Conference Proceedings

IPEMC 2004

The 4th International Power Electronics and Motion Control Conference
August 14~16, 2004 Xi’an, China

Volume 1

Sponsored by
  China Electrotechnical Society (CES)
  National Natural Science Foundation of China (NSFC)
Technically co-sponsored by
  IEEE Power Electronics Society (PELS)
Organized by
  Xi’an Jiaotong University
  Xi’an University of Technology
  Xi’an Power Electronics Research Institute
In Cooperation with
  IEEE Industry Application Society (IAS)
  IEEE Beijing Section
Supporting organizations
  IEEE Power Electronics Society Beijing Chapter
  IEEE Industrial Electronics Society Singapore Chapter
Hosted by
  Xi’an Jiaotong University
Edited by
  Zhaoan Wang

IEEE Catalog Number: 04EX677

XI’AN JIAOTONG UNIVERSITY PRESS
Contents

Volume 1

Plenary Session

PA.1 An Integrated Power Electronics Modular Approach: Concept and Implementation .......................................................... 1
F. C. Lee, J. D. van Wyk, Z. X. Liang, R. Chen, S. Wang, B. Lu, Virginia Polytechnic Institute and State University, USA

PA.2 Power from Wind and Renewables .......................................................... 14
James P. Lyons, Vlatko Vlatkovic, GE Global Research, USA

PA.3 Power Electronics for Low Voltage Semiconductor Technology: Challenges and Some Possible Solutions .......................... 20
Praveen K. Jain, Queen's University, CANADA

PA.4 State of the Art and Future Key Power Semiconductor Device Concepts for Innovative System Applications ............. 29
L. Lorenz, Infineon AG, GERMANY

PA.5 Adjustable Speed Drives – Future Challenges and Applications .......................................................... 36
Frede Blaabjerg, Aalborg University, DENMARK; Paul Theegersen, Danfoss Drives A/S, DENMARK

PA.6 The State of the Art of Electric Vehicles Technology .......................................................... 46
C. C. Chan, Y. S. Wong, University of Hong Kong, Hong Kong, CHINA

PB.1 Power Electronics for Modern Medium-Voltage Distribution Systems .......................................................... 58
Christoph Meyer, R. W. De Doncker, RWTH Aachen University, GERMANY

PB.2 An Alternative Power Architecture for Next Generation Systems .......................................................... 67
F. Marshall Miles, Power Sources Manufacturers Association, USA

PB.3 Novel Application of Electric Energy Storage Using Flywheel/SMES .......................................................... 73
Ryuichi Shimada, Tokyo Institute of Technology, JAPAN

PB.4 Medium Voltage Drives: What does the Future Hold? .......................................................... 82
Steven Rizzo, Navid Zargari, Rockwell Automation, CANADA

Converters and Inverters I

1.1 Analysis of an Improved Zero-Voltage and Zero-Current Switching (ZVZCS) Full Bridge .......................................................... 90
Xiaobo Yang, Huisheng Zhou, Hong Shen, Yingnan Zheng, Yanshan University, CHINA

1.2 Switch-Linearity Hybrid Power Conversion (SLH) with Low Output Resistance .......................................................... 96
Qianzhi Zhou, Lusheng Ge, Anhui University of Technology, CHINA

1.3 Analysis and Mitigation of Interactions between PFC Converters and the AC Source .......................................................... 99
Jian Sun, Min Chen, Rensselaer Polytechnic Institute, USA

1.4 A Novel and Low Cost Design for Forward AC/DC Converter with Harmonic Current Correction .......................................................... 105
Lon-Kou Chang, Hsing-Fu Liu, Chiao Tung University, Taiwan, CHINA

1.5 A Novel High-Voltage Isolation Power Supply for Multiple Devices Driving .......................................................... 111
Wanmin Fei, Zhengyu Lu, Linghui Xia, Gaoxian Jin, Zhejiang University, CHINA

1.6 Switchable Power Converters for Multiple Input Voltage Level Power Factor Correction .......................................................... 115
Applications
Chin Chang, Semtech Corporation, USA; Jingquan Chen, Philips Research, USA
DC/DC Converters

2.1 Analysis and Evaluation of Over Current Protection for DC to DC PWM Converters ........................................ 149
   Jian Yang, Semtech Corporation, USA

2.2 Study on Novel ZVZCT PWM DC-DC Converter Family .......................................................... 154
   Zongbo Hu, Bo Zhang, Wei-hua Deng, South China University of Technology, CHINA

2.3 Frequency Response Power Function of PWM DC/DC Converter (Part I) ........................................... 160
   Muhammad Mansoor Khan, Zhiming Wu, Shanghai Jiaotong University, CHINA

2.4 Frequency Response Power Function of PWM DC/DC Converter Part II ........................................... 166
   Muhammad Mansoor Khan, Zhiming Wu, Shanghai Jiaotong University, CHINA

2.5 A Bi-Directional DC/DC Power Electronic Converter for an Energy Storage Device in An Autonomous Power System
   Y. Hu, J. Tatler, North East Wales Institute of Higher Education, UK; Z. Chen, Aalborg University, DENMARK

2.6 A novel ZVS Dual Bridge DC/DC Converter Using Sic Schottky Diode ............................................ 177
   Junshan Lou, Ma Luo, Min Chen, Dehong Xu, Zhejiang University, CHINA

2.7 Circuit Topology and Control Strategies of DC-DC Power Module for the Future 42V ......................... 181
   Automotive PowerNet
   J. Hu, Infineon Technologies Asia Pacific Pte Ltd, SINGAPORE;
   J. von Bloh, R. W. De Doncker, Aachen University of Technology, GERMANY;
   N. Ott, DaimlerChrysler AG, GERMANY

2.8 A Novel Nonlinear Control Strategy for PWM DC-DC Converter with Optimizing Transient.............. 187
   Response
   Wei Wang, Jihong Zhang, Dianguo Xu, Harbin Institute of Technology, CHINA;
   Guoliang Zhao, Harbin Engineering University, CHINA

2.9 A New Design Strategy for the Monolithic Buck Converters ...................................................... 192
   Li Geng, Qinghua Li, Zhibiao Shao, Xi'an Jiaotong University, CHINA

2.10 About the Distinctive Characteristics of DC-DC Switch-Mode Converters under Discontinuous Conduction Mode
   Tung-Hai Chin, Motomu Nakano, Sophia University, JAPAN

2.11 Implementation of Digital Increment Mode PI Algorithm in Bidirectional DC/DC Converter .......... 201
   Lijun Hang, Wenxi Yao, Zhengyu Lu, Zhaoming Qian, Zhejiang University, CHINA

Active Power Filters

3.1 Detecting and Close-loop Control Methods for Selective-Harmonic-Compensation Active .................. 206
   Power Filter
   Hao Wang, Chao Zhang, Geng Yang, Jihong Du, Tsinghua University, CHINA
3.2 A New Hybrid Power Filter Using Multi-Level Inverters ........................................ 210
Yoon-Ho Kim, Soo-Hong Kim, Kang-Hee Lee, Chung-Ang University, KOREA

3.3 High-Capacity Hybrid Power Filter for Harmonic Suppression and Reactive Compensation in the Power Substation
Lina Wang, Tsinghua University, CHINA; An Luo, Central South University, CHINA

3.4 A Robust Deadbeat Current Control Method By Using Adaptive Line Enhancer for Single-Phase Voltage Source Active Power Filter
Katsumi Nishida, M Rukonuzzaman, Tarek Ahmed and Mutuo Nakaoka, Yamaguchi University, JAPAN

3.5 State Optimizing Vector Control Strategy for Active Power Filter .......................... 227
Guohong Zeng, Rongtai Hao, Beijing Jiaotong University, CHINA

3.6 Topology Study of the Active Power Filter for Balanced Electrified Railway Power Supply System .......................... 232
Guohong Zeng, Rongtai Hao, Beijing Jiaotong University, CHINA

3.7 An Active Method for Suppressing Harmonic Current of Power Capacitor ....................... 237
Jinn-Chang Wu, Kun Shan University of Technology, Taiwan, CHINA;
Hung-Liahng Jou, Kuen-Der Wu, Kaohsiung University of Applied Sciences, Taiwan, CHINA;
Yao-Jen Chang, UIS Abler Electronics Co.Ltd., Taiwan, CHINA

3.8 A Novel Series Hybrid Single-Phase Active Power Filter ...................................... 242
Dayi Li, Qiaofu Chen, Zhengchun Jia, Jianxing Ke, Yali Xiong, Huazhong University of Science and Technology, CHINA

3.9 A Novel Current Detection Algorithm with Predictor for Shunt Active Power Filters in Harmonic Elimination, Reactive Power Compensation and Three-phase Balancing Under Steady-State and Transient conditions
Hongyu Li, Fang Zhuo, Longhui Wu, Wanjun Lei, Zhaoaan Wang, Xi'an Jiaotong University, CHINA

3.10 Study on the Key-Problems for Digital Controlled Multiple Parallel Active Power Filter .................. 254
Wanjun Lei, Fang Zhuo, Hongyu Li, Zhaoaan Wang, Xi'an Jiaotong University, CHINA

Electric Machinery

4.1 Optimal Design for Cogging Torque Reduction of Transverse Flux Permanent Motor Using Particle Swarm Optimization Algorithm
G. Q. Bao, D. Zhang, J. H. Shi and J. Z. Jiang, Shanghai University, CHINA

4.2 Design and Performance of Switched Reluctance Motors ...................................... 264
J. Rizk, M. H. Nagrial, A. Hellany, University of Western Sydney, AUSTRALIA

4.3 Modeling and Simulation of Permanent Magnet Brushless DC Motor Allowing for Damping Windings
Guilin Tao, Zhiyun Ma, Libing Zhou, Shusang Hu, Huazhong University of Science and Technology, CHINA

4.4 The Study of Eddy Current in Rotor and Circuit Coupling Analysis for Small Size and Ultra-High Speed Motor
Keichi Shigematsu, Jun Oyama, Tsuyoshi Higuchi, Takashi Abe, Yasuhiro Ueno, Nagasaki University, JAPAN

4.5 The Research on Load Automatic Ratio Control Contactless Tap Changer Switch on Distributing Transformer
Yu-lin Zhao, Jia-hui Li, Shou-tian Dong, Yan-ling Lv, Jing Ni, Jing-ting Gao, Xiang-feng Xu, Engineering College of Northeast Agriculture University, CHINA

4.6 A New Type of Induction Machine with Inner and Outer Double Rotors ......................... 286
Fengge Zhang, Shenyang University of Technology, CHINA;
Nikolaus Neuberger, Eugen Nolle, Peter Gruenberger, Esslingen University of Applied Sciences, GERMANY;
Fengxiang Wang, Shenyang University of Technology, CHINA

4.7 Radial and Axial Force Calculation of BLDC Motor with Passive Magnetic Bearing .................. 290
Fengxiang Wang, Ji-qiang Wang, Zhiguo Kong, Fengge Zhang, Shenyang University of Technology, CHINA
Power Electronic Devices and Packaging

5.1 Are Traditional MOSFET Packages Suitable for the New Generation of DC-DC Converters ........................................ 316
Alan Elbanhawy, Fairchild Semiconductor, USA

5.2 Overload Capability and Dynamic Behaviour of Low and High Voltage IGBT and Ultra Fast Softswitching Diode
L. Lorenz, Infineon AG, GERMANY

5.3 A New Generation Emitter Turn-Off (ETO) Thyristor to Reduce Harmonics in the High Power PWM Voltage Source Converters
Bin Zhang, Alex Q. Huang, Bin Chen, Virginia Polytechnic Institute and State University, USA;
Yunfeng Liu, GE(CHINA) Research and Development Center Co., Ltd., CHINA

5.4 Fast Soft Reverse Recovery Diodes and Thyristors with Axial Lifetime Profile Created by Iridium Diffusion
Vitezslav Benda, Czech Technical University in Prague, CZECH REPUBLIC;
Martin Cernik, Development Department Polovodice, a.s. CZECH REPUBLIC

5.5 Characteristics Analysis of Transparent Anode GTO .......................................................... 338
Cailin Wang, Yong Gao, Tao An, Li Ma, Xi’an University of Technology, CHINA

5.6 A High Performance 4H-SiC Normally-off VJFET .............................................................................. 342
J. H. Zhao, K. Tone, K. Sheng, Rutgers University, USA;
X. Li, P. Alexandrov, L. Fursin, M. Weiner, United Silicon Carbide, Inc., USA;
T. Burke, U.S. Army TACOM, USA.

5.7 Analysis of Inductive Coupling Disturbances in Hybrid Integrated Power Electronic Module .......... 347
Xiangjun Zeng, Xu Yang, Zhaonan Wang, Xi’an Jiaotong University, CHINA

5.8 Power Electronics Building Blocks for Utility Power System Applications ................................................. 354
F. Wang, S. Rosado, T. Thacker, D. Boroyevich, Virginia Polytechnic Institute and State University, USA.

5.9 Design of Discrete Components Based Power Electronic Building Block ......................................................... 360
Wenjie Chen, Xu Yang, Shuanke Yang, Zhaonan Wang, Xi’an Jiaotong University, CHINA

5.10 An Integrated Power Switching Stage with Multi-chip Planar Interconnection Construction
Zhenxian Liang, J. D. Van Wyk, Fred C. Lee, D. Boroyevich, Virginia Polytechnic Institute and State University, USA.

5.11 Research on Power Electronic Integrated Module for SMPS ......................................................... 370
Qiaoliang Chen, Xiangjun Zeng, Xu Yang, Zhaonan Wang, Xi’an Jiaotong University, CHINA

Induction Motor Drives I

6.1 A New Torque Direct Control Scheme of Induction Machines and Its DSP-Based Implementation .......... 375
Jian Li, Huanggang Wang, Wenli Xu, Geng Yang, Yuexuan Dou, Tsinghua University, CHINA

6.2 Implementation of Sensorless DTC Technique for Speed Control of Induction Motor Using a Novel Switching Pattern
Mohammad Bagher Bannaee Sharifian, University of Tabriz, IRAN; Jawad Faiz, University of Tehran, IRAN
Poster Session I

7.1 Analysis of a Three-Phase Delta Connected Inductive Load Controlled by an AC Voltage Controllers
Hussein A. Kazem Alwaeli, Kadhim Noor Kadhim, Sohar University, OMAN;
Mehdi A. Abuazom, Faculty of Engineering, Libya

7.2 Balancing Compensation of Unbalanced Load Based on Single Phase STATCOM
Yongqiang Zhu, Wenhua Liu, Tsinghua University, CHINA

7.3 A Current Tracking Performance Optimization Control Approach in Three-Phase Three-Wire Active Power Filter
Wei-Ping Zhou, Zheng-Guo Wu, Li Xia, Xin-Guo Hou, Naval University of Engineering, CHINA

7.4 Based on Carrier Phase Shifted SPWM Current-Source Active Power Filter
Jian-Lin Li, Zhao-Shen Liu, Chun Li, Ping Lin, Zhong-Chao Zhang, Zhejiang University, CHINA

7.5 A Harmonic Current Detection Method Based on Digital Signal Processing Technology
Yi-Hong He, Jin-Jun Liu, Zhao-An Wang, Xi'an Jiaotong University, CHINA

7.6 A Current Source Active Power Filter with Minimum Requirement of Current Sensors
Huu-Phuc To, M. Faz Rahman, Colin Grantham, University of New South Wales, AUSTRALIA

7.7 Control and Topologies for Three-Phase Three-Level Active Power Filters
Taotao Jin, Jun Wen, Keyue Smedley, University of California, USA

7.8 Use Hamming Window for Detection the Harmonic Current Based on Instantaneous Reactive Power Theory
Fang Zhuo, Xi'an Jiaotong University, CHINA;
San Shing Choi, Ching Chen, Nanyang Technological University, SINGAPORE;
Yi-Hong He, Zhao-An Wang, Xi'an Jiaotong University, CHINA

7.9 New Control Scheme for Series DC Active Power Filters Coupled by Transformers Applied to High Performance Magnet Power Supplies
Kuang Li, Guochun Xiao, Jin-Jun Liu, Zhao-An Wang, Xi'an Jiaotong University, CHINA
