<i>H. Fujimura, H. Yashiki, H. Kojima, T. Nakayama</i>	
Effect of Hot Bands Annealing on Magnetic Properties in 3% Si grain oriented electrical Steels	415
<i>B. D. Hong, K. S. Han, J. K. Kim, K. M. Cho</i>	
Multiscale modelling and demagnetising surface effect: application to the prediction of magnetostriction of Grain Oriented silicon irons	419
<i>O. Hubert, L. Daniel, R. Billardon</i>	
Modelling of the influence of micro-plasticity on the magnetic behaviour of ferromagnetic polycrystals through a multiscale approach	425
<i>O. Hubert, N. Jendly, L. Daniel</i>	
A New Electrical Steel Containing High Cr and High Si for High Frequency Driven Electric Appliances	431
<i>M. Kawano, O. Kondo, M. Kohno, A. Honda</i>	
Investigation of Skin Effect and Geometrical Factors Affecting Power Loss Components of GO 3%SiFe Toroidal Wound Cores up to 1 kHz	435
<i>I. Kucuk, N. Derebasi</i>	
Magnetic Properties of Silicon Steel Wires	439
<i>F. J. G. Landgraf, M. Henrique, T. Yonamine</i>	
Eddy current loss prediction in electrical steels	445
<i>P. Marketos, T. Meydan, A. J. Moses, P. J. Leonard, M. Lu</i>	
Anisotropy influence on hysteresis and additional loss in silicon steel sheets	451
<i>A. J. Moses, W. A. Pluta</i>	
DC-biased Permeability and Magnetic Shielding Effectiveness under Very Weak Magnetic Field of Grain Oriented Electrical Steel	457
<i>Y. Okazaki, T. Terazawa, S. Yanase</i>	

On the influence of order on the soft magnetic properties of Fe-Si alloys	463
<i>D. Ruiz, T. Ros-Yáñez, R. E. Vandenberghe, Y. Houbaert</i>	
Surface and Grain Boundary Segregation in Fe-3%Si Alloy	469
<i>O. Schneeweiss, M. Vondráček, V. Dudr, V. Cháb, P. Lejček, K. C. Prince</i>	
Modelling of Decarburisation in Electrical Steels	475
<i>Y. Sidor, F. Kovac, M. Dzubinsky</i>	
Modeling decarburization in electrical steels	481
<i>B. Soenen, S. Jacobs, M. De Wulf</i>	
Modeling and Computer Simulation of Secondary Recrystallization in Grain-Oriented Silicon Steel	487
<i>Y. Ushigami, T. Nakayama, S. Arai, T. Kubota</i>	
Influence of the Different Fabrication Steps of Magnetic Cores on Their Magnetic Properties	493
<i>W. Wilczyński, A. Schoppa, J. Schneider</i>	
Aspects of the punching and laser cutting effect on the power losses and magnetic flux density distribution in electrical steel	499
<i>W. Wilczyński, A. Skopec, B. Szubzda, S. Talik, W. Lipiec</i>	
A New Excitation Apparatus for 2-dimensional Magnetic Measurement of Electrical Steel Sheets	505
<i>S. Yanase, N. Ichijo, Y. Okazaki, S. Hashi</i>	
Approaching (100) by rolling directionally solidified silicon steels	511
<i>T. Yonamine, F. J. G. Landgraf</i>	
Keywords	XVII
Authors index	XXIII
