3rd European Conference on Steel Structures

PROCEEDINGS OF THE 3RD EUROPEAN CONFERENCE ON STEEL STRUCTURES
Auditório Laginha Serafim - Coimbra, Portugal
19-20 September 2002

Volume I

António Lamas
Departamento de Engenharia Civil
Instituto Superior Técnico
Lisboa, Portugal

Luís Simões da Silva
Departamento de Engenharia Civil
Universidade de Coimbra
Coimbra, Portugal

cmm - Associação Portuguesa de Construção Metálica e Mista
Departamento de Engenharia Civil da Universidade de Coimbra

## KEYNOTES LECTURES

- The Europe bridge, in Portugal: the concept and structural design  
  A. J. Reis and J. J. O. Pedro  
  Page 3

- Reliability of long span bridges  
  D. M. Frangopol and K. Imai  
  Page 13

- Development and use of high performance steel  
  Reidar Bjorhovde  
  Page 23

- An overview of composite and steel construction in Brazil  
  S. A. L. Andrade, P. C. G. S. Vellasco and J. G. S da Silva  
  Page 31

## ARCHITECTURE AND DESIGN IN STEEL

- Ski Jump “Bergisel” – a new landmark of Innsbruck, Austria  
  C. Aste, A. Glatzl and G. Huber  
  Page 51

- Design assisted by testing of a large roof double-layered reticulated steel structure  
  D. Dubina, V. Ungureanu, R. Zaharia and I. Caraba  
  Page 61

- Clean and spacious appearance for a pleasing atmosphere  
  Halet Almila Büyüktaşkin  
  Page 71

- Glass in steel structures  
  Ján Brodniansky  
  Page 77

- Extension of the Geneva Exhibition Center: bridging a freeway and four roads with a 44’000-m2 platform  
  J. F. Klein, P. Moia and P. A. Dumusque  
  Page 85

- “The Leaf” – an aesthetic landmark in the industrial environment of storaenso, in Portugal  
  L. S. da Silva, R. Belchior, J. Faria, H. Gervásio, R. Martins and A. Pinto  
  Page 95
### STEEL MEMBERS AND STRUCTURAL SYSTEMS

- Lateral-torsional stability behaviour of arbitrary singly symmetric tapered steel beams: a variational formulation
  A. Andrade and D. Camotim

- Elastic design of tapered beam-columns subjected to concentrated axial and transversal loads
  A. M. Baptista and J. P. Muzeau

- Analytical model for the elastic-plastic analysis of simply supported I-shaped beams in simple bending
  A. M. Baptista and J. P. Muzeau

- Analytical formulae for the elastic-plastic analysis of I-shaped cross-sections bent over their weak axis
  A. M. Baptista and J. P. Muzeau

- Stability analysis of a simple two-bar frame using catastrophe theory
  A. N. Kounadis, G. Ioannidis and X. Lignos

- Effective column lengths of plane frames with elastic lateral supports
  C. J. Gantes and E. Voyagaki

- The effect of thermal residual stresses on the bearing capacity of hot-rolled I sections under combined bending and shearing force
  D. S. Sophianopoulos and G. T. Michaltsos

- Failure modes of circular hollow members with flattened edges
  E. S. Mistakidis and S. V. Tsiogas

- Lateral torsional stability of members with lateral restraints at various locations between the supports
  F. S. K. Bijlaard and H. M. G. M. Steenbergen

- FEM simulations of lateral torsional buckling experiments on channel sections loaded in bending
  H. H. Snijder, F. S. K. Bijlaard and H. M. G. M. Steenbergen

- Interaction of the plastic internal forces and moments of symmetrical I- and box-cross sections
  Ioannis Vayas

- Approximate formulas for lateral torsional buckling of beams
  Jan Žmuda

- Tests of steel pitched-roof portal frames covered by metal sheeting
  Jerzy K. Szlendak

- Influence of initial imperfections on the stability of non-uniform steel members
  J. C. Ermopoulos and I. G. Raftoyiannis

- Lateral-torsional buckling capacities of coped girders
  J. Maljaars, J. W. B. Stark, H. M. G. M. Steenbergen and R. Abspoel

- Beam-columns under non uniform bending: numerical simulation and interaction formulae
  L. Mastrandrea and V. Piluso
• Calibration of buckling curves for the lateral-torsional buckling of steel members via EC.3 Annex Z standard procedure
  M. Gheorgescu and D. Dubina
• Analysis of reduced modulus action in U-section steel sheet piles
  M. P. Byfield and R. W. Mawer
• Simple determination of wire rope axial stiffness
  M. Raoof and T. J. Davies
• Influence of variations in the axial stiffness of steel cables on vertical deflections of cable trusses
  M. Raoof and T. J. Davies
• Elastic lateral-torsional buckling of tapered members with monosymmetric cross-sections: new approaches and correct? Solutions
  N. Boissonnade and M. Braham
• New interaction formulae for beam-columns in Eurocode 3: the French-Belgian approach
  N. Boissonnade, J. P. Jaspart, J. P. Muzeau and M. Villette
• On the application of beam–column interaction formulae to steel members with arbitrary loading and support conditions
  R. Gončalves and D. Camotim
• Hybrid bisteel I-section beams – towards simple modeling
  R. Kačianauskas and A. Jaras
• On the local stability interaction effect of high strength steel columns
  S. D. Hermann
• Calculation of uniaxially loaded tapered columns according to Eurocode 3
  V. Šapalas and A. K. Kvedaras
• Development of an advanced analysis method for steel frame structures subjected to lateral torsional buckling
  Z. Yuan and M. Mahendran

COMPOSITE STRUCTURES

• Effects of partial shear interaction, cracking and joint flexibility on the behaviour of composite frames
  C. Faella, E. Martinelli and E. Nigro
• Perforated steel band in the composite saddle shape cable roof
  D. Serdjuk and V. Mironov
• Time dependent behaviour of continuous composite beams with flexible connection
  F. Virtuoso and R. Vieira
• Experimental analysis of perfobond shear connections between steel and lightweight concrete
  I. Valente and P. J. S. Cruz
• Integration of steel sections in shallow floors
  Matti V. Leskelä
- A new simplified method for the design of composite slabs 431
  M. Crisinel and F. M. Carvajal

- Experimental study on connection of composite light-gauge floor system 441
  S. Erdélyi and L. Dunai

- An innovative composite slab system for residential buildings 451

**PLATES AND SHELLS**

- Ultimate shear capacity of tapered plate girders 463
  A. V. Zárate and E. Mirambell

- Experimental investigation on locally pressed I - beams subjected to eccentric patch loading 473
  D. Lučić and B. Sćepanović

- Experimental and numerical investigation on shear response of stainless steel plated girders 483
  E. Real, I. Estrada and E. Mirambell

- Comparison of design buckling stresses for liquid-filled cones obtained with two different procedures 493
  G. Lagae, R. Van Impe, P. Buffel, J. Belis and W. Van Laere

- Effect of initial imperfections in numerical simulations of collapse behaviour of stiffened plates under compression 503
  I. André, H. Degée, V. V. de Goyet and R. Maquoi

- Minimum cost design of ring-stiffened welded steel cylindrical shells subject to external pressure 513
  J. Farkas, K. Jármai, J. A. Snyman and G. Gondos

- Fatigue of girders with undulating webs 523
  J. Machacek and M. Tuma

- Minimum cost design of longitudinally stiffened welded steel plates loaded by eccentric compression 533
  K. Jármai, J. Farkas, L. C. Simões and Z. Virág

- Design of hybrid steel girders 541
  M. Veljkovic and B. Johansson

- A lagrangian model for offshore plated panels under hydrocarbon explosion loading 551
  M. A. Wadee and L. A. Louca

- Lessons drawn from an experimental investigation into the web breathing phenomenon 561
  R. Maquoi and M. Skaloud

- Numerical studies on web breathing of unstiffened and stiffened plate girders 571
  U. Kuhlmann and H. P. Günther

- Behaviour of longitudinally stiffened girder webs subjected to patch loading 581
  U. Kuhlmann and M. Seitz
• Ultimate load of stiffened compressed plates: effects of some parameters and discussion concerning the EC3 rules 591
  V. V. de Goyet, R. Maquoi, F. Bachy and I. André
• Effects of localised imperfections normalised by energy measure on the compression strength of rectangular plates 601
  Z. Sadovský, A. P. Teixeira and C. G. Soares

COLD-FORMED MEMBERS AND THIN-WALLED SECTIONS

• Anti-sag bars influence on the lateral buckling resistance of purlins restrained by sheeting 613
  A. G. Castells and F. M. Carvajal
• On the Eurocode 3 design method of cold-formed Z-purlins 625
  A. L. Joó, S. Ádány and L. Dunai
• Stability and ductility performances of light steel industrial building portal frames 635
  D. Dubina, I. M. Cristutiu, V. Ungureanu and Z. Nagy
• Improved numerical modelling of crest-fixed steel cladding systems subject to pull-through failures 645
  D. Mahaarachchi and M. Mahendran
• Comparative study of new connecting systems for cold-formed structures 657
  G. Di Lorenzo and R. Landolfo
• The local shear buckling of thin-walled cassettes infilled by rigid insulation - 1. Tests 669
  J. M. Davies and A. S. Fragos
• The local shear buckling of thin-walled cassettes infilled by rigid insulation - 2. Finite element analysis 679
  J. M. Davies and A. S. Fragos
• Design by testing of steel storage pallet racks 689
  N. Baldassino and R. Zandonini
• GBT-based distortional buckling formulae for thin-walled Z-section columns and beams 699
  N. Silvestre and D. Camotim
- Comparative analysis of the stability of open and closed thin-walled section members in the framework of generalised beam theory  
  P. Simão and L. S. da Silva  
- Distortional buckling behaviour of innovative cold-formed steel columns  
  S. Narayanan and M. Mahendran  
- Torsional restraint of cold-formed beams provided by corrugated sheeting for arbitrary input variables  
  Tomas Vrany  
- Local-overall and distortional-overall interactive buckling of thin-walled members  
  V. Ungureanu and D. Dubina  
- Finite element analysis and design of unlined cold-formed steel wall frames  
  Y. Telue and M. Mahendran
